The Games of Anatoly Karpov

Kevin J. O'Connell and Jimmy Adams
Anatoly Karpov, just 23 years old, is the most exciting prospect in world chess to emerge since Fischer and Tal. He has, like those two world champions, taken less than five years to make the transition from promising junior to world championship candidate.

In December 1973 Karpov was awarded the chess Oscar, well-merited by a string of successes throughout the year, in the course of which he lost but one game. Even then very few of the pundits were prepared to predict that Karpov would be the man to face Fischer in 1975, though most were agreed that he would meet Fischer in 1978 and that by then he, and he alone, might be able to wrest away the title and take it back to the Soviet Union.

This book contains 347 games, most of them annotated, played by the second-highest rated player in the world. The games show the progress a player must make to rise from talented junior to world championship challenger.

Kevin J. O'Connell, Batsford's assistant chess editor, is co-editor of The Games of Robert J. Fischer.

James B. Adams is a well-known club player and contributor to chess magazines.

Preface

In the short period December 1971 to December 1973 Anatoly Karpov grew in stature and reputation from a strong grandmaster to come to be regarded, throughout the world, as the Soviet Union's real hope to wrest the World Championship title from Robert Fischer.

This book gives all the games (347) to which we have had access, and chronicles Karpov's development to the point of his semi-final Candidates' match.

In this volume we have attempted to incorporate several improvements on its predecessor (The Games of Robert J. Fischer): (a) many more games have been annotated; almost every game has some notes, and about half of them are deeply annotated. (b) surveys of most of the tournaments are given at the beginning of each chapter. (c) a concise list of biographical details has been included (p. xiii). (d) the index of openings is very detailed and includes Karpov's results with each opening variation. (e) an index of annotators and sources.

KJO'C, JBA
London, February 1974
Acknowledgements

We wish to thank the following:

Anatoly Karpov for checking, at Bath, the details of his tournament and match record
Charles de Villiers for assistance in the annotation of games
Mike Wills for translation of much material from Russian sources
M. Blaine for translation from *Magyar Sakkelet*
R. G. Wade for the use of his library
Peter Markland for the loan (in perpetuity) of his bulletins of Graz
Alan Perkins for his help in tracing two games from Graz which did not appear in the bulletins

Sources of annotations will be found acknowledged in some detail in the index, but here we would like especially to acknowledge and thank: Tony Gillam and *The Chess Player* B. H. Wood and *Chess*, Brian Reilly and the *British Chess Magazine*, *Chess Life and Review*, and, of course, all the Russian chess newspapers and magazines without which this book would be far less complete than it is.
Foreword

'Fischer got the title . . . I don't see why, in another six years, Karpov should be in a different position.'

Dr Mikhail Botvinnik, Skopje 1972

There is a lot of propaganda about you as a challenger to Fischer. Does that bother you?

'I don't think about it. I hope to play Fischer in three or four years.'

Anatoly Karpov, San Antonio 1972

1 EARLY YEARS

In 1965 Karpov, at thirteen, was the youngest player in the AllUnion Schoolboys and, at fourteen, had his first game published in *Shakhmatny Bulletin*. In the same year he also played in the 9th Spartakiad of Schoolboys at Harkov – on board three for the RSFSR, he won the board prize jointly with D. Kudishevič. In 1966 Anatoly played in a candidate master v. master event at Leningrad, and as a result of his excellent score he was awarded the master title. He thus became the youngest master in the Soviet Union. Also in 1966 he played in the All Union Schoolboys’ event in January, in which he placed 5th–6th equal, the USSR Junior Team Championship in July, and a junior team match, USSR-Scandinavia, in Stockholm 27–28 August, scoring 1½/2 on board six against the Norwegian player Hatlebak.

Karpov’s international début was made at the end of 1966 under very strange circumstances. The Soviet Chess Federation received an invitation to send two players to an international junior tournament. The choice fell on Anatoly and Viktor Kupreichik. When Karpov and his companion arrived in Czechoslovakia it turned out that an error had been made – the tournament turned out to be not at all for juniors, but for adults. There was nothing to be done, willy nilly it was necessary to include the two youngsters in the tournament. The result was stunning; Karpov took first place without losing a single game.

The results of this tournament, the annual new year event at Trinec, were: 1 Karpov 11, 2–3 Kupka and Kupreichik 9½, 4 Smejkal 8½, 5–6 E. Nowak and Sikora 8, 7 Augustin 7½, 8 Schoupal 5½, 9–11 Blatny, Kornasiewicz and Maroszczyk 5, 12 V. Nowak 3, 13 Rutka 1½. Asked about his results at Bath, Karpov recalled that he had drawn with Kupka, E. Nowak and Maroszczyk and thought that his other draw had been against Blatny. Unfortunately neither a complete tournament table nor any of the games were reported in *Ceskoslovensky Sach* nor, surprisingly, in the Soviet chess press.
In 1967 Karpov played in the USSR Junior Championship, the RSFSR Spartakiad, the USSR Junior Team Championship, and also a little-known match tournament to decide who would be the Soviet representative at the 1967 World Junior Championship in Jerusalem, but following the Six Day War, no more was heard of this. By the end of the year he was already well known inside the Soviet Union and was preparing for Groningen, the event which was to make him known to the rest of the world for the first time.

The games in this section do not provide a complete coverage of these years, but only the most interesting games were selected for publication in the Soviet chess magazines.

0101 K-Orekhov: USSR Armed Forces zonal 1965

French

1 P–Q4 P–K3

A useful move which keeps open possibilities of entering the Nimzo-Indian, Queen’s Indian, Dutch, Benoni, Queen’s Gambit Declined and French – or perhaps a stew containing two or more of these ingredients. It was at one time a great favourite with Keres who would answer 2 P–QB4 with his own 2 . . . B–N5+. Though he played this pet line against such giants as Alekhine, Capablanca, Euwe and Flohr, the Estonian grandmaster seldom included it in his repertoire after the war. An attempted revival in the Piatigorsky Cup, Los Angeles 1963, only resulted in a severe defeat at the hands of Miguel Najdorf. America also witnessed the downfall of an alternative idea, 2 . . . P–QB4, played in the last round at San Antonio 1972 in a game Portisch–Larsen – a victory which enabled the Hungarian grandmaster to share first prize with Karpov and Petrosian.

2 P–K4

It’s interesting that in the European Team Championship, Oberhausen 1961, Portisch, an exclusively QP player, also chose this move going over to a K-side opening against Tal. There was, however, a special reason for this in that Portisch himself was a regular user of the French defence and, after some analysis at home, could find no satisfactory antidote to the variant 1 P–K4 P–K3 2 P–Q4 P–Q4 3 N–Q2 N–KB3 4 P–K5 KN–Q2 5 P–KB4! He hoped that the ex-World Champion would show him the best procedure for Black, but alas the question remained unanswered as Tal went under to a K-side attack! The years have gone by and Portisch is still waiting: in the 1972 Olympiad the Swiss Junior World Champion, Hug, was also crushed after the same ill-fated invitation to a French.

2 . . . P–Q4

3 N–Q2

The invention of Dr Tarrasch which has the advantage over 3 N–QB3 of not allowing the pin 3 . . . B–N5 and of keeping the QBP free to advance to QB3 to support the centre after Black’s inevitable . . . P–QB4. The disadvantage is that the knight obstructs the QB thereby
delaying somewhat Q-side development. Though Karpov has also played 3 N–QB3 the game against Enevoldsen (2311) shows that this, at least, of his teenage preferences is still with him.

3 . . .

N–KB3

The principal alternative is 3 . . . P–QB4, which is the habitual choice of Korchnoi; it leads to active piece play and open lines as compensation for an isolated QP. Hübner, the most successful top board at the Skopje Olympiad, prefers the more closed positions arising from 3 . . . N–QB3 – the Guimard variation.

4 P–K5

KN–Q2

4 . . . N–N1!? has also been tried; White should continue his piece development with 5 B–Q3, and not play 5 P–KB4 when after 5 . . . P–KR4! Black is all set to ride his KN to the fine post at KB4.

5 B–Q3

P–QB4

6 P–QB3

N–QB3

7 N–K2

So that the two knights do not tread on each other’s toes; thus 7 . . . Q–N3 8 N–B3.

7 . . .

P–B3

Black begins an assault on e5. The alternative is 7 . . . Q–N3, hitting d4.

8 KP × P

Karpov’s tendency is to play the openings simply, avoiding theoretical arguments. The books recommend 8 N–KB4 Q–K2 and then 9 KP × P, but Karpov is a practical player not a chess library. 8 P–KB4 would be bad on account of 8 . . . QBP × P 9 BP × P P × P 10 QP × P (10 BP × P? N × QP!) 10 . . . B–B4.

8 . . .

N × BP

8 . . . Q × P 9 N–B3 P × P 10 P × P B–N5+ is a comfortable method of equalizing.

9 N–B3

Black’s intended liberation of his QB with . . . P–K4 must be continually watched.

9 . . .

B–Q3

10 0–0

0–0

11 N–N3

Karpov is unravelling his pieces with his eyes set on the K-side.

11 . . .

Q–B2

An immediate 11 . . . P–K4 leads to a double-edged position e.g. 12 P × KP N × P 13 N × N B × N 14 P–KB4 B–B2 15 P–B5 B × N 16 P × B N–K5 17 B × N P × B 18 Q–N3+ K–R1. An alternative 13 B–B5 B × B (13 . . . N × N + 14 Q × N N–K5 15 B × P + !) 14 N × B N × N + 15 Q × N N–K5 leads to nothing for White. In such circumstances White would have to play energetically, otherwise Black would just complete his development.

12 B–KN5

B–Q2

12 . . . P–K4 was still possible.

13 Q–N1

The more natural 13 Q–B2 would allow 13 . . . P–B5 and if 14 B × N BP × B. Now, however, 14 B × N and 15 B × P + is a threat.

13 . . .

P–KR3

14 B × N

R × B

15 N–R5

R–B2 (1)

15 . . . R3–B1 was also to be considered as after 16 B–R7+ K–R1 17 N × P is unsound because of 17 . . . B–QB1! and 16 N–R4 can be answered by 16 . . . B–K1. But Black prefers to have his rook protecting his KNP and, soon, his KP.
16 B–N6  
17 N–R4

Karpov is taking full advantage of the weaknesses in Black’s K-side; he now threatens 18 B–R7+ K–B2 (else 19 N–N6+ wins the exchange) 19 Q–N6+ K–B1 20 N×P R×N 21 Q–B6+ R–B2 22 Q–R8+ K–K2 23 N–N6 mate. Black therefore has no time for the quick snack of 17... B×P+ after which White would have, in addition to the above threat, the menace of 18 P–KN3 winning the bishop.

17... B–K1

18 P–KB4

From the start Karpov has made it clear that he is striking out for a K-side offensive, and this move prepares the entry of the KR, via KB3, into the theatre of war. This pawn move also holds up... P–K4 and shuts out the threat of... B×P+.

18... P×P

The price for the aforementioned privileges.

19 K–R1

Ruling out the possible check on move 20 which would force the exchange of queens.

19... P×P

20 P×P Q–Q2

Black fears 21 B×B R1×B 22 Q–KN6 R–KB1 23 QR–K1 Q–Q2 24 R–K3 with a tremendous attack, so he prepares to answer 21 B×B with 21... Q×B barring the white queen’s entry.

If 20... P–K4 21 B×B R1×B 22 Q–KN6 R–KB1 23 N–B5 wins.

21 Q–Q3

Preventing 21... P–K4 and freeing the QR for action.

21... B–KB2

Preparing... P–K4 again.

22 R–B3

More troops are coming to pummel Black’s K-side; 23 R–N3 would be mighty hard to meet, so a counter-action is vital...

22... P–K4

23 R–N3 B×B

If Black eats the poisoned pawn by 23... P×P he dies as follows 24 B×B+ R×B 25 R×P+ K–B1 (25... R×R 26 N–B6+) 26 N–N6+ K–K1 27 R–K1+.

24 Q×B R–KB1

Directed against 25 N–B6+ and 25 N–B5.

25 P–B5

Black can see the coming holocaust but cannot do anything about it.

25... P–K5

26 P–B6 R2–B2

27 N–B5 (2)

Though piling up on pawns is a frequent tactic of Karpov, he is unlikely to excel the absolute maximum treatment that he is now giving the KN. 

27... R×P
Snatching the white rook would lead to the following demonstration:

27 \( B \times R \) 28 \( N \times R P + K \times R 1 \) 29 \( N \times R + R \times N \) (29 \( Q \times N \) 30 \( P \times P \) + 30 \( P \times P + R \times P \) (30 \( K \times N 31 Q \times R 6 \) 31 Q \( R 6 + K \times N 1 \) (31 \( R \times R 2 32 Q \times B \) 32 N \( B 6 + \) 28 \( N \times R + \) R \( \times N \) 29 \( Q \times N P + \) Q \( \times Q \) 30 \( R \times Q + \) K \( \times R 1 \) 31 \( R \times Q 7 \) R \( \times N \) 32 \( R \times B \) After a forced series of moves Black finds himself with knight and pawn for rook, but his extra pawn cannot be maintained, so Black stakes all on his passed KP which could be a tricky customer \ldots 32 \ldots \) P \( - K 6 \) 33 \( R \times K 6 \) Karpov did not have much appetite for Black’s KRP even though it was with check: 33 \( R \times R P + K \times N 2 \) 34 \( R \times K 6 N \times K 4 \) 35 \( R \times K 1 K \times B 2 \) 36 \( R \times Q 6 N \times Q 6 \) or 35 \( K \times N 1 K \times B 2 \) 36 \( R \times Q 6 N \times Q 6 \) again with the same result – problems for White. 33 \ldots \) N \( - K 4 \) 34 \( K - N 1 \) Stopping this embarrassing business of back rank mates. 34 \ldots \) K \( - N 2 \) 35 \( R \times K 1 \) K \( - B 2 \) If an immediate 35 \ldots \) N \( - B 5 \) then 36 \( R \times K 7 + K \times B 3 \) (36 \ldots \) R \( - B 2 \) 37 \( R \times R + K \times R \) and White easily wins the ending) 37 \( R \times N P N \times Q 7 \) 38 P \( - K 3 ! \) but not 38 \( R \times R P ? \) P \( - K 7 ! \) 36 \( R \times R P \) N \( - B 5 \) 37 \( R \times R 3 \) R \( - K 4 \) 38 \( R \times B 3 + \) K \( - K 3 \) 39 \( K \times R 1 \) A funny move, probably played to safely arrive at the time control. 39 \ldots \) R \( - K 5 \) 40 \( P \times K 3 \) K \( - K 4 \) 41 \( P \times N 4 \) The beginning of the final stage: White’s connected K-side pawns are decisive, and Karpov shows fine technique in cashing in on his assets. It is of interest to note that if Karpov’s king was still on N1 Black still could not make the combination 41 \ldots \) N \( - Q 7 \) 42 \( R 3 \times P N \times B 6 + 43 \) K \( - B 2 N \times R \) 44 R \( \times N \) since the K \( + P \) ending is won for White. 41 \ldots \) P \( - Q 5 \) 42 \( R \times B 5 + \) K \( - K 3 \) 43 \( P \times P \) R \( \times Q P \) 44 \( R \times B 8 \) P \( - N 4 \) 45 \( P \times N 5 \) R \( - Q 2 \) 46 \( K \times N 2 \) P \( - R 4 \) 47 \( P \times K R 4 \) P \( - N 5 \) 48 \( P \times N 6 \) P \( - R 5 \) 49 \( P \times R 5 \) With the black king cut off the going is easy. 49 \ldots \) R \( - Q 4 \) 50 \( P \times R 6 \) R \( \times N 4 + \) 51 \( K \times B 1 \) R \( \times P \) 52 \( P \times R 7 \) R \( - R 3 \) 53 \( P \times R 8 = Q \) R \( \times Q \) 54 \( R \times R \) P \( - N 6 \) 55 \( P \times P \) P \( \times P \) 56 \( K \times K 2 \) P \( - N 7 \) 57 \( R \times K 6 + \) K \( - Q 4 \) 58 \( R \times P \) Karpov has calculated exactly to the end. 58 \ldots \) N \( \times R \) 59 \( K \times N \) K \( - B 5 \) 60 \( K \times Q 2 \) K \( - N 6 \) 61 \( R \times Q N 1 \) K \( - R 7 \) 62 \( K \times B 2 \) 1-0 The first game Karpov had published in Shakhmatny Bulletin.

Each player played three games against each player of the other category. Karpov exceeded the master norm by two points.

0103 Grigory Ravinsky–AK:

Ruy Lopez
1 P-K4 P-K4

In his younger days Karpov always answered the KP this way. More recently he has added
the Sicilian to his repertoire.
2 N-KB3 N-QB3
3 B-N5 P-QR3
4 B-R4 N-B3
5 0-0 B-K2
6 Q-K2

This is the Worrall Attack, one-time favourite of Alekhine, Keres and Spassky. The idea is to protect
the KP with the queen, to allow the KR to back up the advance P-Q4 from Q1. The fact that two moves
are required for this means that
White’s Q-side development is very late getting started.

The only move ever likely to supersede the trustworthy 6 R-K1 is the Delayed Exchange Deferred
(6 B x N). This has been extensively analysed in a new book by the English
theoretician L. M. Pickett, who feels forced to conclude that ‘it is so strong
for White that the Closed Morphy
Defence has lost its viability’.

6 ... P-QN4

White threatened to win the KP;
e.g. if 6 ... 0-0? 7 B x N QP x B 8
N x P Q-Q5 9 N-KB3 Q x KP? 10
Q x Q N x Q 11 R-K1 wins a

7 B-N3 P-Q3

The alternative is 7 ... 0-0 8 P-B3
P-Q4 since if 9 P x P B-KN5! 10
P x N P-K5 gives Black a strong

8 P-B3

The only move ever likely to supersede the trustworthy 6 R-K1 is the Delayed Exchange Deferred
(6 B x N). This has been extensively analysed in a new book by the English
theoretician L. M. Pickett, who feels forced to conclude that ‘it is so strong
for White that the Closed Morphy
Defence has lost its viability’.

6 ... P-QN4

White threatened to win the KP;
e.g. if 6 ... 0-0? 7 B x N QP x B 8

Defence has lost its viability’.
B-N5! 9 P-B3 (9 P×P N-Q5) 9 ... 0-0! as after 10 P×P P×P 11 R×R Q×R 12 Q×P N-R2! Fine-Keres, AVRO 1938.

8 ... 0-0
9 R-Q1

An immediate 9 P-Q4 allows 9 ... B-N5 10 R-Q1 P×P 11 P×P P-Q4 12 P-K5 N-K5 with equal chances, but now if 9 ... B-N5 10 P-Q3! followed by P-KR3 leaves the bishop misplaced.

9 ... N-QR4
10 B-B2 P-B4
11 P-Q4 Q-B2

To defend the KP which is the strong point of Black’s rugged defence.

12 P-KR3

Black threatened 12 ... BP×P 13 P×P B-N5! 14 N-B3 P-N5, or 14 B-Q3 N-B3 with a powerful game in both cases.

12 ... R-K1

White’s queen was not only a liability because of the aforementioned bishop pin, but also now due to the masked attack by the black rook.

13 P×KP

By this exchange White puts a stop to any tactical opening up of the centre and leaves the black KR in a dead-end street. However, a better way of doing this was by 13 P-Q5 which would give better chances of a K-side attack. Anyway White could not have continued his development with 13 QN-Q2 because of 13 ... BP×P! and Black wins a pawn because of the unprotected bishop.

13 ... P×P
14 QN-Q2 R-Q1

Black has time in hand for this rook readjustment, which contributes to his observation of the d5 square; there have been many brilliant White wins in the Lopez based on a knight thrust at this weak point with a subsequent activation of the Spanish prelate should the knight be captured.

15 N-B1 R×R

This immediate exchange forces an awkward recapture by White, who really would like his other rook on Q1 – this problem dates back to his slow Q-side development.

16 Q×R P-B5

Making space for himself on the Q-side and at the same time cramping White on this wing.

17 B-N5

Continuing his mobilization and, in certain cases, intending B×N followed by N-K3-Q5.

17 ... B-K3

Again watching the d5 square.

18 Q-K2

White anticipates an attack on his queen by ... R-Q1. The variation 18 B×N B×B 19 N-K3 R-Q1 20 N-Q5 B×N 21 P×B Q-B4 22 B-K4 P-N3! followed by ... B-N2 and ... P-B4 loses for White.

18 ... N-N2

This knight is aiming to improve its status by taking up the attractive post at c5 – striking at White’s weak d3 square and keeping White’s Q-side under restraint. Anyway 19 P-QR4 was menaced, when 19 ... N-N2 is not playable because of 20 P×P.

19 N-N3

Perhaps White feared for the safety of his KP, or perhaps intended to crush his young opponent on the K-side, but really 19 N-K3 would have left open more options for the knight which now gets rather shut out of the game by Black’s next move.

19 ... P-N3
20 R-Q1 R-Q1

Black is quite happy to exchange,
thereby diminishing any attacking potential of his opponent.

21 \(R \times R\)  \(B \times R\)

22 \(Q-K3\) (4)

Welcoming the black knight to c5 when 23 \(N \times P\)! \(Q \times N\) 24 \(B-B4\) wins at least a pawn.

22 . . .  \(N-Q2\)

Further liquidation before proceeding with the Q-side offensive: because of his 16 . . . \(P-B5\) Black has room to dig himself in on this flank—the knights in particular have got it made in view of the semi-blocked pawn framework.

23 \(B \times B\)

An attempt to keep the bishop on the board with 23 \(B-R6\) could be met by 23 . . . \(P-B3\) stopping 24 \(N-N5\) and also giving added protection to the KP; then if, for example, 24 \(Q-R7\) \(N-N2-B4\) and if queens are exchanged Black’s Q-side attack comes in fast, and of course 25 \(Q-R8??\) \(N-N3\) wins the queen; finally the K-side thrust 24 \(P-KR4\) \(N-Q3\) 25 \(P-R5\) is not without its dangers e.g. after 25 . . . \(N-B2\) 26 \(P \times P\) \(P \times P\) 27 \(N-R4\) \(P-N4\) wins.

23 . . .  \(N \times B\)

23 . . . \(Q \times B\) 24 \(Q-R7\) \(N/Q2-B4\) 25 \(N \times P\) \(Q-Q7\) was also possible, but Karpov has his future well under control by a solid, steady improvement of his piece placement.

24 \(Q-R6\)

Ravinsky, on the other hand, still shows his enthusiasm for tactical niceties: he now intends 25 \(N-N5\) \(N-B1\) (25 . . . \(N-KB3\) 26 \(N-B5!\) \(P \times N\) \(Q \times N\) wins) 26 \(N-B5\) \(P-B3\) (26 . . . \(P \times N\) 27 \(P \times P\) \(B-Q4\) 28 \(P-B6\)) 27 \(N \times B\) \(N/B1 \times N\) 28 \(N-K3\) with 29 \(N-Q5\) to follow.

24 . . .  \(P-B3\)

Preventing 25 \(N-N5\) and preparing to drive away the queen with . . . \(N-B2\).

25 \(Q-K3\)

The queen leaves quietly.

25 . . .  \(P-QR4\)

Black has a real future on the Q-side, but White will come up against a brick wall on the K-wing.

26 \(P-KR4\)

If 26 \(P-QR3\) to stem the black pawns then 26 . . . \(Q-B4!\) 27 \(Q \times Q\) (27 \(Q-Q2\) \(N-B3\) and 28 . . . \(P-N5\)) 27 . . . \(N \times Q\) followed by 28 . . . \(N-B3\) and 29 . . . \(P-N5\).

26 . . .  \(P-N5\)

27 \(P-R5\)  \(K-N2\)

No entry!

28 \(B-Q1\)

Anticipating a possible . . .\(P-N6\).

28 . . .  \(N-B2\)

Karpov has mapped out in advance the best squares for his knights, and indeed every one of his men.

29 \(RP \times P\)  \(RP \times P\)

30 \(N-Q2\) (5)

Since his K-side ambitions are over White gets ready to meet the coming invasion.

30 . . .  \(N-B4\)

With the clever threat of 31 . . . \(N-Q6\) 32 \(P-N3\) \(BP \times P!\) 33 \(Q \times N\) \(P \times RP\) and the pawn queens. If 31 \(B-K2\) to stop the entry at d3 then 31 . . . \(N-R5\) is just as devastating.

31 \(P-N3\)  \(BP \times P\)

32 \(RP \times P\)
If 32 N×P N×N 33 B×N B×B 34 P×B P×P wins.

32 Q×N

A refinement which allows Black to recapture on b4 with the queen if necessary, so as to increase pressure on the weak QNP and occupy the weak squares with pieces.

33 N3–B1 N–Q3

With the mighty threat of 34 ... P×P 35 Q×P N–N4 36 Q–K3 N–Q5 with the QNP getting the full Karpov pile-up technique.

34 P–QB4 Q–B3

Preparing his next move with gain of time by the threat to the KP.

35 B–B2 P–R5

Otherwise 36 ... N×NP 37 N×N P×N 38 B×P P×BP.

36 B×P

37 N–KN3 B×B

37 B–B2

Not 37 ... N×RP? 38 Q–R7+ -- another Ravinsky trap.

38 P–R5 Q–N4

With the capture of the RP the win will be easy in view of Black’s tremendous passed pawn.

39 P–B4

Desperation - now Karpov finishes in style.

39 Q×P 40 P×P Q–R8+

41 K–B2

If 41 K–R2 Q×P 42 N–B3 then 42 ... N–B4! is a nice move.

41 Q×P

42 N–B3 Q–N7

43 Q×N P–N6

44 N–Q4 P×B

0–1

For if 45 Q×P Q×N+ or 45 N×P N–B5! winning a piece either way.

0108 D. Kudishevich–AK:

Ruy Lopez

This game was annotated by
Anatoly Karpov in 'Youth Lectures'
in the Latvian magazine Saks in
1970. The comments in quotes are
taken from that article.

‘... a stubborn, tense, it cannot be
said faultless, struggle developed. At
one moment it seemed that Black
was near to victory. He seized the
centre and gradually gave up his
pawns to the enemy. But there
followed White's own counter-stroke
and the struggle flared up with
renewed strength. Time-trouble
gradually approached (and this is a very
fearsome thing for a chessplayer –
avoid time-trouble!) and Black
again succeeded in seizing the initia-
tive. The white pieces found them-
selves in a tangle from which they
were unable to emerge.’

1 P–K4
2 N–KB3
3 B–N5
4 B–R4
5 0–0
6 R–K1
7 B–N3
8 P–B3
9 P–KR3
10 B–B2

A refreshing change from the usual
10... P–B4. This bishop move helps
to promote an early... P–Q4 in
many lines. The Soviet grandmaster
Lutikov achieved considerable suc-
cess with it in the sixties, but the 1967
Interzonal game Fischer–Stein put
the brakes on its chances of catching
on further.

11 P–Q4
11... P–B4 12 P–Q5 B–B1 13
QN–Q2 P–B5 14 N–B1 N–N2 15
P–KN4! gave White a lasting
initiative in Spassky–Olafsson, Moscow 1959.

‘In my remarks concerning . . . (Karpov–Zhelyandinov, game 1002) . . . I said that White often bases his play on the knight at QR5. Thus the idea of this variation consists in the redeployment of the knight away from its unfortunate position on a5. At the same time, Black hinders for a while the emergence of the white QN. It is now disadvantageous for White to play 12 QN–Q2 as Black replies 12 . . . N×N and gets rid of one of the most dangerous members of the Spanish inquisition.’

12 P–QN3

12 . . . N–N3

As in the Alekhine, a black knight has been given the run-around before settling down on QN3 — a square from which it is ready for any action that might arise in the centre.

13 QN–Q2

‘It is obvious that in the variation 13 P×P P×P 14 Q×Q QR×Q 15 N×P or 14 N×P Black wins back the pawn by the move . . . N×P and gets a good game.’

13 . . . N/B3–Q2

14 N–B1 P–QB4

15 P–Q5

‘Leads to very sharp play. A quieter continuation for White was 15 N–K3. Black accepts the challenge.’

This move is not so strong as when Spassky played it as Karpov soon demonstrates; 15 N–K3 P–N5 (to gain control over d4) 16 P×KP QP×P 17 P–B4! would have left White with a clear initiative.

15 . . . P–B4

Quite in the hypermodern tradition: White’s proud pawn centre is to be wiped out with blows from the flanks.

16 P×P

16 Q–K2 to prevent the demolition after 16 . . . P×P 17 B×P N–B3 18 P–B4 would have instead been answered by 16 . . . P–KB5! with strong K-side attacking potential, just like favourable King’s Indian positions: after preparation Black would advance his K-side pawns using White’s KR3 as a means for opening a file for an invasion of heavy artillery.

16 . . . B×P

Mission accomplished: soon black pawns will stand where white ones once stood. . . .

‘An inaccuracy. Better was 16 . . . N×P 17 P–B4 N–N5 with fully satisfactory play. But during the game I was afraid that White would be able, successfully, to organize a central blockade and therefore I did not want to allow P–QB4.’

17 P–QR4

Threatening 18 P–R5 B×N 19 Q×B winning a piece.

17 . . . B–QB3

18 N–K3

'A very original and interesting position arises. On the one hand Black has a pawn preponderance in the centre, on the other hand his K-side is somewhat weakened and White threatens, by the moves P-QB4, P-QR5 and N-Q5, to blockade the pawns and transform Black’s strength into a weakness. There is one defence to these plans.

18... P-K5
Not 18... P-Q4 at once because of 19 P-R5.
19 N-Q2
If 19 N-R2 then Black plays 19... P x P 20 P x P P-QR4! (to prevent the nagging P-QR5 and threaten ... P-Q4) 21 P-QB4 N-K4! when Black’s active pieces can hammer the weak white pawns.
19... P-Q4
Fulfilment of a prophecy made on move 16.
'At first sight it seems that Black has obtained an excellent position, but by some energetic moves, White shows that this is not quite so.'
20 P-R5 N-B1
21 P-QB4!
All part of the plan; the anti... P-Q5 move, 21 B-N2, would have been destroyed by 21... B-B3!
'A blow struck at the centre. It turned out that Black was in all one tempo short for fortifying his better pawn centre (. . . N-KB3). Now Black is thrown headlong into a whirlpool of complications.'
21... P-Q5
22 N-Q5
Like a human hand-grenade, the knight is thrown into the enemy camp to cut off fuel for the terrible twins. To back out now with 22 N-N4 would allow 22... P-R4 23 N-R2 P-Q6 24 B-N1 N-Q3 25 Q x P (25 P-B3 B-R5) 25... R x P 26 Q-Q1 (26 Q-N6 B-B3 27 R-R2 R-N4) 26... B-B3 27 R-R2 B-Q5 28 N-N4 Q-R5 with an overwhelming attack.

22...
23 P x B P-Q6
24 B-N1
'The black pawns are far extended and they greatly restrict the opposing pieces, but at the same time they are vulnerable to immense danger. The question arises — how are they to be defended. After 24... B-B3 25 R-R2 N-K4 26 N x P Q xQP 27 P-B4 the QP is lost. More complicated is the variation 24... N-B3 25 N x P N x N 26 R x N N-Q3 27 R-KN4 P-B5 28 P x P P x P 29 B-R2 R x P 30 B-R3 and now against 30... R xQP follows 31 R x BP! N x R 32 B x N ±. Having calculated these variations I decided to play the move... .'

24...
N-K4
White’s plan to win the KP was a success, but there is a hitch... .
25 N x P
If 25 R x P then 25... Q xQP 26 B-N2 B-B3 = ±.
25...
Q xQP
26 B-N2
The beginning of a second long combination by White — of course if Black is permitted... P-B5 without hindrance White has no chance against the connected passed pawns; 26 P-B4 is not possible because of 26... Q-Q5+ picking up the rook.
'An inaccuracy. It was better to play immediately 26 N-B3 Q-Q5 27 B-N2 B-B3 28 R-R2! with great advantage to White. Possibly my opponent did not see 28 R-R2! and therefore chose a different order of moves. Now I succeeded in evading this extremely unpleasant variation.'

26...
P-B5 (10)
27 N-B3
Here White had at his disposal the very interesting and seemingly very strong move 27 P×P! At the board I didn’t much like Black’s position, specifically because of this move. The following variations arise:
(b) 27 . . . N×P 28 B–B3 P–N5 29 P–B6! and wins.

‘Only at home, in calm surroundings, did I find the satisfactory continuation 27 . . . P×P 28 B–R2 N–Q3! (It is difficult to play such a move at the board because all the pieces in the centre are ‘hanging’). White cannot win a pawn after 29 N×N B×N 30 B×N B×B 31 Q–N4 QR–B1 32 B×P Q×B and against 29 N–B3 there is the reply 29 . . . Q–N2 with the threats . . . Q×B and . . . R×P.’

27 . . . Q–B4
28 N–R4

From here on comes an extended series of tactics, counter-tactics and counter-counter-tactics – a sequence which lasts for the next fourteen moves!

‘Better was to transpose into the variations given above, because against 28 N–K4 Black cannot play 28 . . . Q–B2 because of 29 P–B4.

After the text move Black seizes the initiative.’

28 . . . P×N

‘Who could have foreseen that this pawn would decide the outcome of the game.’

29 R×N Q–B2
30 P×BP B–B3

The point! 31 R–K2 is out.

31 Q×QP

The last of the brave trio of pawns is executed – but the three brothers did not die in vain. . . .

31 . . . R–N1

Diamond cut diamond. If 31 . . . B×R 32 Q–Q5+ Q–B2 33 B×B with some real headaches for Black. The move played eliminates the queen fork on d5 and, moreover, underlines the awkwardness of White’s piece placement.

32 Q–Q5+ K–R1
33 B–Q4

After 33 B–B3 Black could play the spectacular 33 . . . R–N4! as on 34 P×R Q×B or 34 Q–K4 R×R or 34 P–B5 B×R 35 B×B Q×BP 36 Q×Q R×Q White is always lost.

33 . . . N–K2
34 Q–K4

34 R×N Q×R 35 B–B2 KR–Q1 36 B×B Q×B wins and of course if 34 Q–B5 then simply 34 . . . Q×Q.

34 . . . N–B3

Threatening both rook and bishop.

35 R–B5 (II)

White is just about keeping his balance despite the treacherous situation. 35 P–B4 would have been defeated by 35 . . . N×B! 36 Q×N KR–Q1 37 Q–K4 R–Q8+ 38 K–R2 B×R 39 P×B P–R6! and the threat of . . . P–R7 wins at once.

35 . . . Q–R2

‘Having seized the initiative, Black accurately conducts this phase of the game. The white pieces mutually
try, but Black has the beautiful defence 37 ... R–N6!! when 38 B–Q2 Q–Q5! or 38 Q–B2 N–Q5! (not 38 ... Q × QBP 39 B × P+) 39 B × N (or 39 Q–Q2 R × B!) 39 ... Q × B 40 R × P R–N7 both win nicely.

36 ...
B × R
37 P–B6
Mate threat!

37 ...
P–N3
Not 37 ... P × P 38 R–R5!
38 R × N Q–Q2
39 B–B2 P–R6
No sense in losing the pawn now. 'A second queen is on the way, and not a single white piece can do anything about it.'

40 B–R6 R × P
41 R × R B × R
42 Q–B4
The last of the white tactics – a double attack.

42 ...
Q–Q1
0–1
A wonderful example of Karpov's tactical ability – he had an answer to everything!

**World Junior Qualifying Event**
May/June(?) 1967

This event was won by Andrei Lukin. Two preliminary groups were held with the first three in each progressing to the final. The result of Karpov's preliminary group: 1 L. Grigorian 5½/7; 2 Bokuchava 5; 3–4 Lukin and Timoshenko 4½; 5 Karpov 3½; 6–7 Dvoretsky and Vaganian 2; 8 Palatnik 1.

Karpov's victory over Lukin and loss to Timoshenko follow. He also defeated Vaganian and Palatnik, but scored only half a point from his games against Grigorian, Bokuchava and Dvoretsky.

**0109 Andrei Lukin–AK:**
Nimzo–Indian

1 P–Q4  N–KB3
2 P–QB4  P–K3
3 N–QB3  B–N5
4 B–N5

A move with which Spassky has had a good deal of success. It combats Black's basic strategy of controlling e4 by means of the pin on the knight. If Black breaks this pin by means of ... P–KR3 and ... P–KN4,
he will have severe K-side weaknesses to worry about instead.

4 . . . P–KR3
5 B–R4 P–B4

The standard treatment. Black takes advantage of the absence of White’s QB from the Q-side to launch a counter-offensive there.

6 P–Q5 B×N+

The main alternative to this move is to play 6 . . . P–QN4, gambling a pawn to gain the initiative in the centre after 7 QP×P BP×P 8 P×P with 8 . . . P–Q4. Karpov chooses a line more in keeping with his style. He makes the capture now because if 6 . . . P–Q3 first, White can play 7 R–B1 and then build up a strong centre without making any concessions in return; while if 6 . . . 0–0 then 7 P–Q6 will make life difficult for Black.

7 P×B P–Q3
8 P–B3

Both preparing P–K4 and providing a retreat for the bishop.

8 . . . 0–0
9 P–K4 R–K1

Black does best to maintain the central tension. After 9 . . . P–K4 White will simply castle and start an attack with P–B4.

10 B–Q3!

Lukin offers a pawn on the strength of the line 10 . . . P×P 11 BP×P P–KN4 12 B–N3 N×Q 13 N–K2! when 13 . . . N–K6 14 Q–Q2 N×P+ 15 K–B2 gives White a very strong attack, and any retreat of the knight allows White to regain the pawn (Q6) or go for a direct K-side attack which is also very promising . . .

10 . . . QN–Q2

But Karpov is not interested

11 P×P

A critical point. White decides to keep the black knight off e5 at the expense of a couple of tempi and his trusty pawn at Q5. However, Black can obtain very good play because he is well ahead in development. A sounder plan would have been simply to complete his development by 11 N–K2 and 12 0–0 before aiming for P–B4.

11 . . . P×P
12 P–B4 Q–B2?

While this is quite a good move on positional grounds, White’s over-ambitious play called for a more energetic counter, and this is to be found in 12 . . . P–QN4! If then 13 P×P Black continues 13 . . . P–B5! 14 B–QB2 (14 B×P? Q–B2 15 Q–K2 P–Q4+) and now 14 . . . Q–B2 gives plenty of play for the pawn, with the miscellaneous threats of . . . B–N2, . . . P–K4 and . . . P–Q4. White probably does best to decline the pawn, but the threat of 13 . . . P×P 14 B×P P–Q4 is very awkward to meet.

13 N–B3 P–QN4

Now White has time to consolidate in the centre.

14 B×N N×B
15 P–K5 QP×P
16 P×KP N–Q2
17 0–0

In deciding on 12 . . . Q–B2 Karpov may have overlooked that he cannot now capture on e5: 17 . . . N×P? 18 N×N Q×N 19 B–N6 winning material.

17 . . . B–N2
18 B–B2!

Again the weakness of Black’s K-side is used to provide an indirect defence for the KP. Now the idea is 18 . . . N×P? 19 N×N Q×N 20 Q–Q3 and wins, or 18 . . . B×N 19 Q×B and:

(b) 20 \( N \times P \) \( Q-K4 \) \( P-N3 \) 21 \( QR-K1 \) with a very strong attack
18 . . . \( P \times P \)
19 \( Q-K2 \) \( B-Q4 \)
Black wants to preserve this pawn and follow up with . . . \( Q-R4 \) counter-attacking the \( Q \)-side pawns.
20 \( QR-K1 \)
Now every white piece is in action and he is ready to start his attack.
20 . . . \( Q-R4 \) \((12)\)

21 \( N-N5! \) \( Q \times BP \)
He cannot play 21 . . . \( P \times N \) 22 \( Q-R5 \) \( N-B1 \) 23 \( R-B2 \) followed by \( R1-KB1 \) and a capture on \( f8 \).
22 \( B-R7+ \) \( K-R1 \)
23 \( B-N1 \)
White improves the position of his bishop so as to free the queen to go to \( KR5 \). Now if Black tries to exchange some rooks with 23 . . . \( R-KB1 \) White will win with 24 \( N-B7+ \) \( K-N1 \) 25 \( Q-R5 \) \( Q-Q7 \) 26 \( R-K2 \) \( Q-Q5+ \) 27 \( K-R1 \) when there is nothing to be done against the threat of 28 \( N \times P + P \times N \) 29 \( Q-N6 + \) mates.
23 . . . \( R-K2! \)
Black is now ready to meet 24 \( N-B7+ \) \( K-R1 \) 25 \( Q-R5 \) with 25 . . . \( R-KB1 \) when he has both rooks taking part in the defence.
24 \( Q-R5 \)
Apparently the strongest, with its threat of 25 \( Q-N6 \), but Black can still hold on.

24 . . . \( Q-Q5+ \)
25 \( K-R1 \) \( B \times P + \)
26 \( K \times B \) \( Q-Q7 + \)
27 \( K-R1 \) \( Q \times N \)
28 \( Q-B3 \)
Still the best, as it not only attacks the rook but also prepares to come in on the weakened diagonal leading to \( h7 \). However, Black finds himself three pawns up for the moment and can prepare to give up a rook for the bishop that has been making all the trouble.
28 . . . \( R-QN1 \)
29 \( Q-K4 \) \( P-N3! \)
First Karpov prepares a safe square for the king on \( g7 \). Since the ending would be lost for White after the exchange of queens he must allow Black to carry out his idea.
30 \( R-KN1 \)
If White tries 30 \( Q \times BP \) then 30 . . . \( R-N5 \) brings the rook into action so that it can be hoisted over to the \( K \)-side, and Black remains two pawns up.
30 . . . \( Q-B4 \)
31 \( Q-K3 \) \((13)\)
He cannot now take the \( BP \) because of 31 . . . \( Q-B6 + \) 32 \( R-N2 \) \( R-N7 \) when the initiative passes over completely to Black.

31 . . . \( R \times B \)
Black must now give up the exchange to avert the imminent
destruction of his K-side, but in so doing he breaks White’s attack and consolidates his own position, remaining with three scattered pawns as quite adequate compensation.

32 R × R

Not 32 Q × RP + ? R–R2 and Black wins.

32 . . . K–N2

White has no more attacking chances and must start worrying about his own exposed king as well about his weak KP.

33 QR–K1 R–B2

34 Q–K2

After 34 R/N1–B1 Q–R4 (not so clear is 34 . . . Q × R + 35 R × Q R × R + 36 K–N2 R–B4 37 Q–QR3) White’s remaining pieces will be tied to defending the KP and Black can expect to win in due course. But the text move makes it even easier for Black.

34 . . . Q–Q6

35 R–N3 Q–Q4 +

36 Q–KN2

White’s king is too exposed to allow him to keep the queens on, so he forces their exchange in the hope that Black’s pawn weaknesses will give him technical problems in the ending.

36 . . . Q × Q +

37 K × Q R–B4

38 R–QR3

Passive defence of the KP allows Black to prepare the advance of his king.

38 . . . N × P

39 R × P + K–B3

40 R–KB1 N–Q6

Threatening to exchange rooks and queen the BP.

41 R–R4 N–N7

42 R–R5 N–Q6

43 R–R4 K–K4

Black must give up a pawn to make progress.

44 R × P K–Q4

45 R–QB2 R–N4 +

Up to now Black has not exchanged rooks because to do so would have brought White’s king towards the BP, but now he decides to keep his rook on the board both to take part in threats against the white king, and to stop the QRP if necessary.

46 K–B3 K–Q5

47 P–KR4 R–K4

Cutting the king off again.

48 R–Q1 P–B5

49 P–R4 R–KB4 +

50 K–N3

Not 50 K–K2?? R–B7 mate.

50 . . . R–QR4

51 R–QR2 P–B6

52 R–KB1 N–B4

53 R–B4 + K–Q6

54 R–R3

Allowing a neat finish.

54 . . . R × P !

55 R–B3 +

Or 55 R4 × R N × R 56 R × N P–B7 leading to an ending which Black wins by simply allowing the White king to get to e5 before playing . . . P–N4 !

55 . . . K–Q7

And the pawn is immune because of the knight fork on e4. White tries one more trick.

56 R–B2 + K–Q8

57 R–B1 + K–B7

58 R–B1 + K–N7 !

0–1

0110 Gennady Timoshenko–AK:

Bishop’s Opening

(Hooper) or 10... B–KN5= Vinogradov–Rovner, Leningrad Ch 1956. Also 4... B–B4!? 5 Q×P N–KB3 6 N–B3 P–B3 The alternative is 6... N–B3 7 Q–R4 and now either 7... B–N5 or 7... B–K2 is alright for Black. 7 B–KN5 P–Q4 8 0–0 0 B–K2 9 KR–K1 9 Q–R4!? 9... B–K3 9... 0–0!? 10 Q–R4 B–K3 is roughly equal. 10 Q–R4 QN–Q2 11 B–Q3 P–B4? This is too weakening, though the alternatives are not very appetizing: 11... Q–R4±; 11... N–B4 12 N–Q4 N3–Q2!? (12... N–N1 13 B×B±) 13 B×B Q×B 14 Q×Q+ K×Q 15 P–B4± Neishtadt–Volkovich, Moscow Ch 1958. 12 N–K5 N×N 13 R×N P–Q5 14 P–B4 N–Q2 15... P×N? 15 B–N5+ N–Q2 (15... The teams in this event were composed of six boys and two girls.
Karpov played board two for RSFSR behind Gennady Timoschenko.
Seiran Chechelyan (board two for Georgia) had the absolute best result
with 8½/9 (there were four preliminary rounds), his only draw being against
Karpov.
None of Karpov’s games are available from this event.
The Preliminaries were held in the form of a single seven-round Swiss: 1 Jocha 5; 2-6 Hostalet, Karpov, Lewi, Ligterink, Timman 4½; 7-8 Zara, Moles 4; 9 Jacobsen 3½; 10 Boersma 3; 11-14 Dudek, Maeder, Schaufelberger, Tate 2½; 15-16 Fučák, Meuldners 2.

0201 AK–Heinz Schaufelberger: PR1: 27 December:

**Sicilian**

1 P–K4 P–QB4

2 N–QB3

As a teenager Karpov never made an extensive study of sharp and complicated opening variations like many youngsters do. He preferred to rely on solid systems, avoiding theoretical arguments. The Closed Sicilian was his favourite choice for many years, though today he confidently plays the usual 2 N–KB3 followed by 3 P–Q4.

2 . . . N–QB3

Throughout Sicilian history this move had been regarded as the natural answer, contributing as it does to restraint of P–Q4 by White. However, in the 1968 Candidates matches future World Champion Spassky had so incisively demolished both Geller and Larsen after their 2 . . . N–QB3 that Korchnoi decided he had better shop around for something else before his turn came; the result was a valuable contribution to theory after 2 . . . P–K3! – the 5th match game continuing 3 P–KN3 P–Q4 4 P×P P×P 5 B–N2 N–KB3 6 KN–K2 P–Q5 7 N–K4 N×N 8 B×N N–Q2! 9 P–Q3 N–B3 with an easy game. Such was the impact of Korchnoi’s idea that Spassky declined to use the Closed Sicilian at all in his title-winning match against Petrosian the following year.

3 P–KN3 P–KN3

4 B–N2 B–N2

More black power on d4.

5 P–Q3

Before Spassky it was Smyslov who was the publicity agent for the Closed Sicilian, and it was he who introduced the strong innovation 5 P–Q3 P–K3 6 B–K3 N–Q5 7 N3–
K2! for if 7 . . . N x N 8 N x N B x P 9 R-QN1 Q-R4 + 10 B-Q2 Q x P 11 R x B! Q x R 12 B-QB3 wins. After White’s fifth move Black must take counter-measures against the intended sequence of B-K3, Q-Q2 N-Q1 P-QB3, N-K2 and, at last P-Q4.

5 . . . P-Q3
6 KN-K2

Spassky’s successful system was 6 P-B4 followed by 7 N-B3 and 8 0-0, a line which brought Geller down three times in the match – all to K-side assaults in which the white pieces and pawns co-operated well in storming the black fortress.

6 . . . Q-Q2

Black has in mind a very interesting mode of development; in the 1954 world title match, Botvinnik chose 6 . . . P-K4 which to this day is still regarded as a powerful equalizer.

7 B-K3 P-N3
8 P-B4 B-N2

Now the idea is clear – Black intends to castle long to sidestep the fury of a K-side offensive.

9 0-0

It is interesting to note that an almost identical position (with the white KN on f3 instead of e2) occurred in the game Bernstein–Fischer, Netanya 1968. Interesting because that game was played a few months later – possibly Fischer had seen this game and decided that he could pick up some tips from Schaufelberger on how to combat the Closed Sicilian.

9 . . . N-Q5

In his position Fischer continued with 9 . . . P-B4! and after 10 Q-Q2 N-B3 11 K-R1 0-0 0-12 QR-K1 K-N1 13 B-N1? P x P 14 P x P B-QR3 had a won position already; it does seem that the Swiss champion should have adopted the same move – an example of the need for clairvoyancy in chess . . .

10 Q-Q2 P-KR4

11 P-KR3

To answer 11 . . . P-R5 with 12 P-KN4 P-B4 13 NP x P P x P 14 B-B2! as in the game.

11 . . . P-B4

Aiming once again for . . . P-R5 now that P-KN4 is not possible.

12 B-B2

A dual purpose move:
(a) to discourage 12 . . . P-R5 when 13 NP x P! and Black must lose time to recover the pawn e.g. 13 . . . N x N + (if 13 . . . B-KB3 at once then 14 N x N! with the same formula as in the game) 14 Q x N B-KB3 15 Q-K1 ÷
(b) to threaten 13 N x N, which if played at once would lose a piece after 13 . . . P x N.

12 . . . 0-0-0

Better was 12 . . . N x N + 13 Q x N and only then 13 . . . 0-0-0-0, though White still keeps the initiative with 14 P-QR4.

13 N x N! B x N

Black realizes that he must swap the dark squared bishops as after 13 . . . P x N 14 N-K2 P-K4 15 P-B3 QP x P 16 N x P N-K2 17 P-QR4! White serves up a tremendous Q-side attack in which White’s QB plays a leading role.

14 B x B P x B
15 N-K2 P-K4 (16)

Karpov has gone out of his way to help Black build up a pawn centre – so that he can bring it tumbling down!

16 P-B3!

Now Black has real problems e.g. if 16 . . . QP x P 17 Q x P + Q-QB2 (17 . . . K-N1 18 BP x P) 18 QR-B1 Q x Q 19 R x Q + K-N1 20 KP x P
NP × P 21 P × P P × P 22 R × P winning, or 16 ... Q–N2 17 QBP × P KP × QP 18 Q–N4 and the QP is lost.

16 ... P–R5

True to his lively style Schaufelberger tries an enterprising counter.

17 QBP × P RP × P

If 17 ... KP × QP 18 N × P RP × P 19 Q–B3+ K–N1 (19 ... Q–QB2 20 Q × Q + K × Q 21 N–K6+) 20 N–B6+ wins the exchange.

18 QP × P N–K2

The best defence, threatening 19 ... QP × P 20 Q–B3+ N–B3!, for if 18 ... QP × P 19 Q–B3+ Q–QB2 20 QR–B1 Q × Q 21 R × Q + K–N1 22 KP × QP R × QP 23 N × P or 19 ... N–B3 20 P–Q4! both leave White set for victory.

19 Q–B3+ K–N1

19 ... Q–B2 20 QR–B1 Q × Q 21 R × Q + K–N1 22 KP × QP R × QP 23 N × P or 19 ... N–B3 20 P–Q4! both leave White set for victory.

20 N × P

20 KP × BP? would be a big mistake e.g. 20 ... N × P 21 P–Q4 B × B 22 K × B N–K6+ 23 Q × N Q × P + 24 K–N1 Q–R7 mate.

20 ... BP × P

20 ... R–QB1 allows 21 Q–Q4!

21 QP × P P–Q4

If 21 ... P × P 22 Q × P +.

22 QR–Q1

22 P × P B × P! 23 QR–Q1 Q–K3 gives Black dangerous counter-chances against White’s weakened K-side.

22 ... P–Q5

23 Q–Q2 (17) R × P?

B-N5 19 P-B3 B-KR4 20 R-R2 K-R1 (25)

Karpov proceeds first to trap a piece in characteristic style: 21 P-N4 B-KN3 22 P-B4 N×P The best chance, as 22 ... N-Q2 23 P-B5 is hopeless. 23 Q×N P-B4 Black's idea consists in maintaining his passed QP. 24 P×P B/N3×P 25 Q-B3 QR-Q1 26 N-B3 Q-B3 27 R-KN2! Karpov is already preparing a counter-attack: of course 27 ... Q×N now loses to 28 B-N2. 27 ... Q-Q5+ 28 K-R1 R-B3 29 B-Q2

Blocking the dangerous passed pawn and protecting the knight. 29 ... R-KR3 Now it looks like Black is getting some real play with a threatened entry on KR6 but Karpov makes a nice combination which spins the attack round to him! 30 Q-B2! R×B 31 R-K1! Threatening a back rank mate which cannot be stopped by 31 ... R-Q1 because of 32 Q×Q or 31 ... B-K3 32 Q×Q R×Q 33 P-B5 or 31 ... K-N1 32 Q×Q R×Q 33 R-K7 - so Black tried 31 ... R-K3 BUT now there follows a forcing sequence of moves which ends in catastrophe for Black. 32 N×R Q×N 33 R×R B×R 34 K-N1 34 ... B-R6 was menaced, so White breaks the pin on his rook. 34 ... Q-N6 To stop 35 B-B3, exploiting the weak g7 square: this was the essence of Karpov's plan, started on move 30, and he plays on this theme until Black is battered into submission. 35 Q-K1! Renewing the threat. 35 ... K-N1 To answer 36 B-B3 with 36 ... P-KN3. 36 P-B5! B-B2 37 B-R6 P-KN3 38 Q-R1! The climax of Karpov's exquisite queen manoeuvre begun with 30 Q-B2. 38 ... B-K4 39 Q×B Q-Q8+ 40 K-B2 Q-B7+ 41 K-N3 1-0 A nice lesson in how to convert material advantage into attack.

Nimzo-Indian

1 P-QN4 N-KB3 2 P-QB4 P-K3 3 N-QB3 B-N5 4 P-K3 0-0 5 Q-B2 P-B4 6 P-QR3 B×N+ 7 Q×B N-B3 8 B-Q3? 8 P×P is the right course. 8 ... P×P 9 P×P P-Q4 10 N-K2 P×P 11 B×BP (26)

When it comes to punishing an opponent for leaving his king in the centre, Karpov can be really violent. It is hard to believe that White's resignation is forced after only seven more moves, yet such is the impact of Karpov's play that this is exactly what happens.

11 ... P-K4!

Immediately underlining White's backward development, for if 12
P × P N–K5! 13 Q–K3 Q–R4+ 14 N–B3 N × N 15 P × N N × P.
12 B–K3

Protecting the QP.
12 . . . N–K5
13 Q–N3 Q–R4+
14 K–B1

As 14 N–B3 allows 14 . . . P × P White’s king is now very definitely held in the centre for good.
14 . . . N × QP
15 N × N P × N
16 P–B3

Not 16 B × QP N–Q7+ winning the queen.
16 . . . P × B
17 P × N Q–Q7!
0–1

It is a forced win for Black after 18 B–K2 B–N5! 19 R–K1 QR–B1 20 Q–Q1 R–B8! 21 Q × R B × B + 22 K–N1 B–B6!

Winning this tournament is the only recorded achievement of Karpov's year at Moscow University. During the summer vacation he transferred to the Faculty of Economics, University of Leningrad.

The tournament was played over a period of several months. At one stage Karpov scored six straight wins.

0401 AK–Gik:

Sicilian

1 P–K4 P–QB4 2 N–KB3 P–Q3 3 P–Q4 P×P 4 N×P N–KB3 5 N–QB3 P–KN3 6 B–K3 B–N2 7 P–B3 0–0 8 B–QB4 N–B3 9 Q–Q2 Q–R4 10 0–0 B–Q2 11 P–KR4 N–K4 12 B–N3 KR–B1 13 P–R5 N×RP 14 K–N1 was played in Spassky–Stein, RSFSR–Ukraine 1967, when Black obtained counterplay with the exchange sacrifice 14 ... R×N 15 Q×R Q×Q 16 P×Q R–QB1 17 K–N2 P–R4. In the last Student Team Tournament in Austria (Ybbs) the German (West German – eds) players succeeded in strengthening White's play and the variation has again gained attention. So White doesn't have to waste a tempo with his king ... 14 B–R6 B×B

14 ... N–Q6+ brings about an extremely sharp situation: 15 K–N1 N×P (not 15 ... B×N 16 N–Q5!) 16 K×N B×B 17 Q×B and now:

(a) 17 ... Q×N+? 18 K–N1 P–R4 19 R–Q3 Q–N5 20 P–R3 Q–N3 21

(b) 17 ... R×N (variously given!!, ! or ?!) 18 P–N4 N–B3 19 P–K5!

R×B+ 20 RP×P R×P 21 N–K2
15 Q×B R×N 16 P×R Q×BP?
R–QB1! 17 N–K2!± (33)

R×N Q–R8+ 19 K–Q2 Q×R 20
P–N4 N–N6 21 Q×Q N×Q 22
K–K3! and the knight is caught.
18 P–N4 N–KB3 19 P–N5 N–R4
Here I was about to play 20 N–N3,
but noticed that after 20 . . . B–N5!
White's queen is shut out of play. If
21 N–B5 then there follows 21 . . .
B×N 22 P×B Q–K6+ 23 K–N1
Q–B5 and there is no continuation of
the attack in sight. 20 R×N! The
only way forward! 20 . . . P×R 21
R–R1 Q–K6+ 22 K–N1 Q×BP
Clearly not 22 . . . Q×N because of
23 Q×P/R5 and mate is inevitable.
23 R×P P–K3 23 . . . Q×P does not
work on account of 24 P–N6! when
the brave pawn comes under four
threats but remains inviolate! Pos-
sibly better chances of salvation are
to be found in 23 . . . N–N3 24
Q×P + K–B1 25 R–R6 P–K3 26
R×N P×R 27 Q×B Q×N. 24 P–
N6! N×P Forced as on 24 . . .
BP×P 25 Q×RP + K–B1 26 Q–
R8+ K–K2 27 R–R7+ N–B2 28
Q×R Q×N 29 Q×NP±± 25
Q×P + K–B1 (34)

26 R–B5! This blow was not
expected by my opponent. 26 . . .
P×R is not possible in the face of
mate, so Black gives up the queen for
rook and bishop. 26 . . . Q×B + 27
RP×Q P×R 28 N–B4 R–Q1 If
28 . . . N×N then, of course, 29 Q–
R8+ and 30 Q×R. 29 Q–R6 +
K–K1 30 N×N P×N 31 Q×P +
K–K2 32 Q–N5 + K–K1 33 P×P
R–B1 34 Q–N8 + K–K2 35 Q–N7 +
K–Q1 36 P–B6 1–0

\(1-\frac{1}{2}\) White draws by perpetual
check after 64 R-KB7 + K-K1 (not
64 . . . K-N1 65 N-K7 + K-R1 66
R-R7 mate) 65 R-K7 +.
0404 AK–Pronin:
Franco–Sicilian

1 P–K4 P–K3
2 P–Q4 P–QB4

The Franco–Sicilian as Gunderam labels it in Neue Eröffnungswegwe. Indeed in his book there are many black successes to illustrate how recommendable this variation really is. As in the opening to Karpov–Orekhov (0101), transpositional possibilities are ever-present.

3 P–Q5

Gaining ground in the centre and definitely giving the game a QP flavour.

3 . . . P × P
4 P × P P–Q3

Setting up the Benoni pawn formation.

5 N–KB3

After 5 P–QB4 Black can fianchetto his KB and develop his KN to e7 with possibilities of going to f5 and d4 – a manoeuvre seen in Petrosian’s games.

5 . . . P–QR3

(a) development of pieces;
(b) piece pressure on White’s temporarily isolated QP;
(c) occupation of, and later ex-
change of heavy pieces on, the open K-file;
(d) use of the free squares e5, e4, f6 and f5 for manoeuvring;
(e) eventual Q-side attack with . . .
b5 when White’s pawns will be weakened because of the need:
(e1) to support the isolani at d5 and
(e2) to stop an invasion of black pieces on the numerous empty squares in and around White’s centre.

In the 1950’s the Hungarian grandmaster Barcza also used to get the position after White’s sixth move e.g. Filip–Barcza, Sofia 1957, which continued 6 . . . B–N5 7 B–K2 B × N 8 B × B B–K2 9 0–0 0–0 10 B–B4 QN–Q2 11 R–K1 N–K1 12 B–K2 P–QR3 13 P–QR4 B–N4 14 B–N3 B–B3 15 B–B1 B–K4 16 B × B N × B 17 P–R5 N–KB3 when Black’s strategy of becoming master of the dark squares was realized.

It is amusing to see the 1970 Lugano tournament bulletin in which the very knowledgeable editor (the late Mr Kühnle-Woods, manager of Chess Express) headed the first round game Unzicker–Larsen a Benoni. That game was naturally Larsen’s pet line, and the great Dane lost no time in gently reminding the editor that the opening was not a Benoni but a Barcza–Larsen defence. A correction duly appeared in the second round bulletin to this effect! What gives this variation its own character is its non-fianchetto of the KB which is standard practice in the Modern Benoni.

this game has an affinity with Filip-Barcza above, while Larsen’s approach is quite different: ‘Si duo faciunt idem non est idem’ – Cicero.

6 P-QR4
To restrain 6 ... P-QN4.
6 ... B-N5
The Barcza half of the defence.
7 B-K2 B x N
Black exchanges at once, consistent with his plan of getting on to e5.
8 B x B P-QN3
To answer 9 P-R5 with 9 ... P-QN4, but being rather casual about getting his pieces moved off the first rank.

9 0-0 B-K2
10 N-Q2!
Following the recipe of Gligorić, who got to c4 via a3.
10 ... N-Q2
11 R-K1
Setting a devilish trap and just willing the black knight to e5.

11 ... N-K4 (37)
The alternative 11 ... KN-B3 12 N-B4 0-0 13 B-B4 N-K1 14 Q-K2 B-B3 15 R-R3! P-QN4 16 N x P N x N 17 B x N R-K1 (17 ... B x P 18 R-K3!) 18 R-K3 R x R 19 Q x R with a winning position is an example of the difficulties Black finds himself in. However, the move played is nicely dealt with by Karpov.

A beautiful sacrifice which makes the absolute maximum of the natural resources in the position.

12 ... P x R
13 P-Q6
The start of something big – this pawn goes down in a blaze of glory to open not only the bishop’s diagonal but also the file for the queen.

13 ... B x P
13 ... R-B1 14 P x B Q x P 15 N-B4 or 13 ... R-R2 14 B-B6+ are clearly good for White.

14 B-B6+
This zwischenschach puts out any ideas Black may have had of castling.

14 ... K-B1
14 ... K-K2 would have enabled Karpov to show how rich in possibilities this deceptively simple position is e.g. 15 B x R Q x B 16 N-B4 Q-B3 17 Q-K2! and then:

(a) 17 ... K-B3 18 P-QN3! N-K2 19 B-N2 N-N3 20 P-B4! R-K1 (20 ... N x P 21 B x P+) 21 P x P + N x P 22 R-KB1 + ;
(b) 17 ... K-K3 18 Q-N4+ K-B3 19 Q-N5+ K-K3 20 Q x NP;
(c) 17 ... P-B3 18 P-B4 and:

(c1) 18 ... Q-Q4 19 N x NP Q-Q5+ 20 K-R1 N-R3 21 P-B3 winning the queen in mid-board.
(c2) 18 ... K-K3 19 P x P B x P 20 B-B4 Q-B2 21 R-K1.

In every case the exposed black king, left in the centre because of Black’s slow development, is the cause of the trouble.

15 B x R Q x B
16 N-B4 B-B2
Forced, to cover the QNP, but now White gets ready to soften up the QBP.

17 B-K3!
Preparing his next move.

17 ... N-K2
17...Q-B3 is nicely met by 18 P-R5! P-QN4 19 N×P B×N 20 Q-Q8+ Q-K1 21 B×P+ N-K2 22 B×N+.

18 P-R5!

Black has already been severely punished for his time consuming and weakening eighth move which resulted in:
(a) a weakening of the h1-a8 diagonal;
(b) a retarded development with his king stuck in the centre; – and now we have
(c) the break up and destruction of the weakened Q-side pawn chain.

18...
P×P

If 18...P-QN4 (18...Q-B3 19 P×P B×P 20 R×P wins at once) 19 N×N6! B×N (19...Q-B3 20 B×P K-K1 – not 20...Q×B?? 21 N-Q7+ – still leaves Black helpless) 20 P×B P-B3 21 Q-Q7 K-B2 22 B×P R-K1 (or if here 22...Q-Q1 23 R-Q1 Q×Q 24 R×Q R-K1 25 R×N+! and the QNP is decisive) 23 P-N7 Q-N1 24 R×P with 25 R-R8 to follow.

19 B×P Q-B3?

A blunder, overlooking White's tactical reply, though Black is lost anyway as the following lines show:
(a) 19...Q-B1 20 Q-Q5! K-K1 21 N-Q6+ B×N 22 Q×B N-B3 23 R×P!;
(b) 19...Q-K1 20 Q-B3! K-N1 21 Q-N7 Q-B3 22 N×RP! Q×Q (22...B×N 23 Q×N) 23 N×Q N-N3 24 R×P and the connected passed pawns are too strong.

20 N×KP!

For if 20...Q×B 21 N-Q7+, or 20...B×N 21 Q-Q8+ Q-K1 22 B×N+ and it's time to put the pieces back in their starting positions.

20...

Q-K1

21 Q-Q4 (38)

Protecting his knight which was now threatened, and preparing the entry of the white rook.

21...
P-R4

If 21...B×N 22 Q×B and 23 R-K1 wins straightaway, but 21...K-N1 was the best defence. Perhaps Black played his 21...P-R4 to prepare 22...K-N1 since he may have feared the possibility of 21...K-N1 22 N-Q7 N-B3 23 N-B6+ P×N 24 Q-KN4 mate!, but really Black can easily stop this fantasy and White would continue in sober fashion with 22 B-N6! then:
(a) 22 N-B3 23 N×N Q×N 24 R-K1 P-R3 (24...B×B 25 Q×B1) 25 B×B Q×B 26 R-K8+ K-R2 27 Q-K4+ P-N3 28 R-K7;
(b) 22...B-N1 23 Q-Q7 K-B1 (23...Q×Q 24 N×Q and the Q-side pawns fall) 24 R-Q1 B×N (24...Q×Q 25 N×Q+ wins the bishop) 25 Q×Q+ K×Q 26 R-Q8 mate.
(c) 22...B×B 23 Q×B and again the doubled pawns will be wiped out.

22 R-K1 1-0

Setting up a double pin – if now 22...K-N1 23 N-N6! P×N 24 R×N Q-KB1 25 R×B wins comfortably. A beautifully economical miniature.

The other games from this event are, regrettably, unavailable.
Karpov played for the Armed Forces team which came second with 72½/110 behind ‘Burevestnik’ (Students) with 78. The composition of teams was of ten players, in board order 6 seniors, 1 junior, 2 women and 1 girl. The Armed Forces team was: Geller, Vasyukov, Liberzon, Lein, Lutikov, Karpov; Gusev; Bilunova, Skegina; Sivamskaya. Reserve: Gufeld.

Karpov, then, received the considerable honour of playing on one of the senior boards (he was still, of course, a junior at this time) with a fully fledged international grandmaster as reserve, ready to deputize should young Anatoly be indisposed!

Karpov’s result of 10/11 was the absolute best result of the event.

Alekhnine

0504 Nisman-AK:
R4 v. Trud:

Nimzo-Indian

1 P-QB4 N-KB3

Later Karppov showed a marked preference for the line 1 ... P-QB4 2 N-KB3 N-KB3 3 N-QB3 (or 3 P-KN3) 3 ... P-Q4 - a relatively underexposed variation with which he can be well satisfied resultwise, his most illustrious victim being Viktor Korchnoi in the Alekhine Memorial 1971.

2 N-QB3 P-K3

3 P-Q4

Allowing Black to go into a Nimzo-Indian. Also possible was 3 N-B3 B-N5 4 Q-N3 P-B4 5 P-QR3
B-R4 6 P-K3 0-0 7 B-K2 P-Q4 8 0-0 N-B3 9 N-QR4! Q-K2 10 Q-B2! N-Q2 11 P-Q4! Karpov–Timman, Groningen 1967–8, with a superior position for White. If White instead tries to sidestep the Nimzo–Indian by 3 P-K4 then 3... P-B4 equalizes easily.

3... B-N5

The Nimzo–Indian – an uncompromising set-up which secures a rapid piece development whilst restraining White in the centre. Though Botvinnik once said it is doubtful whether there is a refutation, in practice such super-grandmasters as Portisch and Gligorić handle the white side of it so skilfully as to win the vast majority of these games.

Anyway such a sound defence is well suited to Karpov’s style and, indeed, he was never one for gambling on sharper systems like the Modern Benoni or King’s Indian – the Queen’s Gambit Declined yes!

4 P-QR3

The oldest living grandmaster, Sämisch, introduced this line to the chessworld some 50 years ago and it bears his name to this day: the names of so many opening variations provide an everlasting memorial to chess giants of yesteryear – the sculptors of modern day chess.

4... B×N+

5 P×B

With this recapture White adds more support to his centre and this, in conjunction with his two bishops, can be converted into attacking power in the centre and on the K-side. Every advantage has a disadvantage, and the doubled QBPs can be shown up as weak and an object of counterattack.

5... P-B4

Whilst making his first strike at the centre, Black blockades and immobilizes the QBPs.

6 P-K3

The main alternative is 6 P-B3 planning to build a concrete pawn centre with 7 P-K4; Black can then play 6... P-Q4 7 BP×P N×P with a piece attack on the white centre, or else continue 6... P-Q3 7 P-K4 0-0 8 B-Q3 N-B3 9 N-K2 P-QN3 10 B-K3 B-R3 11 N-N3 N-QR4 12 Q-K2 P×P 13 P×P R-B1 14 R-QB1 Q-K1 15 0-0 Q-R5 as in Polugayevsky–Karpov, Moscow Blitz 1972.

6... N-B3

An elastic move since this knight can either aid a central pawn advance with... P-Q3 and... P-K4, or else attack the leading doubled pawn from a5.

7 N-K2

Here, rather than to B3, as the knight is heading for KN3 whence it can observe the key c4 square.

7... P-QN3

This is the way the QB gets to see daylight.

8 N-N3 B-R3

An aggressive development which initiates the attack on c4, but one which is not without risk...

9 B-Q3?

This is a mistake that should lose a pawn. The critical variation is 9 P-K4 0-0 (9... P-Q3? 10 Q-R4 wins; 9... N-QR4 10 P-K5 N-N1 11 N-K4+! 10 B-N5 P-R3 11 P-KR4! P×P 12 P×P P×B 13 P×P P-N3 (the h5 square must be kept from the white queen) 14 P-K5! N-R2 15 Q-N4! N×NP 16 N-K4 K-N2 (16... N×N? 17 Q-R3) 17 N×N R-R1 18 R×R Q×R 19 R–Q1 with a dangerous attack.

9... N-QR4

10 Q-K2 P-Q3?

10... P×P 11 BP×P R-QB1
wins the QBP straight off. It seems that neither player was acquainted with the intricacies of this variation!

11 B–N2 Q–Q2

Intending to occupy a4 to increase the pressure on c4. Now 11 ... P x P 12 BP x P R–QB1 13 R–QB1 holds the pawn.

12 P–K4 0–0–0!

If 12 ... Q–R5 13 P–K5 QP x P 14 P x KP N–Q2 15 N–K4! and White has all the chances.

13 P–QR4

Stopping 13 ... Q–R5. Not now 13 P–K5? QP x P 14 P x KP Q x B.

13 ... P–R4!

14 0–0?

14 P–R4 was the only move, but then Black can proceed with 14 ... P–K4 15 P–B3 (to stop 15 ... Q–N5) 15 ... P–N3! with ... N–N1, ... P–B3, ... Q–KN2, ... N–K2, ... QR–N1 and ... P–KN4 to follow. There really isn’t much White can do about this K-side onslaught – he is in too much of a bind. But after the move played it’s worse still.

14 ... P–R5

15 N–R1

What a disgrace.

15 ... P–K4 (42)

Preparing to take control of f4 and also opening the bombbay doors for the black queen to blast the enemy king’s fortress if necessary.

16 P–B4

Blocking the centre with 16 P–Q5 allows Black to display his attacking talent to the full e.g. 16 ... N–R4! 17 P–N3 (to stop ... N–B5 followed by ... N x B and capture of the QBP; while if 17 B–B1 N–QN6 followed by ... N x B and ... N–B5) 17 ... Q–R6 18 B–B1 P–B3! 19 B–Q2 (Or 19 P–N4 N–QN6 20 R–N1 N x B and 21 ... N–B5, but not 19 ... N–B5? 20 B x N P x B 21 P–B3! and 22 N–B2 winning the queen!) 19 ... P–KN4 20 B–K1 QR–N1 21 R–R2 K–N1! 22 R–N2 B–B1! 23 R–R2 (Or 23 P–B3 N–B5 24 P x N NP x P + 25 N–N3 RP x N and 26 ... P–N7 winning) 23 ... N–B5! 24 P x N NP x P + 25 N–N3 Q x P!! 26 K x Q RP x N + 27 K–N2 P x P + 28 K x P R–R7 + 29 K–B3 B–N5 mate!

White not only has the K-side attack to worry about, but also the eternal problem of defending c4. White’s text move prevents Black’s plan of ... N–R4–B5 at the cost of the exchange.

16 ... N–R4

17 BP x P

17 B–B1 N–QN6 18 R–R3 N x B 19 R x N N x P or 17 P–N3 RP x P 18 RP x P Q–R6 19 Q–N2 (19 R–B3 N x KBP!) 19 ... Q x Q + 20 K x Q B x P! both lose for White.

17 ... QP x P

18 P–Q5 N–B5

19 R x N

Forced, otherwise 19 ... N x B and White’s position falls apart at the seams.

19 ... P x R

20 P–K5

This position is what White wanted, but though it looks impressive Nisman is in for a disappointment.

20 ... P–R6
Gaining a few more inches to work in.

21 P–N4

21 . . . K–N1

Preferring to stop the threat by tucking away his king rather than by transposing into the previous note by capturing en passant.

22 B–B1 (43)

22 . . . B×P!

23 B×B

23 . . . N×B

24 Q×N

24 . . . Q×NP+

25 N–N3

If 25 K–B2 Q–N7+

25 . . . R–R5!

Not, of course, 25 . . . P×N?? – there are ranks as well as files in chess.

26 Q×KBP

The best of three evils, the others being: 26 B×P P–KN4! and 26 Q–Q3 P×N 27 Q×P Q–K7! both of which are killing.

26 . . . Q×Q

27 B×Q R×B

28 R–Q1

Protecting d5 but since the QRP is now lost White could quietly resign.

28 . . . P–N3

To play 29 . . . R×RP without allowing 30 N–B5.

29 R–Q2

If 29 P–R5 then simply 29 . . . P×P! and Black has a distant passed pawn with the white king shut right out of the game.

29 . . . R×RP 30 K–B2 Now at least the king can be centralized.

40 R–N3 K×P 41 R×NP R–KB5

42 K–N3 P–B5 + 43 K–R3 R–B6 44 K–N2 P–N5 45 P×P P×P 46 R–N4 K–Q4 0–1

33 ... B×P 34 K×B Q–N4 ≠ 35 K–
B1 N×B 36 Q–K4 Q–N3 37 Q–B3
0–1 (time)
The attempt to create something on the back rank with 43 ... R-R8 suffers a fiasco after 44 B x P R x R + 45 K x R and White wins easily.

All the same Black had an interesting possibility of creating counterplay with 43 ... R-R6! immediately attacking the vulnerable base of the white pawn chain.

If White draws the queen off on defence duty with 44 Q-Q2 then Black immediately activates his game by means of 44 ... Q-N2! threatening to seize the initiative.

The main variation occurs after 44 Q x P + Q x Q 45 R x Q B-Q2! (The first tactical nicety. 45 ... R x P is not so clear on account of 46 K-B2!) 46 R-R6+ (Enticing the enemy king on to g8 or g7 where it will come under fire from White's knight.) 46 ... K-N1 47 R x QP R x P 48 N x P R-B8 49 N-B6+ K-B2!

An interesting tactical moment. In case of 49 ... K-N2 50 N x B R x B + 51 K-B2 P-B6 52 N x N P-B7 the natural 53 N-Q3? is not good on account of the unexpected combinational counter-stroke 53 ... R-Q7+ and it becomes clear that White loses after 54 K-K1 R x N as there is no defence against the threat of ... R-Q8 + and ... P-B8 = Q. All the same this line is inadequate for Black. Instead of 53 N-Q3? White plays 53 R-QB6! P-B8 = Q 54 R x Q R x R 55 K-K3 and the ending is lost for Black.

50 N x B R x B + 51 K-B2 K-K2! (All this is forced. The analysis, belonging to grandmasters Geller and Furman, is correct.) 52 R-K6 + K x N (51)

53 K-K2!! (Already White has to urgently think about his own salvation. 53 R x N is bad because of 53 ... P-B6! and the pawn queens.)
53 \ldots R-Q5 54 R \times N P-B6 55 P-Q6 etc draws.

44 Q \times P Q \times Q 45 R \times Q R-R8 46 R-B1 R-B8 47 N-K2! The start of the winning knight manoeuvre, gaining a tempo on its journey to f5.

47 \ldots R-R8 48 N-Q4 K-N1 49 N-B5! R-R3 50 K-B2 And now the king successfully enters the action.

50 \ldots B-N3 51 K-K3 B \times N 52 P \times B R-R7 53 K-Q4 R-R8 54 B-K2! R-R7 55 B \times RP White already has a winning advantage. Black is defenceless against the advance of the KBP. 55 \ldots R-R7 56 R-B4 R-Q7+ 57 K-K4 R-Q6 58 P-B6 R \times BP 59 K-B5! An instructive moment in the realization of his advantage. The white king penetrates into Black’s position and takes an active part in the decisive attack.

59 \ldots R-K6 60 R-B1 N-Q2 61 R-KN1+ K-B1 62 R-QR1 R-K4+ 63 K-N6 R-K1 64 R-R7 R-Q1 65 R-B7! Indispensable accuracy. Karpov deprives his opponent of any hope of counterplay based on advancing his QBK. 65 \ldots K-N1 66 K-N5 K-R1 67 B-N6 K-N1 68 P-R5 K-R1 69 P-R6 P-B6 70 R \times P R-KB1 71 P-B7 1-0

(b) 45 ... R–Q6 46 Q–K5! Q–N2 47 Q–K8+ Q–B1 48 R–R8+ and White wins.

0606 Rafael Vaganian–AK: G3:

Nimzo–Indian

A similar position arose in one of the games of the 1968 Candidates match between Korchnoi and Tal, in which White had developed his KB not on K2 but on Q3. Tal played 9 ... N–N3 and after 10 N–K2 P–QR4 11 P×P N/N3–Q2 12 P–QR3 N×P 13 B×P+ White had the better position.
9... B x N
Black parts with the bishop, but in exchange secures control of the square e4 with gain of tempo. In the event of 10 P x B P=B5 the position takes on a closed character and White’s two bishops cannot generate activity.

If Black, by analogy with the Korchnoi–Tal game, continues with 9... N=N3 then 10 N=N1 P=QR4 11 P=QR3 P=B5 12 Q=B2 B=Q3 13 N=B3 would have given White some advantage in connection with the weakening of his opponent’s Q-flank.

10 Q x B N=K5
11 Q=B2 P=QN3
12 P x P

After 12 P=QN3 B=N2 13 B=N2 R=B1 this move would have been forced.

12... P x P
13 P=QN3 B=N2
14 B=N2 R=B1
15 KR=Q1

A superficial move. 15 N=Q2, to exchange the active black knight and giving more room for the bishops, is stronger. If 15... P=B4 then there could have followed 16 P=B3 Q=N4 (as Karpov intended to play) 17 P=B4 with the better game for White.

An unfortunate move. White does not think about the initiative, but prepares, by means of P=KN3 and N=KN2, to set up a defensive barrier on the K-side with the aim of holding up the advance of the KBP. Karpov skilfully exposes the disadvantages of this plan.

The logical continuation was 17 P=QN4. After 17... P x P 18 Q=R4 Black would have been obliged to go over entirely to defence. The extra pawn does not play a significant role, and what is more it is impossible to keep it. For example 18... N2=B4 19 Q x RP R=R1 20 Q=N6 R x P 21 Q x P N x P 22 B=Q4, or 18... P=QR3 19 P=QR3.

Seemingly Black was compelled to reply 17... P=B5 against which 18 B=Q4 gives White quite good chances.

17... Q=R5
18 P=N3 Q=R3
19 N=N2 K=R1!

Creating the threat 20... P=Q5. If then 21 P x P there follows 21... P x P 22 Q=Q3 N=BP 23 K x N Q x P 24 R=KN1 (24 B=B3 K=N4) 24... N=K4 25 Q x QP N=N5 + 26 K=B1 R x R + 27 B x R Q x P (threat 28... N=R7 mate) 28 B x N P x B + 29 N=B4 B=R3 + wins.

20 Q=Q3 QR=K1

Because White no longer has the move B=N5 Karpov develops the rook on to the K-file, again threatening the move 21... P=Q5. On 22 P x P there comes 22... N=BP 23 K x N Q x P 24 R=KN1 (or 24 B=KB3) 24... P=KB5! with a winning attack.

In the event of 21 B=KB3 Black continues just the same with 21... P=Q5 22 P x P B=R3 23 Q=B2 (or 23 Q=B3) 23... N=N4 =.

In order to liquidate the attack White should play 21 P=B4, aband-
oning the square e4 to the opposing knight, but Vaganian decides against this and prefers the following weakening of position which leads to bankruptcy.

21 P–B3 N–N4 (58)

22 N–B4

Black's task would have been more difficult after 22 P–KR4. As the variations given below show, Black must still win: 22 ... N–R6 + 23 K–B1 P–Q5 24 P×P (24 P–B4 Q–QB3) 24 ... P–KB5.

If 25 QP×P there follows 25 ... P×P and on 26 Q×N B×P is decisive. If instead 26 P–B6 B×P 27 R×B Q×R 28 Q×N then 28 ... R×P + 29 K–K1 R×B + 30 K×R Q–K5 + and mates.

In the event of 25 P–Q5 P×P and White again cannot hold the position.

22 ... P–Q5

13 . . .    P–K5!

14 N–Q2    R–K1 (59)

Black’s clever idea is that if now 15 P–KN4 Q–R5! 16 P×B P×P leaves White in a jam e.g. 17 N–N3 P–B5 18 B–Q2 P–B6 19 B×BP P×B 20 Q×P N×BP with a winning position.

(b) 17 P×B B–K4+ and then:

15 N–N3

Covering d4 and somewhat relieving the congestion.

15 . . .    P–Q4!

16 P×P

16 P–B5 would only leave Black’s centre intact and consolidated. 16 N×QP transposes into the game continuation after 16 . . . N×N 17 P×N N–N5.

16 . . .    N–N5!
Black wants to blockade the isolated QP with a knight, not with the queen which could easily be driven away.

17 Q-Q2 N5 x QP
17 . . . K-R2, safeguarding his KRP, was also quite playable, since 18 N x P N x RP!, but Vaganian is not noted for his lack of imagination and is always eager to sharpen the conflict at every available opportunity.

18 N-B5

Karpov does not care to try the free sample with 18 N x N N x N 19 B x P when 19 . . . P-K6! 20 B x P N x B 21 P x N B-R3 (21 . . . Q-N4 22 R-QB3 B x RP 23 B-B3! leads to nothing for Black) 22 R-QB3 R-QB1! 23 R-B3 B-K5 24 R-N3 Q-Q3 25 K-B2 P-B4! with . . . P-B5 to follow is very dangerous.

18 . . . N x B!

Thereby weakening both White's K-side and the dark squares.

19 P x N Q-N4

Using the threat of 20 . . . B x RP to gain time for some even more unpleasant tactics later.

20 K-R1

Not 20 K-R2 QR-Q1 21 R-QB2 B-K4 + 22 K-R1 Q-N6 23 R-B4 P-N4! winning.

20 . . . QR-Q1

The QP is now menaced owing to the unprotected state of the white queen.

21 R-QB2

Breaking the pin on his KP and foreseeing that the rook could be useful on the second row in defending his king.

21 . . . Q-N6
22 . . . B-K4 is the idea.

22 Q-B1

This time breaking the pin on the QP. Of course 22 Q-K1 loses a pawn, and then another pawn . . .

22 . . . N-Q4!
23 N x N

If 23 N-Q1 to protect the KP then 23 . . . N-N5 24 R-QB4 B x RP! 25 P x B Q x RP + 26 K-N1 Q-N6 + 27 K-R1 R-Q4 28 N-B2 R-N4! 29 B-N4 R1-K4!! 30 P x R B x P and it's all over.

23 . . . R x N

Now the rook is in position to assist in wrapping up the game with 24 . . . B x RP 25 P x B Q x RP + 26 K-N1 R-N4 + 27 K-B2 Q-N6 mate.

24 B-N5

Clearing the way for White's QR to stop the mate, 24 B-Q1 does not exactly serve the same purpose as 24 . . . B x RP! 25 P x B Q x RP + 26 R-R2 Q x R/B8 mate.

24 B-B4 was another try but 24 . . . R x N! 25 B x P + (If 25 P x R B-K4 26 K-N1 Q-R7 + 27 K-B2 B-N6 + 28 K-K2 Q x NP + 29 K-Q1 Q x P and Black will prove that his pawns and bishops are too much for the white heavy brigade.) 25 . . . K x B 26 R x R B-KB1! 27 R-B7 + K-K2 28 Q-B4 + K-N2 and the everlasting . . . B-Q3 motif makes Black the winner again.

24 . . . R-QB1

Itching to play 25 . . . P-N3.

25 B-R4

25 B-B4 still goes down to 25 . . . R x N 26 B x P + K x B 27 R x R R x R 28 Q x R Q x KP! with the bishops and the KP this time battering White to defeat. So the refugee KB wanders to a4 to save its skin.

25 . . . P-N3! (60)

A good move – falling into a trap!

26 N x P

Neither 26 B-N3 R x N! nor 26 N-R6 R x R 27 B x R B x RP was preferable.

26 . . . B x N!

A case of the trapper being
trapped – Black allows his rook to be captured with check, but he has calculated right to the end.

27 R×R+ K-R2
28 R–QB2

Stopping the threatened disaster on g2 e.g. 28 R–N1 Q×RP mate, or 28 Q–Q2 Q×RP+ 29 K–N1 Q×R with a bishop bonus.

28 ... R–KR4
29 K–N1 R×P
30 R×P

30 ... Q–R7+ 31 K–B1 Q–R8+ 32 K–K2 Q×P+ 33 R–B2 If 33 K–K1 R–R8+ mates. 33 ... Q–N5+ 34 K–Q2 R–R8 All this was forced, and so will Karpov’s resignation very shortly since his queen is lost. 35 Q×R Or 35 R–B1 Q–N7+ 36 K–B3 and 36 ... Q×R/B8 decides. 35 ... B×Q 36 B–N3 B–B6 37 B–K6 Q×B 38 R×B P–KN4 39 Q–QB7 K–N3 40 R×P P–N5 41 R–B1 P–R4 42 R–R6 P–N6 43 P–R4 B–R3 44 R–B3 P–R5 0–1 A game of some interest!

0608 Rafael Vaganian–AK: G5:
Nimzo-Indian

0609 AK–Rafael Vaganian: G6:
Alekhine
1 P–K4 N–KB3 2 P–K5 N–Q4 3 P–Q4 P–Q3 4 N–KB3 P–KN3 5 P–B4 N–N3 6 P×P BP×P 7 P–KR3 His customary choice since faring badly, though he eventually drew, with 7 B–K2 B–N2 8 0–0 0–0 9 P–QN3 N–B3 10 B–N2 B–N5. 7 . . . B–N2 8 B–K2 0–0 9 N–B3 N–B3 10 0–0 B–B4 11 B–B4 (62)

The idea behind Karpov’s move is to maintain central tension for as long as possible, and thus limit Black’s ability to inaugurate counterplay.

This section contains games from three separate events: a match between junior teams of the USSR and Yugoslavia, the 'Red Armies' team tournament in Warsaw, and the USSR Armed Forces Team Championship.

The first two games are from the USSR-Yugoslavia match for juniors, played during April in Moscow. In the other two games from this event, Karpov, on board three, scored a win and a draw.

The third game is the only game that Karpov played in the 'Red Armies' team tournament in Warsaw, May 1969. Karpov was reserve for the Soviet team of Geller, Lutikov, Gufeld and Savon. The event was won by the USSR with 11\(\frac{1}{2}\)/12 (it was Gufeld who let the team down!) ahead of Poland 6, Czechoslovakia 4, and Cuba 2\(\frac{1}{2}\).

The other three games are from the USSR Armed Forces Team Championship which took place at Leningrad in June(?). Karpov won the board prize for second board (Furman played on board one) ahead of three masters and four candidate masters. The event was won by Karpov's team: Leningrad.

The Official USSR ranking list appeared on the 1st of March 1969. This listed the top ten juniors: 1 Balashov, 2 Belyavsky, 3 Vaganian, 4 Karpov etc.

Also there was a lightning tournament, entitled by the tournament book 'The Unofficial World Junior Championship in Lightning Chess!':

Preliminary Group 2: Karpov 5/5, Vujačić 4, Torre, 3, Ogaard 2, Bellon 1, Seret 0.

Final A: Adorjan 10½/11, Karpov 9, Andersson 7½, Kaplan 7, Ligterink 6, Torre 6, Vujačić 5½, Neckar, 5½ Hug 4½, Diaz 3, Meulders 1, Weber ½.

We Have Waited 14 Years For This Day

A discussion with GM Semyon Furman, trainer of A. Karpov. This article appeared in Shakhmatisti Rossii October 1969.

I became acquainted with Anatoly Karpov at the end of last year on the eve of the USSR Team Championship. The army chess
players were taking part in a training conference in which Anatoly, representing the team on the first junior board, took part.

A lean, pale-faced youth, in appearance somewhat phlegmatic. It even seemed that it was with difficulty he moved the chess pieces. Was it possible that such a one was capable of the highest sporting achievements?

When Eduard Gufeld caught sight of Anatoly for the first time he said 'this little boy will never be a grandmaster, he is too thin'.

To which Efim Geller, standing beside him, remarked, not without irony, 'Well, of course everyone judges by his own standards, you, for example, Edik became a grandmaster when your weight reached 100 kilogrammes'.

Nature did not endow Anatoly Karpov with a gigantic frame, but it conferred upon him a rare chess talent and strength of will, and also modesty and a love of hard work.

When I began to concern myself with Karpov I immediately understood that this was a very able chess player with great prospects. And I was not mistaken. In the USSR Team Championship Anatoly scored 10/11, conceding to all his young adversaries only two half points.

From this moment I, as trainer of the army chess players, took charge of Anatoly, and now I have been helping him prepare for competitions for almost a year.

In order to win the right to take part in the World Junior Championship, Anatoly had to show his superiority over two other candidates; Rafael Vaganian and Misha Steinberg. This match-tournament of the young chess players took place in the spring of last year in Leningrad and ended in a convincing victory for Karpov.

We regard the World Junior Championship very seriously. Anatoly realized his great responsibility on behalf of millions of Soviet chessplayers. Fourteen years have passed since the time that Boris Spassky for the first (and last) time won for our country the title of World Junior Champion. It is time, it was already time long ago, for this title to return to the country of the chess champions.

The preparations for the World Championship consisted of various aspects. Most of all it is very important for every chessplayer to know himself; this is not so easy, especially at a youthful age. During work with Karpov we succeeded in bringing to light
the strong and weak sides of his game and in completely assessing his capabilities. Thus, for example, it transpired that Anatoly is somewhat at odds with the theory of the openings, but this circumstance even pleased me. This problem was easy to settle and we liquidated this fairly rapidly. It is true that Karpov's opening repertoire remained somewhat limited, but we did not try to broaden it. At that moment our main task consisted of achieving success in a concrete tournament and I endeavoured to deepen Karpov's knowledge of specific opening systems.

The natural feature of Karpov's chess talent delighted me; a fine positional sense. That is a special intuition which always characterized the great chessplayers. I also paid attention to Karpov's masterly conduct of endgames and overall accuracy of technique.

But how to take the most logical advantage of these strong sides of Karpov's chess talent in the forthcoming tournament?

On studying the games of Karpov's future opponents I formed the impression that the foreign juniors were in general good tacticians but weak strategists. As a rule they searched for a suitable moment to deliver a tactical blow, and rarely concerned themselves with the game as a strategic whole. Therefore we decided that Karpov would choose those openings which would not give his opponents opportunities to sharpen the game without retribution. Running in advance I remark that this line of attack proved the most expedient and completely justified itself.

It was also necessary to pay attention to Anatoly's physical preparation. Daily morning gymnastics were prescribed for him. During the training period Anatoly often played badminton and table tennis and went boating. At first we relaxed near Moscow, at Bakovka, and then we moved to Zelenogorsk, near Leningrad, with its almost Scandinavian climate. This change of venue was very expedient because the Junior Championship would take place at Stockholm and it was essential for Anatoly to become acclimatized.

Were we confident of final success?

I must say frankly that I did not have 100% confidence in Karpov's victory. Firstly many Soviet juniors had returned from previous championships on the shield. Secondly I was not exceptionally well acquainted with the play of Anatoly's future opponents, indeed the final composition of the tournament only
became known on the eve of the first round. True, I knew Karpov’s strength extremely well, knew what he was capable of. But you know, everything is relative and is seen only in comparisons.

As for Anatoly himself, in general he knows his own strengths and limitations. It seems to me that before Stockholm his confidence in victory matched his strength (! – eds).

We arrived in Sweden several days before the start of the Championship in order to better to acclimatize to and acquaint ourselves with the conditions. We were shown the tournament hall, in which we had to pick our way through a forest of scaffolding and step-ladders. We were not even certain whether all the repair work would be finished before the opening of the tournament, but our fears proved to be groundless; the Swedes tried not to grieve us with troubles.

This place was received by the Stockholm Chess Federation from the municipal authorities very recently. The money for the repairs was given by chess patrons; it was even necessary to open a special fund. Now the chessplayers will have their own central club. It was fairly spacious for a club, but was most unsuitable for holding a major tournament, There was no big hall and in the oblong rooms where the Junior Championship took place it was very cramped, especially for the spectators (the converted building had been an ancient debtors’ prison – eds.). Our TsShK (Moscow Central Chess Club; formerly the house of the Tsarist Civil Governor of Moscow – eds.) certainly would have been more suitable and spacious, but by Swedish standards even the Stockholm club was good enough.

Of course for adults to play in such conditions would have been significantly tougher, but the youngsters did not complain. True, many of them were tired out towards the end of the tournament, but I think it was the strict tournament schedule which was to blame for this. Playing off the adjourned games took place in the mornings, and only one rest day in the whole month (20 days – eds) could not have helped anyone. The only consolation was the weather. The Swedes said that they could not remember such a good summer for a long time.

During our preparation for the Championship, we had calculated that Karpov’s chief rivals would be the Hungarian Adorjan, the Swede Andersson and the Scotsman McKay, but at the very last moment the Puerto Rican, Kaplan, winner of the previous
World Championship, arrived in Stockholm and it became clear that he was the number one rival.

The 1969 World Junior Championship attracted a record number of participants. The Championship was contested by 38 youths from 37 countries (the Swedes were represented by two players according to the host nation’s rights). True, it was unclear whether it was possible to consider England and Scotland as separate countries. However, seeing as in other forms of sport (e.g. football) they each field their own teams no one felt able to challenge this tradition.

The participants were divided into six preliminary groups, from each of which the two winners were to make up the main final.

The system of division into such small groups involves many surprises and is fundamentally shameful. It turned out that by no means the strongest participants won through to the final. Thus the American Rogoff and the Philippino Torre failed to reach the main final, while the Colombian Castro, who reached the final, was considerably weaker than them.

In the preliminary group Karpov was noticeably nervous. At first his rivals forged ahead and it was not clear whether Anatoly was in a position to concede any draws, or was absolutely obliged to go all out for the win. Thus, playing sharply for the win against Torre and the Swiss player Hug, Anatoly stood on the verge of defeat in these games. And in general I noticed that in the preliminaries the especially nervous ones were those participants who had every ground for aspiring to the leading places in the final.

But everything turned out favourably. Karpov did not lose a single game and even took first place in his section.

I was happy with Anatoly from the very beginning. I clearly saw his prospects in the final, and I knew that there he would play very differently, that under unworried conditions he could show his best qualities.

My forecasts were fulfilled. In the finals he played a completely different game. Karpov began to win game after game. Karpov’s victories affected the play of his rivals in a fatal manner. Realizing that by ‘normal play’ it was impossible to catch up with Karpov, certain participants began to take too many risks and this turned out badly for them. Anatoly was able to pull ahead of his rivals. Two rounds before the end of the tournament he had assured
himself first place irrespective of the outcome of the remaining games.

Of course no one could have foreseen that Karpov would succeed in winning eight consecutive games in the final. No one set him such a target and even he himself had not counted on such a series of wins. Even so, this was not fortuitous – we had succeeded in accurately defining what tactics Anatoly should follow in order to achieve maximum success. Karpov showed himself to be a remarkably able student. He succeeded in creatively developing the ideas which I showed him during the preparation for the tournament. Even those ideas which did not arise out of the given concrete opening Karpov took advantage of during the other stages of the game.

At this point the game Juhnke-Karpov is given with notes by Furman.

I have already remarked that the main strength of the foreign juniors was in tactical play, therefore the task in front of Karpov consisted of obtaining positions such that tactical contrivances by his opponents would be doomed to failure. This meant that the position must be reliable and a plan of campaign logically flow out of the requirements of the position itself.

Now part of the game Karpov–Andersson appears.

The attack in this game was carried out by Karpov on a firm positional base and was prepared for by consistently planned play. All the same, certain chess-players sometimes succeeded in complicating the play and ‘luring’ Anatoly into the realms of tactical struggles. But then they turned out to be in unfavourable conditions because they were acting anti-positionally, for example the Colombian Castro risked using the King’s Gambit against Karpov and paid heavily for it.

Castro–Karpov.

On the basis of this game it’s possible to judge Karpov’s tactical ability. Therefore the ‘course of solidarity’ is explained not by any weakness of Karpov’s combinational vision, but by expediency and safety.

Karpov’s magnificent play and his modest disposition aroused the regard and sympathy of the Swedish chesslovers; the local inhabitants turned to us with good wishes for success, and later with congratulations. During the period of the Championship Anatoly had a bit of a cold; the Swedes were very concerned and literally overwhelmed him with medicines, and one of them
brought a thermos flask of hot tea to Anatoly at his hotel. Anatoly quickly got better, and it seemed to me that his recovery was helped not so much by the hot tea as by the warmth of the local hospitality.

The Swedish press, radio and TV publicized the Championship widely. Of course the Swedes were rooting for their own Ulf Andersson, undoubtedly a very talented player. While Ulf was still in with a chance it was impossible to get near his board. Later the spectators’ interest turned to Karpov. I even recall an occasion when, under the onslaught of the public who had climbed on to the windowsill in order to get a better view of Anatoly, the radiator was torn away from the wall. Once again the repair brigade had to be brought in. . . .

On one of the days Boris Spassky and Bent Larsen, who were staying in Stockholm, visited the tournament. The famous grandmasters were themselves juniors not long ago, each of them in his time carried off the title of World Junior Champion (Larsen never won the title – he was 5th in 1951 and 8th in 1953 – eds). This symbolic meeting made an indelible impression on the youngsters.

The closing ceremony of the Championship took place in the picturesque park of lake Skansen. The deputy mayor of Stockholm laid on a ceremonial lunch for the participants. There the prizes were distributed.

And so Anatoly Karpov won the title of World Junior Champion. In accordance with the FIDE rules he was awarded the title of international master. And what next? How will the sporting fate of the young player work out? Many grandmasters of high reputation were Junior Champions in the past, will Karpov join their ranks?

Anatoly, in my opinion, will undoubtedly become a grandmaster. When? I think a year or two, but this depends not only on his training but also on his opportunities of participating in big tournaments. The sooner that Anatoly starts to meet top-flight masters the sooner he will become a grandmaster.

Semyon Furman was talking to V. Henkin.

0809 Ak–Ulfs Andewsson:
FR3: 20 August:
Ruy Lopez

1 P–K4 P–K4 2 N–KB3 N–QB3 3 B–N5 P–QR3 4 B–R4 N–B3 5 0–0
8 B–B3 P–Q3 9 P–KR3

This is usually played before P–Q4 since otherwise the pin by . . . B–N5 can be disturbing.

9 . . . N–QR4
10 B–B2 P–B4

All part of the standard (and much overlooked) strategy of this variation; Black gains a little space on the
Q-side and prepares to defend e5 with his queen, thus removing her from a file which may one day be inhabited by ferocious rooks. Meanwhile he retains options of play on the QB-file.

11 P–Q4 Q–B2
12 QN–Q2 B–N2

The idea of this move is to provoke the blocking of the centre which now follows. Attempts by White to maintain the tension may result in Black’s QB becoming very effective after the freeing manoeuvre of exchanges on d4 followed by ... P–Q4 has been carried out.

13 P–Q5

After this move White has a permanent, though slight, space advantage.

13 ... B–B1

There is no longer any reason to keep the bishop on b7. The loss of two tempi is insignificant since nothing very sudden can happen in this blocked position.

14 N–B1 B–Q2
15 P–QN3 N–N2

White’s plan is to reduce Black’s Q-side play to a minimum before committing himself to the K-side attack which is his objective. Since he cannot keep all the Q-side lines permanently closed, he aims to limit Black to one open file, and to maintain equality of space on that side.

16 P–B4 KR–N1
17 N–K3 B–KB1
18 N–B5

It is unfavourable for Black to exchange this knight since then White will occupy e4 with the other knight and conduct a pawn-storm with P–KN4–N5 and so on.

18 ... N–Q1

Both to clear the QN-file and to bring the knight over to the defence of the K-side – from f7 eventually.

19 N–R2

Karpov’s conduct of this game is typical of his style. A more direct approach involving P–KN4, K–R2, R–KN1 and doubling rooks on the KN-file would eventually run into a solid black defensive position, when White would have to justify his build-up by a sacrifice. Instead of such a speculative, though often employed, plan, Karpov uses his pieces in front of his pawns to create the most favourable conditions possible for an eventual breakthrough by first forcing weaknesses in Black's K-side.

19 ... N–K1
20 P–KR4

All part of the plan. This pawn will help to restrain Black from adopting a solid set-up based on ... P–B3, ... P–N3, with the KB on B1 and knights on KB2 and KN2.

20 ... P–B3
21 P–R5 N–B2
22 R–K3

If White can now force ... P–R3, he will have an overall light square bind which will considerably help his attack.

22 ... N–N4
23 N–R4

Preventing ... P–N3.

23 ... Q–Q1
24 R–N3 N–QB2
25 N2–B3 P–R3 (78)
Black couldn’t really avoid this as after 25 ... B–K2 26 P–R6! was very strong e.g. 26 ... P–N3 loses a pawn to 27 N×N P×N 28 N–B3 P–KN5 29 N–R2.

26 N–N6  P–R4
27 P–R4!

Otherwise Black gets two open files with 27 ... P–R5.

27 ...  P×BP
28 P×P

White’s first priority is now to cover all the entry-points on the QN-file so that the black rooks cannot penetrate.

28 ...  N–R3
29 Q–K2  R–R2
30 B–Q2  R2–N2

30 ... R–N7 of course achieves nothing – the boarder is repelled by 31 B–B3.

31 B–B3  N–N5

This attempt at repetition of moves gets him nowhere. Sooner or later he will have to try ... R–N5, with the intention of recapturing with the QBP and thus obtaining some positional advantages as compensation for the exchange. However, White need not accept the rook until it actually succeeds in threatening something, and can meanwhile continue cheerfully with his own plans.

32 B–Q1  N–R3
33 N–Q2

Avoiding the repetition while still covering the b1 square.

33 ...  N–N5
34 R–K3  B–K1
35 N–B1  Q–B1
36 N–N3  B–Q2
37 Q–Q2  N–R2
38 B–K2  K–B2

With the rather half-hearted idea of heading for points West. But he soon decides that he may as well have his king available to defend the weaknesses in his K-side. He is strategically lost anyway.

39 Q–Q1  B–K2
40 N–B1

Over the last few moves White has been preparing an exchange of light-square bishops by B–KN4. This knight is about to lend a hand from KR2. Once this exchange has been achieved he will simply place his knights on g6 and f5, then play P–N3 and P–B4 with a position that wins itself.

40 ...  B–Q1

Black’s last, though very limited, chance of breaking out was to play 40 ... P–B4 or the same on his 41st.

41 N–R2  K–N1

He might as well have continued with his plan (now that the QRP is protected) of playing ... N–R3 and ... R–N6, but was probably oppressed by a sense of the futility of the whole business.

42 B–N4  N–N4

After 42 ... B×B 43 N×B N–B7?

44 N×RP + White picks up a pawn.

43 B×B  Q×B

The first piece exchange of the game!

44 N–B1 (79)

Now he goes for f5. In desperation Black tries his last remaining chance.

The positional advantage is on White’s side – he controls more
space, Black’s light squares are weak, and his bishop has no prospects. White intends to seize the point f5 with the aid of the manoeuvre N/B1–N3–B5 followed by the pawn-storm P–N3 and P–B4. Not wishing to be a passive observer of the onslaught being prepared, Andersson tries to free himself from White’s grip on the position.  

44 ... 
P–B4
45 P × P  
Q × BP
46 N–N3  
Q–B2

This move loses without a fight. He had to try 46 ... Q–B7 to keep chances, e.g. 47 Q–N4 R–KB2! 

‘Against 46 ... Q–B7 47 P–B4 would have followed and 47 ... P × P is not possible because of 48 R–K8+. The struggle which follows revolves around the advance P–B4.’ 

47 Q–K2

‘Renewing the threat.’  

47 ...  
B–B3
48 R–KB1  
Q–Q2

‘Black can no longer prevent the opening up of the position.’ 

49 P–B4!

The decisive break-up. 

49 ...  
P × P
50 R × P

Our Young Champion

V. Tumanov

If at the World Junior Championship in Stockholm a special prize had been awarded for modesty and serious application to chess then, together with title of Champion, it would have gone to Anatoly. In the course of the three weeks he sat at the board calmly and in a business-like manner and pulled off one victory after another.

'Everything depends on the finish' he replied to the importunate questions of Swedish correspondents, although it was obvious that everything was virtually decided already. Eight consecutive victories in the final made his position unassailable. And it was only in the ninth round when the Hungarian Andras Adorjan, having drawn with Karpov, shook his hand and said 'Congratulations, you are the Champion' that Anatoly's face lit up in a broad grin.

Many had believed in Karpov's victory. The ex-World Champion Mikhail Botvinnik, a man of high principle and guarded in his judgements, had spoken highly of Anatoly's play. And Boris Spassky, on the eve of Anatoly's departure for Stockholm, had announced 'I am convinced that Karpov will repeat my success of fourteen years ago and become the World Junior Champion'.

On what was based the faith of the Soviet chess-players in the success of their representative? – an analysis of Anatoly's short but impressive sporting career.

Karpov was five years old when he became acquainted with chess. He lived at the time in Zlatoust, a small town in the Urals, far from the chess centres. Anatoly soon stood out in the All-Russian Schools Championships, and at the age of eleven obtained the rank of candidate master. Quite a lot of attention was focused on the able young boy. Mikhail Botvinnik began to concern himself with him. Even then there was already an uncommonly striking tenacity and purposefulness in Karpov's play. It was strange to observe how, scarcely noticeable behind the chess pieces, the small boy sat, not stirring for five hours at a time, absorbed only by his will to win.

At the age of fifteen Anatoly became a master, the youngest chess master in our country. And now, at eighteen, he is World Junior Champion. Isn't it a fact that the sporting biographies of
Anatoly Karpov and Boris Spassky are surprisingly similar, and is there not a special significance in this?

When Anatoly flew into Moscow from Stockholm not one correspondent was able to extract an interview from him. It was not at all because Karpov had not yet learnt to give them, it was simply that he did not have the time. Evgeny Stepanovich Karpov, chief engineer of one of the Tula factories, drove his son, straight from the airport, back to Tula for 'repairs'. Anatoly certainly needed as much rest as possible because before him stretched a whole year of studies at the Moscow State University (MGU).

And so I was chatting to Anatoly. The World Junior Champion visited the central house of culture of the Railwaymen (Moscow – eds) where the 37th USSR Championship was taking place. He looked with interest at the games played by the young débutants in the event.

'I thought' said Anatoly, 'that Volodya Tukmakov would show up best of all, but then I was mistaken'.

The conversation turned to Anatoly's chess career.

'Up to the age of twelve' said Karpov, 'I had a very confused understanding of chess theory. I had read, all in all, two chess books, the titles of which I cannot now remember.

'When I was included in the junior Trud school where M. Botvinnik directed the studies, the ex-champion of the world, on becoming acquainted with my knowledge, exclaimed "he doesn't understand anything about chess". Understandably Mikhail Moiseyevich, not wanting to insult me, did not say this to my face, but I was later informed that this was the first thing he ever said about my play.

'The studies with M. Botvinnik did me a lot of good, especially the homework which he gave out. This homework taught me to work independently, forced me to sit down to work at chess books.

'Now my trainer is grandmaster Semyon Furman. He helped me to win in Stockholm and I am very grateful to him. I shall be glad if Semyon Abramovich continues to work with me. He is splendid both as a man and as a chessplayer."

And which chessplayers have had the greatest influence on your play?

'Capablanca and Botvinnik.'

It frequently happens that parents are unhappy about the extracurricular activities of their children, fearing that these will
interfere with their studies. What was the attitude of Karpov’s parents to his chess?

‘They had no reason to be worried’ said Anatoly, ‘I always got an “excellent” for my studies, and I finished school with the gold medal, and now I am taking the first course of the Economics Faculty of the MGU.’

Well, what are your interests apart from chess?

‘I like pop music, Lermontov and I collect stamps.’

Anatoly looked searchingly at me, expecting some further questions, but I well realized that he had long been wanting to go to the tournament hall where it was much more interesting.

0901 AK–Andras Adorjan:

King’s Indian

1 P–Q4 P–KN3 2 P–QB4 B–N2 3 N–QB3 P–Q3 4 N–B3 N–KB3 5 P–KN3 0–0 6 B–N2 QN–Q2 7 0–0 P–QR3!?;

This unusual move was introduced into master praxis by Navarovsky. It can be justified with the following tactical points: 8 P–K4 P–B4 and:

(b) 9 P–K5 N–K1 10 KP×P N×P 11 P×P N2×P 12 B–K3 B×N! 13 P×B Q–B2 and Black is better.

If White tries to hinder Black’s Q-side opportunities with 8 P–QR4 then 8 . . . P–QR4! could be an answer. Although this is a loss of tempo, after . . . P–QB3 and . . . P–K4 White’s dark square weaknesses provide ample compensation.

These motifs are the main characteristic of the type of position that Black has built up, especially advantageous in that it tests the opponent with new ideas, and as chess is played with a time control this is very important.

8 P–K4 P–B4 9 R–K1 P×P 10 N×P N–B4

This position is reminiscent of the Sicilian Dragon. On the other hand, the QN has moved to B4 (instead of the usual B3), where it is in readiness to execute the most important strategic aim of exchanging itself, when it moves to R5, for White’s N/QB3. If that is achieved then the weakness of d5 ceases, and the remaining black knight has a larger role to play – it facilitates the possibility of doubling rooks on the QB-file apart from the very important manoeuvre . . . N–Q2–K4.

11 P–KR3

Another variation would have been 11 P–N3 B–Q2 12 B–N2 R–B1 13 P–QR4? (13 Q–K2 P–QN4! 14 P×P P×P 15 N4×P N3×P! 16 N×N B×N 17 Q×B B×B with even chances; in this variation 15
N3 x P is not good because of 15... P-K4! 16 N-B2 N4 x KP! 17 P-QR4 R-K1! 18 N2-R3 P-Q4) 13... N-N5! 14 P-KR3 N-K4 15 B-KB1 N-B3! with advantage for Black.

11... B-Q2 12 B-K3 R-B1 13 R-QB1 Q-R4!

This prepares... P-QN4. The immediate 13... P-QN4 would be disadvantageous because of 14 P x P P x P 15 P-QN4! N-R3 16 P-R3. On the other hand, if White tries to prevent this move then the plan of exchanging knights and playing... P-K4 would be possible

14 P-R3 N-R5! 15 P-QN4!? A move that could be argued about, because of the weakening of White’s pawn at c4 it allows Black Q-side play. It is true that it only hangs by a thread that White’s plan of P-QB5 is unsuccessful.

After the less demanding variation 15 N x N B x N 16 P-N3 B-K1! 17 P-QR4 N-Q2 Black’s game is easy – he has no problems.

15... N x N 16 R x N Q-R5! 17 Q-N1 R-B2 18 R1-QB1 R1-B1 19 Q-Q3 B-K1!! (88)

The best move of the whole game, and a very difficult decision. Only after considering a lot of pros and cons was I able to convince myself that the evergreen motifs in the game (e.g. ... P-K4 followed by the breakthrough... P-Q4, possibly with... P-QN4, ... P-QR4 and... B-K3! combinational-wise) were valid – in the absolute it is not enough for a combinational decision. On the other hand the text move allows 20... N-Q2-K4 against which there is no defence.

20 B-B3

The aforesaid threat could be parried by 20 P-B4 but the answer 20... N-R4! 21 P-N4 (21 K-R2 P-K4! 22 P x P B x P) 21... N x P! 22 B x N P-K4 23 B-K3 P x N 24 B x P B x B 25 Q x B P-QN4! would be to Black’s advantage.

20... N-Q2! 21 B-Q1?

21 Q-B1 was better, which, as against the game, would have saved a tempo: 21... N-K4 22 B-K2 Q-Q2 and:

(a) 23 R3-B2 P-QN4! 24 P x P R x R 25 R x R R x R 26 N x R P x P 27 N-Q4 Q-N2! 28 B x P N-B6+t! 29 N x N B x B 30 Q-N1 Q-R1! 31 B-B1 P-Q4! 32 N-Q2 P x P 33 N x P Q-Q4! t+t

(b) 23 P-B4 N-B3 24 R-Q1 N x N 25 B x N Q-K3 26 B x B K x B 27 B-B-N4 P-B4 28 P x P P x P 29 B-K2 P-N4 t+t

(c) 23 P-B5 N-B3 24 R-Q1 N x N 25 B x N Q-R5 t+t

21... N-K4 22 Q-B1

22 B x Q N x Q 23 R x N B x B 24 R3-B3 B-Q2 25 K-R2 P-B4! 26 P x P P x P gives Black a decisive advantage because of the threats of... P-Q4 and... P-K4.

22... Q-Q2 23 P-B5 P-QN4! 24 B-N3 P x P 25 R x P R x R 26 P x R N-B5!

This little combination results in a Winnable position. To my great surprise Karpov, a good defensive player, defends rather poorly and with his next hastens the end.

27 B x N B x N 28 R-Q1 P-K4 29
32 P-KR4 R-B7! 33 P-K5?
This results in the loss of a pawn without compensation. He should have tried 33 P-R5!?

33 ... Q-B6! 34 R-Q3 QxKP 35 Q-N2
Or 35 R-K3 QxR 36 RxB + K-N2 37 Q-R1 + P-B3 38 R-K7 + K-R3 39 P-N4 R-Q7 40 P-N5 + K-R4! 41 RxP + K-N5 = +

35 ... K-N2
It’s a pity that 35 ... P-N5?! doesn’t work – 36 PnP Q-K8 + 37 Q-B1 Qxp + 38 KxQ B-N4 = +, but after 36 Q-K4! the win would be very difficult.

36 Q-B3?
Loses instantly. White could have prolonged the game with 36 Q-K4 QxQ 37 BxQ B-B3! 38 BxB RxB, but without much hope.

36 ... Q-K8 + 37 K-N2 R-B8 38 P-N4
Or 38 K-R3 B-Q2 + 39 P-N4 P-B4!!

38 ... Q-R8 + 39 K-N3 R-KN8 + 40 K-B4 Q-R7 + 41 K-K4 QxRP 0-1

0904 Zoltan Ribli–AK:

Ruy Lopez

1 P-K4 P-K4 2 N-KB3 N-QB3 3 B-N5 P-QR3 4 B-R4 N-B3 5 P-Q4 P×P 6 0-0 B-K2 7 R-K1

One and a half decades ago the candidate master Laszlo Alfoldy, a known chess writer, believed and ascertained that this position must be won for White. Unfortunately no one believed him at the time. However, this is now one of Ribli’s favourite lines.

7... P-QN4 8 P-K5 N×P 9 R×N

According to theory this exchange holds more chances for Black. However, 9 N×N P×B 10 Q×P 0-0 11 Q×RP R–N1 gives Black a good game.

9... P-Q3

This is necessary, according to theory, because the immediate 9... P×B is good for White: 10 N×P 0-0 11 N–QB3 R–K1 12 B–N5 B–N2 13 N–B5. This assertion is based on the following move order: 13... B–KB1 14 R×R Q×R 15 B×N P×B 16 Q–N4+ K–Q1 17 Q×P Q–K4 18 Q×QP St. Szabo-Balanel, Bucharest 1954. On the other hand, in the game Barczay–Antoshin (from this match), Black, instead of capturing on move 15, continued 15... Q–K3 16 B×P Q×N 17 B×B R×B 18 Q–Q3 Q×Q 19 P×Q B–B3 20 R–Q1 R–Q1 21 R–Q2 K–B1 22 P–B3 K–K2 23 K–B2 ½–½.

10 R–K1

That this variation is good for Black is based upon 10 R–N5? P×B 11 R×P N–R4! of Reshevsky–Euwe,
Dubrovnik 1950. Instead of the decentralization of the rook, the retreat to K1 is much healthier. Now the weakened black pawn formation gives White’s minor pieces good opportunities. We shall see on move 12 why the build-up of the White position is successful.

10 . . . P × B 11 N × P B–Q2 12 Q–B3! 0–0 13 N–B6! B × N 14 Q × B R–K1

Because of the B/K2 this move is a necessary preamble to . . . Q–Q2, and it is only this tempo that ensures that White, with some positional advantage, should regain the temporarily sacrificed pawn.

15 N–B3 Q–Q2 16 Q × Q N × Q 17 N × P B–B3 18 B–Q2 R–K3 19 QR–Q1 R–K1 20 K–B1 K–B1 21 P–QN3 R × R + 22 B × R!

The R/Q1 will still play a part in the undermining of Black’s Q–wing. It would be a pity to exchange it.

There is a time when it is more important to make sure that the opponent cannot do something than do something ourselves. This move thwarted, for the moment, Black’s . . . N–B4.

24 . . . R–KB4?

This attacking gesture is easily countered. On the other hand, Black is worried that the well-placed white minor pieces do not allow Black much counterplay. At this moment 24 . . . P–KR4 would have been a cold-blooded waiting game.

This type of build-up is more uncomfortable for Black than one with B–N4.

This not only hinders . . . N–N5, but also threatens the black rook with P–KN4.

The black army has retreated, the Q-side pawn formation is catastrophically weak and material disadvantage can no longer be avoided, e.g. 34 . . . N–K4 35 B–N5 + (35 R–B7 + K–B3) 35 . . . P–B3 36 N–Q5 + K–B2 37 R–B7 + is decisive. This motif recurs in other variations as well. The ensuing pawn sacrifice is therefore a positional necessity.

34 . . . P–Q4 35 N × P + K–Q2 36 N–B7! R–K5 37 B–N3 P–B4

Another compulsory sacrifice because after 37 . . . P–QR4 38 N–Q5 not only does 39 N–B6 + win the exchange but 39 N–N6 + is threatened with annihilation as well. These two threats can only be parried by the hopelessly passive . . . R–K3.

On 41 . . . R–QR4 42 R × P followed by 43 B–N3 would save the knight, but the three pawns would quickly decide the issue.

42 P–N4! K–Q3 (93)
... K–Q4 is threatened. But oh no, the following clever move thwarts this last hope.
43 P–N5! R × P 44 R × P B–N2 45 R–B7 B–K4 46 R × P R–R4 47 N–N4! The bone-crusher 47 ... N × N
48 B–K7 + K–K3 49 B × N R × P 50 B–B5 B–B5 51 K–N2 R–B7 52 B–N6 R–N7 53 B–Q8 B–K4 54 B–R4
1–0 The game was adjourned here, but next day Black resigned without resuming play.
No details concerning this event are available, other than the fact that it was played in Leningrad (we are grateful to Karpov for pointing this out). The two games that appear in this section are probably from the Leningrad event, though it is possible that one or both of them could be from the USSR Armed Forces Team Championship zonal event, played in Riga earlier in 1970. No reference has been found to indicate that Karpov played in this latter event, but in the Latvian magazine, Saks No. 12/1970, there is a photograph of the event in progress, and this shows Karpov strolling between the chess tables!

1001 Rafael Vaganian–AK:

Queen’s Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3 3 N–KB3 P–QN3 4 P–QR3 I used Tigran Petrosian’s system for the first time very recently against Victor Korchnoi in the Grandmasters v. Young Masters tournament in Sochi; throughout that game I had a pretty good position. 4 . . . B–N2 5 N–B3 P–Q4 6 B–N5 B–K2 7 P–K3 QN–Q2 8 P×P P×P 8 . . . N×P was not so good: 9 B×B Q×B 10 N×N B×N 11 R–B1 with the freer game for White. 9 B–Q3 0–0 10 0–0 N–K5 11 B–KB4 P–QB4 12 R–B1 On 12 P×P could follow 12 . . . N×N 13 P×N N×P and Black stands well, but not 13 . . . P×P because of 14 B×P+ K×B 15 Q–N1+. 12 . . . P–QR3 In my opinion an important loss of tempo. Bearing in mind that Black is preparing to play . . . P–B4 it was essential to take the king off the dangerous diagonal with 12 . . . K–R1. 13 Q–B2 P–B4 14 P×P P×P 15 KR–Q1 Black has a difficult game; 16 B×N BP×B 17 N×KP! P×N 18 N–K5 B–B1 19 Q×KP R–R2 20 N–B6 is already threatened. 15 . . . Q–B1 16 P–QN4? It’s possible that the position does not demand such a radical solution but I wanted to get down to concrete operations. Not bad also was the quiet 16 B–B1. 16 . . . P×P 17 P×P B×P (94)

18 N–R2 Originally I had planned
to play 18 \(Q-N3\) B×N 19 B×N BP×B 20 R×B N-B4 21 Q-R3 (against 21 Q-N6 N-R5 is good) 21 . . . P×N 22 R×N, but here my opponent would have had at his disposal the unpleasant thrust 22 . . . Q-N5. 18 . . . B-R6 18 . . . Q×Q 19 R×Q B-R4 was stronger, although after 20 B-B7 White would have for the pawn a position rich in possibilities. 19 Q-N1! B×R 20 R×B N2-B4 if 20 . . . N5-B4 then simply 21 B×BP R×B 22 Q×R Q-B1 23 Q-N1 21 B×N QP×B 22 N-Q4 B-Q4 23 N-N4 Q-N2 Probably the only way to escape from the pin. 24 R×N KR-B1? The losing move. It was still possible to hold on by means of 24 . . . QR-B1 25 R×B Q×N 26 Q-Q1 Q-R5 27 N-K2 when, at the end, White does not have such an enormous advantage. 25 R×B Q×N 26 Q-Q1! 26 R-Q8+ K-B2 27 Q-R2+ Q-B5 was weaker. 26 . . . Q-R5 27 R-Q8+ K-B2 28 Q-R5+ 1-0 (Notes by Vaganian)

1002 AK-Zhelyandinov:
Ruy Lopez

The notes to this game that appear within quotation marks are by Karpov from ‘Youth Lectures’ in the Latvian magazine Sahs.

‘In the game a variation put into practice by V. Smyslov is met.

‘What is characteristic for this variation?

‘As is usual in the Spanish (Ruy Lopez), White attempts to play in the centre and on the K-side, while Black organizes counterplay on the Q-side.

‘And it is necessary to say straight out — concrete ways have not yet been found which allow White to obtain any advantage in the opening stage. The difficulties of the struggle are carried over into a long and sophisticated middle-game. The following game is no exception.’

1 P-K4 P-K4
2 N-KB3 N-QB3
3 B-N5 P-QR3
4 B-R4 N-B3
5 0-0 B-K2
6 R-K1 P-QN4
7 B-N3 P-Q3
8 P-B3 0-0
9 P-KR3 P-R3
10 P-Q4 R-K1
11 QN-Q2 B-B1
12 N-B1 B-Q2

‘Another possible continuation is 12 . . . B-N2.’

13 N-N3 N-QR4
14 B-B2 P-N3

After this the black QN, up until the end of the game, is unable to get into play. 14 . . . N-B5 15 P-N3 N-N3 getting the knight closer to the centre held out better prospects.

‘Other continuations are 14 . . . N-B5 or 14 . . . P-B4. Against 14 . . . P-B4 White replies 15 P-N3 N-B3 16 P-Q5 N-K2 17 N-R4 with advantage. I decided to lead play into the position that would have arisen from that variation.’

15 P-N3

‘This move limits the field of operations of the knight on QR5. Very often White bases his play on utilizing the bad position of this knight. In the text game, the black knight retreats to the square b7, but even there it remains rather out of play. 15 N-R2 followed by P-KB4 deserves consideration.’

15 . . . P-B4
16 P-Q5

White blocks the centre and play is transferred to the flanks. It is clear that White will aim for a K-side offensive, while Black will go for a Q-side counter-attack. As soon be-
comes clear White has the better chances; in no small measure thanks to Black’s passive QN.

16 ... B-N2
17 B-K3 N-R2

‘Black adopts an interesting plan. He attempts first to restrict White’s K-side play and then to start his Q-side counterplay. In the game Black did not completely succeed in effecting this idea. In the middle of the game he starts to change plans and suffers defeat.’

18 Q-Q2 P-R4
19 N-R2 N-N2

‘Now and on the next moves the continuation P-KB4 and then P-B5 would have led to very sharp play.’

It is interesting that a similar position, but on move 22 and with the black queen on K2, arose in Stein-Geller, 37 USSR Ch. Stein effectd the advance 22 P-KB4 and after 22 ... P×P 23 B×KBP had the initiative. All the same Geller brought about considerable complications with a pawn sacrifice.

Karpov chooses another plan. He carries out a regrouping manoeuvre in order to make the advance P-KB4 with the greatest possible effect. Above all he reduces to a minimum Black’s freedom of action on the Q-side and only then gets down to his attack.

20 QR-B1 P-R4
21 P-R3

‘The idea of the text move is clear – White intends, at an appropriate moment, to close the Q-side, and also to play P-QN4 to bury the black knight on b7.’

Now on 21 ... P-QR5 there will follow 22 P-N4.

21 ... Q-N3

Later on the queen will go to K2, losing several tempi en route. Better 21 ... Q-K2 at once.

In the Chigorin systems Black usually operates on the lines of ... Q-B2, ... P-KB3 and ... N/QN2-Q1-B2. In the given case, Black’s position has been weakened by ... P-KR4 and the advance ... P-B3 would make the position of the black king difficult. One gets the impression that White’s plan, in conjunction with the move P-Q5, is very unpleasant for Black.

22 K-R1

‘White intends to prepare and carry out the advance P-KB4. Therefore it is useful to remove the king from the g1-a7 diagonal.’

22 ... P-N5
23 RP×P RP×P

‘23 BP×P BP×P 24 P-QR4 and the re-development of a knight on QB4 was possible, but at the time of the game I intended the plan with P-KB4 and I did not want to give it up. And so White succeeded in closing the Q-side, but at the same time conceded the QR-file. In the outcome it transpires that the QR-file does not give Black sufficient counterplay.’

24 P-QB4

Now Black’s Q side counterplay is finished. The incursion of the rooks along the open QR file is of a purely symbolic character.

24 ... R-R7
25 Q-Q1 R1-R1
26 R-B1 Q-Q1
27 N-K2

‘Here I intended the re-deployment of knight on Q3 and bishop on QN2 and then the move P-KB4. Black prevented the re-deployment B-QN2, but all the same the white knight occupied the Q3 square.’

27 ... B-KB3

The game is given in Shakhmaty v SSSR, where it was annotated by Magergut, as continuing 27 ... Q-K2 28 R-QN1 B-KB3 29 N-B1 R7-
R6 30 N–B3 K–R1 thus rejoining the game score (followed by Karpov) given in the column.

‘Black loses the thread of the game. He makes all the subsequent moves in random order. Now if Black had decided to exchange the dark-squared bishops then a better way to do this was by 27 . . . Q–KB1 and 28 . . . B–R3.’

28 N–B3

‘Preventing . . . B–KN4.’

28 . . . K–R1?

‘After White carries out his plan with P–KB4 it becomes clear that the king ought to be on KN1 in order to defend the f7 square.’

29 R–QN1 Q–K2
30 N–B1 R7–R6
31 N–Q3 B–N2
32 N–Q2

‘White is unable to transfer the bishop to QN2 because of . . . P–B4.’

32 . . . Q–B1
33 P–B4

White finally realizes this important advance.

33 . . . P × P

It is not possible to maintain the centre, since on 33 . . . P–B3 there follows a double capture on K5.

34 B × KBP Q–K2

Now Black’s position falls apart. 34 . . . P–B3 is no help, e.g. 35 B–N3 and if 35 . . . Q–K2 (the threat was 36 P–K5) then 36 N–B4 N–B1 37 P–K5 with a strong attack.

35 N–B3

‘Now White wants to carry out the advance P–K5. If he can achieve this then the black position collapses.’

35 . . . R–R7

If 35 . . . P–B3 to prevent P–K5 then 36 B–B1! with N–B4 to follow.

‘Against 35 . . . P–B3 White plays 36 B–R2 and then N–B4 and P–K5.’

36 P–K5 B–B4
37 R–K1

‘White breaks through in the centre, after which all his pieces spring to life. At the same time the black pieces are strewn all over the place and cannot organize effective resistance.’

37 . . . Q–B2
38 R–QB1 K–N1 (95)

‘See, he’s got to put the king back. But there now follows a combination and White wins quickly.’

95

39 P × P N × P
40 N × NP! P × N
41 B × B B–B6

‘On 41 . . . P × B follows 42 P–B5.’

42 B–N1 R–R8
43 R–K2 1–0

‘It is typical that after the logical culmination of the plan, White succeeded in finishing the game with a little combination.’

Interview With Anatoly Karpov

This interview appeared in the magazine Sahs (No. 10/1970) in conjunction with the ‘Youth Lectures’ article (see the introduction to the previous game).
Q: Three or four years ago in the Republic’s youth newspaper the headline was published *15-year-old Master*. It was devoted to you. Is it true that you were the youngest master in the Soviet Union?

AK: Yes, but not for long. Soon after the fourteen-year-old Ukraine player Misha Steinberg became a master.

Q: And how old were you when you became a candidate master?

AK: Eleven. This was in 1962.

Q: Who introduced you to chess and where did you get your first training?

AK: My father taught me to play. He did not have a grading, he just loved the game. I also started to love it and I started to go to the chess classes in the Metallurgists’ Palace of Sport, we then lived in Zlatoust, and I was soon given a 3rd category rating.

Q: Who was your first trainer?

AK: The leader of the section in the Palace of the Metallurgists, Alexander Pak. He taught the section general opening play, was a great chess enthusiast, and succeeded in inspiring in his students a love for this game.

Q: It must be assumed that in those days you were still too young to appreciate the real beauty of chess. Who or what prompted you to be seriously immersed in chess culture as you now are?

AK: Capablanca. When I came across one of his games I began to study it with great interest, then a second and a third. I could sit out the evenings at these studies without getting bored.

And later something else happened: I landed up at Botvinnik’s school; four times a year we went to Moscow and spent a whole week there. Mikhail Moiseyevich set homework and then went through it with us. This was very interesting. Undoubtedly it was there that I began to apply myself more seriously to chess.

Q: Which of the two events – the USSR junior selection tournament, or the World Junior Championship itself – do you consider was the more difficult for you?

AK: It was more difficult for me in the World Junior.

Q: Notwithstanding your good result?

AK: Yes. I was under constant tension.

Q: Your favourite opening for White?

AK: 1 e4. Most of all I like to play the Spanish (Ruy Lopez).

Q: Who is your favourite grandmaster?
AK: Spassky – I am all the time afraid of him.

Q: What are your immediate chess plans?

AK: To play well in the semi-final of the USSR Championship and to get into the final.

Q: And if we are not speaking about chess?

AK: To finish my studies at the Faculty of Economics, Leningrad University.

Q: Who is your trainer at the moment?

AK: Grandmaster Semyon Abramovich Furman.

Q: At the age of eleven you became a candidate master, at fifteen a master, and at eighteen an international master. When do you reckon to get the grandmaster title?

AK: It is still early to think about this question. I have played very few games with grandmasters. Now the important things are training and more encounters with strong chessplayers.

KN–K2 8 P×P B×BP 9 N–N3 B–
N3 10 R–K1 0–0 11 B–K3 B–N5 A
safer equalizing method is 11 ... B×
B! 12 P×BB–N5 = . 12 B×B If White
ignores the pawn offer, Black secures
an easy game. 12 ... Q×B 13
B×N N×B 14 Q×P N–N5 15 Q–
K4 B×N 16 P×B P–Q4 17 P–
QR3 Krogius suggests as better 17 N–
Q4. 17 ... N–B3 18 Q–K3 N–N4 19
P–QR4 Q–R4 20 Q–K4 Q–KN4+
21 K–R1 Q–B3 22 N–B5 QR–Q1?
‘After 22 ... Q×NP 23 N–Q7 KR–
Q1 24 QR–N1 Q–Q5 the position is
considerably simplified, and chances
would have been level. However I
renounced that line, over-estimating
Black’s attacking possibilities.’ Krogius.
23 P–B3! P–QN3 24 N–Q3

1103 AK–Alexander Zaitsev:

Caro Kann

1 P–K4 P–QB3 2 P–Q4 P–Q4 3
N–QB3 P×P 4 N×P N–Q2 5 N–
KB3 Another possibility, which
keeps more pieces on the board, is 5
B–QB4 KN–B3 6 N–N5 P–K3 7 Q–
K2. Karpov’s line is a solid one with a
good reputation. 5 ... KN–B3 6
N×N + N×N 7 N–K5 B–B4 8 P–
QB3 More usual here is 8 B–QB4,
but Karpov has an experiment in
mind. 8 ... P–K3 9 P–KN4!? Here
it is. This idea (to gain space on the K-side and embarrass the black QB) has been tried before after 8 B–QB4, but in that case Black has a good defence in 9 ... B–K5 10 P–KB3 B–Q4! and if 11 B–Q3 Q–N3! or 11 B–K2 P–QN4. In the present position, Black cannot, of course, bring the bishop to d5 since then P–QB4 would win it at once. Zaitsev could now play 9 ... B–K5 10 P–B3 before retreating to N3, but he quite justifiably decides to preserve this option for later use.

9 ... B–N3 10 P–KR4 B–Q3
Now 11 P–R5 fails to 11 ... B–K5 12 P–B3 B–N. 11 Q–K2 P–B4!? 12 P–R5? 12 B–N2 should have been played. 12 ... B–K5 13 P–B3 P × P!
The idea behind Black’s eleventh move is now apparent. The bishop on d4 has an ideal retreat square at d5, and the immediate 14 P × P? is very bad because of 14 ... B–N5+ and 15 ... Q × P.

14 Q–N5 + N–Q2! An interesting, possibly strong, alternative was 14 ... B–B3 15 N × B P × N 16 Q × BP + K–K2! with attacking chances against the exposed white king. 15 N × P! The best practical chance. The alternatives are all clearly in Black’s favour:
(a) 15 N × N B–B3!;
(b) 15 Q × N + Q × Q 16 N × Q B × P;
(c) 15 P × B B × N.

15 ... B–N6 + 16 K–K2 Nimzowitsch used to say ‘My king likes going for walks’, this one is going on a very long journey. 16 ... P–Q6 +? Black is so taken with the idea of driving the white king into the middle of the board that he overlooks the fact that it will be safer there than it was when nearer home. He should have played 16 ... Q–B3! when after 17 P × B Q × N! the threatened queen entry gives White severe problems. 17 K × K3! Q–B3
And now 17 ... K × N is better, but Black has already missed his best chance. 18 K × B (98)

An heroic king. 18 ... Q × N 19 R–R3 The idea of this is to cover the KBP while the king retires discretely towards the Q-side. 19 ... P–QR3 20 Q–N5 P–R3? Kotov and Gudes both question this and give Black a win with 20 ... P–K4 21 R × B N–B4+ 22 K–K3 0–0 23 R–R3 (Black’s threat was 23 ... Q–KB5+) 23 ... QR–Q1 24 B–Q2 N–K5! 25 K × N (25 P × N? Q–B7 mate) 25 ... Q–Q4 + 26 K–K3 Q–B4 + 27 K–K4 R–Q5 +.

21 Q–K3! White must be careful. 21 Q–N6? loses to 21 ... N–B4 + 22 K–K3 (Or 22 K–Q4 0–0–0+) 22 ... B–B5 + 23 K–B2 Q × Q 24 P × Q P–Q7. 21 ... P–K4 Black gets no win from 21 ... N–B3 + 22 K × P N × N P 23 P × N Q × B + 24 K–B2 Q × R as then 25 Q × KP + leads to a draw by perpetual check. 22 K × QP
Not 22 R × B? Q–QB5 + and Black wins. Now White’s king ends his stay in the centre by retiring, and picks up a golden handshake on the way.

22 ... B–B5 23 Q–N1 Still keeping an eye on c5. 23 ... 0–0–0 24 K–B2 B × B 25 R × B! Much better than 25 K × B Q–KB5 + 26 K–B2 P–K5 27
P×P N–K4 when Black once again has a good attacking position. So Karpov returns the pawn to gain the initiative and 'his sort of position'. 25 ... Q×QRP 26 R–R2 KR–B1 27 R–Q2! Q–R5+ After 27 ... R×P 28 Q–R7 or 28 R1–Q1 followed by 29 B–N2 White obtains an overwhelming attack. Zaitsev decides it’s time to go over to defence.

28 K–N1± Home at last! 28 ... Q–B3 29 B–Q3 Karpov plays with great energy; the threat of the pin by 30 B–B5 is sufficient to save his KBP. 29 ... K–B2 30 B–K4 Now that the bishop has reached this square there can no longer be any doubt about who is on top. 30 ... Q–QN3 31 Q–R2 R/Q1–K1 32 R1–Q1 N–B3 33 B–N6 R–K2 34 R–K1 Karpov systematically piles up the pressure on the unfortunate KP. 34 ... Q–N4 35 R2–K2 N–Q2 36 B–B51± R×B In desperation Zaitsev gives up the exchange in a last-ditch attempt to hold his position together.

37 P×R Q–Q6+ 38 K–R1 Q×P/B4 39 Q–R4! The queen emerges from her burrow, and starts to make her presence felt. 39 ... N–B3 40 Q–QB4+ K–Q1 Or 40 ... K–N1 41 Q–B5. 41 Q–B5 N–Q2 42 Q–Q5 K–B1 43 R–K4 P–QN4 Otherwise 44 R–QB4+ or 44 R–QN4 will be crushing. 44 Q–B6+ K–Q1 45 Q×QRP Q×RP 46 P–KB4! Finally he conquers the KP. 46 ... Q–B4 47 Q–R8+ K–B2 48 Q–R5+ K–B3 49 P–B4 P–N5 50 Q×NP R–K3 51 P×P 1–0

1104 AK–Rashkovsky:

King’s Indian

White sealed 51 P–QR4 One would think the position held no difficulties for Black: the active position of his king will compensate for thepawn minus.

When the adjournment session began, Rashkovsky made the strongest move 51 ... K–B6 saying that after 52 B–B1 N–Q2 53 P–R5 N–B4 the game would soon be drawn.

Since the threat 52 B–B1 is easily parried, White decided to try a different order of moves ... 52 P–R5
N–Q2? The cunning is justified. Black proceeds to defend against the threat of 53 B–B1 and unexpectedly finds himself in a difficult situation. With 52 . . . K–N5 he could have forced the draw. 53 P–R4 K×P
And here 53 . . . K–N5 preserved drawing chances.

54 N–Q5 Suddenly it is clear that Black’s king cannot approach the pawn on R5 or attack the knight because of N–N6+. 54 . . . N–B4 55 K–K3 K–R5 Naturally Black hastens to win back the RP, thinking that with one remaining pawn he can easily cope with the task in hand.

1105 AK–Sergievsky:

Pirc

1 P–K4
2 P–Q4

The usual move. 2 P–KB4, 2 N–KB3 or 2 N–QB3 would give Black a chance to change his mind and go into a Sicilian with 2 . . . P–QB4.

2 . . .
3 N–QB3
4 QN–Q2

A Sergievsky special which gives the position a kind of Old Indian flavour. If 3 . . . P–B3 4 P–B4 B–N5 5 Q–Q3! leaves Black’s bishop misplaced, and 3 . . . N–B3 4 N–B3 P–K4 5 P×P QN×P 6 N×N P×N 7 Q×Q + K×Q 8 B–KN5 P–B3 9 B–QB4 K–K1 10 0–0–0 led to a clear advantage for White in Donner–Penrose, Amsterdam 1954.

4 KN–K2

Pirc recommends 4 P–B4! as after 4 . . . P–B3 5 B–Q3, or 4 . . . P–K4 5 N–B3, or 4 . . . P–KN3 5 P–K5 Black stays cramped and White has plenty of opportunity to start attacking operations.

4 . . .

P–QN4

An interesting move: we wonder if this position has ever occurred before in the history of chess! However, 4 . . . P–B4 was more natural, since if 5 P–Q5 P–QN4! or 5 B–K3 P×P going into a Sicilian.

5 P–K5!

Of course 5 N×P N×P is no good for White, but Karpov’s move has a subtle result . . .

5 . . .

P×P

6 P×P

N×P

7 Q×Q +
8 K×Q

This is the position that Karpov was after when he played 5 P–K5
and it is a fine example of his understanding of the game. He now has:
(a) exposed the black king and disqualified it from castling;
(b) weakened Black's Q-side because of the absence of the QP and QNP there exist several vulnerable squares which can serve as outposts for the white forces;
(c) achieved a Q-side pawn majority, which means a potential passed pawn.

These three factors are well exemplified in the subsequent play.

8 . . .

P–QR3

Driving off the knight to relieve the pressure on c7. 8 . . . B–N2 9 B–B4 N3–Q2 10 0–0–0 (intending 11 B×N) 10 . . . K–B1 loses time for Black.

9 N5–Q4 B–N2

This piece has a nice diagonal here.

10 B–B4 N–N3

11 0–0–0! K–B1

12 B–Q2!

The idea of this back-step is to exploit some of the weak Q-side squares.

12 . . .

P–K3

13 N–QN3!

Destination a5 to obliterates the dangerous bishop.

13 . . .

N–N5

14 B–K1

A temporary inconvenience, but Black's pieces will later be pushed back as they have no support points.

14 . . .

B–Q3

An attempt to preserve his beautiful QB fails after 14 . . . R–QN1 15 N–R5 B–R1 16 N–B3 R–N3 17 N–R4 and his QRP is lost.

15 P–KR3

Not 15 N–R5 at once because of 15 . . . B–B4 striking at f2.

15 . . .

N–B3

16 N–R5

Progress at last! The elimination of Black's QB will not only give White the two bishops, but will also point up Black's Q-side weaknesses.

16 . . .

R–Q1

17 P–QB4

Denying Black the use of d5, making more room for his own men, and beginning a general mobilization of his Q-side pawns.

17 . . .

N–B5

Black could make a double bishop sacrifice if he is not careful - 17 . . . B–B4?? 18 R×R+ K×R 19 N×B–+

18 N×B

Now is the time for the exchange as g2 is attacked.

18 . . .

K×N

19 K–B2

More preparation for the Q-side pawn advance, and also threatening 20 R×B!

19 . . .

B–K4

Black is still averse to swapping knights and helping White's bishop to f3, so he stops the combination this way.

20 N–B3! (100)

Leaving the knight stranded on f4 and a target for a pawn attack.

20 . . .

R×R

Black's best chance lay in 20 . . . B×N 21 B×B N–K5 since after 22 B–K1 (to keep the bishop pair) 22
. . . R × R 23 K × R R−Q1 + 24 K−B2 N−B4! Black’s knights can deal with the bishops. White would play instead 22 R × R R × R 23 P−KN3! N × B 24 K × N N−N3 25 P−QN4! with a very favourable ending.

21 N × R

Though it seems that Karpov has got stuck in reverse gear the pieces will come bouncing back with a vengeance.

21 . . . R−Q1
22 P−KN3 N−N3
23 B−N2+ K−N3

The king is soon shown to be in a surprisingly ticklish position here.

24 N−B3!

Planning the manoeuvre N−K2, P−B4 and B−B2 +.

24 . . . B−Q5

Only helping White, but White’s plans go through whatever Black does.

25 N−K2 B−K4

If 25 . . . B−B4 26 P−QN4 B−K2 27 P−B4! K−R2 28 B−B2+ K−N1 29 N−B3! K−B1 30 R−QN1 and the creation of a deadly passed pawn will be decisive; White’s method being P−QR4−R5 and then P−QN5.

26 P−B4 B−Q3

27 N−B3!

For the third time this knight has played this move – making this game an interesting twin of the game Karpov lost to Kavalek at Caracas 1970.

27 . . . P−B3 (101)

28 P−QB5+!!

Conjuring tricks are an occasional habit with Karpov, but this one is a beauty.

28 . . . B × QB

29 N−R4+ K−N4
30 K−N3!

Not 30 P−N3 B−N5! and there is no mate. This king move rules out . . . B−N5, covers the knight, and sets up B−B1 mate: Black has no choice.

30 . . . R−Q6+
31 B−B3 R × B+

Forced in view of the threat of B−B1.

32 N × R+ K−R4
32 . . . K−N3 33 N−R4+ K−N4 34 B−B1+ wins the bishop.
33 N–R4 B–B7
34 R–QB1! N–K2
34 ... B×P?? 35 R–B5 mate.
35 R–B2 B–K6
36 B×P N–R4
Black is completely lost and this move enables Karpov to finish in elegant style.

37 B–K8!
Preserving the bishop to weave another mating web.

37 ... N×NP
The condemned man ...

38 K–B4

Threat 39 P–N4 mate.

38 ... N–Q4
39 P–R3 N–N3+
40 K–Q3!! N×N
40 ... N–Q4 41 P–N4+ wins.
41 K×B N–KB4+
42 K–Q3 1–0

 Since if 42 ... N–N3 43 P–N4 is mate, and otherwise 43 P–N4+ K–N3 44 B×N leaves White with an extra rook.

A good illustration of Karpov's fusion of strategy and tactics, and what a lot of mates out of nowhere!

### In One Bound

A. Roshal

Anatoly Karpov obtained the grandmaster norm at the first attempt. This tournament in the capital of Venezuela was in itself interesting, but the most significant aspect of it was the success of the 19-year-old Soviet player.

Anatoly, quite tired after two hard events (prior to Caracas there was Kuibyshev, where Karpov won the title of RSFSR Champion), hurried home to Tula.

The Karpov's flat is still only beginning to resemble the home of a great sportsman. There is a silver cup for winning the World Junior Championship, and behind the glassware, amidst the crockery (a special place, for the time being, not having been devised), are medals. One of them, gold, for excellent work at school.

In almost every home there is a family album; old photographs,
reminiscences and old tales... Nina Grigorievna proudly calls her collection her son’s ‘archives’, but shows it seemingly with the fear that ‘Tolik’ will accuse his mother of immodesty.

It was in his native town in the Urals, Zlatoust, that Anatoly took his first steps in chess. To begin with, when he was seven, he won the third category title, and later on all his sporting ambitions, with the exception of the second category title, at the first attempt. All this time he always worked well at school. His achievements are by no means solely in the field of chess; there were photos of the ten-year-old Anatoly with the Red Banners of the All-Russian Young Pioneer camp ‘Orlenok’, and a document, presented to Karpov in the seventh class of Zlatoust School No. 3, on which it stated that he was awarded the title of ‘honoured pupil’, and so he went down in the annals of the school. All this, together with his success in the Tula technical and mathematical olympics, precisely characterize Anatoly Karpov – a talented youth, a conscientious person, whose name is noted in the roll of honour of the Central Committee of the Young Communist League. Although externally everything is at the summit it is easy to overlook the thoughtful and tense work that has gone into it.

He is no robot, it is his nature to be ‘carried away’. He collects stamps – on the currently most popular themes of the cosmos and sport. Abroad (Anatoly has already been abroad seven times) he always acquires catalogues and more stamps, though at home he spends little time on them. This hobby is of some use for his future speciality – the political economy of foreign countries.

One of the reasons for his recent move from the Moscow State University to Leningrad University was the desire to live nearer his trainer, Semyon Furman, whom he holds in very high esteem and to whom is due no little part of the responsibility for Karpov’s recent ascents.

‘I have already played forty games this year, two of which I lost (in Caracas), which will suffice for the time being. Altogether in the last two years,’ Karpov counts them up precisely, ‘I have played 140 official games with the result +75 −9 =56. Now I have scored 11½ points, but if these points had not amounted to the grandmaster title they would not have been satisfactory.’

Karpov is sober, rational, I might say has a practical outlook on life and on chess. The world’s youngest grandmaster is a position player to the core.
Until the tournament in Caracas, Karpov had only played a total of five games against grandmasters: Gipslis, Krogius, A. Zaitsev and twice against Antoshin (+2 -1 =2). The young player confesses that from the very first he has exhausted his imagination in play against the bearers of the highest chess title.

1201 AK–Arthur Bisguier: R1:

Ruy Lopez

1 P–K4 P–K4 2 N–KB3 N–QB3 3 B–N5 N–B3 4 Q–K2 B–K2 5 P–B3 P–Q3 6 P–Q4 N–Q2 7 0–0 0–0 8 QN–Q2 8 P–Q5 should be played, but for the time being I was not concentrating in full and did not enter the struggle. 8... B–B3 9 P–Q5 N–K2 10 B–Q3 P–B3 11 P–B4 P–QR4 12 P–QN3 P–KN3 13 B–R3 P–B4 14 B–N2 B–N2 15 P–N3 K–R1 16 QR–K1 As long as Black cannot play... P–B4 there is no sense White being in a hurry. 16... N–KB3 17 N–R4 N3–N1 18 N–N2 P–R5 19 P–B4 P–B3 20 N–K3 N–R3 21 B–B3 RP xP 22 RP xP B–R6 23 R–B2 B–Q2 24 Q–B1 Covering h3. 24... N–B2 25 P–B5 P–KN4 26 B–K2 N–N1 And here I began to bustle. Before opening the file it was necessary to put the king on h1 and to double rooks. 27 P–R4 P xP 28 P xP B–R3 29 B–KR5 Q–K2 30 K–R1 B–B5 31 Q–R3 P–N4 32 P xP B xNP 33 N2–B4 B/B5 xN Necessary. Otherwise N–R5 and N3–B4. 34 N xB R–R6 35 B–Q1 N1–R3 36 B–N2 R–R7 B–R5 R–KN1 38 N–Q1 R7–R1 39 N–B3 B–Q2 40 B–B1 QR–N1 41 B–Q1 R–R1 (102) 42 N–K2 R–R7 43 R–N1 R xR + 44 K xR B–N4 45 N–B3 R xR 46 K xR B–R3 47 N–N1 I couldn't understand what to do next. It was only later, after the second adjournment, that we – L. Stein and I – established that in order to realize the advantage it is necessary to exchange queens. 47... Q–N2 48 Q–QB3 N–N1 49 N–Q2 N–K2 50 B–R5 N–N1 51 K–K1 N1–R3 52 K–Q1 B–N4 Now if 53 K–B2 then 53... Q–R3 with the threat... B–K7, after which it would be impossible to punch a hole through Black's position. 53 N–B3 Q–R3 54 N–N5 Still I could not see the right plan. It is interesting that three or four days later Bisguier told me that he could have drawn straight away with 54... P xN 55 P xP B–K1! 56 B–K2 B–N4 57 B–R5 and that afterwards he felt unhappy about thirty superficial moves. When 54 N–N5 was played it was after one in the morning and, I can honestly say, I was totally unable to think anything out. 54... B–K1 55 B–K2 B–N4 56 B–R5 B–K1 Finally getting the chance to adjourn I sealed... 57 N–B3 This position was to be continued at 10:00 a.m. the same morning. 57... B–N4 58 N–K1 Q–R7 59 Q–N2 Q–R4 60 B–Q2 Q–R1 61 Q–B3 Q–R7 62 N–B2 P–B5 63 P xP B xP
64 Q-QR3 After the game had finished my opponent told me that he was fully able to exchange queens here with an easy draw. But I don’t think it’s as simple as that. 64... Q-N8+ 65 Q-B1 Now it’s necessary to exchange queens all the same, or to sacrifice a piece. The grandmaster preferred... the second possibility. 65... Q-N6 66 B/Q2 x N Q-Q6+ 67 B-Q2 Q x KP 68 Q-R3 Much better was 68 N-K3 B-N6+ 69 K-K2 B x QP 70 Q-B7 and then B-QR3. 68... B x P 69 N-K3 Q x RP 70 B x N B x B 71 Q x P Q-R5+ 72 K-K1 Q-R5+ 73 K-Q1 Q-R5+ 74 K-B1 Clearly one could escape the checks with 74 K-K2. 74... Q-R8+ 75 K-B2 Q-R5+ 76 K-Q3 Q-N4+ 77 K-K4 Q-N2+ 78 N-Q5 Q-N8+ 79 K-K3 Q-N8+ 80 K-Q3 B x N 81 Q x BP+ Q-N2 82 Q-Q8+ Q-N1 83 Q-K7 Q-N6+ 84 B-K3 P-R4 $\frac{1}{2} - \frac{1}{2}$ All this long and rather boring game demonstrates the persistence and the exhausting character of the struggle at the very start of an international tournament.

1202 Gedeon Barcza–AK: R2:

English

Karpov was not particularly put out by the draw (with Bisguier) because in between the sessions he had outplayed the experienced Hungarian grandmaster Barcza. In this game he cunningly exchanged the knights; Barcza’s favourite pieces:

1 N-KB3 P-QB4 2 P-QB4 P-KN3 3 P-KN3 B-N2 4 B-N2 N-QB3 5 N-QB3 P-K4 6 P-Q3 KN-K2 7 0-0 0-0 8 N-K1 If 8 P-QR3 to initiate Q-side play then 8... P-B4 is strong. 8... R-N1 Also 8... P-Q3 is worth a try. 9 N-B2 P-QR3 10 R-N1 P-Q3 If 10... P-QN4 11 P x P P x P 12 P-QN4 P x P 13 N2 x P N x N 14 R x N Q-R4 15 P-QR3 is good for White. 11 P-QN4 B-K3 12 P x P P x P 13 N-K3+ P-N3 14 N/K3-Q5 B-Q2 15 B-Q2 N x N 16 N x N N-K2 17 Q-B1? Better 17 P-QR4 17... N x N 18 B x N? B-R6 19 R-K1? (103) Now he should play 19 B-N2.

19... P-QN4! $\mp$ 20 P-R3 Q-Q3 21 B-KB3? And now 21 P-K4 would be preferable. 21... B-K3 22 P x P? P x P 23 B-K3 KR-B1 $\mp$ 24 Q-Q2 P-N5! 25 P x P P x P 26 B-R7 R-N4 27 R/K1-QB1 R x R+ 28 Q x R P-N6 29 Q-B6?? $\mp$ 30 B x Q R-R4 31 B-K3 R-R7 32 B-N5 P-N7 33 K-N2 P-K5 34 P-Q4 B-N6 0-1

1203 AK–Bruno Parma: R3:

Nimzo-Indian

1 P-QB4 N-KB3 2 N-QB3 P-K3 3 P-Q4 B-N5 4 Q-B2

'When I came to the board I couldn’t help thinking that in the next two rounds weaker opponents awaited me. I already had ‘+1’ and there was no necessity to take risks right in the opening. In short, if I am to speak completely frankly, at the beginning I would not have been terribly worried only to draw.'
8 P–QR3 allows Black to equalize with 8... B×N 9 B×B N/B4–K5 as in Kottnauer–Keres, Budapest 1952.

8... P–QN3 9 B–K2 B–N2

9... B–R3 is also possible e.g. 10 P–QR3 B×N 11 B×B R–B1 12 0–0 P–Q4 13 QR–Q1 N/B4–K5 14 B–N4 B×P! Pirc–Bondarevsky, 1948.

10 0–0 P–Q3

Still 10... N/B4–K5 can be played, allowing Black equality: 11 N×N B×N 12 B–Q3 B/K5×B 13 Q×B B×B 14 Q×B (½ Flohr–Najdorf, Budapest 1950) 14... R–B1 15 QR–B1 = Najdorf–Keres, 1952.

11 KR–Q1 P–QR3 12 P–QN3

12 P–QR3? would be a horrible error: 12... B5×N 13 B×B? B–K5!

12... P–K4 13 P–QR3 B/N5×N 14 B×B Q–K2 15 N–K1?

15 P–QN4!? is suggested by Milić: 15... B–K5 16 Q–N2 N–R5 17 Q–N3 N×B 18 Q×N QR–B1 19 QR–B1 KR–Q1!

15... QR–B1 16 QR–B1 N–K5?!

104

'I daresay that it was because of this mistake that Black lost the game, because the knight on e6 did nothing.'

22... P–B4!? is probably preferable.

23 N–K4 N–K1 24 Q–Q5 K–N2 25 P–R3 N–B3 26 N×N K×N

Or 26... Q×N 27 Q–N7

27 Q–K4 K–N2 28 R–Q5 Q–B2

'It is doubtful whether White could succeed in winning by the standard method Q–Q3, P–K4 etc. Sensing this I found what was in my opinion a very interesting solution to the position.'

Milić points out that Black could not avoid this position with 28... P–QN4 because of 29 P–B5 P–B4 30 Q–Q3!

29 P–B4! R–K1

Or 29... P×P 30 Q–Q4+ K–N1 31 P×P with 32 P–KB5 ± to follow.

30 P×P P×P 31 P–B5 R–K3 32 Q–Q3! ± P×P

Not 32... R–QB3? 33 R–Q7 Q–N1 34 R–B1 and wins.

33 P×P

If 33 R5×BP R–Q1!

If 45... Q–B2 46 P–R5! with 47 R–QN1 to come.

46 P–R5 R3–QB3 47 R–B1 P–B3

'Aha, the enemy can't stand the pressure!'

Or 47... R–K3 48 R–QN1 R3–QB3 49 R×P Q–B3 50 R–K8+ K–N2 51 P–K5 and 52 P–K6!

48 Q–Q2 K–B2
1204 Slujsar–AK: R4:
London System

1205 AK–Miguel Cuellar: R5:
Sicilian

1 P–K4 P–QB4 2 N–QB3 N–QB3 3 P–KN3 P–KN3 4 B–N2 B–N2 5 P–Q3 P–K3 6 P–B4 P–Q3 6 ... P–K4!, Botvinnik's idea, may well prove to be best here, provided that Black follows normal praxis and plays 5 ... P–Q3. 7 N–B3 KN–K2 8 0–0 0–0 9 R–N1 9 P–QR3 B–Q2 10 R–N1 R–B1 11 B–Q2 N–Q5 12 N–K2 B–R5 was allright for Black in Spassky–Geller, game 8 Candidates 1968; better still 12 ... P–QN4 and if 13 P–B3 N x N/6 + 14 B x N P–QR4 with a strong initiative. 9 ... R–N1 10 P–QR3 P–QN4 11 B–Q2 P–QR3 12 P–QN4 P x P 13 P x P B–N2 14

1206 Pal Benko–AK: R6:
Queen’s Indian

‘I refrained from the more committal 11 N–R4 and 11 P–B4 from purely practical considerations . . . opposite me sat a theoretical expert.’

11 . . .
12 B–B2
13 N–B1

13 . . .
14 N–N3
15 P–QR4

This is often met with in tournament praxis. Only in place of the last move 15 . . . P–B4 is usual. The Belgian grandmaster tries out a more original continuation.

16 B–Q3 P–Q4 (108)

Now the play takes on a forced character. Another, more reliable, possibility was 16 . . . P–B3.

‘Here I thought up a little trick. . . .’

17 B–N5!

‘It turns out that this move practically forces the win of a pawn.’

The best reply. White gets nothing

17 . . .
18 B×KP B×B
19 N×B P×P
20 N×P P–B4

‘The threat was 21 N–B6.’

After 20 . . . P–R3 21 N–B6 Q–B1 22 N×N+ N×N 23 R×R+? Q×R 24 B×N Q×N! Black holds on, however, after 23 B×N! R×R+
24 Q×R B×B 25 Q–K4 K–N2 26 Q–Q5 Black’s position leaves much to be desired!

21 B×N!

‘O’Kelly, some way back, had not seen that here 21 . . . B×B would be unplayable because of 22 N–B6 and
23 Q×N.’

21 . . .
22 N×B

22 N×BP R×R+
23 Q×R P–N5 (109)

White has won a pawn, however, from being the attacker White is suddenly turned into the defender, which, undoubtedly, acts negatively upon the young player.

24 R–B1

‘Right now I still don’t know precisely how I should have continued, but 24 R–B1 wasn’t much use – that I do know.’

A. Karpov digs up this move which, however, does not fill the prescription of strengthening his position. This is increased by 24 R–Q1, so that on 24 . . . P×P he can recapture with the queen. However, in that case, after 25 . . . R–B1! it is not so easy for White to untie his position. For example: 26 P–QN4 N–K5 27 Q–B4 Q–R5! or 27 Q–B3 N×N 28 N–N3 Q–R5 29 P×N Q×QRP 30 Q–N7 R–B1 31 P–B6 B–K4 32 R–K1 B–Q3 or 28 . . . N–Q2 29 N–B5 R×N 30 P×R Q–B2 31 Q–R8+ B–B1 32 P–B6 N–B4! 33 R–Q8 N–K3 34 R–B8 Q–K4 35 Q×P K–N2 and in both cases White gets nowhere.

There was also a second possibility, namely: 24 N–K2, but in that case White would have had to consider the possibility of the sacrifice of a
second pawn: 24 ... Q–K2!? 25 P × P R–K1 26 K–B1 Q–Q3 or 26 ... N–Q4 with an unclear position.

24 N–B6? was weak because of 24 ... Q–Q3! 25 N–K7 + K–B1 and White loses a piece.

24 ... P × P
25 P × P

This weakening of the Q-side compensates Black for the missing pawn. However, it is not so easy to decide on 25 Q × P, the more so as after 25 ... R–B1! 26 Q–Q2 (26 Q–Q3 N–Q2?) Black would have had the pleasant choice between 26 ... R × N! 27 R × R N–K5 28 N–K6! Q–K1! (28 ... Q–N1? 29 Q–B4 or 28 ... Q–R1? 29 Q–Q5!) 29 N × B Q–KB1 30 Q–Q4 N × R 31 P–R5 N–N6 32 Q–B3 N × P 33 Q × N Q × N with a draw, and 26 ... N–K1 and White is left with nothing but to give back the pawn with 27 N4–N3.

25 ... Q–Q4!

Black centralizes his queen and takes control of the important c4 square.

26 N4–N3

Also after 26 N5–N3 R–QB1 White will find it difficult to re-coordinate his pieces.

26 ... B–B1
27 Q–Q1

The knight cannot leave QB5! After 27 Q–K3 R–B1 28 P–QB4 Q–B3 White must part with his QRP.

27 ... Q × Q+
28 R × Q R–B1!

'After some unfortunate moves by White O'Kelly has obtained the moral right to offer a draw, but a refusal followed.'

29 N × P R × P
30 R–N1

30 N–R5? would have been interesting. Then on 30 ... R–B1 there would follow 31 N–N7! R–B3 32 N–N8 R–N3 33 N–Q7! and the chance appears for White to realize his extra pawn. However, after 30 ... N–K5! 31 P–B3 B–B4 +! 32 N × B N × N 33 R–R1 K–B1 the black king goes to Q2, while 34 N–B6 is bad on account of 34 ... N × P!

30 ... B–Q3!
31 R–Q1

The threat was 31 ... R–B3.

31 ... B–B1
32 R–N1 (110)

32 ... N–Q2?

'I was already prepared to agree a draw, but the venerable grandmaster wants, by taking advantage of the time scramble, to trap my knight. This was all that was necessary for White.'

Black fancies that he is going to trap the knight. He should play 32 ... B–Q3! with a draw.

33 P–R5 R–B3
34 R–Q1! N–K4

Black placed his hopes on 34 ... B–Q3 to defend everything, but at the last moment discovered that 35 N–N4! B × N 36 R × N R–B6 37 P–R6! does not leave him any chance.

35 R–Q5 N–B5
36 N–N8 R–B1
37 N–Q7 B–K2
38 N–N6 R–B3
39 N × N R × N
40 P–R6 R–QR5
41 R–QR5 1–0
1208 Boris Ivkov-AK: R8:
Queen’s Gambit Declined
1 N-KB3 N-KB3 2 P-QB4 P-K3 3 N-QB3 P-Q4 4 P-Q4 B-K2 5
B-N5 0-0 6 P-K3 P-KR3 7 B-R4
P-QN3 8 B-Q3
A quiet and unusual line; White has better prospects with 8 P×P as in
Fischer-Spassky, game 6 1972.
8 . . . B-N2 9 0-0 P-B4 10 Q-K2
BP×P 11 KP×P
11 KN×P is better according to
Taimanov.
11 . . . N-B3
11 . . . P×P 12 B×P N-B3 as in
Portisch-Filip, Budapest 1961, gives
rise to an unclear position with chances for both sides.
12 QR-Q17!
12 P×P should be an improve-
ment.
12 . . . N-QN5! 13 B-N1 P×P 14
N-K5
Of course not 14 Q×BP B-R3.
14 . . . R-B1 † 15 P-QR3 N5-Q4 16
B×N
‘Here Ivkov offered a draw.
‘In the street (the previous day, Karpov and Stein had been taking a
stroll through the town and had met
Ivkov, who, upon seeing Karpov, had called out ‘already a grand-
master!’), in answer to the retort of
the Yugoslav grandmaster I had
observed that much could still
change, and this proved correct.
‘The sporting result, the outcome
of my first games against grand-
masters was very reassuring. Analysis
of the crosstable showed that if I
could avoid defeat against Ivkov,
Panno, Kavalek and Stein (far off—in the penultimate round!) real
chances of first place could even
appear. And I had wanted to get a
draw, offered to me by a participant
in the USSR-World match, up until
the grandmaster lost a pawn, now I
somehow replied ‘No’, but I could
not play safely—my mind was
working hazily. Ivkov, on the other
hand, began to play with great
vigour and within a few moves the
game which brought me not only
my first zero, but also a lengthy de-
pression, was decided.’
16 . . . B×B
‘A mistake. It was essential to
liquidate the dangerous knight.’
17 Q-B2 R-K1
The plausible 17 . . . P-N3 would be
a grave mistake: 18 N×NP
P×N 19 Q×P + B-N2 20 Q-R7 +
K-B2 21 B-N6 + K-B3 22 N-K4 +
winning.
18 Q-R7 + K-B1 19 N-K4 R-B2 20
KR-K1!
White now has good compensation
for the pawn—Black’s king is de-
cidedly unsafe.
‘I didn’t sense the danger, other-
wise I would have played 20 . . . N-
B5.’
20 . . . P-B6 21 N-N3!
‘The terrible combinational motif
N-B5 appears, but even here all is
not lost. It seems to me that 21 . . .
P-N3! gets a draw. Ivkov also, by the
way, thought this. In view of the
threats . . . B-N2 and . . . N-B3 it
seems that White is forced to take
perpetual check after 22 B×P B×N
23 R×B P×B.’
With the idea of 22 N-B5! win-
ning, as the knight could not be
taken: 22 . . . P×N 23 N-Q7+ and
24 Q-R8 mate—Ivkov.
21 . . . N-K2!?
The best defence is 21 . . . P-N3!
e.g. 22 N-N4? B-N2! 23 N×P?? N-
B3 and Black wins! Or 22 B×P!
B×N! 23 P×B P×B 24 Q-R8 +
22 Q-R8 + N-N1 23 B-R7 (111)
23 . . . B×N?
Black has much better here in 23 ... K–K2! 24 N–B5+! P×N 25 N–B6++ K–Q2 26 N×Q P–N3!! (An easy move to overlook!) 27 Q×N! (27 R×R? B×Q 28 R×N and now 28 ... P–B7 29 R–QB1 B×QP 30 N×B B×NP 31 R×BP R×R with an excellent position for Black was pointed out by Ivkov in the post mortem.) 27 ... R×Q 28 B×R P–B7 29 N–B!! (not 29 R–QB1 K×N! 30 R–K2 B–K5=) 29 ... P×R=Q 30 R×Q K–K2 31 B×P==. (analysis by Milić in Informator 10).

24 N–B5! ± ± P×N 25 Q×N + K–K2 26 R×B + K–B3 27 R×P +

27 R×R? allows the tables to be turned dramatically by 27 ... P–B7 28 R–KB1 Q–Q4! + +, or 28 R–QB1 Q×P and wins; while 27 Q×R is also an error: 27 ... Q×Q 28 R×Q P×P! 29 R8–K1 B–K5=! 27 ... K–K3 28 R–K1 + K–Q2 29 R×R 1–0 29 ... Q×R 30 R×P + wins the queen and allows the bishop on KR7 to cover Black’s QB. A most important game.

1209 AK–Oscar Panno: R9:

Sicilian

1210 Lubomir Kavalek–AK: R10:

Ruy Lopez

1 P–K4 P–K4 2 N–KB3 N–QB3 3 B–N5 P–QR3 4 B–R4 N–B3 5 0–0 B–K2 6 R–K1 P–QN4 7 B–N3 P–Q3 8 P–B3 0–0 9 P–KR3 N–QR4 10 B–B2 P–B4 11 P–Q4 Q–B2 12 QN–Q2 N–B3 I knew that Karpov is a positional player. I studied this variation before the game; I had a feeling about it. 13 P×BP P×P 14 N–B1 B–K3 15 N–K3 QR–Q1 16 Q–K2 P–B5 17 N–B5 KR–K1 The alternative is 17... B×N 18 P×B KR–K1 or 18... P–R3?! Igor Zaitsev’s interesting idea which can be found in game 0815. 18 N3–R4! I think this is best. Why should I not be able to go to the wonderful KB5 square twice? And why should I give my opponent good drawing chances with Reshevsky’s 18 B–N5 N–Q2 19 B×B N×B 20 N–N5 when Black has the wonderful move 20... N–KB1! defending the K-side? 18... K–R1 The idea of this move is 19... N–KN1, 20... B2×N and... KN–K2. Then Black will be in control of the important squares d5 and f5. 19 N×B! Just in time! Otherwise Black’s idea will be successful. 19... Q×N If 19... N×N then 20 P–B4 is possible. Now I have a free hand to go to KB5 again. 20 Q–B3 N–Q2 21 N–B5 Q–B1 22 B–K3 I was thinking that Black should play 22... P–B3 23 KR–Q1 N–B4 and then I have R–Q6! as in the game. But let us see what happened. 22... N–B4? 23 KR–Q1? I just picked up my rook without looking at the position, and when I had the rook in my hand I saw the combination 23 N×P! K×N (23... Q×N 24 B×N) 24 B–R6+! K×B 25 Q–B6+ K–R4 26 P–KN4+ B×P 27 P×B+ K×P 28 R–K3 and mate.

Grandmaster David Bronstein once told me he likes complicated combinations better than the easy ones. Let’s follow him! 23... P–B3 24 R–Q6 The only way to get into Black’s position. The next is forced. 24... R×R 25 B×N R–Q8+ 26 R×R Q×B 27 R–Q6! (113)

Twice the same move! Now it is with greater effect. White is already threatening 28 Q–R5! P–N3 29 Q–R4 P–N4 30 Q–R6 and wins. There is no defence after 27... P–N3 28 N–K7!! And after 27... B×N 28 R–Q5! Q–K2 29 P×B the white bishop gets on the h1–a8 diagonal and White has a clear advantage. Karpov makes the best move. 27... B–B2 28 Q–Q1 N–N1 29 R–Q8 Q–B2 After the game Karpov told me that he had the better move 29... Q–KB1 and after 30 N–Q6 the choice between 30... N–B3 which is no good because of 31 N×R N×R 32 N–B7 winning a pawn, or 30... B–R4 after which I planned the queen sacrifice 31 N×R!! B×Q 32 B×B N–B3 33 R–R8 and after White wins the black knight he has a clear advantage. 30 N–Q6! Three times on the same square! White now gets a winning endgame. 30... R×R 31 N×B+ Q×N 32 Q×R+

1211 AK–Gudmundur Sigurjonsson: R11:

Pirc

21 B–K3 21 B × P only opens files for Black: 21 ... KR–Q1 and 22 B × N B × P! followed by 23 ... Q–K6+ wins comfortably, or 22 B–B5?! Q–R3! 23 R–Q1 Q–B5 and again the illnesses of White’s QBP and his Q3 are incurable. Also 22 P–K5 is no good as it allows Black’s knight to jump on to f5. 21 ... P–QB4 22 K–B2 Q–N6 23 R/B1–B1 KR–Q1 23 ... KR–N1!? was worth considering. 24 N–B4 P–Q4 25 Q–B2 Q–N1 26 QR–N1 Q–Q3 27 K–N1 P–Q5 If 27 ... P × P 28 P × P! is a satisfactory antidote. 28 R × Q 1 B–K4 29 N–R3 Q–K3 30 P × P Q × N? Getting side-tracked, 30 ... P × P! was the consistent course. 31 P × B Q × BP 32 B × P Q–N5 + 33 K–R1 R × R + 34 R × R White’s pawns are not a pretty sight, but he can survive. 34 ... R–QB1 The KNP would cause indigestion: 34 ... Q × NP 35 P–K6! P × P 36 R–KN1 and 37 B × N ±. 35 R–KB1! R × B!= Black could have gone wrong with 35 ... Q–K3? 36 Q–B2! ± 36 Q × R Q × KP + 37 K–N1 Q–KN5 + 38 K–R1 Q–K5 + –}

Karpov’s own view of the event appeared in 64; ‘This year I participated a great deal in competitions and already, after the first games of the Soviet Championship final, I felt overworked and very tired. Lack of confidence in my strength gave birth to caution – throughout the first half of the championship I tried not to take risks and made several quick draws. I cannot say that in the later stages I began to play better, it was simply that the other competitors were getting even more tired. In general it is difficult playing in the final. In international tournaments it is always possible to find some weaker opponents, but in our championships there are no outsiders. However, the advantage for me from playing in the tournament is unquestionable – I gained essential experience: you know a débutant is always a débutant!’

Semi–Tarrasch
1 P–QB4 P–QB4 2 N–KB3 N–
KB3 3 N–B3 P–Q4 4 P×P N×P
5 P–K3 P–K3 6 P–Q4 N–QB3
Reaching the semi–Tarrasch. 7 B–Q3
B–K2 8 0–0 0–0 9 P–QR3 N–B3 Or
9 . . . P×P 10 P×P B–B3 11 B–K4
Q–Q3 12 R–K1 R–Q1 13 B×N
P×B 14 N–Q5 Q–B1 15 P–R3 P–
QR3 16 N–B3 Q–Q3 = Averbakh–
Fuorman, 26 USSR Ch 1959. 10 P×P
B×P 11 P–QN4 Obtaining a
slightly different position from 11
B–N2 Q–K2 14 N–K4! Flohr–
Levenfish, Moscow 1936. 11 . . . B–
Q3 12 N–K4 N×N 13 B×N Q–K2
14 B–N2 P–B4 15 B×N P×B 16
B–K5 B×B 17 N×B

Anatoly continued 17 . . . P–B4 and
White replied with 18 R–B1! Pre-
paring to launch an invasion into
the depths of enemy territory before
Black has time to mobilize. 18 . . .
P×P 19 N–B6 Q–B3 20 P×P B–R3
21 R–K1 B–N4! By placing the
bishop here, in preference to b7,
Black denies White the opportunity
of playing P–QN5 when 22 . . .
B×N 23 P×B! or 22 . . . P–QR3 23
P–N6! both allow White a dangerous
passed pawn. 22 Q–Q6 Threatening
23 N–Q4 winning the KP. 22 . . .
B×N 23 R×B Now Karpov must
hold on for his life. 23 . . . QR–K1 24
P–N3 Ruling out all possibilities of
. . . P–B5 or back rank mates. If 24
P–N3 R–N2! gives Black adequate
counterplay. 24 . . . Q–K2 So that if
25 Q×Q R×Q 26 R–Q1 R–N1 etc.
25 R–Q1 R–B2 If 25 . . . Q×Q 26
K4 P–N5 R–N1 28 R–Q5 keeps the pressure on. 26 Q–B5!
Aiming for 27 R–Q6 and since 27
. . . R–Q1 28 R×R+ Q×R 29
R×P loses a pawn, Black is obliged
to exchange queens thereby giving
White a passed pawn. 26 . . . Q×Q
27 P×Q R–N2 To answer 28 R–Q6
with 28 . . . K–B2. 28 R–R6 To
free the way for the QBP. 28 . . .
QR1 29 P–B6 R2–Q2 Now if
White tries 30 R–Q6 K–B2! 31 R–
Q7+ R×R 32 P×R R–Q1 33
R × RP K–K2 equalizes. 30 R–Q7! The best way to preserve his initiative, since it would be very bad for Black to play 30 . . . R × P 31 R–N6! R × P! 30 . . . R × R! Karpov has seen the full ramifications of this move, realizing that he can hold the inferior endgame which results. Since Averbakh is one of the world's greatest experts in the realm of endgame theory, Karpov’s conduct of this position is all the more commendable. 31 P × R R–Q1 32 R × RP 32 R × KP R × P 33 R–QR6 is also insufficient to win. 32 . . . K–B2 33 K–N2 K–K2 34 K–B3 R × P Now material is level, but White places great hopes on his more aggressive king. 35 R × R + K × R (127)

1312 AK–Vladimir Bagirov:

R12: 12 + 14 December:

Alekhine

P × P 19 NP × P R–R6 = 15 P–K4! P–QB3! 16 P–QN4 NP × P 17 NP × P Q–R4 when 18 N × P!! was both necessary and strong. 13 . . . N–B3 (128)

Now the centre is well under control full attention can be given to creating that passed pawn. 28 . . . N–Q1 29 P–N5 P–N4 30 P–QR4 N–N3 31 Q–R1! Q–N2 32 KR–K1 Q–N2 33 N–B5 R–B2 34 P–R5 R–K2 35 N–R6! R–R1 36 B–B1 N–B2 37 N–B7 R–Q1 38 R–B6 N–B1 Karpov has outplayed his opponent right from the opening (and Bagirov has written a book on Alekhine’s defence!), having combined the advance of the a+b pawns with an ideal posting of his pieces in readiness for the final push. 39 P–N6 P × P 40 P–R6! N–R3 41 R–B1 N–N5 42 P–R7 N × KP 43 R6–B2 N–B5 44 P–R8=Q The single-mindedness with which Karpov has cashed in on his pawn majority illustrates how dangerous this weapon is in his hands. 44 . . . R × Q 45 N × R P–N4 46 R–R2 R–N2 1–0

QB3 (135)

1319 Vladimir Doroshkevich–AK
R19: 23 December:

Nimzo–Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3 3
N–QB3 B–N5 4 Q–B2

A move which used to be played
frequently in years gone by, though
nowadays 4 P–K3 is usual. The idea
is to recapture on QB3 with the
queen if Black exchanges, thereby
avoiding doubled pawns. Though
from QB2 the queen observes K4 it
leaves the QP unprotected and also
can itself become an object of attack
by Black’s minor pieces or rooks
should the QB-file become opened.
4 . . . 0–0

A solid system; the alternatives
are 4 . . . N–B3, 4 . . . P–Q4 and 4

5 P–QR3

The best; 5 P–K4 is answered by 5
. . . P–Q4 6 P–K5 N–K5. Dorosh-
kevich has also tried 5 B–N5 here,
e.g. against Giterman, Riga 1968,
when he got a good game after 5 . . .

5 ... B×N + 6 Q×B P–Q3

6 ... N–K5 7 Q–B2 P–Q4 is another, more complex, line.

7 B–N5 QN–Q2 8 P–K3

8 N–B3 would transpose into Doroshkevich–Smyslov, Riga 1968, when the ex-world champion equalized without too much trouble after 8 ... P–QN3 9 P–KN3 B–N2 10 B–N2 Q–B1 11 B×N N×B 12 0–0 P–B4 13 KR–Q1 R–Q1 and a draw was soon agreed. Here Doroshkevich plans a different development.

8 ... P–QN3 9 B–Q3 B–N2 10 P–B3

Stopping the attack on KN2 and getting control of the important K4 square.

10 ... P–B4!

11 N–K2 R–B1

Shadowing the white queen.

14 P×P

14 Q×P N–K4 15 B–N1 B×P! is good for Black.

14 ... P–QN4!

Taking full advantage of the pin to fix White with weak pawns.

15 P–QN3

If 15 Q–N3 P×P 16 B×P Q–R4+ 17 N–B3 N–N3 18 B–Q3 N/B3–Q4 exploiting the weaknesses in White’s camp.

15 ... P×P 16 P×P (136)

Now White has the celebrated ‘hanging pawns’ – the QB and QPs in their present state can only be pro-
tected with pieces and Black should try to cash in on this. He will try to exchange pieces whenever possible so as to weaken the support for the hanging centre; he will also use his pieces to put pressure on the pawns – possibly forcing an advance which would further weaken them. As for White, he must try to use the space advantage conferred by his centre pawns to create attacking chances, having the possibility of a breakthrough with P–Q5 or P–KB4–B5.

However, the present position is clearly in Black’s favour and rather unusual in that Black still has his QP, having used the QNP to set up the hanging pawns: usually in these Nimzo–Indian type positions it is the other way around. This means that Black has:

(a) more control of the central squares;
(b) more room on the Q-side in which to manoeuvre, since a pawn on QN3 would only have a restricting effect on Black’s mobility.

16 ... B–R3!

The pressure begins.

17 B×N

A rather surprising exchange but after 17 0–0 B×P! 18 B×B P–Q4 19 Q–N4 P×B 20 R×P R×R 21 Q×R Q–R4 Black has a clear advantage because of the isolated pawns on d4 and a3 and the consequent weak...
squares which will serve as beautiful outposts for Black’s marauding knights. So White realizes that his QB is inferior to the opponent’s knight and therefore takes the opportunity to exchange.

After 17 0–0 N–Q4? 18 B×Q N×Q 19 B–K7! is good only for White.

17 ... Q×B

17 ... N×B intending 18 ... N–Q4 was also good, White would play 18 Q–Q2 Q–Q2 (to go to QR5) 19 Q–R5 R–B3 which is still better for Black.

18 Q–R5

Getting away from the hypnotic gaze of the black rook, and hitting the bishop.

18 ... N–N1!

Not only protecting the bishop, but preparing a great future for this black stallion. 18 ... R–B3 allows 19 B–K4.

19 R–B3

Black’s threat of 19 ... P–Q4 is met by protection of the KB so as to break the pin on the QB.

19 Q–Q2 with the same idea is met

by 19 ... N–B3! 20 B–N1 (20 0–0 N×P!) 20 ... P–Q4! 21 P×P (21 P–B5 B×N wins the QP) 21 ... P×P 22 R–Q1 KR–K1 23 B–Q3 N×P! 24 B×B Q×B wins.

19 ... P–Q4! (137)

The most forceful, although 19 ... P–K4 came into consideration e.g. 20 P×P Q×KP or 20 P–Q5 R–B4 and the QBQ remains under fire.

20 P–B5

If 20 P×P B×B 21 R×B Q–N4 22 0–0 (22 Q–Q2 Q×NP 23 R–N1 Q×RP or 22 P–B4 Q×NP 23 R–N1 Q×Q P) 22 ... R–B7! keeps a sharp initiative. As played White gets positionally crushed by simple, strong, Capablanca–like moves.

20 ... B×B 21 R×B N–B3

From now on Black goes like clockwork.

22 Q–Q2

22 Q–R4 allows 22 ... P–K4! 23 P×P N×P 24 R×P N×P+! 25 P×N Q×P or 24 R–B3 KR–K1! is very strong e.g. 25 Q×P N–B3!

winning a piece.

22 ... R–N1 23 0–0 R–N2 24 P–B4

If White tries to combat the coming rook invasion he runs into trouble e.g. 24 R–B1 R1–N1 25 R3–B3 R–N7 26 R3–B2 R×R 27 R×R (27 Q×R N×P) 27 ... R–N8+ 28 K–B2 (28 R–B1 R×R+) 28 ... Q–R5+ wins. So White tries a desperate demonstration on the K-side.

24 ... R1–N1 25 P–R3

Making a flight square for the king.

25 ... R–N7 26 Q–K3

26 Q–Q1 R–R7 intending to double rooks on the seventh rank is tremendous for Black.

26 ... N–R4

It’s getting to be a jigsaw puzzle and Karpov is having no problems making the pieces fit!

27 N–N3 N–B5 28 Q–K1

Not 28 Q–B3 N–Q7.

28 ... R1–N6

This is the climax of the black offensive; now pawns start disappearing fast.

29 R×R
Or 29 R1–B3 R–N8.
29 ... Q × Q P + 30 K–R2 R × R
White could resign – the rest is just
cleaning up.
31 P–B5 N–K6 32 R–B3 Q × P 33
P × P P × P 34 N–R5 Q–Q3 + 35 K–
N1
35 R–N3 N–B4 =± 35 ... P–Q5
Covering the knight 36 R–N3 R–N2
37 Q–Q2 R–N8 + 38 K–B2 Or 38
K–R2 N–B8 + winning the queen
also.
38 ... R–KB8 + 39 K–K2 Q–R3 +
40 Q–Q3 R–K8 +! 0–1 A fine
exhibition by Karpov, who carried
out the anti-hanging pawns plan,
outlined in the note to White’s six-
teenth move, in text-book fashion.

The Soviet Union won with their accustomed ease – this was their thirteenth victory in seventeen attempts (they have been second on three occasions. There was also their 1963 'disaster' when they finished fourth). Karpov participated as the third board (four boards and two reserves), the full team being Tukmakov, Balashov, Karpov, Podgayets, Kuzmin and Razuvayev. Round by round results were as follows:

**Preliminaries**

1 board 3 v. Silva 1 USSR 3 Peru 1
2 board 2 v. Torres 1 USSR 3 Puerto Rico 1
3 Karpov free USSR 3 Ecuador 1
4 board 3 v. Markula 1 USSR 4 Austria 0
5 USSR free

**Finals**

1 USSR free
2 Karpov free USSR 4 Brazil 0
3 board 2 v. Camacho 1 USSR 4 Puerto Rico 0
4 board 2 v. Amos 1 USSR 4 Canada 0
5 Karpov free USSR 4 Iceland 0
6 board 3 v. Rogoff 1 USSR 3½ USA ½
7 Karpov free USSR 2½ Israel 1½
8 board 1 v. Wittmann 1 USSR 4 Austria 0
9 board 3 v. Ruiz ½ USSR 3½ Colombia ½

It was only in the last round that Karpov missed sharing the absolute best result of the event (Razuvayev had already scored 7/7), but his score of 7½/8 (93.8%) was the best score by a board three and was equalled only by Kuzmin (with an identical score).

'Karpov played ... very effortlessly and with elegance. Normally he was
the first to finish his game, not using up more than an hour on the clock. It seemed that his opponents did not understand the thinking of the young grandmaster. In my opinion Karpov possesses a very original and subtle chess style, and it would be difficult to name his chess predecessor. That is always the sign of a great talent.” Grandmaster Aivar Gipslis in his report on Mayaguez in 64.

1501 Amos–Karpov: FR4:

Sicilian

1 P–K4 P–QB4

Karpov added the Sicilian to his bag of openings in late 1970, before that 1 . . . P–K4 was his habitual answer to the king pawn opening.

2 N–KB3 P–K3
3 P–Q4 P×P
4 N×P N–QB3

This variation is named after Soviet grandmaster Mark Taimanov who unearthed it from the distant past and revitalized it; in the 1962 USSR Championship he scored an amazing 7/9 with his system – no wonder it became popular!

5 N–QB3

In the first and sixth games of the Fischer–Taimanov Candidates match Fischer had played 5 N–N5 P–Q3 6 B–KB4 P–K4 7 B–K3 N–B3 8 B–N5.

5 . . . P–QR3

6 P–KN3

6 . . . KN–K2!

It was because of White’s possibility of advancing his KP, both striking at KB6 and opening the diagonal for the KB, that Taimanov realized that the KN was better developed here.

This innovation moreover introduces the idea of playing 7 . . . N×N to be followed by 8 . . . N–B3 and . . . P–QN4 and Q-side mobilization. Against Holmov in the 1970 USSR Championship, Karpov played an immediate 6 . . . N×N 7 Q×N N–K2 8 B–KB4 N–N3 9 B–Q6 B×B 10 Q×B Q–K2 11 Q–N6 when White had a clear initiative. In the 1972 Student Olympiad at Graz, against Albano, Karpov played a slightly different manoeuvre in a similar position and got the better game. In that position the white KB was already on N2, while the whiteQN was unmoved and play continued 6 . . . N×N 7 Q×N N–K2 8 0–0 N–B3! 9 Q–B3 P–Q3 10 B–K3 B–Q2 11 N–Q2 R–QB1 12 P–QR4 P–QN4 with active Q-side counter-play. More critical, however, would have been 8 B–B4 N–B3 9 Q–Q2.

7 N–N3

7 N–Q4–K2, with the same motive of preventing Black’s freeing knight exchange, came unstuck in Veselovsky–Karpov, USSR Team Ch 1971, when after 7 . . . P–QN4 8 P–QR3 B–N2 9 B–N2 N–B1 10 0–0 B–K2 11
p-B4 0-0 12 K-R1 N-Q3! Black soon got a grip on the position.

After 7 B-N2 N x N 8 Q x N N-B3 9 Q-Q1 (9 Q-K3 is better) 9 . . . B-K2 10 0-0 0-0 11 B-K3 Q-B2 12 N-K2 P-QN4 13 Q-Q2 B-N2 14 P-QB3 N-K4 15 B-B4 P-Q3 16 P-N3 KR-Q1 17 QR-B1 QR-B1 Black had achieved a total development with no problems, Cortlever-Taimanov, Wijk aan Zee 1970.

7 B-K3 is an interesting suggestion from Keres: 7 . . . N x N 8 Q x N N-B3 9 Q-N6! Clearly the theory of this line is still being created (largely by Karpov) and we must wait and see what the future holds . . .

7 . . . N-R4!

Another original contribution by Karpov for the next editions of Euwe, Pachman, Boleslavsky etc. Black clears QB3 for his KN whilst easing his defensive task should White exchange knights.

8 B-N2

8 Q-R5 is best met by 8 . . . P-QN4!

8 . . .

8 N2-B3

9 0-0 P-Q3

9 . . . N x N 10 RP x N allows White the open a-file as compensation for the doubled pawns, which makes any . . . P-QN4 rather more awkward.

10 N-Q2

A serious attempt to exploit the rather off-side position of the black QN – by leaving it dangling in midair. Keene, against Karpov at Hastings 1971-2, played more orthodoxy with 10 N x N Q x N 11 N-K2 B-K2 12 P-N3 0-0 13 B-N2 B-Q2 14 P-QB4 KR-Q1 15 P-QR4 QR-B1 16 B-QB3 Q-B2 with a balanced game: Black is not so congested as he would have been if the pair of knights had not been swapped.

10 . . . B-Q2

Q-side development takes priority in this situation, since if now 11 P-QR3 (to win the knight with 12 P-QN4) then 11 . . . R-B1! 12 P-QN4 N-K4!

11 P-N3

The best way of activating the QB.

11 . . . B-K2

12 B-N2 R-QB1!

12 . . . 0-0? 13 P-QR3 P-QN4 14 P-QN4 N-B5 15 N x N favours White.

13 N-K2

Now if 13 P-QR3 N-K4 14 P-B4 N/K4-B5! 15 P x N Q-N3+ or 14 K-R1 Q-N3! 15 R-QN1 P-KR4! with excellent piece-play for Black in both cases.

13 . . . 0-0 (146)

Protecting the KNP!

146

W

14 P-QB4?

14 P-QR3 still doesn’t click – 14 . . . N-K4! 15 P-KB4 N-N5 16 R-B3 B-KB3! 17 B x B P x B! (threatening to win the exchange with 18 . . . Q-N3+ followed by the knight check at KB7) 18 N-KB1 Q-N3 + 19 Q-Q4 (19 N-Q4? P-K4) 19 . . . Q x Q + 20 N x Q P-K4! and Black is winning, e.g.:

(a) 21 N-B5 B x N 22 P x B P-K5 winning the rook.
(b) 21 P-QN4 P x N 22 P x N R x P.
So 14 P–QR3 is bad, but the text is worse: the Q-side pawns soon come under fire from their black counterparts, and the weak squares in White's camp will also be ravaged by enemy artillery.

14 ... P–QN4!
Goodbye 'Maroczy Bind'.

15 P × P

The threat to give White a lousy pawn structure by 15 ... P × P could not be met by 15 R–B1 because of 15 ... N–N5! e.g. 16 B–QB3 N × RP 17 B × N Q × B 18 R–R1 B–KB3 19 P–QN4 Q–R6 or 19 N–KB3 B × R 20 Q × B P × P.

15 ... P × P

16 N–KB3

Or 16 P–QR3 P–N5! as in the game.

16 ... P–N5!

Putting a block on any ideas of Q-side expansion by White – it is Black who is the invader.

17 P–QR3?

Further weakening his pawns – Karpov soon shows his opponent why this attempt to gain Q-side play is all wrong.

17 ... R–N1!

18 P–QR4

18 P × P N3 × P with forthcoming pressurization of b3 as well as some mighty activity with his knights and bishops leaves Black dictating the proceedings – so Amos makes the best of a bad job and seals the Q-wing.

18 ... P–K4!

Preparing 19 ... B–K3 hitting the invalid white QNP.

19 N–Q2

Anticipating the bishop move, which could now be countered with 20 P–B4 P × P 21 N × P B–B3 22 N × B P × N 23 B × B with some hope for White.

19 ... B–B3!

Directed against White's potentially freeing P–B4 – the point is seen later.

20 R–B1

20 ... B–K3

21 P–B4

If White tries to take it lying down with non-committal moves his opponent will trample all over him with ... P–Q4.

21 ... P × P!

Now the point of Black's 19th is seen – his queen reaches the battlefront.

22 B × B Q × B

23 N × P

23 ... KR–B1

Contesting the open QB-file and protecting his knight on QB3, which would be lost in a variation such as 23 ... Q–Q5 + 24 K–R1 B × P 25 N × B Q × Q 26 KR × Q N × N 27 R × N – but now this variation is on.

24 N–Q5

Shielding the QNP from the glare of Black's QB. After 24 N × B Q × N the poor pawn would be in real trouble e.g. 25 N–B4 N × N 26 R × N N–R4 and Black will soon have a deadly passed pawn.

24 ... Q–Q5 +

25 K–R1

If 25 R–KB2 N–K4 and the threat of ... N–Q6 is decisive.

25 ... K–R1!

Stopping all possibilities of a knight fork at his K2.

26 Q–K2
Trying to get himself organized. If 26 N-KB3 Q×Q 27 KR×Q N×P and White doesn’t have 28 R×N R×R because 29 N-K7 isn’t check anymore.

26 . . .  
N-K4

Black is now ready to open up with all guns into White’s defenceless territory.

27 P-R3

After 27 N-KB3 N×N 28 R×R+ R×R 29 Q×N R-B7! or 28 Q×N Q-Q7! is overwhelming.

27 . . .  
P-R3!

Surprisingly enough Black has to watch out against back rank mates. 27 . . . Q-N7 28 R-QN1 Q-B7 was not so clear, but Karpov gives 28 . . . Q-R7 29 R-R1 Q-B7=.

28 KR-Q1

Hoping to get away with 29 N-QB4 but . . .

28 . . .  
N-Q6! (147)

0-1

White is helpless. After 29 R×R+ R×R (with the idea of 30 . . . N-B7=) and:

(a) 30 K-R2 R-B7 31 N-KB3 (else 31 . . . N-N7) 31 . . . Q-N7! 32 Q×N R×B+ 33 K-R1 R×P wins e.g. 34 Q-Q2 (or 34 R-Q2 R×N!) 34 . . . Q×Q 35 N×Q B×N 36 P×B R-Q6! 37 K-N1 N×P.

(b) 30 R-QN1 R-B8+! 31 R×R (31 B-B1 R×R 32 N×R N-B7+) 33 K-R2 N×KP) 31 . . . N×R 32 Q-N5 (32 Q-Q1 N8×P) 32 . . . Q×N7 33 Q×N Q-K8+ 34 K-R2 N-K7 35 Q-N6 Q×P+ 36 K-R1 B×P 37 N-K3 B×B+ 38 N×B Q-R6 mate.

(c) 30 R-KB1 R-B7! 31 N-KB3 Q-N7 32 Q×N R×B wins: 33 P-N4 R-N6 or 33 N×P B×RP and it’s all over the mating.

1502 AK—Kenneth Rogoff:
FR6:

English

1 P-QB4 P-K4 2 N-QB3 N-KB3 3 P-KN3 B-N5 4 B-N2 0-0 5 P-Q3 P-B3 6 Q-N3 B-R4 7 N-B3 P-Q4 8 0-0 P-Q5 9 N-QR4 QN-Q2 10 P-K3 P×P 11 B×P R-K1 12 P-QR3 B-B2 13 QR-Q1 B-Q3 14 P-Q4 P×P 15 N×P B-B1 16 Q-B3 Q-K2 (148)

Having played the opening inaccurately Rogoff found himself in this very awkward predicament, being very much pinned down. Play continued 17 KR-K1 which threatens to crush Black after 18 B-B4 Q-Q1 19 B×P! P×B 20 N×P R×R+ 21 R×R B-N5 22 P×B Q-B1. So Rogoff decided that he had better run with the queen to the K-side.

17 . . . Q-K4 18 P-QN4! Taking a few more squares away from Black.
18 ... Q-KR4 19 P-R3! A web is being woven to catch the displaced person on h5. 19 ... N-N3 20 N×N P×N 21 P-N4 Q-N3 (149) If 21 ... Q-R5 22 N-B3 does the necessary, while if 21 ... B×KNP 22 P×B N×P 23 B-B4 stops any nonsense.

22 B-B4! Subtly played, for if now 22 ... N-K5 23 Q-B2 N-Q3 24 R×R N×R 25 B-K4, or 22 ... P-R4 23 P-KN5 R×R+ 24 R×R N-R2 25 B-K4 P-KB4 26 B-N2! when 26 ... N×P loses to 27 Q-KN3! and 26 ... B-Q2 allows 27 N-B3! with a winning position. 22 ... B-Q2 23 N-B3! R×R+ If 23 ... P-R3 24 N-K5 wins. 24 R×R N-K1 If 24 ... P-R3 25 N-K5 Q-R2 26 N×B N×N 27 B-K4 P-N3 28 Q-Q4 P-KB4 (28 ... R-Q1 29 B-B7) 29 R-Q1 gives White an overwhelming game. 25 Q-Q2! R-Q1 Black loses a piece after 25 ... B-Q3 26 B×B Q×B 27 Q×Q N×Q 28 R-Q1. 26 N-R4 1-0 After 26 ... Q-B3 27 P-KN5.

1503 AK–Wittmann:

Deuel, in 64, point out that 18 Q–N3 is also not bad, e.g. 18...N–R4 19 Q–N4 and not 19...N×P on account of 20 R×N P×R 21 N–Q5. 18...QR–Q1 19 P–QN4! ± P–QR4 Or 19...P×P 20 P–N5 P×P 21 P×P B–Q2 22 N–Q5 and White wins. 20 P–N5 B–Q2 21 P–B5 21 N–Q5!? is also possible, for example 21...N×N 22 P×N±. 21...B–B1 22 N–Q1 (152) Gufeld again suggests 22 N–Q5!?

1602 AK–Yanis Klovian:

Ruy Lopez

In their game at Daugavpils, Karpov gained the initiative after 9 N–Q2 B–Q3 10 P–QB3 0–0 11 Q–N3 + K–R1 12 N–B5 B×N 13 P×B N–R5 14 Q×P Q–Q2 15 Q–N3 N×BP 16 N–B4. This time White tries another plan.

9...B–Q3 10 N–B5 0–0 11 P–KB4 Q–K1

In the game Gipslis–Savon, 37 USSR Ch 1970, Black played 11...B×N 12 Q×B Q–K2 13 N–Q2 QR–Q1, however after 14 QR–K1 White obtained a not inconsiderable advantage. Klovian’s move also fails to save Black from difficulties.

12 N–Q2 N–K2 (153)

13 N×N +?

An incorrect decision. Now everything in Black’s position is in order; the bishop pair fully compensate for the presence of his doubled pawns.

After 13 Q×Q R×Q 14 N×B P×N 15 N–B4 Black’s position would have been critical; 15...P–Q4 is weak; 16 N–N6 R–N1 17 P–B5 with the threat of 18 B–B4, while after 15...R–Q1 both 16 B–N6 R–Q2 17 B–R5 and 16 KR–Q1 are possible.

Black already has the initiative. With his next move White intends to start an attack on the black king, but at the same time weakens the position of his own king.

White’s position is critical; Kar- pov’s tactics have not demonstrated their value.

Here the game was adjourned. On home analysis it became clear that Black’s win is simply a question of time, since, after a series of checks, he captures the QRP and forces White to play an utterly hopeless queen ending.

42 . . . Q–K8 + 43 K–R3 Q–B6 + 44 K–N4 Q–B5 + 45 K–R3

On 45 K–R5 follows 45 . . . Q–B5 and White, in order to save himself from the mate, must part with his knight.

The last move of ‘homework’.

60 N–B3

This loses quickly, but it is clear that White had not the slightest desire to play the queen ending after 60 Q × P B–B8 + 61 N–N2 Q–K6 + !

62 K–R2 Q × P + 63 K–N1 B × N.

60 . . . B–B8 + 61 K–R4 Q–N7 0–1

Sicilian

1 P–K4 P–QB4
2 N–KB3 P–K3
3 P–Q4 P×P
4 N×P N–QB3

Taimanov’s system has gained a great deal of popularity as a result of Taimanov’s own experimentation with it. The fact that he plays it almost invariably when facing 1 P–K4 does, however, make preparation a lot easier for his opponents. Taimanov puts his faith in the fundamental soundness of his system, and on the whole this faith has been justified.

5 N–N5 P–Q3
6 B–KB4 P–K4
7 B–K3 N–B3
8 B–N5

With some loss of tempo, White aims to establish control over Q5. This variation also occurred in the second and sixth games of Taimanov’s Candidates match with Fischer earlier in 1971. In the second game Taimanov tried 8 . . . Q–R4+, in the sixth he continued as he does here.

8 . . . B–K3
9 N1–B3 P–QR3
10 B×N P×B
11 N–R3 N–K2

In the first Fischer–Petrosian match game, Buenos Aires 1971, Black played 11 . . . P–Q4! and obtained an excellent position after 12 P×P B×N 13 P×B Q–R4 14 Q–Q2 0–0–0 15 B–B4 KR–N1. Unfortunately for Taimanov, however, Petrosian’s innovation, dreamed up by Suetin, was not unveiled in Buenos Aires for another fifteen days!

12 N–B4!

The knight is recentralized with the immediate threat of establishing a bind on Q5 by 13 N–K3, so Black must free himself at once.

12 . . . P–Q4
13 P×P N×P
14 N×N B×N
15 N–K3

White is heading for an ending in which his Q-side majority will be superior to Black’s on the K-side because of the doubled KBPs. White’s first aim is to eliminate the dangerous black bishop-pair.

15 . . . B–B3
16 B–B4

After the sharp 16 Q–R5 Q–R4+ 17 P–QB3 0–0–0 Black gets strong counterplay.

16 . . . Q×Q+
17 R×Q R–B1

</tbody>
</table>
18 B–Q5!  B x B
19 R x B  K–K2

White now has a small but clear endgame edge, based mainly on the fact that Black cannot exchange all the rooks on the Q-file without allowing White a won knight v. bishop ending in which Black's majority could be permanently blockaded on dark squares. It is strategically essential for Black to get his pawn to KB4 if he is to survive at all, so he brings his king up to help it to advance.

20 K–K2
If 20 P–KN4 then 20 ... P–KR4.
20 ...
21 R1–Q1  P–B4 (162)

With the threat 22 ... P–B5 to win the QBP, and if 22 P–QB3 then still 22 ... P–B5 and the knight has no good square.

22 P–KN3!  P–B5
22 ... P–B3 allows 23 P–QB3 with a clear advantage.
23 P x P  P x P
24 N–N2
24 N–N4? allows 24 ... P–B3 with the threat of 25 ... P–KR4
24 ...
25 K–B3

Now White's static advantage of the better pawn structure is converted into the dynamic one of attacking chances against the exposed black king.

25 ...
B–B4

Not 25 ... B–R3? 26 R–Q6+, nor has he time for 25 ... R–NP? 26 N x P + K–B3 27 R–K1 and Black must surrender material to avoid mate.

26 N x P +  K–B3
27 N–Q3  R–QB1!

Black is making strenuous efforts to make his pieces co-operate, and should be able to hold the position in spite of the superior tactical agility of White's minor piece.

28 R–Q7  P–N4?

This move weakens the QRP. A more solid defence was 28 ... P–N3 to support the QRP on QR4 if necessary.

29 R–K1  K–N2
30 R–K4
30 R–K6 allows Black counterplay by 30 ... R–Q7! Since 30 ... R–Q7 now loses to 31 N x B, Black must look for some other way of handling the threats to his loose pawns on KB2 and QR3.

30 ...
R–B5

This loses a pawn, but he has nothing better, thus 30 ... R–B3 31 R–KB4 R–B3 32 R x R K x R 33 R–B7 wins.

31 N–K5!

Much stronger than 31 R x R P x R 32 N–K5 K–B3.

31 ...
32 K x R  K–N1
33 P–B4!

White could throw away his winning chances here by 33 R x P? B–Q3! when Black forces the transition to a rook ending in which there will be terrible slaughter along White's second rank.

33 ...
B–B1

33 ... R–B1?! is probably too passive to hold any hopes for Black, and 33 ... P–B3? 34 N–N4 R–B3 35 K–B5 only makes matters worse. Beilin
felt that 33 ... R–K1 was essential, though not very promising.

By keeping his rook active, Black hopes to mop up some pawns, but his
king is about to get into trouble again. With the minor pieces on the
board White always maintains attacking chances.

34 N×P R–B7
35 N–N5

With the idea of 36 R–Q8 and 37 N–K6 to follow.

35 ... B–R3
36 N–K6! R×RP

Furman points out that 36 ... R×NP with the idea of sacrificing the
bishop as in the game, and then capturing the QRP to obtain two
united passed pawns, fails to 37 K–B5 B×P 38 K×B R×QRP 39

37 K–B5

The threat of 38 K–B6 now forces
Black to give up his bishop, since 37 ... R–N7 loses to 38 R–Q8+ (also
38 K–B6 R–N3 + 39 K–K7 K–R1 40

37 ... B×P (163)

38 K×B?

Here Karpov misses an easy win
with 38 N×B R×P 39 K–B6 P–R3
40 R–KN7+ K–B1 (40 ... K–R1 41
N–N6 mate) 41 N–K6+ K–K1 42
R–K7 mate.

38 ... R×P
39 R–KN7+ K–R1
40 R–R7

Unfortunately for Black, White
can preserve his last pawn.

40 ... P–KR4
41 R×P P–N5
42 N–Q4

Just in time to stop 42 ... P–N6.

42 ... R–N7
43 K–B3

Here it would be simpler to play
43 N–B5, aiming for the same
position as in the game.

43 ... R–Q7
44 K–K3 R–QN7
44 ... R–R7 might be slightly
better.

45 K–B4 R–Q7
46 N–B5 R–QN7

Black could prolong the game
somewhat by 46 ... K–N1.

47 K–N5 P–N6

Or 47 ... K–N1 48 K–N6 R–
N7 + 49 K×P.

48 R–R6+ K–N1
49 K–B6 1–0

1805 AK–Karen Grigorian:
R5: 20 September:
Alekhine

1 P–K4 N–KB3
2 P–K5 N–Q4
3 P–Q4 P–Q3
4 N–KB3 P–KN3

At one time this was thought to be
unplayable because of 5 N–N5, but
analysis by the ex-world corre-
respondence champion Hans Berliner
and others has shown that Black can
safely play either 5 ... P–KB3 or 5
... P×P 6 P×P B–N2 and if 7 P–
QB4 N–N5!

5 B–QB4
A Karpov favourite.

5 ... N–N3
5 ... P–QB3 6 P×P is good for
White.

6 B–N3 B–N2
Furman prefers 6 ... P–Q4.

7 N–N5
A promising alternative is to keep his pawn-structure flexible with a build-up involving 0-0, P-KR3 and Q-K2.

7 ... P-Q4

Since 7 ... P-K3 weakens the dark squares too much, and 7 ... 0-0 allows 8 P-K6!, Black must release his pressure on White’s centre.

8 0-0

Furman suggests 8 P-KB4!? 8 ... 0-0?! 
And here Furman prefers 8 ... P-KR3.

9 P-KB4 ± (165)

13 ... K-R1

Better was 13 ... P×P 14 BP×P N-R4 to exchange the bishop. Black is about to embark on a positionally unsound plan.

14 P-B3 P-N4?

This move is based on 15 BP×P? P×P which is favourable for Black. But Karpov can maintain his central control and prepare to infiltrate by using the weakness Black has created at his KB4.

Better was 14 ... N-R4 – Furman.

15 KP×P KP×P

16 N-B1! P-KR3

17 N-N3 B-N3

18 B-B2

The exchange of these bishops accentuates the weakness of the light squares in Black’s K-side.

18 ... Q-K1

Grigorian is hoping to get his queen to KN3 but Karpov isn’t having any.

19 P-N3! ±

A fine multi-purpose move which restricts the knight on QN6 and prepares to make life awkward for Black’s K-side pieces by 20 B-R3.

19 ... N-B1

20 B-R3 N-Q3

20 ... N1-K2 is no better. At least this way he gets a little counterplay on the QB-file.

21 B×N

Karpov will not allow the knight to establish itself on e4, even at the cost of the exchange.

21 ... P×B

22 R-K2 Q-B2

23 Q-N1! (166)

23 ... B×B

24 Q×B KR-K1

25 R1-K1 N-K2

25 ... P×P 26 N-B5 only makes Black’s position worse.

26 P-B5

Transferring his attentions to the
K6 square. Black's bishop is now quite helpless.

26 ... B–B1
27 R–K6 N–N1
28 N–R2

To come in on KN4. If now 28 ... P–KR4? 29 Q–K2 wins a pawn.

28 ... R/K1–B1

Black decides to abandon the K-file as he cannot afford to capture on e6 and give White a passed pawn and the f5 square.

29 R1–K3 R–B3
30 Q–K2 R1–B1
31 Q–B3 Q–B2 (167)

32 N–K2

Now QB3 is covered and White is ready to proceed to the K-side.

32 ... Q–R4
33 P–QR4

But there is no point in giving anything away!

33 ... R3–B2
34 R–K8 B–N2
35 Q–R5 Q–N3
36 N–N4

Karpov overcomes his natural reluctance to leave pawns en prise in view of the threat of 37 N × RP. Grigorian finds another way to lose.

36 ... R × R
37 R × R R–K2
38 N × RP R × R
39 N–B7 mate

B–K2 8 P–QR3 0–0 9 P–B4 N–KB3 10 N–B3 N–K5 with good play for Black, Gurgenidze–Kuznetsov, 1/2-final 28 USSR Ch 1960, but White’s play was not very convincing. 8 R–K1 B–K2 9 B–B1 0–0 10 P–B3 B–KN5 11 QN–Q2 P–QR3 12 Q–N3 B–R4?! 12 ... R–N1!? keeps White’s advantage to a minimum. 13 N–K5! ± B–N3 13 ... N x N 14 R x N leaves White winning thanks to the double attack on the bishop and QNP. 14 N x B RP x N 15 N–B3 N–N3 16 Q–B2 Q–Q4 17 P–QN3 KR–K1 18 B–Q3 QR–Q1 19 B–KB4 Q–Q2 20 P–QR4 20 QR–Q1, continuing to build up pressure in the centre, is probably better. 20 ... N–Q4 21 B–Q2? (169)

1808 AK–Leonid Stein:
R8: 25 September:

Sicilian

1 P–K4 P–QB4
2 N–KB3 N–QB3
3 P–Q4 P x P
4 N × P N–B3
5 N–QB3 P–Q3
6 B–QB4 Q–N3

Stein is well-known for his experiments in the Sicilian. This one has achieved a degree of respectability and has been tried by Hort and Polugayevsky among others.

7 N × N

Various moves which have been tried here have failed to produce any convincing refutation of Black’s queen move. The attacked knight can go to K2, QN3 or QN5, or it can even be protected by 7 B–K3?!

The exchange played in this game is generally regarded as positionally inferior for White and of value only as the quickest possible way to complete development. The plan Karpov now adopts may force a change in this assessment.

7 . . . P × N
8 0–0 P–K3?

This is soon shown to be a waste of time. Black should play 8 . . . P–K4 at once.

9 P–QN3!

The bishop will be very useful on the long diagonal if Black carries out his plan of . . . P–Q4.

9 . . . B–K2
10 B–N2 0–0
11 Q–K2!

White is threatening to spoil Black’s pawn-structure with 12 P–K5, so Black must admit the error of his eighth move.

11 . . . P–K4

Now 11 . . . P–Q4 would lose a pawn after 12 P × P BP × P 13 B × P.

12 K–R1

To be able to answer . . . B–KN5 with P–KB3; White is also keeping open the possibility of P–KB4 with a K-side attack.

12 . . . Q–B2
13 QR–K1

White is ready to meet 13 . . . B–K3 with 14 B × B P × B 15 P–B4 and if 15 . . . P × P 16 P–K5! Stein, therefore, prepares to meet P–KB4 by playing the knight to a square from which it can help control his K4.

13 . . . N–Q2

Now 14 P–B4 is no longer good, so Karpov sets about increasing his control of the centre. Meanwhile Stein is having great difficulty in finding a plan.

14 N–R4 B–N2

Black should play 14 . . . B–B3, covering the KP, so as to answer 15 B–Q3 with 15 . . . P–Q4. He should then be able to hold the balance, whereas White can now carry out his plan.

15 B–Q3 KR–K1
16 P–QB4

Now White has a small but definite plus.

16 . . . B–N4
17 Q–B2!

Placing more difficulties in the way of . . . P–Q4.

17 . . . P–KR3
18 P–QN4

Intending to continue with 19 P–N5, weakening the Q5 square and establishing a Q-side pawn majority.

18 . . . P–R3
19 Q–N3 QR–N1
20 P–QR3 B–B1
21 Q–B3 B–B3

Forestalling White’s P–KB4–B5.

22 Q–B2 (170)
22 . . . P–QR4

Stein decides that he must do something active or perish; but this means that Karpov’s waiting tactics
have paid off, as $P-N5$ will soon become possible.

$22 \ldots N-N3?!$ would probably have put up greater resistance.

23 $B-B3$ $P \times P$
24 $P \times P$ $N-B1$
25 $P-N5$ $P \times P$?!

25 $\ldots B-Q2$! would minimize Black’s disadvantage. White would then probably play 26 $R-QN1$ before committing himself on the Q-side. As Stein plays, White has too many open lines to help him in his advance of the QNP.

26 $P \times P$ $B-Q2$
27 $R-QN1$ $R/K1-B1$

The black queen is a poor blockader: White now threatens 37 $B-R6$.

36 $R \times R$ $R \times R$
37 $Q-K2$!

Covering the queening square as well as attacking the KP.

37 $\ldots$ $B-B3$
38 $Q-B2$ $R-B1$
39 $B-B7$

With the crushing threats of 40 $Q-B6$, 40 $B-B6$ and 40 $N-B5$. Stein has one last try.

39 $\ldots$ $B-Q1$
40 $N-B5$ $R \times B$
41 $N \times Q$! $R \times Q$
42 $N \times B$ $B-B1$

If 42 $\ldots B-R7$ 43 $P-N7$! $B \times R$ 44 $P-R4$ wins.

43 $P-N3$ $R \times P$
44 $R-QB1$ $R-B3$
45 $R \times B$ $R \times P$
46 $B-B4$ $K-R2$
47 $N \times P$ 1-0

1809 Vasily Smyslov–AK:

R9: 27 September:

Semi–Tarrasch

1 $P-QB4$ $P-QB4$
2 N-KB3 N-KB3
3 N-B3 P-Q4

Karpov likes this method of dealing with the English. One line for White now continues 4 P×P N×P 5 P-KN3, but Smyslov decides on a Queen's Gambit Declined type of position with an isolated QP.

4 P×P N×P
5 P-K3 P-K3
6 P-Q4 P×P
7 P×P B-K2
8 B-Q3 0-0
9 0-0 N-QB3
10 R-K1 N-B3

Smyslov suggests 10 . . . B-B3 as an alternative in his notes to this game in Informator.

The text move is played to avoid the difficulties arising after 10 . . . P-QN3 11 B-K4!, but it involves a clear loss of time for Black and White's next move gives him the edge.

10 . . . N×N, as pointed out by Yudovich, is also possible.

11 P-QR3!

This prevents the manoeuvre . . . N-QN5-Q4 and prepares to line up the queen and bishop against the black king. Now Black will have trouble blockading the QP.

11 . . . P-QN3
12 B-B2 B-N2
13 Q-Q3 R-B1?

He should have played 13 . . . P-N3. Now the isolated pawn gets its chance for a glorious death. . . .

14 B-N5?

But Smyslov misses it! He should have played 14 P-Q5!:
(a) 14 . . . P×P 15 B-N5 P-N3
16 R×B Q×R 17 N×P N×N
18 B×Q N3×B with a substantial material plus for White;
(b) 14 . . . N-QR4 15 B-N5 R×N
(15 . . . P-N3 16 P-Q6!±±) 16 P×R Q×P.

14 . . . P-N3
15 QR-Q1

White still has much the better game, and it is hard for Black to find a move which does not allow his opponent to improve his position.

15 . . . N-Q4
16 B-R6 R-K1 (72)

17 B-R4!

Preparing to drive away the bishop with . . . P-QN4, but this move falls in with White's idea.

'On 17 . . . N×N White had the choice between the solid 18 Q×N or a promising pawn sacrifice with 18 P×N B×P 19 P-B4, having in mind a later P-Q5. The text leads to difficulties of another kind.' – Keres.

Korchnoi gives 17 . . . N×N 18 P×N B×P 19 P-B4 B-B1 20 Q-K3± or 20 B-KN5±.

18 N×N! Q×N

'It is understandable that Black does not want to remain in a slightly inferior position after 18 . . . P×N, but that may have been the lesser evil. Now he has to be alert to the possibility of a breakthrough with P-Q5, which finally brings the decision.' – Keres.

19 Q-K3!

Now the point of White's seventeenth move is shown; without the interposition of 17 B-R4 P-R3, Black could meet the threat of 20
B–N3 with 19... N–R4! White’s last move covers the QB so that 20 B–N3 Q–KR4 21 P–Q5! is possible.

19... B–B3?

‘This leads by force to material loss, but Black’s position is already difficult. After 19... Q–KR4 the continuation 20 P–Q5! P×P 21 Q×P is very strong, but 19... R/K1–Q1 was probably his best practical chance. Now Smyslov finishes the game with a few strong blows.’ – Keres.

20 B–N3 Q–KR4

21 P–Q5!±

‘This Sword of Damocles has been hanging over Black’s head for some time, and now it falls with decisive effect. Even Tarrasch mentioned that isolated central pawns can sometimes change from weaknesses into formidable striking forces!’ – Keres.

21... N–Q1

22 P–Q6 R–B4

‘Black has no time for 22... B×N, as 23 P–Q7? would then cost him a whole rook. But with 22... R–R1, Black could probably put up tougher resistance, protecting his first rank.’ – Keres.

23 P–Q7 R–K2?

The decisive mistake. He can hold out a little longer by 23... R–KB1 24 B×R K×B, but it hardly matters any more. Korchnoi recommended 23... R–KB1 (23... R68 sic) as better.

24 Q–B4!±

24... B–N2

25 Q–N8 Q×B

26 Q×N+ B–KB1

27 R–K3!

A rather cruel touch; Smyslov sees no reason to allow his pawns to be broken up (as they would be after the immediate 27 Q×B+, which also wins), since his next move cannot be prevented.

27... B–B3

28 Q×B+ Q×Q

29 P–Q8=Q 1–0

1815 Nikolai Krogius–AK:
R15: 6 October:
Queen’s Indian

1816 AK–Mark Tseitlin:
R16: 9 October:
Ruy Lopez
1 P–K4 P–K4
2 N–KB3 N–QB3
3 B–N5 P–B4?!
Tseitlin may have been tempted to play this risky line because of his opponent’s well-known preference for quiet positions; and if he was hoping for a short brilliancy he was not to be disappointed!
4 N–B3
The most popular move.
4 . . . . N–Q5?!
The most usual line continues 4 . . . P × P 5 QN × P P–Q4 when White can choose between 6 N × P and 6 N–N3. Tseitlin’s move is rarely played and not particularly good, though it could have surprise value.
5 B–R4
Karpov is duly surprised. Theory recommends 5 N × P! as giving White the advantage. But the text move is not bad and Black does not
succeed in justifying his opening here either.

Karpov gives as alternatives 5 B-B4 and 5 N×P!

5 . . . N-KB3

Not 5 . . . P×P? 6 N×N P×N 7 Q-R5+ and wins.

6 N×P P×P

Karpov, in his notes in The Chess Player, points out 6 . . . B-B4 7 N-Q3 B-N3 8 P-K5± and 6 . . . Q-K2!? 7 N-B3 N×N + 8 Q×N P×P

9 Q-N3 P-B3 10 0-0 P-QN4 11 B-N3 P-Q4 12 R-K1 and then P-Q3±.

After the game Tseitlin condemned this move and suggested instead 6 . . . Q-K2 7 P-B4 P-QN4!? 8 N×NP N×N 9 B×N P×P with some initiative for the pawn - Korchnoi.

7 0-0 B-B4

On 7 . . . B-K2 White can simply win a pawn with 8 R-K1; and after 7 . . . B-Q3 Karpov gives 8 N-B4 B-K2 9 P-Q3 P×P 10 Q×P N-K3 11 N-K5 with a small edge for White.

Safer was 7 . . . B-Q3 8 N-B4 B-K2 or 8 N-N4 0-0 - Korchnoi.

8 N×KP!?

The move one would expect from Karpov is 8 P-Q3 (also suggested by Korchnoi and by Yudovich), which is good for White e.g. 8 . . . P×P 9 N×P/3 B-K2 10 N-B4! Instead he tries a tricky combinative line which is sound enough, but is possibly not objectively the strongest.

8 . . . N×N

9 Q-R5+ P-KN3

10 N×NP (177)

10 . . . N-KB3?

Also bad for Black is 10 . . . P×N 11 Q×R + K-K2 12 Q-K5+ etc. Correct was 10 . . . Q-N4 11 Q×Q N×Q 12 N×R P-N4 13 B-N3 N×B 14 RP×N B-Q5 - Korchnoi.

11 Q-K5+!

This is stronger than either 11 R-K1 + B-K2! or 11 Q×B N-K3 12 R-K1 P×N 13 R×N + K-B2.

11 . . .

12 N×R±

Less clear is 12 R-K1 N-B6+! 13 P×N R-KN1 14 Q×B+ Q×Q 15 R×Q + K-Q1 as pointed out by Karpov.

12 . . .

13 P-N4

13 Q×N/4 P×B

14 R-K1 K-B1

15 P-Q3 R-N1

Hoping to air-lift this rook to the K-side disaster area. If he tries 15 . . .

K-N1 16 B-N5 K×N 17 R×B wins.

16 Q-K5!

With the very nasty threat of 17 B-R6+.
16 ... N-N1
17 Q–KR5 K–N2
17 ... Q–K1 18 Q×P R–N3 19 R–K4 is altogether too much.
18 N–B7 Q–K1
19 B–R6+ N×B
20 Q×N+ K×N
21 Q×P+ K–B1
21 ... K–B3 22 R–K4 is no fun for Black either.
22 R–K3 R–N3
23 R–N3 1–0

1817 Leonid Shamkovich–AK:
R17: 10 October:

English

1 P–QB4 P–QB4 2 N–KB3 N–KB3 3 N–QB3 P–Q4 4 P×P N×P 5 P–K3 5 P–K4 and 5 P–KN3 are the alternatives. 5 ... N×N 6 NP×N P–KN3 The position is equal – Gufeld. 7 B–R3 TN – theory gives 7 P–KR4!? P–KR4!? 8 B–B4 B–N2 9 N–N5 0–0 10 Q–B2 ± or 7 Q–R4+ N–Q2 8 Q–R4 B–N2 9 B–B4 ±. 7 ... Q–B2 8 B–B4 B–N2 9 0–0 0–0 10 R–B1 N–Q2 11 P–Q4 The position now closely resembles a standard Grünenfeld situation, except that White has played R–QB1 instead of Q–K2 and Black would normally have played ... N–QB3 or ... B–KN5.
11 ... R–N1 12 B–N5 P–N3 13 N–Q2 R–Q1 14 Q–B3 P–QR3 15 B–K2 B–N2 16 Q–N3 Q–B3 17 B–N2 (178)

17 ... P–K4! Black’s position was already clearly better; now he starts to put real pressure on White’s centre. 18 P–K4 KP×P 19 P×P P–QR5= 20 B–B4!? P×P 21 B–N3 Q–N4 22 Q–B4 R–KB1

1818 AK–Vladimir Tukmakov:
R18: 11 October:

Sicilian

For 11 ... B–Q2!? see Karpov–Hartston.
12 R–B1!

The most promising of White’s choices in this position. Much worse is 12 P–B3 R–K1! – Black exploits White’s undefended QB to threaten ... P–Q4 in earnest and so forces White’s reply: 13 Q–N3 N–Q2 14 KR–Q1 N–B4! 15 Q–B2 B–B3 16
Furman, 31 USSR Ch 1963.
12 . . . N–K4 13 Q–Q4 N4–Q2
13 . . . N3–Q2 leaves White with
some advantage after 14 P–B3 e.g.
Q–Q2 R–Q1 17 N–B2 N–KB3 18
N–Q4 Gipslis–Averkin, 37 USSR
Ch 1969.
14 P–B3?! (179)
14 KR–Q1 is required first to
maintain restraint on the black QP.
Thus 14 KR–Q1 and now:
(b) 14 . . . R–B1 15 P–B3 with the
idea of Q–Q2 (Karpov in The Chess
Player), but not 15 . . . R–K1 16 Q–
Q2?! P–Q4! Instead 16 N–B2! is
much stronger as 16 . . . P–Q4 now
fails to 17 BP×P P×P 18 P×P B–
B4 19 Q–Q2 P–QN4 20 B×B R×B
21 P–Q6.

White could secure a real plus with
21 R2–Q2! e.g. 21 . . . P–QN4 22
N×QP N×N 23 P×N Q–Q3 24
N–B2 ± as pointed out by Karpov.
The text is too slow and gives Black
time to regroup.
21 . . . Q–Q3 22 R2–Q2 P–QN4 23
N×QP
Not 23 P×NP? R×N and the
white knight on QR3 loses its
protection.
23 . . . N×N 24 P×N N–B3 25 B–
Q3 B×P 26 B–K4 R–K4 27 B×B
R×B 28 R×R N×R ?!
Black misses a chance of dead
equality with the surprising 28 . . .
Q×R!, for if 29 R×Q R–B8 + 30
Q–B1 R×Q + 31 K×R N×Q
(Karpov) with a dead draw.
29 Q–Q4 Q–QN3 30 Q×Q N×Q
31 R–Q6 R–N1 (180)

180 W

32 R–QB6! ±
A quiet move which gives White
some advantage – all Black’s pieces
are passively placed and cannot
move without shedding material.
32 . . . K–B1 33 N–B2 R–B1
If 33 . . . K–K2 simply 34 N–Q4
consolidates White’s advantage.
34 R×R + N×R 35 N–N4!
Forcing a weakening advance of
Black’s QRP.
35 . . . P–QR4 36 N–B6 P–R5
Now it is possible for White’s king
to get at the Q-side pawns.
37 K-B2 K-K1 38 K-K3 K-Q2 39 N-K5+?

The right way to increase White's advantage was 39 N-Q4! N-Q3 40 K-Q3 K-B2 41 K-B3 K-N3 42 K-N4± (Karpov) and Black's pieces are restricted to running on the spot.

39 ... K-K3 40 K-Q4 P-B3?

40 ... N-K2 was correct.

41 N-Q3 K-Q3 42 N-B4 P-N3 43 N-Q5 P-B4 44 P-KN4 N-R2 45 N-N4 P×P 46 P×P N-B1 47 N-Q3

If 47 N-Q5 N-R2 48 P-N5 N-B3+ 49 K-K4 N-R4= – Karpov.

47 ... N-K2 48 N-K5 K-K3 49 P-QR3 N-Q4 50 N-Q7! K-Q3 51 P-N5

51 N-B5 N-N3 and White can make no progress.

51 ... N-K2 52 N-B8 N-B3+ 53 K-B3 N-K4?

The decisive error. 53 ... K-K4

54 N×RP K-B4 55 K-Q3± and White's advantage is kept to a minimum.

54 N×RP N-B6 55 K-N4 1-0

If 55 ... K-B3 then the KNP wreaks havoc: 56 N-B8 N×RP 57 N×P N-B6 58 N-K7+.

1819 Mikhail Tal-AK:

R19: 13 October:

Queen's Indian

1 N-KB3 N-KB3 2 P-KN3 P-QN3 3 B-N2 B-N2 4 P-B4 P-K3 5 0-0 B-K2 6 P-Q4 0-0 7 B-N3 N-K5 8 B-Q2 N×N 9 Q×N P×P 10 Q-Q3 (Karpov stops here – is this significant?) 14 ... P×P 15 B×P P-B4! Tal-Korchnoi, game 1 Candidates 1968 has been regarded as equalizing, but obviously Tal would be prepared for that line.

11 KR-Q1 P-Q3 12 QR-B1 N-Q2 13 P-QR3 P-QR4! (181)
B4 1–0 Bikov–Klaman, Leningrad 1963. 11 P–K5 Theory, and good at that, at the time was 11 K–N1 B–B3 12 B x N P x B 13 B–B4 R–KNI 14 P–B5! Jansa–Simagin, Polanica Zdroj 1968. 11 ... P x P 12 P x P B–B3? 12 ... R x N!? is a much better chance for Black now, though the complications are unclear to say the least. 13 B–N5 A strong alternative is 13 B x N P x B 14 N–K4 P x P 15 N–B6 + K–K2 16 Q–KR4. 13 ... N–Q4 (182)

14 B x B+ In The Chess Player 1, Shamkovich and Fedorov now give 14 N x N! with:
(a) 14 ... Q x B 15 N–B7+! and mate at Q8;
(b) 14 ... P x N 15 Q x Q P x B 16 P–K6! P–B3 17 Q x P;
(c) 14 ... B x B 15 Q x P! B–R3 16 Q–N6.

However, in the last variation they appear to have overlooked 15 ... B–N5! (better than 15 ... B–R3 and immensely superior to 15 ... Q x Q? 16 N–B7 + R x N 17 R–Q8 mate) 16 Q x Q (or 16 Q x P 0–0 17 N x B Q x N gives Black a strong attack) 16 ... B x Q with a level ending: 17 N–B4? P–R3 and 17 N–K3 B–K7 are both difficult for White, while 17 P–QN4 P x N 18 P x B B–B5 led to a drawish ending in Hort–Panno, Palma 1970. Perhaps Soviet analysts have discovered something new in this line ...

1821 Lev Polugayevsky–AK:
R21: 16 October:

English

17 ... N–Q5 18 B x N P x B 19 Q x RP Q–K3 20 KR–K1 R–R1 21 Q–N7 R x P 22 N–N5 Q–K4 23 N–B3 ½–½
Karpov’s success in this event signalled the arrival of 'Anatoly Grozny' – since this event Karpov has had only two 'failures' (2nd at Budapest and 2nd in the 1973 Soviet Championship), in every other event in which he has competed he has taken first prize (in tournaments) or has won the board prize (in team events). This phenomenal run of success can only be compared (in modern times) with Fischer's very similar record in the period 1963–1972.

**Interview with Karpov and Furman**

The discussion with Anatoly Karpov (conducted by A. Roshal and published in 64 No. 52 1971) took place in the presence of Semyon Abramovich Furman and, understandably, the trainer took part in the conversation.

**AR:** It is difficult to suppose that your sporting goal in this tournament was to share first place.

**AK:** Even some people very favourably disposed towards me hoped for a place in the top ten for me. I myself was prepared to get one of the first five places.

**SF:** For me personally today's success is not so unexpected,
partly because during recent years his results have been stable and with every tournament they have improved. Certainly I could not have foreseen that he would share first place, but I did estimate that he could get about the same number of points as he did get. I calculated that he would get plus 4 or plus 5. One’s placing in a tournament is not always decided by the total of points, everything depends on how the struggle takes shape. But the even standard of the participants suggested in advance that such a showing would achieve a very high placing.

**AR**: Well, how did things take shape?

**AK**: I was not satisfied with the way the draw worked out for me. It dictated a stormy start, and I did not feel any special wish to play. Nothing much happened. All the time I wanted a great deal, but nothing worthwhile came up, the games took shape in a difficult way. The turning point was the meeting with Vlastimil Hort, it stood out not only in a sporting but also in an artistic connection. My spirits immediately rose. In the outcome I even got the prize for the best finish. Here I emerged victor over David Bronstein and Viktor Korchnoi. True, in the game with Viktor Liovich we both unfortunately made several mistakes. Well, and against Vladimir Savon in the last round it somehow happened that he walked into an ambush. We expected that he would adopt the Open defence in the Ruy Lopez, although to guess exactly which system was difficult. When already at the board, I recalled one of his games in which he developed in a similar fashion. I found a strong manoeuvre with the queen (18 Q-B1! - eds), which turned out to be fatal for my opponent.

**SF**: We had been looking at a similar idea beforehand. It should be added that Karpov embarked on this encounter with the express wish of winning. In addition he was White.

**AR**: Does which colour you have and fighting spirit mean much?

**AK**: It is undoubtedly more difficult to play Black. But it is also not bad, especially when the opponent starts to play sharply for a win. I am always disposed for a fight, but nevertheless for some reason colourless games sometimes arise.

**AR**: To amateurs the style of the 20-year-old Karpov seems somewhat dry, rather academic. Frequent draws ... At your age doesn’t the wish arise to sacrifice a bit, to burn your bridges, and - charge!?
AK: So far I have a somewhat narrow opening repertoire – in consequence of having little spare time to work on broadening it. Of course I would like to play sharper and more modern systems, but in my opinion this is not in keeping with my style. At least I am satisfied with my style and I have not yet thought of changing it. Certainly it is possible to sacrifice pieces. Why not sacrifice? – if it is correct. But bridges I don’t burn, it’s not my speciality.

Draws are a separate matter. With a tournament schedule like the Memorial’s they are unavoidable. It is true that they say that there is now a difficult tournament schedule everywhere, but you know you don’t get such a first-class field everywhere. As regards me personally, I normally go out simply to play chess, I do not agree to draws beforehand. I settle for draws if the game which develops is not the type which I like, or if the half-points enable me to achieve the desired sporting result in the tournament. But in general it is necessary to learn not to lose, and wins will come afterwards.

SF: Prudence, or discretion – that is his characteristic feature. This particularly pleased me, even on first acquaintance; such a valuable quality is rarely met with in such young players. But for further achievements of the highest order a healthy risk is necessary; great aggressiveness. There arises a danger of changing a good quality into its opposite. Fortunately Tolya has proved, to some extent against expectation, a most dutifull student in the chess sense.

AK: Of the players in the tournament, Petrosian and Smyslov made the greatest impression on me.

SF: Clearly this is because both ex-champions are close to Karpov in their style of play, although there is not a complete resemblance. Therefore they are the most interesting for him.

AK: I don’t know why. I just feel that here are chessplayers who understand everything, for whom there are no secrets.

AR: Do you ever experience time-trouble agonies these days?

AK: In all, two or three times in my life. This is not at all because while others think everything is clear to me. It is simply that I don’t want to make stupid mistakes, and then lose, because of time shortage. Therefore I feel compelled to content myself with normal moves (they seem good to me) instead of searching for the best ones.
AR: The burden of first place – now many people will expect a repeat of your success. Someone even laid a bet . . .
AK: . . . But I, as a rule, never bet on anything. And so far no burden of compulsion to demonstrate anything has been laid on me. One must learn to play. You know in the last count absolutely all chessplayers are only occupied in learning to play better.
SF: In order to achieve further goals it’s probably necessary to experiment somewhere. One just cannot do this in invitation tournaments. There, as grandmaster Uhlmann puts it, ‘keine fokus!’
AR: What tournaments lie ahead?
AK: Next the international tournament at Hastings. Apparently in February, a match with the World Junior Champion, Hug, for the right of taking part in the Interzonal tournament (the match didn’t take place, both players were given places in the Interzonal – eds), at the beginning of March the final of the All-Union Olympiad.
AR: Isn’t that rather a lot?
AK: In the first half of 1971 I hardly played at all, but beginning with June I scarcely left the board – June, semi-final of the Soviet Championship; July, Student Olympiad; August, two team championships (national and Armed Forces); September–October, final of the national championship. If the Alekhine tournament hadn’t been so outstanding and so tempting, I would have had to decline.
AR: Isn’t it possible to give the All-Union Federation the individual plan of grandmaster Karpov, to have it ratified there, and afterwards to play and to occupy yourself in accordance with this plan?
SF: Unfortunately alterations, for reasons unknown to us, are quite often made. We expected that Karpov would take part in another foreign international tournament next spring. Now we again have to change all our plans.
AR: Is Anatoly really, at the same time, counted as a student of Leningrad University?
AK: I’m not just counted as one – I study the third year course in the Economics faculty. So far in my examination successes there has not yet been a ‘four’ and in the forthcoming session I’m desperate for an ‘excellent’.
AR: Good Luck!

Sicilian

1 P-K4 P-QB4 2 N-KB3 P-Q3 3
P × P 4 N × P N-KB3 5 N-QB3 P-QR3 6 B-K2 P-K4 7 N-N3
B-K3 8 0-0 QN-Q2 Gheorghiu also
mentions 8 . . . B-K2 9 P-B4 P × P 10
B × BP N-B3=. 9 P-B4 Q-B2 10
P-B5 B-B5 11 P-QR4 B-K2 12 B-
KN5 TN – Karpov, in Informator 12,
this is also the move-order given in
64. In The Chess Player 1 Gheorghiu
gives the move order as 12 P-R5 0-0
13 B-N5! 12 . . . 0-0 13 P-R5 KR-
B1 ± – Gheorghiu 14 B × B Q × B
15 R-B2 P-R3 (187)
Gheorghiu gives this move an
exclamation mark. 16 B × N? Gheor-
ghiu gives 16 B-R4 as an alternative.
Karpov elucidates on this with 16
B-R4!? ± P-QN4 17 P × P N × NP
18 B × N winning. 16 . . . N × B 17
18 P–QR3 B–B3 19 Q–B5 NP × P 20 R × P B–N4 21 R–QB3 Q–N5 22 R–N3 Q–B4 23 R–QB3 1–1

1906 AK–Yuri Balashov:
R6: 30 November:

Ruy Lopez

16 N–R2 (189) A novelty, played with the idea of 17 P–KB4. 16 B–N2 is better.

1905 Robert Byrne–AK:
R5: 29 November:

Sicilian

18 Q–Q3 Not 18 N–B5? R × P 19 Q–N4 Q–B3 =, but 18 N × N is also possible, e.g. 18 ... P × N 19 Q × Q QR × Q 20 B × KP B × B 21 R × B R–Q8 + 22 N–B1 N–Q2 23 B–N2 R × R 24 B × R R × P =.
1907 Wolfgang Uhlmann–AK: R7: 3 December:

English

35... R–N2 36 R×R Uhlmann queries this and gives instead 36 N–R6! N×N 37 R×KP+ K–B2 38 R×N N–B5 39 B–B1 when White stands much better. 36... N×R 37 N–B6 B–N2! 38 N–R7 According to Kotov, White can retain some advantage with 38 B–N6! N–R1 39 B–R7 N–B2 40 B–N8 ±. 38... N–Q3 39 B–N6 N–R1 Now the bishop manoeuvre is no longer available.

40 B–B5 N–B5 41 N7×P N×NP Informator gives the game as drawn here. 42 K–B1 ½–½

1908 AK–Boris Spassky:
R8: 4 December:

Ruy Lopez

12 B–B2 P–B4 13 N–B1 B×N 13...

26 Q–N4 QR–Q1 27 B–B2 N–QB3 28 K–R2 R–KR1 29 R–Q2 N–B3 30 Q–B3 N–KR4 31 Q–N4 N–B3 32 Q–B3 N–KR4 1/2–1/2 'I had the better position at the moment I agreed to a draw. But I couldn't help doing that, for I did not see any clear-cut plan of action' – Karpov.

1909 Mikhail Tal–AK:
R9: 5 +6 December:
Queen's Indian

1911 AK–Vlastimil Hort:
R11: 8 December:

Sicilian

1 P–K4 P–QB4
2 N–KB3 P–Q3
3 P–Q4 P × P
4 N × P N–KB3
5 N–QB3 P–K3
6 P–KN4 N–QB3

The alternatives are:
(a) 6 ... P–QR3?! 7 P–N5 KN–Q2 8 B–N2 P–QN4 9 P–B4 B–N2 10 P–B5 P–K4 11 N–K2 B–K2 12 P–B6!
– Nikitin.
(b) 6 ... P–Q4 7 P × P N × QP 8 B–QN5+! B–Q2 9 N × N P × N 10 Q–K2+ ± Furman.

7 P–N5 N–Q2
8 B–K3

Informator, with notes by Karpov, gives the move-order as 8 P–B4 P–QR3 (if 8 ... P–KR3 9 N × P P × N 10 Q–R5+ is unclear) 9 B–K3. However the majority of sources, including 64 in which the game was annotated by Furman, give the move-order employed in the text.

8 ... P–QR3
9 P–B4

Furman prefers the immediate 9 R–KN1, criticizing the text as premature.

9 ... B–K2

9 ... P–R3 can lead to interesting play, e.g. 10 P–N6 Q–R5+, or 10 P × P Q–R5+, but White can play simply 10 N–B3.

10 R–KN1 N × N

Perhaps this leads to a premature fixing of the central pawn structure.
11 Q×N P-K4
12 Q-Q2 P×P
13 B×BP N-K4

It is true that Black has obtained the e5 square, but White has control of d5 and also the position of the black king is rather unsafe.

14 B-K2 B-K3
15 N-Q5 B×N
16 P×B N-N3

16... Q-B2 with the idea of 17... 0-0-0, though more passive, would have been more prudent, e.g. 17 R-N3 0-0 18 0-0-0 QR-Q1 and with 19... KR-K1 to follow Black would not be so badly off.

17 B-K3

17 0-0-0 would also have been good, for example 17... N×B 18 Q×N±.

17...
18 P×P P-KR3
19 K-Q1 P×P
20 B×KR B-B3

This is Black's best. The unhappy alternatives are 20... Q-B3 21 B-K3 and 20... Q-Q2 21 B-N7.

21 P-B3 B-K4 (193)

Creating an outlet for the queen to KR5.

22 R-N4

The rook has great scope here; both for attack and defence; for example it prevents... Q-R5 and is ready to go to K4 or QB4.

The text is immeasurably stronger than the paltry 22 B-KN5 Q-N3 23 B-K3 Q-B2 when Black begins to emerge from his straitjacket.

22...

Q-B3
22... B×RP!? would not improve Black's position - he would have to reckon with 23 B-Q3 or, probably stronger, 23 K-B2 N-K4 24 R-N4 Q-B3 - but at least he would have the same number of pawns!

23 P-KR4!
24 R-N4!

Black's king cannot run away; if 24... 0-0-0 25 B-N4 is a bonecrusher.

24...

B-B3
25 R-K3
26 K-B2 with 27 B-K4± to follow.

25...

B-K2
25... N-K4? loses the bishop to 26 R-KB4!

26 R-KB4!

Q-K4 (194)

27 R-B3!

With the terrible threat of 28 B-KB4.

27...

N×P
28 R-Q3 R×B

There is nothing better to be seen. If 28... N-K2 then 29 B-KB4 with unpleasant consequences for Black.

29 R×N

29 Q×R allows 29... B-N4 with... N-K6+ to follow.
29 ... Q-K5
Or 29 ... Q-K3? 30 R x P Q x R
31 Q x Q R-Q1 32 Q x R+ with a very advantageous ending despite the bishops of opposite colour.
30 R-Q3!
Out of his last nine moves, White has shifted the rook seven times ... and has a won position to show for it — not an everyday occurrence.
30 ... Q-R8+
31 K-B2 Q x R
32 Q x R B-K4
33 Q-N5 1-0 time

Is there one particular game ... which you like most of all? AK: 'It was in the Alekhine Memorial tournament ... the game with Hort.'

1912 Vladimir Tukmakov-AK:
R12; 9 December:
Ruy Lopez
1 P-K4 P-K4 2 N-KB3 N-QB3 3 B-N5 P-QR3 4 B-R4 N-B3 5 0-0 B-K2 6 R-K1 P-QN4 7 B-N3 P-Q3 8 P-B3 0-0 9 P-KR3 N-N1 10 P-Q4 QN-Q2 11 P-B4 P-B3 12 BP x P RP x P 13 N-B3 B-R3 Gheorghiu gives this an exclamation mark; it does seem to be an improvement over the older 13 ... B-N2. 14 P-R3 For 14 B-N5 see Geller-Karpov. 14 ... P-B4 = 15 P x BP P x P 16 B-N5 P-B5 17 B-B2 Q-B2 (195)

18 N-KR2 Q-N3 19 N-N4 KR-K1 20 Q-B3 B-N2 21 B x N \frac{1}{2} \frac{1}{2}

1913 AK-David Bronstein:
R13; 12+14 December:

Sicilian

1 P-K4 P-QB4 2 N-KB3 P-Q3 3 P-Q4 P x P 4 N x P N-KB3 5 N-QB3 P-QR3 6 B-K2 P-K4 7 N-N3 B-K3 8 P-B4 Q-B2 9 0-0 QN-Q2 For 9 ... N-B3?! see Karpov-Mecking. 10 P-B5 B-B5 11 P-QR4 B-K2 12 B-K3 0-0 13 P-R5 P-QN4 14 P x Pep N x NP 15 K-R1! Better than 15 B x N Q x B + 16 K-R1 B-N4!= Tal-Fischer, Curaçao 1962. 15 ... KR-B1 16 B x N Q x B 17 B x B R x B 18 Q-K2 R-N5 18 ... R1-QB1 has since become more popular. 19 R-R2 P-R3

Geller-Fischer, Curaçao 1962, continued 19 ... Q-N2?! 20 N-R5! Q-B2 21 N-Q5 N x N 22 P x N R-N4 23 Q-Q2 (Karpov gives 23 Q-B4±) 23 ... Q-B4 24 P-B4±. O'Kelly, in The Sicilian Flank Game, says 'if we consider the position after 19 R-R2 we find that both sides have two weaknesses; White on QN2 and K4 and Black on QR3 and Q3. Nobody has ever demonstrated that 2+2 equals more than 4; the position must be considered balanced'. Having played through this game, the answer is clear ... in this case 2+2=5!

20 R1-R1 B-B1 O'Kelly suggests 20 ... K-R2; to guard against checking possibilities on the back rank and to threaten ... P-QR4-R5. 21 R-R4! Karpov's improvement. Previously theory knew only of 21 R x P R x R 22 R x R Q-N2 23 N-R5 Q-B2 24 N-N3 Q-N2=. 21 ... R-B1 22 R x R If now 22 R x P then 22 ... Q-Q1 with ...
R1 × N and . . . R × P to follow. 22
... Q × R 23 Q × P (196)

23 . . . R × N Black cannot get
equality, so he sacs the exchange to
activate his game. Another possi-
bility was 23 . . . R–B5 24 R–R4
R × P 25 Q–B1 and:
(a) 25 . . . R–KB5 26 Q × R Q × Q
27 R × Q P × R with much the better
ending for White.
(b) 25 . . . Q × N/B6 26 P × Q R × R
and White won’t find it so easy to turn
his material advantage to account.
(c) 25 . . . Q × R 26 N × Q R × N 27
P–N3 ±.

24 P × R Q × KP 25 Q–Q3 Black
doesn’t have sufficient compensation
for the exchange. 25 . . . Q–KB5 26
R–KB1 Q–KR5 27 N–Q2 27 P–B4?! looks
doubtful: 27 . . . N–N5 28 Q–KN3 Q × Q 29
P × Q N–K6 =. 27 . . . P–K5 28 Q–
N3 Q × Q 29 P × Q P–Q4 30 R–
QN1! Activating the rook. 30 . . .
B–Q3 31 K–N1 B × P Or 31 . . . N–
N5 32 R–N5 ±. 32 K–B1 The king
commences a victory march. 32 . . .
B–B5 33 K–K2 N–R4 34 N–B1 B–
K4 35 N–K3 B × P 36 R–N8 +?
Pointless. 36 N × P is more logical.
36 . . . K–R2 37 N × P N–N6 + 38
K–B2? The king should march for-
wards, not sideways. Now he is
forced back. 38 . . . B–Q5 +! 39 K–
K1 N × P 40 R–N4 N–K6 41 K–K2

If 41 R × B?? then 41 . . . N × BP +
wins. 41 . . . B–B4 42 R–N5 N × N 43
R × B N–B5 + 44 K–B2 the sealed
move 44 . . . K–N3 45 P–N3 N–K3
46 R–Q5! P–B4 47 P–B4 P–B5 48
P–B5 P–K6 + 49 K–B3 P × P 50
K × NP P–R4 51 P–B6 P–K7
Against 51 . . . P–R5 + White wins
by 52 K × P P–K7 53 R–K5 N–Q5 54
R × P! and the knight is absolutely
helpless – attacking White’s remain-
ing pieces but unable to capture
either: 54 . . . N × R allows the pawn
to queen, while 54 . . . N × P 55 R–
K6 + and it’s all over. 52 K–B2
K–B3 53 R–Q7 1–0

1914 Viktor Korchnoi–AK:
R14: 13 December:

English

1 P–QB4 P–QB4
2 N–KB3 N–KB3
3 P–KN3 P–Q4
4 P × P N × P
5 B–N2 P–KN3?!

5 . . . N–B3 first was more accurate

6 P–Q4! B–N2

If 6 . . . P × P White recaptures
with the queen.

7 P–K4 N–B2!?

After 7 . . . N–B3 White still plays
8 P–Q5, since the KP is immune
because of the check on QR4. 7 . . .
N–N3 would be more usual in this
type of position.

8 P–Q5 N–N4

The knight gets ready to jump in
on d4 at an appropriate moment.

9 0–0 0–0

10 Q–B2 N–R3

11 B–B4 B–N5

12 QN–Q2 ± (197)

White maintains control over Q4
and his strong centre gives him a
good game.
197

Offering the exchange after 21...
Q-N5 22 Q×Q N×Q 23 B×B N–B7 24 B×QP, but Karpov is not
interested in such insignificant gains.

21 . . .
B×B

21 . . . N–N5 is not possible now
because of 22 B×B N–B7 23 B×QP
N×R/K8 24 B–K2 (coveting KN4)

22 R×B
23 B–K3
24 . . .
N–B4

This is much stronger than 23 . . .
Q×NP 24 QR–N1 with counterplay for White.

24 Q–Q4

24 Q–R3 is better. Gheorghiu gives
the move an exclamation mark and
assesses the position as ±. Karpov

24 . . .
P–K4

25 P×Pp
Q×KP

26 . . .
QR–B1?

This soon allows Black a neat
tactical blow. Better was 26 P–QN4
immediately – before the rooks can
be doubled on the QB-file – e.g.

26 . . .
R–B1

27 P–QN4
N×P! (198)

Now this move is very good as 28
Q×QP is no longer an answer for
White because of 28 . . . N×BP!
winning.

198

W
30 P–B3  N–Q3
31 Q–Q3  R–B3!
Preparing to improve his position
by offering the exchange of queens.
There is nothing left for White to do.
32 P–Q R4  Q–B5
33 Q–Q2  N–B2
34 P–B4
To prevent ... N–K4.
34 . . .  P–N5
35 P–N5  R–B1
Gheorghiu prefers 35 ... R–B2
which is slightly more accurate.
36 Q–Q7  P–K R4
37 K–B2  Q–B6
38 Q–B5  R–K1
0–1
After 39 R–K1 Q×R + 40 K×Q
P–B8=Q + leaves Black with a
lot of extra material and a mating
attack.
Karpov's third great game in the
space of four rounds.

1915 AK–Leonid Stein:

Furman states ‘Black has a satisfactory game’. Karpov suggests, instead of the text, 17 ... R-B1!? 18 Q-K5! N-Q4 19 Q×Q QR×Q 20 P-QR3 If 20 N-Q4 P-N5 and the pawns, though far advanced, do not seem to be weak. 20 ... N-N3+ 21 N/3-B3-K5 21 N-Q4 B×B 22 K×B B-B3 gives Black pressure against White’s Q-side. 21 ... B×B 22 K×B KR-B1 23 QR-B1 N-B5 24 P-K3 ½-½

1917 AK-Vladimir Savon:
R17: 18 December:

Ruy Lopez

1 P-K4 P-K4 2 N-KB3 N-QB3 3 B-N5 P-QR3 4 B-R4 N-B3 5 0-0 N×P

‘This game was played in the last round, when Stein was leading the tournament a half point ahead of Karpov. Logically therefore, Karpov was playing for a win and Savon must have known this.

‘Under the present circumstances, I do not like Savon’s choice in this game. The Open Ruy Lopez is a variation in which Black gets active pieces at the price of positional weaknesses; thus it is a type of play with no way back. As we will further see, Savon goes for a dubious variation without having prepared any improvements.’ Keres.

6 P-Q4 P-QN4 7 B-N3 P-Q4 8 P×P B-K3 9 P-B3 B-QB4 10 QN-Q2 0-0 11 B-B2 B-B4

Less well known than the main alternatives 11 ... P-B4, 11 ... N×N and 11 ... N×KBP!? 12 R×N P-B3.

12 N-N3 B-KN3

‘This leads by force to an inferior position for Black. If he wanted to play this variation, 12 ... B-KN5 was better here. The theoreticians recommend then 13 N×B N×N 14 R-K1 R-K1 (but not 14 ... B-R4? 15 B-N5! ... ) 15 B-B4, but Larsen thinks 15 ... P-Q5 16 P-N4 N-K3 17 B-K4 Q-Q2! is then quite playable for Black.’ Keres.

The text move is Savon’s patent.

13 N-B3-Q4 (201)

201

Much better than 13 P-QR4? B-N3 14 P×P P×P 15 R×R Q×R 16 Q×P? N×QBP! 17 P×N B×B+ Tukmakov-Savon, 37 USSR Ch 1967. Karpov must have wondered why his opponent entered this inferior variation for the second time. 13 ... B×N 14 P×B!

Maybe Savon expected 14 N×B N×N 15 P×N P-QB4 16 P-B3 P×P when 17 P×N P×P is good for Black, while 17 Q×P (Karpov simply gives this an!) 17 ... N-N6! 18 P×N B×B isn’t bad for Black either.

14 ... P-QR4 15 B-K3 N-N5?

Tal and Kirillov suggest instead 15 ... P-R5 16 N-B1 P-R6. Vatnikov also considers this possibility, but gives 16 N-Q2 and then if 16 ... P-R6 17 N×N B×N 18 R-N1! is good for White, but Keres points out 16 ... P-B4! and then 17 P×B P-B5!; White should proceed simply with 17 P×Pep and 18 R-B1 ±.

16 B-N1 P-R5, 17 N-Q2 P-R6
Or 17... P–QB4 18 QP×P P–Q5 19 N×N P×B 20 N–Q6±, but Petrosian’s idea of 17... N×N 18 Q×N N–B3 with ... Q–Q2 and ... N–Q1–K3 to follow was better.

18 Q–B1!

‘Even better than 18 Q–N3 N×N 19 B×N N–B3. Now Black’s activity has come to an end and he must already meet the threat of 19 P×P.’

Keres.

18... R–R3?

Karpov mentions the alternatives 18... N×N 19 Q×N N–B3 20 R–B1 and Petrosian’s idea is still almost workable for Black, and 18... P–QB4!? 19 QP×P P–Q5 20 N×N P×B 21 NP×P P×P+ 22 N×P±.

Keres’ recipe for avoiding the worst is to offer a pawn by 18... Q–Q2 19 P×P N×N 20 Q×N N–B3.

19 P×P R–QB3

Now if 19... N×N 20 B×N N–B3 21 B×B BP×B 22 Q–B5 is winning. Savon is playing for a combination, but Anatoly refutes this nicely.

20 Q–N2 N–B7

20... N×N is again no better: 21 B×N! and White is clearly winning after either 21... N–B7 22 R–B1, or 21... N–Q6 22 Q–N3. The text move gives White the chance to play 21 B×N N×N 22 B×B N×R, or 22 B×N R×B with a trouble-free game for Black.

21 R–B1! (202)

21... N×B 22 R×R N×BP

A final fling. Equally hopeless is 22... Q–N4 and both 23 B×N B×B 24 P–N3 (Karpov), and 23 R×B! BP×R (Furman gives 23... RP×R 24 B×N) 24 B×N P×B 25 Q–N3+ (Vatnikov) put an end to further resistance.

23 N–B1!

‘This eliminates all of Black’s possible attacking chances. Further simplification is unavoidable, after which White’s exchange plus must tell.’

23... Q–Q2?

‘A grave mistake in great time trouble, but the position was already lost. Black could not play 23... N×N because of 24 Q×N, and after 23... N7–N5 24 N×N N×N 25 Q–K2 White would not have much work to do to make his exchange tell.’

24 N×N 1–0

‘A good game by Karpov, showing that his play deserved the points he gathered in the tournament.’

</tbody>
</table>

On February 24 1972, Anatoly Karpov discussed the Hastings tournament at the Moscow Central Chess Club.

The international tournament at Hastings, over a period of many years, took place as a rule with ten participants. In recent years this formula has begun to be outmoded. Over such a short distance the players avoided risks because even one defeat could have a fatal significance on the result. The tournament table was decorated with frequent draws. The element of fight was kept to a minimum. Such a situation did not suit either the participants or the organizers. Therefore the Englishmen came to the conclusion that it was essential to break with tradition and increase the number of participants.

This year eight grandmasters and eight masters were invited to the main tournament. At the last moment Szabo could not come and he was replaced by the 1965 World Junior Champion, Kurajica, who had been down to participate in the first subsidiary tournament (Challengers – eds). Although as a result of this change the main tournament did not forfeit its rating status the grandmaster norm turned out to be very high.

Korchnoi and I came to Hastings immediately after the Alekhine Memorial, and we felt tired. The ‘echo’ of the Moscow tournament was unexpectedly heard at the time of the draw.

‘Of course I will draw “my” number one, that unlucky one, just as in the
Alekhine Memorial’, said Viktor Korchnoi as he approached the judges’ dais.

Amid general laughter Viktor Korchnoi duly drew this number. But the strangest occurrence was still to come – I also got ‘my’ number fourteen, under which I played in Moscow! However I managed it I don’t know, only unlike Viktor Korchnoi, I was not put out. It is true that I had Black against practically all my rivals, but every cloud has a silver lining: against the weakest participants I had White, and that made beating them that much easier.

Conditions in the tournament hall, although it was large enough, turned out to be very difficult. Our tournament took place parallel to the master tournament, the distance between the players and spectators was insufficient – the public were 2–3 metres away from the participants – we heard every conversation and remark. Viktor Korchnoi suffered especially – it was agonizingly painful for him to play.

The tournament began successfully for me. After drawing with Pfleger in the first round I won three successive games, and after another draw I again scored three victories. Here I felt that my strength was giving out. In the previous eight months I had played about a hundred games, and, speaking frankly, I had simply become played out. In my game against Korchnoi, who had proved to be my only rival, I could no longer fight as before – Viktor Korchnoi easily beat me.

Before the last round Viktor Korchnoi led me by half a point, and on the final day of the tournament took no risks; agreeing a quick draw with Najdorf. The question of first place was decided by my game with the Englishman Markland. At the cost of an incredible amount of effort I succeeded in overcoming this opponent and catching up with Viktor Korchnoi.

The fight for third place was between Byrne and Mecking. Success accompanied the Brazilian player, or, more accurately, not success but good luck. Thus Pfleger, in an advantageous position, forgot to make the last move before the time control. A very ugly incident took place in the meeting Mecking-Botterill; the players were in time-trouble with two or three minutes for eight moves – Mecking put his hand on the clock and would not allow the Englishman to press it – the judge did not notice and Botterill lost his calm and, in two moves, the game. Everybody was extremely indignant and Najdorf called Mecking ‘the bandit of the chessboard’.

Although Mecking succeeded in fulfilling the grandmaster norm, I don’t have too high an opinion of his play. I was ever so much more pleased with the play of the Swede, Andersson – a very talented and promising player.

As for Kurajica, who in his time raised high hopes, in my opinion he has not advanced. At any rate, there is no sign that the Yugoslav works at his chess. It is possible that he was unprepared for playing in such a strong tournament. At first Kurajica was rejoicing in his unexpected ‘promotion’, but later he lamented that he had accepted the invitation and moved from the master to the grandmaster tournament. . . .

I will show you two of my games, to some extent similar to each other. In both of them the Sicilian was played, an early exchange of queens took
place, and an ending with opposite coloured bishops arose. In both games White succeeded in realizing a positional advantage and in getting up an attack on the black king despite the meagre quantity of material left on the board. (The games referred to are those against Byrne and Mecking – eds.).

The above article was translated from the *Central Chess Club Bulletin*.

**2001 Helmut Pfleger-AK:**

R1: 29 December:

Queen’s Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3
3 N–KB3 P–QN3 4 P–KN3 B–N2
5 B–N2 B–K2 6 N–B3 N–K5 7
Q–B2 N × N 8 Q × N 0–0 9 0–0
P–Q3 10 P–N3 P–QB4 11 B–N2
B–KB3 12 Q–B2 N–B3 13 R/R1–Q1
Q–K2 14 P–K4 P–N3 15 P–Q5
N–N5 16 Q–Q2 B × B 17 Q × B
P × P 18 KP × P R/R1–K1 19
P–QR3 N–R3 20 R/B1–K1 Q–Q1
21 N–Q2 P–B4 22 P–B4 N–B2 (203)

Karpov’s from the Soviet Central Chess Club Bulletin No. 2 1972.

1 P–K4 P–QB4
2 N–KB3 N–QB3
3 P–Q4 P × P
4 N × P N–B3
5 N–QB3 P–Q3
6 B–KN3 B–Q2
7 Q–Q2 R–B1
8 0–0–0 N × N
9 Q × N Q–R4

A well-known theoretical position has arisen.

10 P–B4

Another possibility is 10 Q–Q2.

10 . . . P–KR3

Formerly 10 . . . P–K3 11 P–K5
P × P 12 P × P B–B3 was played here.

11 B–R4 P–KN4

12 P–K5 (204)

This position also is not new. In one Yugoslav tournament a game went 12 . . . B–N2 which led to great complications. The variation 13 B–K1 N–R4 14 N–Q5 Q × P 15 N × P is obviously good for White. But I think that Black’s idea is worth considering and is interesting to analyse.

**2002 AK–Robert Byrne:**

R2: 30 December:

Sicilian

The notes to this game are
12 ... \[P \times B\]
13 P × N \[P-K3\]
14 B-K2

A good move. The white bishop, depending on circumstances, can be transferred to f3 or h5, where it will control important squares.

14 ... \[B-B3\]
15 KR-K1 \[R-KN1\]
16 B-B3

It’s far from simple for Black to find a move, and it’s no coincidence that Byrne thought for 20 minutes.

16 ... \[K-Q2\]

Black decides on evacuating the king to the Q-side. I succeeded in finding a line which led to a clear positional advantage.

17 R-K5 \[Q-N3\]
18 Q×Q \[P×Q\]
19 B-R5

Now the KBP cannot be defended. A series of forced moves begins – each side strives to gobble up as many pawns as possible.

19 ... \[R×P\]
20 B×P \[R×RP\]
21 B×P+ \[K-B2\]
22 R-K3

White’s position is better because his pawns on the KB-file are more dangerous than the black pawns on the KR-file. In addition to which Black’s KB is, for the time-being, out of play.

Now Black faces the problem – where to put the R/B1?. It’s possible he should have moved it to R1, but this was a difficult decision to make; it took the b8 square away from the king.

22 ... \[R-Q1\]
23 N-Q5+ \[B×N\]
24 R×B

In spite of the opposite coloured bishops White’s position is very much better because Black has very weak pawns.

24 ... \[R-B7\]

Provoking an advance of the KBP (KB4), Black prepares to bring out his bishop on h6.

25 P-B5 \[P-R4\]
26 R-QB3+ \[K-N1 (205)\]
27 P-R4

205

I’m not convinced with the correctness of the plan of attack on the king – it’s possible that the correct procedure was to concern myself with the opponent’s passed pawns, but this course seemed to me too slow.

27 ... \[R-B5\]
28 R-QR3 \[R-KN5\]
29 P-R5 \[B-R3+\]
30 K-N1 \[P×P\]
31 R5×RP

The pawn on b7 is in danger and there is no way to defend it. Black’s only counterplay consisted of the line 31 ... R-N8+ 32 K-Q2 B-R3+. Byrne, however, began immediately with the second move and allowed the white king to hide itself away on a2.

31 ... \[K-B2\]
32 R-N5 \[R-N6\]
33 R-R7 \[R-QN1\]
34 B-Q5 \[R-N8+\]
35 K-R2 \[R-KB8\]
36 R7×P+ \[R×R\]
37 R×R \[K-Q1\]
38 B-K6 \[P-R6\]
The last chance...

39 R–Q7+

In time-trouble Byrne noticed that if 39 . . . K–B1 40 R–KR7+ K–Q1 41 R×B P–R7, White succeeds in holding the pawn by 42 B–Q5, and played...

39 . . . K–K1

but after...

40 R–QB7 1–0

resigned because of the unavoidable mate.

2003 George Botterill

B–K2 0–0 10 0–0 P–QN3 11 B–K3
B–Q2?! An interesting innovation.
This move is sometimes played on
move ten, but after 11 B–K3 the
theoretical continuations are 11 . . .
and 11 . . . N–K4 with the aim of
making possible the advance . . .
P–QN4.

12 R–B1 12 P–B3 Q–N1 13 Q–K1
R–R2 14 Q–B2 R–N2 15 KR–Q1
N–QN5 16 R–Q2 R–Q1 17 R1–Q1
B–K1 18 P–B4± Kapengut-
Balashov, 39 USSR Ch 1971.

12 . . . Q–N1 13 P–KN4!? (207)

Fischer, against Taimanov at
Palma 1970, played 13 P–B3 but had
no more than equality after 13 . . .
R–R2 14 N–B2 R–Q1 15 Q–K1
B–K1 16 Q–B2 R–N2 17 P–QR4
P–QR4 establishing QB4 for the N/KB3.

13 ... R–B1 If 13 ... P–QN4 then
14 P × P P × P 15 N/R3 × P N–N5
16 P–QR3 N–R7 17 N × N B × N 18
P–B3 and the weaknesses in White’s
K-side do not sufficiently compensate
Black for the connected passed
pawns.

14 P–N5 N–K1 15 B–B4 R–R2 16
Q–K1 R–N2 17 Q–R4 P–N3! 18
R–B3 N–N2 19 R1–B1 19 R–R3
only wastes time as then 19 ... 
P–KR4 leaves the K-side blocked.

19 ... R–K1 20 B–Q3 20 N–B2?!
is an interesting alternative e.g.
20 ... P–N4 21 N–Q5 P × N 22
BP × N is unclear. But 20 R3–B2,
with the idea of N–Q5 is not so good
on account of 20 ... B–KB1 –
removing the bishop from attack and
strengthening the K-side.

20 ... P–KR4 21 Q–B2 N–N5! 22
B–N1 B–QB3 23 R–R3 White wants
to play P–B5. Minić and Marić in
Informator 13 point out the interesting
line 23 B–Q4 P–K4 24 P × P P × P
25 R × P P × B! 26 R × N + K × R 27
Q–B7 + K–R1 28 Q × NP B–B4! ⊥ ⊥ 
23 ... B–Q2 24 Q–R4 Q–B1 25
R–B1 N–Q5 is now a threat.

25 ... Q–N1 26 R–B1 Q–B1 27
R3–B3 P–Q4! = 28 BP × P P × P
29 P–B5!? B–B4 30 B × B Q × B +

31 Q–B2 Q × Q + 32 R3 × Q P–Q5
33 N–K2 P–Q6 34 P × P P × P Not
34 ... P × N? 35 P × P + K–R2 36
P–K5 +! and White wins. 35 N–KB4
R × P 36 N × QP (208)

36 ... R–N5 +?! 36 ... B–R6 was
better. 37 R–N2 R × R + 38 K × R
N × N? And now 38 ... N–Q4! was
the right course, though even then
White would have some advantage –
Black’s K-side pawns are probably
weaker than White’s, and White’s
pieces are more actively placed.
Now Black loses a pawn.

39 B × N N–B4 40 B × P B–B3 +?
Here 40 ... N–K6 + was essential.
After 41 K–N1 R–R2 42 B–B4 +
N × B 43 N × N B–N4 posing White
some problems. 41 K–B2 R–Q2 42
R–B1! B–K5 43 B–K2 N–Q3? 43
... N–Q5!? was the last chance of
fighting White’s growing advantage.

44 N–B4 N × N If 44 ... R–QB2
then 45 N × N R × R 46 N × B and
White should have no real problems
converting his material advantage.

45 R × N B–Q4 46 R–QN4 B × P 47
R × P K–N2 48 R–N4 B–N8 49
K–Q2 K–K3 52 R–N5 B–K5 53
P–N4 R–QB2 54 K–K3 B–N8 55
R–QB5 R–K2 Black cannot ex-
change rooks – White simply marches
to the K-side and gobbles up the
pawns. 56 B–B3 K–Q3 + 57 K–Q4
R–KB2 58 R–B6 + K–Q2 59 R–B6
R–K2 60 P–N5 1–0

2006: AK–Henrique Mecking:
R6: 4 January:

Sicilian

The notes to this game are
Karpov’s from the Soviet Central

Mecking introduced a new move
in the opening, but I think that he
had not foreseen the reply.

Mecking very much wanted to
take first place. When I had 3½/4
and my next game was with the
Romanian master Ciocaltea,
Mecking asked him,
‘You are going to “get rid” of
Karpov?’,
‘I am going to play,’ answered
Ciocaltea.
‘Make sure you don’t lose, other-
wise I can’t be first.’

Understandably my game with
Mecking took on the character of a
needle-match.

1 P–K4 P–QB4
2 N–KB3 P–Q3
3 P–Q4 P×P
4 N×P N–KB3
5 N–QB3 P–QR3
6 B–K2

I frequently use this system and I
know it quite well. In games against
many foreign chessplayers the winner
is often not he who plays best, but
he who has analysed the opening
variation the furthest.

6 . . . P–K4
7 N–N3 B–K3
8 P–B4 Q–B2
9 P–QR4 (210)

Here the usual replies are 9 . . .
B–K2 or 9 . . . QN–Q2, but Mecking
Karpov analysing his game against Hecht, Bath 1973
Karpov analysing his game against Hecht, Bath 1973
Karpov - Gligoric

1. e4 e5 2. Kf3 Kc6 3. Bb5 a6 4. ca4 Kd5 5. 0-0 c5

The game Karpov-Gligoric, Leningrad 1973, in Karpov's own hand
Before a game at Bath 1973

Karpov as seen by a Russian cartoonist
didn’t fancy either of them. He thought for a long time and chose a new, but far from the strongest continuation.

9 ... N-B3
10 P-B5 B x N
11 P x B Q-N3

If White succeeds in castling K-side and putting his bishop on QB4, his advantage will be overwhelming. Mecking hinders the achievement of this plan.

12 B-KN5 B-K2
13 B x N B x B
14 N-Q5 Q-R4 +
15 Q-Q2 Q x Q +
16 K x Q B-N4 +
17 K-Q3 0-0
18 P-R4 B-Q1

On ... KR3 the bishop might be dangerously placed (after P-KN4).

19 QR-QB1

It’s not yet possible to smoke out the knight from d5 because on 19 ... N-K2 follows 20 N x N + B x N 21 R-B7. And if 19 ... N-Q5 then 20 P-QN4.

19 ... P-QR4
20 K-Q2 R-N1
21 P-KN4

White’s plan is clear – a pawn storm on the K-side; after B-B4 it will be very dangerous. Appreciating this, Mecking seeks succour in the opposite coloured bishops.

21 ... N-N5
22 B-B4 N x N
23 B x N

The position has stabilized. White has a big advantage in the complete absence of counterplay for the opponent. Mecking had placed great hopes on his next move, thinking that he would be able to blockade the K-side pawns and halt their advance.

23 ... P-KN4
24 BP x Pep RP x P

25 K-Q3 K-N2
26 P-R5 B-N3

No better is 26 ... B-N4 27 R-B7.

27 R-R3

In order to seize the KR-file after the exchange on KN6.

27 ... B-B4
28 R-KB1 P-B3

Forced. 29 P-R6 + was threatened.

29 P x P K x P
30 R1-KR1 R/N1-K1
31 R-R7 K-N4

Mecking was in time-trouble and was afraid of mating threats after R1-R5.

32 K-K2 K-B5

Here a devastating idea came into my head and I played ...

33 R1-R3 (211)

Mecking didn’t appreciate the threat and replied ...

33 ... B-Q5

and after ...

34 R-N7 1-0 (time)

he exceeded the time limit, although he could have resigned in view of the unavoidable mate.

But even after the best defence – 33 ... K x NP 34 R-R1 R-KN1 35 B x R R x B 36 R-KB1 White wins easily.

2014 Viktor Korchnoi–AK:
R14: 13 January:
QP – Torre
1 P-Q4 N-KB3
2 N-KB3 P-K3
3 B-N5 P-QN3
Somewhat unusual; 3 ... P-B4 is
normal. I adopted this opening
against Paul Keres in the tourna-
ment at Tallinn in 1965 – my only
previous trial of it. Black gets the
advantage of the two bishops; White
secures a lead in development and a
strong centre.
4 P-K4 P-KR3
5 B × N Q × B
6 B-Q3
I played an early N-QB3, castling
Q-side, in the game against Keres,
encountering slight difficulties be-
cause he was able to set up an attack
on my king along the QN-file. So I
switch to QN–Q2 here. The choice,
however, is really only a matter of
taste.
6 ... B-N2
7 QN–Q2 P-Q3
8 Q-K2 P-QR3
Or 8 ... N-B3 9 P-B3 0-0-0
followed by ... B-R6.
I was rather expecting 8 ... Q–Q1
followed by ... B–K2 and ... 0-0.
It is natural for such an undevelop-
ing move as ... Q–Q1 to go against
the grain but I felt that the queen
was misplaced on f6 and expected
Karpov to retreat it at more than
one stage. The course of the game
repeatedly reinforced my opinion.
Najdorf and I, analysing together
after the game, found it surprisingly
difficult to establish any definite
advantage for White if Black goes 8
... Q–Q1.
I had planned to answer 8...
P–B4 by 9 P–K5 but, on subsequent
consideration it seems to me that
quietly maintaining the pawn centre
by 9 P–B3 might be best.
My last move or my next could
well have been P–K5, but I did not
feel inclined to start an attack before
completing the development of my
pieces.

**9 0–0–0  N–Q2**

10 K–N1
A move which, as so often after
0–0–0, proves to have been a useful
safety measure in the sequel.

**10 ... P–K4**

10 ... B–K2? would have shown
up the bad positioning of Black’s
queen in a drastic way; after 11
P–K5 P × P 12 P × P Q–B5 13
P–KN3 the queen would have been
driven all around the board, with
White continuously improving his
position.

To 10 ... Q–Q1, just as to the
move played, 11 N–B4 would have
been the answer: any attempt to
dislodge this well-placed knight by
pawn attack would seriously weaken
Black’s position.

**11 P–B3  B–K2**

I had still been expecting 11 ...
Q–Q1!

**12 N–B4  0–0**

13 B–B2  KR–K1 (218)
Perhaps 13 ... P × P should have
been played first, even though it
appears to strengthen White’s centre
dangerously; the point being that
after 14 P × P, 14 ... R–K1 would
have some counter-attacking effect.
15 P–K5, however, would still leave
White on top.

**14 P–Q5  P–B4**

218

After long thought, but a bad
move. 14 ... P–B3 seems indicated,
followed, if 15 P–KN4, by 15 ...
P–QN4 16 N–K3 P × P and 17 ...
N–N3, or by 16 ... N–N3 at once,
securing some play on the Q-side for
Black.

**15 N–K3**
Now White is all set to start a
direct attack by 16 P–KN4.

**15 ... B–KB1**
Both the next move and Black’s
reply came on the instant.

**16 P–KN4  Q–Q1**

17 P–N5  P–KR4
If 17 ... P × P 18 QR–K1
followed by P–KR4 would expose
Black’s king to a terrific attack.

**18 P–N6  P × P**

19 KR–N1  Q–B3

20 N–N5  B–K2

21 N–K6  N–B1
After the game I asked Karpov
had he overlooked the loss of the
exchange. ‘No’ he replied, ‘I invited
it feeling that, in view of the strength
of your advanced knight, it was my
best chance’. Of course he already
has a pawn ...

But 21 ... QR–QB1 seemed a
natural measure to me, e.g. 22 R–N2
N–B1 23 QR–N1 K–R2 24 N × N
R × N 25 R × P Q × R 26 R × Q
K × R 27 N–B5; White has B–Q1,
P–KB4 etc to follow with, probably,
a winning attack, but the game is not
over by any means. Whereas from now on, Black really has little or no prospect of salvation.

Note that in answer to 21 . . . QR–QB1 22 N–KB5? would get nowhere because of 22 . . . B–B1!

22 N–B7 Q–B2

23 QR–KB1?

With victory in sight, I begin to relax. I have the K-side under control and should now have killed Black’s prospects on the Q-side as well.

I am convinced that the one correct move here was 23 P–QR4 followed by P–QN3, B–Q3, K–B2 etc.

23 . . . P–QN4?

Inaccurate play on both sides. 23 . . . QR–B1 24 N×R Q×N would have cost me a clear tempo compared with the game.

24 N×R/R8?! B×N?

It would have been easier to bring the rook back into the game after 24 . . . R×N, than to activate this very poor bishop anew.

25 P–QB4

To block the Q-side, at least partially.

25 . . . R–N1

26 B–Q3

Black should now have reconciled himself to 26 . . . P–N5. It slows down his counter-attack, but it does ease a little the urgent task of bringing back his QB into play.

26 . . . Q–K1?

In answer to 26 . . . P–N5, I planned B–B2–QR4 (if 27 . . . Q–K1 then 28 Q–Q1 conquering the diagonal from White’s QR4) followed by manoeuvring my knight to Q3 and K–R1, P–QR3 and either R–QN1 or P–KB4.

27 R–B1 B–KB3

28 R–N2

I thought of playing 28 P×P P×P 29 P–N4 followed by N–Q1–B3, but realised that both the opportunity and the necessity of activity on the Q-side had passed by.

28 . . . R–N3

So as to play 29 . . . B–N2 and 30 . . . B–B1 but I am able to ensure that he never gets the time. The text is an ugly move and if any move can be said to lose the game, this is it.

29 R/B1–N1 R–N1

Forced, because White threatened 30 R×P N×R 31 Q×P.

30 Q–B1 P–N5

He might well have tried 30 . . . B–N2 31 P×P B–B1 and if 32 P×P? B–R6 followed by 33 . . . B×R 34 Q×B. This could only be regarded as a desperate measure for White’s QRP remains strong, and QB4 will be a fine square for his knight.

31 B–K2

This is the winning move, if there is one. Now Black has no answer to the threat of 32 R×P.

31 . . . P–R5

32 R×P Q×R

or 32 . . . N×R 33 B–R5 Q–K2 34 N–B5 etc.

33 R×Q N×R

A queen doesn’t always win against a rook and bishop, but here White has a big positional advantage as well; Black’s pieces are poorly co-ordinated.

34 B–N4 N–B5

35 Q–Q1

Heading for QR4.

35 . . . P–N6

Agony!

36 P×P B–N2 (219)

Coming back into play at last.

37 N–N2!

A move which drew applause from the spectators — B. H. Wood.

37 . . . B–B1

If 37 . . . N×N White would win by 38 B–K6+ followed by 39 Q–R5.
37 ... K–B1 would be a little better than the move played.

38 B × B  R × B
39 Q–N4  R–K1
40 N × N  P × N
41 Q × BP  B–K4
42 Q × P  R–KB1
43 P–N4  B–Q5

Queen and seven pawns against rook, bishop and three – it is too much!

44 P × P  1–0

If 44 ... B × QBP 45 Q–K7 R × P 46 P–K5 wins.

The notes (by Korchnoi) to this game originally appeared in the February 1972 issue of Chess and are reproduced here by special permission.

**2015 AK–Peter Markland:**

R15: 15 January:

French

White also gets an advantage from 10 0–0 B × B  11 P × B  P–QR4  12 N–N5  P–R3  13 N–R3  ± with a positional bind and the possibility of advancing P–KB4–B5.

10 ... N1–B3  11 0–0 P–KR3  12 R–K1  N–R4  13 Q–Q2?! 13 B–K3 to be followed by N–Q2, as Byrne had played against Markland in the 5th round, is better.

13 ... R–QB1!

Much better than 13 ... 0–0?! 14 Q–B4 P–B4 15 KP × Pep Q × Q 16 B × Q  ± Mecking–Markland, 9th round.

14 P–R4

14 Q–B4 doesn’t promise much:

14 ... P–B4  15 Q–N3 (15 KP × Pep Q × Q  16 B × Q  P × P  ± when Black has good attacking chances) 15 ... K–B2 to be followed by ... QR–KN1=.

14 ... 0–0  15 Q–B4 P–B4  16 KP × Pep R × P  17 Q × Q  R × Q (220)

18 P × P! ±

This guarantees White some advantage: Black’s central pawns are only strong optically. 18 N–K5 would have been wrong because of 18 ... P × P! 19 P × P  N2–B3=.

18 ... P × P  18 ... R × P?  19 B–R3  ±  19 N–K5  B–B1  20 P–QB4?!

20 P–N3?! with 21 B–KB4 to follow is a more suitable treatment.

The only way to make progress.

N–B3 and White can do little for fear of the QBP.

25 ... N × B 26 P × N R × RP 27 N–K4

If 27 QR–B1 R–R5 28 B × P then not 28 ... R × P? 29 B–N4 and wins, but simply 28 ... B–Q2!

27 ... R–R4 28 KR–QB1 B–N2

28 ... P–B5 allows 29 B–Q6 R–Q2 30 P–R6!

29 N × P B–Q4 30 P–B3 R–B4 31 P–R6 (221)

With the idea of ... N–Q5.

33 B–B5 R–QB1 34 B–B2 R2–B2

35 R × R R × R 36 R–N1 N–K2 37 R–N8+ K–R2 38 K–R2 N–N3

Or 38 ... N–B1 39 N–B5 with R–N7 to follow.

39 N–B5 Again angling for R–N7.

39 ... R–B3 Or 39 ... N–K4 40 R–N7 B × R 41 P × B N–B3 (41 ... N–Q2 42 P–Q4 wins) 42 B–N3 ±.

40 R–Q8 Not now 40 R–N7?

R × P! =.

40 ... R–B2 41 R–Q7 ± R × R 42 N × R B–B3 43 N–N8 B × P N–K2 45 B–N6 Not 45 B–B5? allowing 45 ... N–Q4–B2–R1. 45 ... N–B1 46 B–B5 K–N3? 46 ...

---

Interview–London 1972

Q: Grandmaster Anatoly Karpov, can you say something about the British players who played at Hastings?

AK: Best of all played Keene; at Hastings he played less well than he can do, it seemed to me that he was afraid to lose.

Q: Is there one particular game or two games which you played at some time which you like most of all?

AK: It was in the Alekhine Memorial tournament in Moscow recently; the game with Hort, and here the game with Byrne.

Q: Would you like to say who will win the forthcoming match, Spassky or Fischer?

A: I don’t know!

Q: Which games in the history of chess do you admire most of all?

AK: There are very many games which are very good. All the good games I like.

Q: Who are your chess heroes?
AK: Capablanca and Botvinnik.
Q: As well as chess what do you like to do? What are your main interests?
AK: I am a student studying economics in the faculty in Leningrad.
Q: What can you say about London?
AK: Interesting city!
Q: When did you have your first significant chess achievement?
AK: At what particular level?
Q: At international level.
AK: The first time I played in Czechoslovakia, it was a small international tournament – I took first place. And then the World Junior Championship in Sweden.
Q: Was there one particular game in that tournament in Sweden which left a big impression?
AK: Most of all the game with Andersson.
Q: Do you do some physical training as preparation for chess?
AK: Yes I swim, and in the winter I ski.
Q: What do you think about your own chess style?
AK: I haven’t got any particular opinion of my own style – I just play chess.
Q: What do you think of Walter Browne, the Australian grandmaster?
AK: I haven’t met him yet!
Q: Have you seen Browne’s games?
AK: Not a great deal, I don’t feel able to say anything about him.
Q: Is this the first time that you have visited London?
AK: Yes it is.
Q: Can you advise us what we must do if we want to improve?
AK: I don’t know what you do at the moment.
Q: We study openings a lot, we play a lot I suppose.
AK: But endgames not very much – do the opposite study endgames!
Q: When you were a child did you play in simultaneous displays against Soviet grandmasters?
AK: Yes I did play against Botvinnik, Korchnoi, Spassky – almost all the Russian grandmasters.
Q: Did you win against some of them?
AK: I don’t remember, I think I drew with Botvinnik, Spassky and Korchnoi, the others I don’t really remember.

Q: What is your opinion of Vaganian?

AK: Some months ago he had a very good result (first at Vrnjacka Banja 1971 – eds), was it just one result or will he in future get equally good results? We shall see.

Q: Do you play blindfold chess?

AK: No.

Q: Have you tried?

AK: It’s very tiring, bad for the head, and there’s not a great deal of point to it.

Q: What particular branch of economics do you study?

AK: I study the economics of foreign countries.

Q: Do simultaneous displays help you?

AK: No they do not help me, but they are necessary for popular results at chess.

This interview took place at the London Central YMCA Club on Saturday evening 22 January 1972 on the occasion of a simultaneous display. The questions were put and the answers translated by Mike Wills.

Karpov played on board two (below Polugayevsky) for the RSFSR team. All but one of the games from this event are available:

### 2101 AK—Anatoly Kudriashov:

PR1 v. Turkmen SSR:

Sicilian

1 P-K4 P-QB4 2 N-KB3 P-K3 3 P-Q4 P×P 4 N×P N-KB3 5 N-QB3 P-Q3 6 P-KN4 P-QR3?! 7 P-N5 KN-Q2 8 B-K3 P-QN4 9 P-QR3

9 P-B4!? has now been unearthed:

9...B-N2 10 P-B5! P-N5 11 P×P!

9...N-N3 Or 9...B-N2 10 Q-Q2 Q-B2 (10...N-B4 11 P-B3 N-B3 12 N×N B×N 13 0-0-0 Q-B2 14 B-KB4 R-Q1 15 P-N4 N-N2 16 P-KR4 ± Adorjan-Ostojić, Polanica Zdroj 1970) 11 B-K2 N-B4 12 P-B3 N-B3 with a complicated double-edged position.

10 Q-Q2 10 P-B4 may be better e.g. 10...N1-Q2 11 B-N2 P-K4 12 N-B6! Q-B2 13 N-N4 B-N2 14 P-B5!± Padievsky-Malich, Amsterdam 1972.

10...Q-B2 11 0-0-0 N1-Q2 12 P-B4 N-R5!?! 13 N×N P×N 14 N-K2 B-N2 15 B-N2 N-B4 16 N-B3 B-B3 17 B×N! Liquidating the hub of Black’s position. 17...

P×B 18 P-K5 B-K2 19 B×B+ Q×B 20 Q-K2 P-B5 21 Q-K4 R-QB1 (222)

Now Black is left with a lost ending, but 21...Q-B1 22 R-Q4 was not really an alternative. 22 Q×Q+ R×Q 23 N×P P-R3 24 P-R4
P-B6 Ridding himself of one weak pawn, but it also brings the white knight back towards the centre.

25 N×P B×RP 26 N-K4 B-K2
27 P-N3 P-QR4 28 P-B3 P-R5
This sacrifice is Black’s last chance – its effect is to weaken the white Q-side pawns and create some open files to White’s king.

2102 AK–Mark Taimanov:
PR2 v. Leningrad:

Sicilian

1 P-K4 P-QB4 2 N-KB3 P-K3 3 P-Q4 P×P 4 N×P P-QR3 5 B-Q3 B-B4 6 N-N3 B-N3 For 6... B-R2 see Karpov–Hübner (No. 2208). 7 0-0 N-K2 8 Q-K2 QN-B3 9 B-K3 N-K4 9... B×B 10 Q×B P-Q3 11 P-QB4 + with a bind 10 P-

QB4! After 10 P-KB4 Black has the aggressive 10... N-N5 11 B×B Q×B + 12 K-R1 P-KR4 with a good game, or a simple path to equality with 10... N×B 11 P×N P-Q4. 10... B×B 11 Q×B Q-B2 If 11... N×B then 12 Q×N +, but 11... P-Q3 is an alternative though White still has the edge and two good plans in 12 B-K2 to be followed by P-B4, and 12 R-Q1 Q-B2 13 N-R3 +. 12 P-B5! N×B 13 Q×N P-QN3 14 P×P Q×NP 15 N1-Q2! P-Q4 16 P-K5!
Much better than 16 P×P which lets Black off with equality after both 16... P×P 17 KR-K1 B-K3 18 N-Q4 0-0 and 16... N×P 17 N-B4 Q-N5 18 P-QR3 Q-K2. 16... B-Q2 17 KR-B1 0-0 18 Q-Q4! Q-K1 Or 18... Q×Q 19 N×Q KR-B1 20 N2-N3 B-B3 21 N×N B×N and White has 22 R-B3 + or 22 N-Q4 +. 19 N-B3 N-B3 19... N-B4 20 Q-KB4 + 20 Q-K3 R-B1 If 20... P-B3? 21 N-B5 wins. 21 R-B5 P-QR4 22 R1-QB1 P-R5 23 N-N3-Q4 N-R4 23... N×N 24 Q×N + 24 R×R + B×R 25 P-QN3 B-Q2 (223) Or 25... P×P 26 P×P B-Q2 27 P-R4 +

White now commences a K-side pawn storm. 26 P-R4 P-R3 27 P-KN4! Q-N2 27... Q-Q1, to
control some of the dark squares on the K-side, followed by ... R–QB1, would have been better. 28 P–R5 N–B3 28 ... R–QB1 brings no relief: 29 R×R+ Q×R 30 P–N5+. 29 P–N5 N×N 30 N×N KRP×P 31 Q×P K–R2 32 P–R6 P–N3 33 Q–B6 K–B1 34 P–R7 was a terrible way to go. 32 R–B3!± ± Q–N5 33 R–N3 R–KN1 34 N–B3 P×P 35 P×P Q×P This loses, but 35 ... Q–B1 36 Q–B4 was hardly any better. 36 Q–B1! Q–R7 37 N–N5+ K–R1 38 N×BP+ K–R2 39 Q–N5 Q–N8+ 40 K–R2 1–0 There is no defence against 41 Q–N6+ Q×Q 42 P×Q mate.

2103 Hillar Kärner–AK: PR3 v. Estonian SSR:

QP – Torre

Petrosian annotated this game for Informator. He must have some fond memories of this system; at the Munich Olympiad 1958, he played it against Kozma, to be greeted by 4 ... P–QN3? 5 P–Q5 P×P 6 N–B3 B–N2 7 N×P B×N?! 8 B×N Q×B 9 Q×B N–B3 10 B–B4 B–K2 11 0–0–0 R–Q1 12 R–Q2 and Petrosian had complete control of the Q5 square and, after ringing the changes on d5 – pawn, knight, queen, bishop, rook, he broke through to score a beautiful win.

4 ... P×P 5 P×P B–K2 6 QN–Q2 P–Q3 7 P–B3 QN–Q2 8 B–Q3 P–QN3 9 N–B4 B–N2 10 Q–K2 Q–B2 11 0–0 0–0= is the original, Torre-Lasker, Moscow 1925.

5 QN–Q2!?

Probably strongest. Alternatives are:

(a) 5 N–B3!? Q×P 6 N–N5 Q–N5+

7 P–B3 Q–R4 8 N–Q2 P–QR3!

9 N–B4 Q×N 10 N–Q6+ B×N 11 B×Q P×B and Black’s three pieces proved far stronger than White’s queen in Bisguier–Sherwin, New York 1954–5;

(b) 5 P–QN3? N–K5 6 B–KB4 P×P 7 P×P B–N5+ ⊕;

(c) 5 Q–B1 N–K5 6 B–KB4 P–Q4 7 B–Q3 N–Q2 8 0–0 B–Q3=.

5 ... Q×P

Black should accept the challenge as 5 ... P–Q4 6 B×N! P×B 7 P–B4! Spassky–A. Zaitsev, 30 USSR Ch 1962, is already clearly better for White.

6 B–Q3

Black also comes out on top after 6 B–QB4 P–Q4 7 R–QN1 Q–B6 8 B–N5+ N–B3 9 N–K5 N×N 10 N×N P–QR3! ⊕ – Petrosian.

6 ... P–Q4 7 P–B4

Or 7 P×P QN–Q2 8 0–0 N×P ⊕ Kan–Goldenov, 15 USSR Ch 1947.

7 ... Q–B6 8 N–K5 N3–Q2 9 R–QB1 Q–R6 10 N×N B×N 11 B–N1 P–KR3 12 B–B4

A rather strange position – Black only has his queen in play, yet almost all White’s pieces have been forced to occupy awkward positions. 12 ... BP×P 13 0–0 B–Q3 14 B×B Q×B 15 BP×P KP×P 16 P–K4!? White tries to conjure up some play to compensate for his dwindling army of pawns.

16 ... N–B3 17 Q–N3 N–R4 18 Q–Q3 N–B3 19 KR–K1 B–K3 20 P–B4 0–0–0

Since castling K-side is out of the question in view of 21 P–K5.

If 26 N×P K–N1 allows Black to exchange off into a very favourable ending.

26 ... K–N1 27 R–B5 Q–N5 28
Q×N3 + K×R1 29 R×N5 Q×K2
Black has enough booty for now, besides 29 ... Q×P 30 R×NP is rather embarrassing e.g. 30 ... K×R 31 N×B5 +.
30 N×B5 P×R3 31 Q×QR3
Trying to keep some threats going.
31 ... R×QN1 32 B×Q3 P×Q3 N3 33 P×R5 P×N
Black now has an easy win – too easy perhaps?
34 R×N6 R×R 35 P×R P×B 36 Q×P + K×N1 37 R×R1 Q×N2! 38 Q×R3 P×B
Black has no objection to his 'ugly' QPs – bearing in mind how they got there!
39 Q×Q6 + K×B1 40 R×R8 +
White keeps trying ... 40 ... Q×R?? 41 Q×B7 mate.
40 ... N×N1 41 Q×B5 + B×B3 42 Q×Q6 (224)

Your hopes are changed to dark despair;
Do see each move is made with care.
S. G. Tartakower
Black had a simple win with 42 ... B×N4 (But not 42 ... Q×P? 43 R×N + Q×R 44 Q×B + and White draws by perpetual) 43 R×R7 P×Q7 44 R×Q P×Q8 = Q + 45 K×B2 R×B1 + (45 ... Q×Q7 + is not so clear) 46 Q×R + (46 K×N3 Q×K8 + 47 K×R3 Q×K6 +; 46 R×KB7 R×R + 47 P×R Q×KB8 + 48 K×N3 Q×BP and White does resign) 46 ... K×R and wins. But now ...
43 R×N + 1–0!
43 ... Q×R 44 Q×B + K×Q1 45 Q×Q7 mate and Black's queue of potential queens is of no avail.

2104 AK–Gennady Kuzmin:
PR4 v. Azerbajian SSR:

Sicilian

1 P×K4 P×QB4 2 N×KB3 P×K3 3 P–Q4 P×P 4 N×P P×Q3 5 N×N5 P–Q3 6 P×QB4 N×B3 7 N1×B3 P–QR3 8 N×R3 B×K2 9 B×K2 0–0
10 0–0 B×Q2 11 B×K3 Q×R4!? 12 Q×K1!? Taimanov prefers 12 Q×N3
12 ... KR×K1 13 R×Q1 QR×Q1 14 P×B3 B×QB1 and Black has a satisfactory and harmonious development. 15 N×B2 Q×B2 16 Q×B2
N×Q2 17 R×B1 B×B3 18 N×R3

Why doesn't White resign? Obviously Black isn't going to fall for 42 ... Q×R?? – he's already avoided that. Karpov perhaps felt insulted here: a top-flight grandmaster two pieces up against a mere master who nevertheless continues playing ... Well he couldn't carry on two pieces and a queen down, so ...
42 ... P×Q7??

THE CATASTROPHE
In tournament or friendly game,
A hasty slip may mean the same:
Q–R4 19 KR–Q1 N–B4 20 N/R3–N1 R–Q2 (225)

2105 AK—Donatas—Piatras
Lapenis:
PR5 v. Lithuanian SSR:
½–½ X moves.
This game, is unfortunately, un-
available — it is the only one of
Karpov’s games which did not
appear in the Russian bulletins of
this event.

2106 AK—Alvar Gipslis:
FR2 v. Latvian SSR:
Pirc
1 P–K4 P–Q3
2 P–Q4 N–KB3
3 N–QB3 P–KN3
4 B–KN5

Until the sharp variation, begin-
ning with 4 P–B4 was worked out—
the continuation 4 B–KN5 was
reckoned to be the most active.
There is a straightforward plan:
White castles long and inaugurates a
K-side pawn storm.

4... P–B3

Ten to fifteen years ago the auto-
matic reply to 4 B–KN5 was 4... B–N2, but then it was found that it
is most important to secure the
defence of the d5 square at once, so
that after 5 P–K5 P×P 6 P×P
Q×Q+ 7 R×Q N–N5 one need
not fear a sudden attack by the white
QN.

5 Q–Q2

5 P–B4 gives better chances.
Against the old plan chosen by
Karpov there is a perfectly good
antidote.

5... QN–Q2
6 P–B3

White sets up a consistent pawn
formation, neglecting the possibility
of adding a new direction to play
by means of 6 P–B4.

6... P–QN4
7 N–R3

On 7 KN–K2 the QN loses the
use of K2 and the QB4 square is cut
off from the KB. Now White pre-
pared the transfer of the knight to
KB2, whence it defends both K4 and
KN4 at the same time. The defect
of putting the knight on KB2 reveals
itself as being that (as in the game)
the Q4 square may find itself in
trouble.

Another move order comes into
consideration; first to castle long and
then develop the knight on K2 or R3
depending upon Black’s choice of
plan.

7...
8 B–R6

Now 8... B×B 9 Q×B Q–R4,
forcing the white queen to return to
Q2, doesn’t seem bad. But Gipslis
boldly castles K-side.

8...
9 N–B2 P–K4

With this central counter-action,
Black makes it more difficult for his
opponent to develop a K-side ini-
tiative.

10 B×B K×B
11 0–0–0 Q–R4
12 K–N1 R–K1

In order to move the knight away
from Q2, Black strengthens his K4
square.

13 P–KR4 P–R4
14 P–KN4 N–N3
15 P–N5

Since it is not possible to open the
KN– and KR– files, Karpov puts
his hopes on opening the KB–file.

15...
16 N/B3–Q2
16 P–R3  R–QN1
17 P–B4? (226)

White under-estimates his opponent’s threats and immediately finds himself in a difficult position. It follows that he should have offered the exchange of queens with 17 N–R2. Black can scarcely avoid the exchange without weakening his position. After 17 . . . Q × Q 18 R × Q White's game is preferable, since he will have time to double rooks on the Q-file. It is true that 18 . . . P–R4 19 B–K2 K–B1 20 R1–Q1 K–K2 does not grant White any clear way to strengthen his position, but, in any case, he would have the initiative.

17 . . .  N–B5!
18 Q–K1

18 . . .  P × BP
19 N–Q3  N–K6
20 R–Q2  P–QB4!

Not giving his opponent a breathing space. Now 21 . . . P–N5 is a very strong threat.

21 R–B2

21 P × P is no better: 21 . . . N2 × P

21 . . .  P–N5?

22 N–R2  R × P (227)

23 R × P?

23 . . .  R × R
24 N × R  BP × P!
25 P × P  Q–KB4

Now comes the concluding stage of Black’s strategy – the attack against QB7.
26 N–Q3  N–K4
27 B–K2  B–K3
28 N2–B1  R–QB1
29 B–Q1  N4–N5
30 Q–Q2  K–N1

Sheltering the king from any checks. Black is not rushing anywhere.

31 B×N  P×B
32 N–K1  Q–K5
33 R–N1  B–B4
34 Q–Q3

Despair! If 34 N/B1–Q3 then 34...
N×P wins.

34...
35 Q–R6  Q–R7
0–1

Notes by Boleslavsky translated from Shakhmaty v SSSR No. 5 1972.

2107 Roman

Dzhindzhikhashvili–AK:
FR3 v. Georgian SSR:

Queen’s Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3
3 N–KB3 P–QN3 4 P–KN3 B–N2 5
B–N2 B–K2 6 N–B3 N–K5 7 B–Q2
P–Q4 8 P×P P×P 9 0–0

This system was given a good work-out in the Olympiad. Other moves tried here were:

(a) 9 B–B4 0–0 10 Q–B2 N×N! 11
Q×N P–QB4 12 0–0 N–Q2 13
KR–Q1 P–B5 14 N–K5? (14 P–N3
is more exact – Taimanov) 14...
P–QN4± Pavlenko–Furman;

(b) 9 R–QB1 0–0 10 0–0 N–Q2 11
B–B4 P–QB4 12 N×N P×N 13
N–Q2 P–B4 Korchnoi–Polugayevsky
(13...N–B3 14 P×P B×P 15
N–N3± Dzhindzhikhashvili–Furman, Gori 1971) and now 14 N–B4±
–Taimanov.

9...0–0 10 B–B4 N–Q2 11 Q–B2

New. 11 R–B1 P–QB4 12 N×N
P×N 13 N–Q2 would transpose into (b) above.

11...P–QB4 12 N×N P×N 13
N–K5 N–B3

If 13...P×P 14 B×P R–B1 15
Q–N1 with an unclear position, but
not 15 B×P+?? K–R1 16 Q–KB5
N–B3 and Black wins easily.
14 P×P± B×P 15 B–N5 Q–B2
15...R–K1 is no better: 16
B×N! (the ‘clever’ 16 N–N4? fails
to 16...Q–B1! 17 N×N+ P×N 18
B–K3 B×B 19 Q×Q QR×Q 20
P×B R–B7=) 16...
Q×B 17
N–Q7= and Black’s bishop battery
will soon be firing on only one barrel.
16 N–B4 B–K2 17 QR–B1 (228)

![Chess Diagram](image)

White stands very well out of the opening.

17...KR–K1 18 N–K3 Q–K4

Exchanging queens by 18...
Q×Q allows 19 R×Q P–KR3 20
B×N B×B 21 R–B1 and White
has succeeded in doubling his rooks,
with much the better game, e.g.
21...QR–B1 22 R×R R×R 23
R×R+ B×R 24 N–Q5 ruining
Black’s K-side pawn formation or
picking up the KP free as 24...

QB1 21 Q–R4 Q×KP 22 R×R R×R
22...B×R?? would be terrible:
23 Q–B6! and Black has to play 23...
Q–R3 when White has many
threats.
23 Q×RP Q-R3 24 Q×Q B×Q 25 N-B5 B-B4 26 R-Q1 P-N3 27 B-N5 27 N-K3! is much stronger.
27 ... P×N 28 B×N B-B5 29 P-N3 B-K3 30 B-B1 K-B1 31 B-R6 R-R1 32 B-QN7! If 32
R-Q8+ R×R 33 B×R P-B5!
32 ... R-N1 33 R-Q8+ R×R 34 B×R K-K1 35 B-N5 K-Q2 36 B-B4 B-Q3 37 B-K3 K-B2 38

Board 1: Karpov 7/9 (77.8%), Hübner 9½/13 (73.1%), Rogoff 7/10 (70.0%).

The USSR team of Karpov, Balashov, Tukmakov, Vaganian, Podgayets and Anikayev was quite probably the strongest team ever seen at a student Olympiad.

Alan Perkins (of the English team) mentioned some interesting points in the British Chess Magazine, Sept. 1972: ‘Balashov has obviously benefited from Russian training methods in one respect at least; he is noticeably physically more substantial than formerly. One feels that Karpov has scope for similar improvement (he plays well enough already). Someone asked him when he thought he would be playing Fischer – “not just yet” he said. I doubt if even Fischer had ever been photographed as much as Karpov here, but the Russian did not seem to mind.’

Taimanov played 6 ... B–N3 against me. In the variation chosen by White there is no real difference between these two lines.

7 0–0 N–QB3
8 Q–K2 P–Q3
9 B–K3 B x B
10 Q x B N–B3
11 P–QB4 0–0
12 R–Q1

AK: Hindering the freeing ... P–Q4. The opening stage is concluded. White has a space advantage, but Black’s position is solid.

12 ... Q–B2
13 N–B3

AK: The knight manoeuvre N1–Q2–B3 comes into consideration. But in that case one must carefully watch for the possibility of ... P–Q4. With the text move White consolidates his space advantage.

13 ... N–K4
14 QR–B1

AK: Indirectly defending the QBP.

14 ... P–QN3
15 B–K2

AK: It is useful to preserve the bishop. If immediately 15 P–B4 there follows 15 ... N4–N5 16 Q–B3 P–QN4!

15 ... B–N2
16 P–B4 N–N3

AK: 16 ... N x BP loses after 17 B x N Q x B 18 Q x P Q–B3 (18 ... B x P 19 N–R5) 19 R x P.

17 P–N3 KR–Q1 (240)

AK: This position had already occurred in the game Ivkov–Hübner, Palma Interzonal 1970. Ivkov continued 18 R–Q2 QR–B1 19 R1–Q1 N–K2 20 N–Q4 P–K4 21 P x P P x P 22 N4–N5! ±. I think that instead of 20 ... P–K4, Hübner would have got an adequate game by means of 20 ... Q–B4 with the threat of ... P–K4.

2208 AK–Robert Hübner:
FR6: 26 July:

Sicilian

The notes to this game are by Karpov (AK) from 64 and Robert Hübner (RH) from The Chess Player 3.

1 P–K4 P–QB4
2 N–KB3 P–K3
3 P–Q4 P x P
4 N x P P–QR3
5 B–Q3 B–B4

AK: Another possible continuation is 5 ... N–QB3, but in the variation 6 N x N NP x N, which occurred in one of the games of the Fischer–Petrosian match, Black was unable to equalize.

6 N–N3 B–R2

AK: In the All-Union Olympiad
Hübner was in favour of 24 . . . N–B3, but 25 N–Q5 gives White an appreciable advantage.

24 . . . P × P?!

25 P × P

25 . . . Q × Q ±

26 R × Q

AK: It is clear that the draw is declined since the game had decisive significance for the award of the first board prize, and, besides that, I had enough foundation (purely in the chess sense) to continue the fight.

26 . . . N–N3?

27 R–Q1 K–B1?!
AK: During the game I thought that Black’s best continuation was 27 . . . R–K1 28 R × P N–R5 29 K–B2 N × B 30 K × N N × P 31 N × N P–B4 32 N2–B3 P × N + 33 K–N4. But in that case also, White has the advantage.

28 R3–Q3 N–K1
AK: The only move – on 28 . . . K–K2 there follows 29 P–K5 P × P 30 R × R R × R 31 R × R.

29 K–B2 R/Q1–B1
AK: Essential—the threat was P–K5.

30 K–N3 N–K2
31 N–Q4 R–B4
32 R1–Q2

32 . . . B–N2
33 N–B2?
RH: 33 P–R4 ±

33 . . . P–KN4
AK: A questionable decision. Of course White could have prevented this move by means of 33 P–R4, but... you see Black is adding many weaknesses on the K-side. Though, in all truth, Black’s pieces do obtain the... K4 square.

34 P × P  R × NP +
35 K–B2  N–N3
36 B–R1

AK: Defending against the threat of 36... N–K4 and at the same time clearing the third rank for manoeuvres.

36...
R–B1
RH: 36... N–K4 37 R–N3 R × R
38 P × R P–B4 39 N–Q4 ±
37 R–N3  R1–B4
38 N–K3  N–K2

AK: Black was unable to appropriate the... K4 square, since that would have involved diverting the knight from the defence of... Q4.

39 B–B3  R × R
RH: 39... R–N3!?
40 P × R  R–K4
RH: 40... P–B4!?
41 P–KN4

AK: The sealed move. It seems illogical, because the pawn advances on to a square of the same colour as the bishop, but in return White anchors the KB5 square and further hampers his opponent.

41...
P–QR4

AK: Relinquishing the struggle for... P–QN4 and putting the initiative completely in White’s hands.

Truly Black’s position is already very difficult, and in the event of him waiting passively, White will advance his QNP to QN5, then occupy Q5 with the knight at present on QB3, so that after the exchange the knight on K3 can attack Black’s pawns from QB4 or KB5.

42 R–Q1

AK: 42 N–B5 is no good on account of 42... N × N 43 NP × N B × B 44 K × B P–R4 45 N–Q5 N–N2! White waits for a more opportune moment and for the time being withdraws his rook to the empty first rank.

RH: 42 N–B5?! N × N 43 NP × N B × B 44 K × B P–R4 is unclear.

42...
B–B3
43 N/B3–Q5 (241)

AK: A move earlier this move brought nothing because of 42... N × N 43 BP × N B–R3. Now Black cannot capture the knight because of the unfortunate placing of the bishop.

43...
N–B1
RH: 43... B × N 44 BP × B with 45 N–B4 ± to follow.
44 N–B5  B × N

AK: The knight can no longer be endured. It would be bad to exchange the knight on... KB4 because of NP × N.

RH: 44... B–Q2 45 R–KR1 K–N1 46 K–N3 B–K3 ±
45 BP × B  N–K2
46 N–K3

AK: Directed towards QB4.

46...
N–N1

47 N-B4 R-K2
48 N x NP
AK: 48 P-K5 also gave a great advantage.
48 . . . R-N2
49 N-B4 R x P
50 R-QR1!
AK: In the ending the rook should be behind the passed pawn. There is no defence against 51 N x RP.
50 . . . N/N1-B3
51 N x RP R-N7+
52 K-K3 N-Q2
53 N-B6 R-N6+
54 K-B4 N-K4
55 N x N P x N+
56 K-N3
AK: The rest is, as they say, a matter of technique. 56 . . . N-Q3 57 K-B2 R-N7+ 58 K-N1 R-N2 59 P-R5 R-R2 60 P-R6 K-K2
AK: In the case of 60 . . . N-N2, White wins with 61 B-K2 N-B4 62 R-N1 N x KP 63 R-N7 R-R1 64 P-R7 K-N2 65 R-B7.
61 K-B2 K-Q2 62 K-K3 N-B5+ 63 K-Q3 N-N3 64 B-K2 K-Q3 65 K-K3 N-Q2 66 R-R1 N-B1 67 R-R6+ K-K2 68 P-Q6+ K-Q1 69 B-N5 R-R1 70 R-R5 P-B3 71 R-R6 R-N1 72 B-B6 R-N6+ 73 K-Q2 R-QR6 74 R x BP R-R7+ 1-0

2209 AK–Peter Markland:
FR8: 28 July:

Sicilian

1 N-KB3 P-QB4 2 P-K4 N-QB3
3 P-Q4 P x P 4 N x P N-B3 5 N-QB3 P-Q3 6 B-KN5 B-Q2 7 Q-Q2 R-B1 8 0-0-0 N x N 9 Q x N Q-R4 10 B-Q2 P-QR3 11 P-B3 Q-QB4 12 Q-Q3 P-KN3 (242)

13 P-KN4 B-N2 14 P-KR4 It's a favourite tactic of Karpov to push up the K-side pawns, which usually results in the opening of attacking lines as well as weakening the opponent's defensive pawn formation. 14 . . . P-R3 15 K-N1 B-K3 16 B-K3 Q-QR4 17 B-Q4! Even when Karpov is undertaking a K-side attack, he never seems to lose sight of the rest of the board — to be accurate, he tends to keep control over the whole position — see his games against Vujakovic and D. Byrne. 17 . . . 0-0 18 Q-Q2! Threatening 19 N-Q5 and 18 . . . R x N 19 Q x R Q x P+ 20 K-B1 R-B1 21 Q-R3 leads to (a) nothing for Black. 18 . . . N-Q2 19 N-Q5 Q-Q1 20 B x B K x B 21 N-K3 N-K4 22 B-K2! To play simply 23 P-KB4. Karpov's attack is simple, strong and deadly. 22 . . . P-B3 23 P-KB4 N-B5 24 B x N B x B 25 P-N5! Forcing the opening of lines to Black's king. 25 . . . RP x P 26 RP x P P x P This loses, but if 26 . . . R-KR1 or 26 . . . B-B2 then 27 P x P+, or 26 . . . B-N1 27 Q-R-N1 and there is no real hope. 27 Q-B3+ P-K4 28 N x B P-N4 29 P x KP R x N 30 Q-KR3! 1-0 Black is shattered: if 30 . . . R-R1 simply 31 Q x R+ followed by capture of the QP, and if 30 . . . K-B2 31 Q-R7+ wins.

The USSR team was Petrosian, Korchnoi, Smyslov, Tal, Karpov and Savon.

Karpov’s score of 86.7% was just bettered by Tal with 87.5% (the absolute best result). Karpov’s score was easily the best on his board (first reserve!): 13/15 ahead of Balshans 13/16 (81.3%), Rantanen 12/15 (80.0%) etc.

Ray Keene and David Levy devoted a section of *Chess Olympiad Skopje 1972* to Hübner, Karpov and Ljubojević, entitled *Future World Champions?*

Keene and Levy posed the question ‘which of this trio – if any – do you think will wrest the crown from King Bobby? Hübner – the realistic individuals? Karpov – the protégé of the Soviet machine or the charismatic Ljubojević?’

Their concluding predictions were: ‘David Levy believes that Karpov’s all-round virtuosity backed up by the vast chess resources of the Soviet Union will one day carry him to the top, while ... Raymond Keene adheres to the view that Hübner is likely to be Fischer’s challenger in the not-too-distant future.’

From the above one can see that at this time opinion was still divided as to Karpov’s likely prospects.

This is what Tal wrote about the youngest member of the Soviet Olympic team: ‘To be quite frank, only now at Skopje, have I realized that Karpov is really capable of the highest achievements. He had excellent results before, it is true, but from the creative point of view his play did not impress me. Now,
simply as a chessplayer, I am enchanted with several of Karpov’s games. When we are asked to show something of interest from Skopje we (the other members of the USSR team) have difficulty finding examples, but in Karpov’s case there is another difficulty: he cannot decide which of his fine games could be called the best one."

Gligorić was, if anything, even more impressed. In his introduction to the game Karpov-Ungureanu in Chess Life and Review he wrote: ‘At the present moment, Anatoly Karpov seems to come closest to satisfying the difficult requirements (to attempt to take the title away from Fischer). He has had steadily high results, which no other young player can boast, and the experience which only a Soviet-based player can achieve. At the same time, his knowledge of the openings is more profound and up-to-date (a particular Fischer weapon) than any other representative of the coming generation. If he has any deficiencies, they could be that he is a little too cautious and physically too frail for his age’.

Black’s position perhaps suffers
from the slight disadvantage that the
queen has gone to QB2 too soon.
10 P–QR4
10 B–K3 is also good.
10 ...
11 N–N3 0–0
12 B–K3
There was no point trying to
tie up the Q-side with 12 P–R5 as Black
could break out with 12 ... P–QN4
13 P×P Q×P. However, 13
P–R5 is now an unpleasant threat.
12 ...
13 N–QN5
Black ignores his opponent’s plan
He had to play 12 ... P–QN3!?
and only then 13 ... N–QR4 or
13 ... N–QN5. The alternative
12 ... N–QR4 would give White a
slight advantage after 13 P–K5
N–K1 (Not 13 ... P×P 14 P×P
Q×P 15 B–Q4 Q–B2 16 N×N
Q×N/R4 17 B×N± =) 14 N×N
Q×N/R4 15 Q–Q2 and 16 B–Q4.
13 P–R5±
14 B–B3
If 13 ... P–Q4 14 B–N6 Q–B1 15
P–K5 N–K5 16 N×N P×N 17
P–B4.
14 B–N6 Q–N1
The logical continuation. Black
prepares to drive the bishop away
by ... N–Q2 and follow up with ...
P–QN4. But this plan is too slow
and Black should have played 14
... Q–Q2 after which I intended to
play 15 B–B3 preventing the freeing move . . . P–Q4.

15 Q–Q2

An important move. White defends the KP indirectly and threatens to win Black’s advanced QN by 16 N–Q1 P–Q4 17 P–B3 N×KP 18 Q–B1.

15 . . . P–Q4
16 P–K5 N–Q2
16 . . . N–K5 17 N×N P×N 18 P–B4 (with the threat 19 N–B5±) is horrible for Black.

17 B–Q4 P–QN4
18 B–N4

Preparing P–B5 and preventing Black from advancing his BP. White would have achieved nothing concrete with 18 P×P N×NP 19 P–B5 because of 19 . . . P×P 20 R×BP N–B5.

18 . . . P–N3
19 QR–K1

Played with the idea of 20 P–B5. Black’s pieces are clustered on the Q-side and he takes no steps to transfer them to the defence of his king. He even removes his KR from the vital KB1 square to make room for the knight.

19 . . . R–B1 (244)

20 P–B5

Decisive.

20 . . . NP×P

21 B×P N–B1

22 Q–R6 N–N3

23 B×N RP×B

If 28... B×P 29 Q×KP with an easy win, and if 28... N×P 29 R–R7 forces mate.

29 R×P+ 1–0

2303 Alvarez–AK:
PR6 v. Dominica:
24 September:

Sicilian

Now Karpov wins with a neat combination: 25... R×B/N6! 26 P×R N4–N5 27 QR–K1 R×R 28 R×R N–B7+ 29 K–R2 N3–N5+ 30 K–N1 N–K5+ 0–1

2304 Saren–AK: PR7 v. Finland:
25 September:

Sicilian

21 P–N5? 21 B–N4 is correct: 21...
R–B3 22 N–K4 R–N3 23 B–R5 (23 N–N5!? B×N 24 P×B N3–K4 25 Q×Q+ R×Q 26 B–R5 N×P!) 23... R–R3 24 B–B3± 21...
P×P 22 P×P N–R4 23 B×P? This suddenly leaves White in terrible trouble thanks to Black's fine 24th move. 23... N×B 24 Q×N B–Q1! 25 Q–R7 If 25 Q×QP Q×Q 26 R×Q R–B4 with 27... R1–B1 to follow, or

2305 AK–Jürgen Dueball:
FR2 v. West Germany:
28 September:

Sicilian

It is better to retain the bishop pair with 28 B–KB5 ± though after 28 . . . P–R4 29 R–N1 P–KR5 it is not easy to see how White would make progress.

28 . . . N–R6!

32 . . . P–QN5 33 BP × P P × P 34 R–N3 R2–QN2 35 P × P P × P 36 R × R R × R 37 K–R3 only serves to open up the position, giving White excellent winning chances thanks to his passed QNP.

However, 32 . . . P–R5, fixing the Q-side pawns, is much better.

33 P–N4 P–R3 34 K–N2 R–K2?

Black’s best chance of counterplay lay in occupying the QR–file immediately by 34 . . . R–R1 followed by 35 . . . R2–QR2, allowing the white pieces as little scope as possible, and constantly threatening to penetrate to a3.

35 R × R K × R 36 K–N3 ± R–QR1

Better than both 36 . . . P–R5 + ? and 36 . . . P × P 37 K × P, both of which would only further weaken Black’s pawns.

If 40 . . . R–N1 + White can
abandon the QNP in favour of
direct attack, e.g. 41 K-B6 R×P 42
K×P R-N3+ 43 K-B5 R-N1
(43 . . . R-N6 44 R-R2 and Black's
rook must retreat to QN1 since 44
. . . R×P 45 R-R8+ and 46 P-Q6+
wins, while 44 . . . N-Q6+ 45 K-B4
- 45 K-Q6?? R-N3 mate - 45 . . .
N-B8 46 R-R7 R×P 47 B-K6 and
48 P-Q6+ ±) 44 R-R2 R-N2 45
R-R8+ K-K2 46 P-Q6+ or 44
. . . K-B2 45 R-R7+ R-N2 46
P-Q6+ K-N1 47 P-Q7!
41 R-QB2+ K-N2 42 B-Q7!
42 R-B6? allows Black strong
counterplay with 41 . . . N-K7!
42 . . . R-R6 43 R-B6! R-Q6
If 43 . . . N-K7 44 B-B8+ K-N1
45 K-N6 wins, e.g. 45 . . . N-B6 46
B-K6 N-R5+ 47 K-N5 N-B6+
48 K-B4 N-K7 49 R×P R×P 50
R-N6+ and the advanced pawns
win easily.
43 . . . N×P!? 44 R×P N×P! 45
K×N R×P± or 45 R×P!?±, though
interesting, would not help
Black survive in the long run. Also
43 . . . R×P 44 R-R6 N-Q6 45
B-B6+ K-B2 46 R-R7+ K-B1
47 K-R5 N-K4 (47 . . . R-B7 48
P-N5 R-R7+ 49 K-N6±) 48
P-N5 leads to a win for White.
44 R-N6+ K-B2 45 B-B6 N×P 46
R-N7+ K-B1
46 . . . K-Q! is no better: 47
47 R-KB7
47 R-KR7! wins more quickly:
(a) 47 . . . N-B5 48 R×P P-B4 49
R-B6 R-Q7 50 R×BP R×P 51
R×P± ±. (b) 47 . . . K-Q1 48
R×P K-K2 49 K-B4 N-B5 50
R-R7+ K-Q1 (50 . . . K-K3? 51
B-Q7+; 50 . . . K-B1 51 P-N5) 51
R-KB7± ±. (c) 47 . . . N-B2+ 48
K-N6 wins the knight. (d) 47 . . .
N-B6+ 48 K-B4 R-K6 (48 . . .
R-Q8 49 B-N7+ and 50 K×N) 49
K-Q4 N-Q8 50 B-R4 R-K8 51
R×P± ±.
47 . . . K-Q1 48 R-Q7+ K-B1 49
R-KB7
Again 49 R-KR7!
49 . . . K-Q1 50 K-B4 N-B5 (248)

51 R×P
Not 51 P-N5 N-N3! and it is not
clear any more that White is win-
nic, e.g. 52 K×R (52 R-Q7+ K-B1 53 K×R N-K4+ 54 K-K4
N×R 55 K-B5 N-K4 56 B-Q5
K-B2 57 K×BP K-N3 and Black
survives) 52 . . . N-K4+ 53 K-K4
N×R 54 K-B5 K-K2 55 P-N6
N-K456B-Q5 N-Q2 57 P-N7 P-R4.
51 . . . P-Q4+
If 51 . . . K-B2 52 K-N5! wins, but
not 52 R×N? R-R6!=.
52 K-B5
And now not 52 B×P? N×B!=.
52 . . . K-K2 53 R×P R-B6+
If 53 . . . R×P 54 B×P wins.
54 K-N6 R×P 55 P-N5 P-N5?
After 55 . . . R-K6 or 55 . . .
R-QN6± White still has clear
winning chances, but now he has a
clear win.
56 R-R4! R-KR6 57 R×P N-K7
There is no longer anything better:
57 . . . N-K3 58 B×P R×P 59
R-K4± ±, or 57 . . . N-Q6 58
R-N3± ±.
58 K-B7
White, though, could still go
wrong with 58 B×P? N-B6!=
since Black can give up the knight for both the white pawns.
58 ... R-R2 59 P-N6 K-K3 + 60 K-Q8! N-Q5!
Ingenious, better than 60 ... K-Q3 61 R-N6+ K-B4 62 P-N7=, but inadequate.
61 R×N K-Q3 62 B×P! K-B4
White's last move prevented the mate threat, now Black would be on the receiving end: 62 ... R-R1 + 63 B-N8 + K-B3 64 R-KN4=, or 62 ... R×P 63 P-N7 R-R1 + 64 B-N8 + K-B3 65 P-N8=N+! K-N2
66 R-QN4+ K-R2 67 K-B7 wins.
63 R-Q2 K×P 64 R-QB2 1-0

2306 Nicolai Padevsky-AK:
FR4 v. Bulgaria:
30 September:

French

Karpov's only loss from this event:
1 P-K4 P-QB4 2 N-KB3 P-K3 3 P-B3 P-Q4 4 P×P P×P 5 P-Q4
B-Q3 6 P×P B×BP 7 B-K2?! 7 B-QN5 is preferable. 7 ... N-QB3
8 0-0 KN-K2 9 QN-Q2 0-0 10 N-N3 B-N3 11 N/B3-Q4? 11
N/N3-Q4!= 11 ... N-N3 12 B-K3

2307 Alexander Sznapik–AK:
FR6 v. Poland: 2 October:

King’s Indian Attack

26 . . . R1×N 27 Q–Q2 (251)
27 ... P–B5 Winning 28 B–K4 Q–Q3 29 Q–K2 B–K1 30 B–Q5 R–B1 31 P × P If 31 N–B3 then 31 ... P–R3 32 K–N2 B–R4 is decisive. 31 ... P–R3 31 ... P × P would be too hasty: 32 N–B3 with 33 Q × B to follow 32 P × P Q × P! 33 Q × Q N × Q 34 P–B4 N–N5+ 35 K–N3 Or 35 K–R3 N–B7 + 35 ... N–K6 0–1

2308 AK–Dan Uddenfeldt:
FR7 v. Sweden: 3 October:

Sicilian

1 P–K4 P–QB4 2 N–KB3 P–Q3 3 P–Q4 P × P 4 N × P N–KB3 5 N–QB3 P–QR3 6 P–B4 It just does not pay to use the same line every time, so 6 B–K2 is given a rest. 6 ... Q–B2 7 B–Q3 P–K3

Zandor Nilsson criticizes this as being passive, suggesting as better 7 ... P–K4 or 7 ... QN–Q2 and 8 ... P–K4. Karpov and Gufeld, however, consider that against 7 ... P–K4 8 N–B3 followed by K–side castling is favourable for White. 8 0–0 B–K2 9 N–B3!

Another popular treatment is 9 B–K3 followed by 10 Q–B3.

9 ... QN–Q2 9 ... N–B3!? 10 Q–K1

Supporting 11 P–K5 and also ready to move out on to the K–side. 10 ... N–B4!? 11 P–K5! N3–Q2 12 Q–N3 P–KN3

12 ... 0–0! is asking for trouble: 13 P–B5 and now:
(a) 13 ... N × B 14 P–B6 and it’s all over;
(b) 13 ... N × P 14 N × N P × N 15 P–B6 and, again, it’s all over;
(c) 13 ... QP × P 14 B–R6 B–B3 15 B–K3 P–QN4 16 QR–Q1 ±;
(d) 13 ... KP × P? 14 B–R6 B–B3 15 N–Q5 and the pieces are ready to be set up for another game.

12 ... N × B also loses, this time to 13 Q × P Q–N3+ 14 K–R1 N–B7+ 15 R × N Q × R 16 Q × R + and 17 B–Q2.

13 B–K3

Now if 13 P–B5 Black can hold out with possibility (d) below:
(a) 13 ... QP × P 14 P × NP RP × P 15 B × NP P × B 16 Q × NP + K–Q1 17 N–KN5 ± ±;
(b) 13 ... NP × P 14 Q–N7 ±;
(c) 13 ... KP × P 14 N–Q5 ±;
(d) 13 ... N × B! 14 P × KP N6 × KP 15 P × N + B × P.

13 ... P–QN4

13 ... 0–0 is jumping straight from the frying pan into the fire: 14 P–B5 N × B 15 P–B6 N6 × KP 16 P × B R–K1 17 Q–R4 ± with a fierce attack.

14 B–Q4!

Stronger than 14 QR–Q1 (the idea behind which is 15 P × P B × P 16 B × QNP) 14 ... P × P meeting the threat very simply, or 14 P × P!? B × P 15 QR–Q1. The latter, though is quite strong.

14 ... N × B 15 P × N

Now if 15 P × P B × P 16 B × R then 16 ... N × BP 17 Q–R4 B–N2 lets Black off the hook.

15 ... P–Q4?

This makes matters even worse, but 15 ... P × P, the only alternative, is not very appetizing: 16 N × KP (16 P × P is also good: 16 ... B–N2 17 QR–B1 ±) and now:
(a) 16 ... N–B3 17 N–N4 Q–Q1 18 B–K5 ±;
(b) 16 ... B–B3 17 N–K4 ±;
(c) 16 ... B–B4 17 B × B Q × B + 18 K–R1 N × N 19 N–K4 ±;
(d) 16 ... N × N 17 B × N Q–N3 +; 17 P × N B–N2 is probably the best of a bad lot.

16 QR–B1 Q–N2 (252)

17 P–B5! ± ± NP × P

17 ... KP × P is no better: 18 P–K6 N–B3 19 P × P + K × P 20
2309 AK–Heinz Wirtsenohs:
FR8 v. Switzerland:
4 October:

Sicilian

1 P–K4 P–QB4 2 N–KB3 P–Q3
3 P–Q4 P×P 4 N×P N–KB3 5
N–QB3 P–QR3 6 P–B4 P–K4 7
N–B3 QN–Q2

8 B–B4 B–K2 9 P–QR4 0–0 10
P–B5?!

10 0–0! is probably better.

10 . . . P–QN3 11 B–K3

Alternatives do not work out well
for White:
(a) 11 B–KN5 B–N2 12 B×N N×B
N×KP? 14 N×N P–Q4 15 R–Q1
or 13 . . . Q–B2 14 0–0 N×KP 15
N×N P–Q4 16 B–Q3 P×N 17
B×KP) 14 B–N3 Q–N3++;
(b) 11 B–Q5 N×B 12 N×N B–N2
P–QN4 to follow is comfortable for
Black.

11 . . . B–N2 12 N–Q2 P–Q4

An interesting possibility, pointed
out by Karpov, is 12 . . . Q–B2?!
13 Q–K2 P–QN4 (also 13 . . . N–B4
14 B–B2 KR–B1 or 14 B×N
Q×B=) 14 B–N3 N–B4 (and here
14 . . . P–N5!? 15 N–Q5 N×N 16
P×N N–B3 is not bad) 15 B×N
P×B (15 . . . Q×B is correct) 16
P×P P×P 17 R×R R×R 18
N×P Q–B3 19 0–0 N×P 20 N×N
Q×N/K5 21 Q×Q B×Q 22 R–K1.

13 N×P N×N 14 B×N B×B 15
P×B B–B4

If 15 . . . N–B4 then White has 16
P–B4! (but not 16 Q–B3? P–K5 17
N×P N×N 18 Q×N R–K1 and
Black wins) 16 . . . N–Q6+ 17
K–K2 N–B5+ (or 17 . . . N×P 18
Q–N3±) 18 K–B3 with an
excellent game.
16 Q-K2 Q-R5+ 17 P-KN3 Q-QN5= 18 0-0

If 18 R-R2 BxB 19 QxB N-B3
20 P-B4 KR-B1 21 0-0 N-N5 22 Q-K2 Q-B4+ 23 K-R1 N-K6 is clearly very good for Black.
18 ... QxNP 19 P-B4 P-B3
19 ... P-QN4!? was a possibility.
20 K-R1
Avoiding 20 Q-Q3? P-K5!
20 ... KR-B1
Now 20 ... Q-B6!? could be tried.
21 Q-Q3 BxB 22 QxB P-QR4 23 KR-B1
Or 23 QR-N1 Q-B7
23 ... Q-N5
And here 23 ... Q-Q5!? 24 R/B1-QN1 Q-B4 25 QxQ RxB 26 K-N2 = (25f)

26 ... K-B1

Black should probably try one of the alternatives: 26 ... P-K5 27 K-B2 N-K4, or 26 ... P-R4!? 27 K-B3 K-K2 28 P-N4 R-R1 29 P-R4 + R-KB1 30 K-K3 P-R3 31 R-N1 R4-B1 32 R/R1-N1 R-QN1 33 N-K4 + R/N1-B1

If 33 ... R/B1-B1 then not 34 P-N5?! RPxP 35 PnP RnP 36 P-Q6+ (or 36 PnP NnP! 37 RxKNP+ K-B1) 36 ... K-B2 37 P-N6+ K-B1, but simply 34 R/KN1-QB1 ±.
34 R/KN1-QB1 R/KB1-K1 35 R-N5 R/K1-Q1 36 K-Q3 K-B1?
37 P-N5 RPxP 38 PnP K-K2 39 R-KN1 R-KR1
If 39 ... R-KN1 then 40 P-Q6+ K-B1 41 PnP PnP 42 RxR+ KxR 43 P-B5 wins.
40 PnP PnP 41 R-N7+ K-Q1 42 N-Q6 R-R6 + 43 K-K2 R-R7 +
44 K-K3 1-0 44 ... R-B2 (44 ... R-N1 45 R-QN1 with R1/N1 to follow) 45 R-N8 + K-K2 46 R-K8+ KxN 47 R-K6 mate.

2310 AK-Vlastimil Jansa:
FR9 v. Czechoslovakia:
5 October:

Sicilian

1 P-K4 P-QB4 2 N-KB3 P-K3
3 P-Q4 PxB 4 NxB P-NQB3 5 N-N5 P-Q3 6 P-QB4 N-B3 7 N1-B3 P-QR3 8 N-R3 B-K2 9 B-K2 0-0 10 0-0 P-QN3 11 B-K3 B-N2 12 R-B1
Better than 12 Q-Q2!? N-K4 13 P-B3 R-K1 =.
12 ... N-K4 13 Q-Q4 N4-Q2 14 KR-Q1!?
Stronger than 14 P-B3? when Black can free himself with 14 ... P-Q4! 15 KPxP PnP 16 PnP B-B4 17 Q-Q2 BxB + 18 QxB NxB =.
14 ... Q-B2
Better than 14 ... P-K4? 15 Q-Q3 N-B4 16 BxB N ±. However, 14 ... R-K1 and 14 ... R-B1 were also possible.
15 P-B3 KR-K1 16 P-QN4! ±
On 16 Q-Q2 Black gets a good game from 16 ... QR-B1 followed by ... Q-N1.
16 ... QR-N1
Or 16 ... QR-B1 17 N/R3-N1 Q-N1 18 N-R4 ±.
17 N/R3-N1 B-R1 18 P-QR3 B-B1 19 N-Q2 P-R3 20 P-B4?!
R/N1-B1!? 21 Q-Q3
White may also get an advantage from 21 P–K5 P×P 22 P×P N×P 23 Q×P, but it is not very clear.
Black aims for ... P–QN4.

3 N–Q2 P–KB4?!
This move is rare in tournament play. The theoretical continuation is now 4 P×BP P×P 5 Q–R5+ P–KN3 6 Q–K2+ Q–K2 7 N2–B3 with an advantage in the coming endgame. 4 P–K5 also gives White the advantage, but Karpov did not want a blocked position.
4 P×BP P×P
5 N2–B3 N–KB3
6 B–KN5
The characteristic move of this variation. Of course 6 B–Q3!? followed by 7 N–K2 and 8 0–0 also gives White a clear advantage.

6 ... B–K2
The only satisfactory move. White was threatening Q–K2+ followed by capturing on KB6. Now Karpov decides to sacrifice his QNP and go all out for a win by a direct K-side attack.

7 B–Q3
If 7 N–K5 0–0 8 N1–B3 P–B4 and Black escapes a quick disaster.

7 ... N–K5
8 B×B Q×B
9 N–K2 Q–N5+
Black must accept the challenge, because if White can get in 10 0–0 he will have very powerful play against Black’s weak squares on the K-side. Thus 9 ... 0–0 10 0–0 with 11 P–QB4± is very good for White.

10 P–B3 Q×NP
11 0–0 0–0
If Black takes the second pawn he gets taken apart: 11 ... N×QBP 12 N×N Q×N 13 R–B1 and 14 R–K1+. The black knight at K5 is the bulwark of his position and cannot be exchanged for such a small material gain.

12 P–B4± P×P
With 12 ... P–B3 13 N–B4, Black ties himself down to the defence of the QP. He could still defend it by:
19 \textbf{N4} \times \textbf{P}

An inaccuracy. White misses a beautiful win: 19 \textbf{R} \times \textbf{P} + \textbf{K} \times \textbf{R} 20 \textbf{N}4 \times \textbf{P} (20 \textbf{N}5 \times \textbf{P} \textbf{Q} \times \textbf{Q}3 21 \textbf{N} \times \textbf{R} + \textbf{Q} \times \textbf{N}1 22 \textbf{Q} \times \textbf{R5} + \textbf{K} \times \textbf{R}1 24 \textbf{Q} \times \textbf{R6} mate) 21 \textbf{N} \times \textbf{R} + \textbf{K} \times \textbf{N}2 (if 21 \ldots \textbf{Q} \times \textbf{N}1 then 22 \textbf{Q} \times \textbf{R5} + \textbf{K} \times \textbf{R}1 24 \textbf{Q} \times \textbf{B7} + \textbf{K} \times \textbf{R}1 25 \textbf{N} \times \textbf{N}6 +) 22 \textbf{Q} \times \textbf{R5} \textbf{N} \times \textbf{N} 23 \textbf{Q} \times \textbf{R7} + \textbf{K} \times \textbf{N} 24 \textbf{P} \times \textbf{N}! (the move that Karpov missed over the board) 24 \ldots \textbf{Q} \times \textbf{N} \textbf{Q} \times \textbf{N}8 + \textbf{K} \times \textbf{R} 24 \textbf{Q} \times \textbf{B7} + \textbf{K} \times \textbf{R} 25 \textbf{Q} \times \textbf{B8} + \textbf{K} \times \textbf{Q} 26 \textbf{R} \times \textbf{Q} 27 \textbf{B} \times \textbf{Q} \textbf{P} 29 \textbf{Q} \times \textbf{P} followed by \textbf{P} \times \textbf{K}6.

\textbf{19} \ldots \textbf{P} \times \textbf{N}

\textbf{20} \textbf{N} \times \textbf{P} \textbf{Q} \times \textbf{B}3!\textbf{!}

The only way to keep control of \textbf{KR}1. If 20 \ldots \textbf{Q} \times \textbf{N} 21 \textbf{N} \times \textbf{R} \textbf{K} \times \textbf{N} 22 \textbf{R} \times \textbf{R8} + \textbf{K} \times \textbf{K} 23 \textbf{R} \times \textbf{K} 21 \textbf{N} \times \textbf{R} \textbf{K} \times \textbf{N}

\textbf{22} \textbf{R} \times \textbf{R7} \textbf{N} \times \textbf{K} 22?

A better try was 22 \ldots \textbf{N} \times \textbf{N} when 23 \textbf{R} \times \textbf{P} does not work because of 23 \ldots \textbf{Q} \times \textbf{Q} and so Karpov had intended to play 23 \textbf{R} \times \textbf{R5} \textbf{B} \times \textbf{K} 3 and now:

(a) not 24 \textbf{R} \times \textbf{N} \textbf{B} \times \textbf{B} 25 \textbf{Q} \times \textbf{R5} \textbf{N} \times \textbf{K} 23;
(b) and not 24 \textbf{P} \times \textbf{Q} \textbf{B} \times \textbf{B2} 25 \textbf{P} \times \textbf{N} \textbf{B} \times \textbf{B} 26 \textbf{P} \times \textbf{P} \textbf{R} \times \textbf{N} 27 \textbf{Q} \times \textbf{B} \textbf{B} \times \textbf{R} 28 \textbf{Q} \times \textbf{P} \textbf{R} \times \textbf{P} 29 \textbf{Q} \times \textbf{R} \textbf{B} \times \textbf{K} 7 when Black has defended himself successfully;
(c) but 24 \textbf{B} \times \textbf{B} \textbf{N} \times \textbf{B} 25 \textbf{P} \times \textbf{Q} \textbf{R} \times \textbf{Q} 26 \textbf{Q} \times \textbf{N} \textbf{N} \times \textbf{K} 3 \times \textbf{Q} \times \textbf{N} 27 \textbf{Q} \times \textbf{P} \textbf{R} \times \textbf{P} 28 \textbf{Q} \times \textbf{B} \times \textbf{P} \pm.

\textbf{23} \textbf{R} \times \textbf{K} 1

There was no point to winning the queen by 23 \textbf{R} \times \textbf{B} 7.

\textbf{23} \ldots \textbf{Q} \times \textbf{N} 3

\textbf{24} \textbf{R} \times \textbf{B} 7 + \textbf{Q} \times \textbf{R}

If 24 \ldots \textbf{K} \times \textbf{K} 25 \textbf{P} \times \textbf{B} \textbf{B} \times \textbf{B} 26 \textbf{B} \times \textbf{B} \textbf{Q} \times \textbf{B} 27 \textbf{R} \times \textbf{R}.

\textbf{25} \textbf{B} \times \textbf{Q} \textbf{K} \times \textbf{B}
26 Q–R5+ K–B1
27 Q–R6+ K–B2
Or 27... K–K1 28 P–B3 N–QB6
28 Q–R7+ 1–0

The growing interest in Karpov, and his future potential, was noted by the late Kühne -Woods in Chess Express: "The chess world was eager to see how Karpov would fare, who is already now and somewhat prematurely labelled as opponent for Fischer in 1975. He did not disappoint and captured first place."

Karpov's share of the prize money was $2,333.30.

2408 AK–Svetozar Gligorić:
R8: 29 November:

Ruy Lopez

It is hoped that the notes to this
game will provide an especially
good insight into the game and into
the characteristics of Karpov’s ‘style’.
The notes by Karpov are selected
from those that he contributed to a
special article in the February 1973
issue of Chess Life and Review, while
the notes by grandmaster Semyon
Furman (Karpov’s trainer) are from
Shakhmaty v SSSR No. 4 1973.

1 P–K4 P–K4
2 N–KB3 N–QB3
3 B–N5 P–QR3
4 B–R4 N–B3
5 0–0 B–K2
6 R–K1 P–QN4
7 B–N3 P–Q3
8 P–B3 0–0
9 P–KR3 N–N1

SF: This move was suggested by
the talented Hungarian master G.
Breyer. Together with G. Borisenko,
I have analysed this continuation a
great deal and, to that extent, promoted its popularity in contem-
porary competitions.

10 P–Q3

SF: At first sight 10 P–Q4 is more
logical. After 10 ... QN–Q2 11
QN–Q2 B–N2, White has to play 12
B–B2 to defend the KP and realize
the traditional ‘Spanish’ manoeuvre
N–Q2–B1–N3. In reply Black carries
out a regrouping with 12 ... R–K1
13 N–B1 B–KB1 14 N–N3 P–N3,
neutralizing White’s potential K-
side initiative. In this manoeuvre
lies the main idea of the variation. In
the tenth match game Fischer–
Spassky there followed 13 P–QN4
B–KB1 14 P–QR4 N–N3 15 P–R5
N/N3–Q2 16 B–N2 Q–N1 17 R–N1
(more convincing is 17 P–B4!
suggested by Smyslov and already
tried by Savon against Mukhin in
the USSR zonal play-off, Moscow
1973) 17 ... P–B4 18 NP×P
QP×P 19 P×KP N2×P 20 N×N
Q×N 21 P–QB4 with better chances
for White.

A good defensive plan was demon-
strated by Black in Razuvaev–
Furman in the last (40th) USSR
Championship: 14 ... P–QR4!
(this defensive idea had already been
played by Portisch at Wijk aan Zee
in 1969 – eds.) 15 NP×P R×P 16
R–N1 B–QR3 17 RP×P R×P 18

10 ... QN–Q2
11 QN–Q2 B–N2
12 N–B1 N–B4

SF: The advantages of the quiet 10 P–Q3 are already evident. White can carry out the knight manoeuvre without moving the bishop from the important a2–g8 diagonal – the KP is now obviously defended. Black, however, in order to carry out his regrouping, must drive the bishop off this diagonal. However, his QN is in an unfortunate position to attempt such a task.

13 B–B2 R–K1
14 N–N3

SF: Tal–Furman, 40 USSR Ch 1972, went 14 N–K3 B–KB1 15 P–QN4 N–K3! and Black had a good game; 16 P–Q4 is not possible – the KP being left undefended.

14 ... B–KB1
15 P–N4

AK: This is the only way to drive away Black’s knight. 15 P–Q4 is impossible because of the insufficient defence of White’s K4.

15 ... N4–Q2

SF: The knight has to go here since 15 ... N–K3 16 P–Q4 is clearly good for White.

16 P–Q4 (269)

San Antonio 247

16 ... P–R3
17 B–Q2

SF: Thus White connects his rooks. Also 17 P–QR4 deserved attention.

AK: Defending against the possibility of ... P–Q4.

17 ... N–N3

AK: For some reason Gligorić declined to play the known 17 ... P–QR4 which gives Black a completely equal game. Nevertheless, his move merits consideration.

18 B–Q3

AK: This move blocks the incursion of Black’s knight at White’s QB4 and halts the advance of Black’s QRP at the same time.

18 ... R–B1
19 Q–B2!? (270)

269

SF: In comparison with the 10
AK: At first glance a strange continuation - White places his queen on the same file as Black's rook. But the QB-file will not in fact be opened, either by the immediate 19... P-B4 20 NP×P QP×P 21 P-Q5, or after the preliminary exchange 19... P×P 20 P×P P-B4 21 NP×P by 21... P×P 22 P-Q5 with a very sharp position.

19... Q-Q2

AK: For the present White has no direct threat, so Black continues to manoeuvre. However, already now it was necessary for him to think of counterplay. 19... P×P deserved serious consideration. After 20 N×P P-N3 with 21... P-B4 to follow Black stands well. While 20 P×P P-B4 gives a sharp position with chances for both sides.

AK: A lethargic move that will cost Black dearly. Not only does it lose an important tempo, but the queen has taken the... Q2 square away from Black's knights, limiting their manoeuvrability.

20 QR-Q1 Q-B3
21 B-K3 N-R5

AK: This is the only way to gain time to defend against the threatened N-Q2-N3-R5. 21... N-B5 was impossible in view of 22 P-Q5 Q-Q2 23 B×N P×B 24 N-Q2 and 25 N×P.

22 R-QB1 N-N3
23 Q-N1

AK: Better is the immediate 23 N-Q2; then 23... P-Q4 is not dangerous since White's K4 is safely defended, e.g. 24 QP×P R×P 25 B-Q4! (25 P-KB4? P×P with a winning position for Black) 25... P×P 26 N2×P. There is no defence against N-Q2-N3-R5.

23... Q-Q2
24 N-Q2 P-B4

SF: Now Black is obliged to resort to this advance in less favourable circumstances. White has already prepared P-QB4.

AK: A forced action. Now White gets a strong, defended passed pawn on Q5.

25 NP×P QP×P
26 P-Q5

SF: The location of the pawn on Q5 defines White's spatial advantage. If Black could now advance his pawn to... QB5, his position would be satisfactory. However, that is not possible as the knight on QN3 would be left undefended.

26... N-R5
27 P-QB4 P-N5
28 R-B1

AK: Black's trouble is that he cannot find a satisfactory defence against the breakthrough P-B4, initiating a fearsome assault on the king's position. Q-side counterplay is hopelessly late.

28... Q-B2
29 P-B4 N-Q2
30 Q-B2 N-B6 (271)

AK: This advance of Black's knight loses a pawn by force after the transfer of White's bishop to Q2, but a retreat to N3 would be even gloomier.
31 P–B5!

SF: White increases his space advantage and prepares a K-side pawn storm.

31 . . .

N–B3

32 N–K2?!

AK: Of course it would have been better to win the pawn by 32 N–B3, 33 B–Q2 and 34 B×N, but it seemed to me that Black was defenceless against a K-side pawn storm. However, it turns out that Black’s king is able, a little at a time, to escape from its insecure refuge.

32 . . .

N×N+

33 B×N

B–Q3

34 P–N4

K–B1

SF: The beginning of the evacuation, not without difficulty, of the king to the Q-side. However it is very difficult to suggest something better for Black – he is completely devoid of counterplay.

35 P–KR4

K–K2

36 P–N5

P×P

37 P×P

N–Q2

38 B–N4

AK: White’s pieces have turned out to be unprepared for such a swift unfolding of events. The decisive thrust requires regrouping and the supply of new pieces to the K-side.

38 . . .

R–KN1

AK: White was threatening 39 P–B6+ P×P 40 P×P+ N×P 41 B–N5. But without the advance . . . P–B3, Black will hardly be able to manage. Thus 38 . . . P–B3 was better here.

39 K–B2

R–KR1

40 R–KR1

QR–KN1

(272)

AK: It is vital for the black king to be able to escape to the Q-side without interference. Now White has an excellent chance to resolve the struggle in his favour by 41 P–R3 P–R4 42 Q–R4! N–N3 43 Q–N5! and Black cannot trap the queen since on 43 . . . R×R 44 R×R R–QR1 there follows the deadly P–B6+ and Black has no time for . . . P–B3 because of the manoeuvre N–N3 with attacks on Black’s QR4 and QB4. But I bypassed this opportunity and made a not completely unsuccessful move.

41 Q–Q1

K–Q1

42 Q–N1

N–N3

43 R–R2

Q–K2?

AK: This is a serious mistake. It is necessary to push the Q-side pawns. White’s knight immediately occupies QR5 and the game ends quickly.

44 N–N3

K–B2

45 K–B3

AK: Yet another little stratagem: White’s king move frees the second rank for his rooks and opens the KN1–QR7 diagonal for his queen.

45 . . .

N–Q2 (273)

46 P–R3!

SF: Black’s ‘late Q-side’ (now ‘K-side’) is fragile, and White opens lines for attack.
46 ...  $P \times P$
47 $R-R2$

SF: White no longer needs the KR-file.

47 ...  $R-R5$
48 $R \times P$  $R1-KR1$
49 $R-QN1$

AK: Black lacks the strength to defend all his weak points, and the game ends very quickly.

49 ...  $R-QN1$?

AK: An error which does not change matters. All the same, 49 ... $P-B3$ was more tenacious.

50 $Q-K1$  $R \times B$

AK: On 50 ... $R5-R1$ there would follow 51 $Q-R5+$  $K-B1$
52 $P-B6$  $P \times P$  53 $N \times P$.

51 $K \times R$  $B-B1$
52 $Q-R5+$  1-0

AK: On 52 ... $R-N3$, decisive is
53 $N \times P$  $B \times N$  54  $R \times R$  $B \times R$  55
$B \times B$  $N \times B$  56 $P-B5$.

SF: A game characteristic of Karpov’s style.

2409 Lajos Portisch–AK:
R9: 30 November:
Nimzo-Indian

Geller, in 65 No. 11 1973, tells the story of Karpov at Budapest: 'After six rounds he was one point behind me. In the remaining eight rounds a real race developed with the interesting consequence that we, one with the other, as if by agreement, began to play in synchronisation: if one day one of us won, then the other was also victorious.

'A. Karpov's play is distinguished by the confidence in his strength for rapid and correct calculation of variations, the highest technique in playing typical endings (for example in his game against Hort). And here, in Budapest, Anatoly played confidently, easily, was boldly combinative, but sometimes he showed, I dare say, insufficient sporting staying-power. He sometimes let slip an advantage in the struggle against stubborn opponents. (Geller here points out the win Karpov missed against Ribli – eds).

'Usually Karpov goes straight towards the goal by simple means. However, when that does not work, he can abruptly switch to a sharp combinative struggle.'

2502 AK–Vlastimil Hort:
R2: 14 February:

French

The notes to this game are by Karpov from Informator 15, Victor Ciocaltea (VC) from The Chess Player 4 and Ervin Haag (EH) from Magyar Sakkolet.

Sicilian

The notes to this game are by Geller from 64.

1 P–K4 P–QB4
2 N–KB3 P–Q3
3 P–Q4 P×P
4 Q×P

In this comparatively quiet variation White can hardly count on gaining any opening advantage.

4 . . . N–QB3
5 B–QN5 Q–Q2!?

As a rule 5 . . . B–Q2 is played here. I considered the text move a theoretical novelty, although these days it is difficult to think up a new continuation on move five, let alone in the well-studied Sicilian. Only after the tournament ended, when I was already back in Moscow, did I learn that the move 5 . . . Q–Q2 had been suggested in the article Theoretical Notes by the international master I. Zaitsev (64 1972 No. 40), although, apparently, it had not been seen in a major tournament. It is possible that it was independently examined, even earlier, by Hungarian players, but maybe they noticed that article.

6 Q–K3

An artificial move. Simpler and better is 6 B×N and if 6 . . . P×B
then 7 P–B4, getting into a known set-up, while in the case of 6 . . . 
Q×B, as recommended by Zaitsev, 7 N–B3 with a big advantage in 
development.

6 . . .
P–QR3
7 B–R4

And here 7 B×N deserved consideration, although on K3 the white 
queen occupies a less apt position. Now Black’s light-squared 
bishop stands to be very strong and may play a major role both in 
attack and defence

7 . . .
P–QN4
8 B–N3 N–R4
9 0–0 P–K3
10 R–Q1 B–N2
11 N–B3 B–K2
12 P–K5 N×B
13 RP×N

It is possible that after 13 BP×N the QB-file might come in handy 
for White.

13 . . .
R–Q1

A questionable decision. He should have played 13 . . . Q–B3, creating 
pressure on the a8–h1 diagonal and controlling the e4 square. In that 
case 14 P×P B×P 15 Q–Q4 is not difficult on account of 15 . . . 0–0–0 
and the line 16 Q×P N–K2 17 Q×BP KR–N1 leads to a suspect 
position for White.

14 N–K4!
Q–B3
15 N×P + B×N
16 P×B R×P
17 B–Q2 N–K2
18 B–N4 R–Q4
18 . . . R–Q2 is more reliable.

Barczay points out that if 18 . . . 
R×R 19 R×R N–Q4 20 Q–Q4.
19 P–B4!
P×P
20 P×P Q×P
21 B×N K×B
22 N–K5 Q–K5? (293)

A mistake. He should have defen-
ded by means of 22 . . . Q–N4

23 Q–N5 + K–B1
24 P–B3

White wins the exchange, but 
now he obtains a technically diffi-
cult ending, ultimately ending up as a 
draw.

A win is reached with 24 N–Q7 + 
K–K1 25 Q×P K×N 26 Q×R 
Q×P + 27 K×Q R×R + 28 P–B3 
R×R 29 Q×P and the KRP 
decides the game’s outcome.

24 . . . Q×N 25 Q×Q R×Q 26 
R–Q8 + K–K2 27 R×R R–KN4!

26 USSR NATIONAL TEAMS MATCH-TOURNAMENT
Moscow, 24–30.4.1973

Karpov 1 ½
Spassky 0 ½

Karpov played on board one for the USSR Youth team (the other two teams in the event were USSR–1 and USSR–2), and captured the board prize with 3/4 (this was jointly the absolute best result). Karpov also won the best game prize for his win over Spassky. Team results: USSR–1 23 ½, USSR Youth 18 ½, USSR–2 18.

2601 Mark Taimanov–AK:
R1: 24 April:

Nimzo-Indian

In single combat on the first board, the two Leningrad grandmasters were the only ones in the entire match to keep both queens on the board for nearly forty moves. In all the other first round games the queen was the most short-lived piece, and several grandmaster pairs managed to cross the bridge from opening to endgame in double-quick time.

The leader of the country’s youth team went to play on this day feeling slightly unwell, but that didn’t have any effect on his fighting frame of mind. As always, Mark Taimanov played actively and optimistically. As a result, though not without errors, a heavy-weight grandmaster duel evolved.

B×B 14 Q×B B×N 15 P×B
R–B2 16 QR–B1 Q–B1 17 Q–R4

(294)

At first the struggle flows smoothly enough and, it seems, is on the point of rolling along a peaceful channel. But the main events unfold after Black’s next move.

17 . . . R–B5!

The moves P–QB4 and B–B4 pose Black definite threats, and so he hurries to block the c4 square, even at the cost of a dead pawn.

18 Q×P
Now White has a material advantage, Black a positional advantage. 18 ... Q×B3 19 Q×R3 R×B1 20 P×R3 P×R3 21 R×N1 R×R5

Black, not without foundation, counts on winning one of the Q-side pawns.

22 Q×N3 N×Q4 23 R/Q1-QB1 R×B5

Black’s concentrated force oscillates; as a whole compensating the sacrificed pawn, but hardly sufficient to gain a palpable advantage.

After the game, in analysis, both players, at almost every move, solved the problems of the ending at once. Thus, for example, here Anatoly Karpov, on 24 Q×N5, intended to carry out approximately the following plan: 24 ... Q×Q 25 R×Q R×R1 26 R×B2 P×B3 27 K×B1 K×B2 28 K×K2 P×K4 29 K×Q R1×R5 30 R×N3 K×K3 and White’s position is suddenly threatened with the piquant threat 31 P×N4 P×K5+! 32 K×P N×B4 mate! Of course, this line is far from forced, but it serves to illustrate that, in the ending, disregarding the extra pawn, exact play is called for from White. On the whole the rivals’ chances must now be counted as level, and, one should think, that White will, in the final analysis, reach a peaceful haven. However, grandmaster Taimanov has nothing to do with those chessplayers who, having an extra pawn, will think about a quick draw.

24 R×N2 P×B3

On 24 ... N×P 25 B×N R×B 26 R×R Q×R 27 Q×Q R×Q 28 N×K5 N×N 29 P×N both players will cross the 30-move barrier with preparations for a draw. (Reference to the ill-starred but immortal rule that games may not be drawn in less than thirty moves – eds).

25 R×K1 K×B2 26 Q×Q

‘I cannot be worse here’, Taimanov stated definitely. At this moment White’s position already seems more attractive than it did a few moves ago. In the press bureau, opinion was divided – one preferred Black’s chances, another White’s.

26 ... N×B1 27 R×N3 N×N3 28 Q×N1 R×QR1 29 R×K4

The white queen is tied down to defence. Perhaps now is exactly the right time to ‘stir up trouble’: 29 Q×Q3 R×RP 30 R×KP!? K×R 31 Q×N.

29 ... R5×R5 30 R×N2 N×B1 31 Q×Q3 R×B5 32 R×K1

A ‘polite’ invitation to the black knight to return to KN3, in which case, clearly, 33 R×KP!? would follow without fail. White, as before, does not fear for his QBP: 32 ... N×P 33 B×N R×B 34 R×NP R×Q 35 R×Q etc.

32 ... R×R6

The battery of black pieces strengthens to the maximum its fire upon White’s Q-side. All the same, the following denouement is largely attributable to the time-trouble in which White now finds himself.

33 Q×N1 N×N3 34 R×QB1

White, in vain, switches wholly to defence. 34 Q×Q3 deserved consideration – setting a trap: 34 ... N×P? 35 R×N3! and intending to strike a blow against K6 – 36 R×KP.

34 ... N×P

Black denied himself this dainty morsel for a good fifteen moves.

35 Q×Q3 N×K7+ 36 Q×N/2 R×R+ 37 B×R Q×B+ 38 K×R2 (295)

The decisive mistake. 38 N×K1 was essential.

38 ... R×N!
A well-thought-out blow. After 38 ... N–B5 39 Q–Q2 the worst is over for White.

39 P × R N–R5!

At this moment the flag on White's clock quivered and tumbled down. Truth to tell, it is already none too easy to find an acceptable defence, e.g. 40 R × P? Q–B2 +; 40 K–N3 Q–N4 +; that leaves 40 R–N3 but also then with 40 ... Q–N4! 41 Q–B1 Q–B5 + 42 K–N1 N × P + or 42 ... Q × QP, Black has excellent chances of realizing his advantage. 0–1 (time)

2602 AK–Boris Spassky:
R3: 26 April:

Ruy Lopez

The prize of the weekly 64 for the best game of the match tournament was awarded to grandmaster Anatoly Karpov. The prize was a cut crystal (or glass) bowl. The presentation was made by Tigran Petrosian!

1 P–K4 P–K4
2 N–KB3 N–QB3
3 B–N5 P–QR3
4 B–R4 N–B3
5 0–0 B–K2
6 R–K1 P–QN4
7 B–N3 P–Q3
8 P–B3 0–0
9 P–KR3 N–N1

Both players are ardent supporters of the Spanish game. They not infrequently employ it in the most crucial competitions and have successfully passed through theoretical duels. It is not surprising that on this occasion the subject of the argument was the frequently met Breyer variation.

10 P–Q3

The main line continuation is 10 P–Q4. The line employed in the game hardly gives White any advantage. But in return it leads to a tense, protracted struggle.

10 ... B–N2
11 QN–Q2 N1–Q2
12 N–B1 N–B4
13 B–B2 R–K1
14 N–N3 B–KB1
15 P–N4 N4–Q2
16 P–Q4

All this has been met with more than once. Now White is forced to push the QP, otherwise Black will intercept the initiative with the liberating pawn advance ... P–Q4.

16 ... P–R3
17 B–Q2 N–N3
18 B–Q3 P–N3

Spassky deviates from the game Karpov–Gligorić (No. 2408) in which 18 ... R–B1 was played.

19 Q–B2

A regrouping of forces. The queen frees the Q1 square for the rooks and at the same time protects the K4 square.

19 ... N/B3–Q2

If White has surplus defence of his QB4 square, it is essential to organize rapid pressure against the neighbouring ... Q5 square with the help of the bishop on ... KN2.

20 QR–Q1 B–N2
21 P × P

Here I thought for more than 30 minutes. Black has disposed his pieces very adroitly and, therefore,
it is not easy to set up an advantageous game. The standard plan, with an attempt at a K-side attack, or undermining the centre with P–KB4, will not do, since in each case Black has time to strike a counter-blow in the centre — . . . P–Q4. I came to the conclusion that White is almost forced to carry out this central exchange.

21 . . . P × P

This move, undoubtedly, cannot be called a mistake, but maybe one should exchange knights.

22 P–B4

This follows rapidly; there is no time to prepare this advance, for example, 22 B–K3 Q–K2 23 N–Q2 P–QB4 with quality.

22 . . . P × P

23 B × BP Q–K2 (296)

But this is already an inaccuracy. Allowing the dangerous white ‘Spanish bishop’ to escape with his life, Black subjects himself to great difficulties. After 23 . . . N × B 24 Q × N chances would have been level.

24 B–N3! P–QB4

Of course, in making this move, I foresaw the exchange sacrifice and considered its consequences. As a matter of fact, White had decided on the exchange sacrifice a move earlier (24 B–N3), and now there is no going back, nor is there any need.

25 . . . P–B5

25 . . . P × P and 25 . . . R–QB1 were both bad on account of 26 P–R5, Black replying, according to his 25th move, either 26 . . . R–QB1 or 26 . . . P × P 27 Q–R2 N–R1 28 B × NP!

26 B–R2 B–QB3

27 P–R5 B–R5

28 Q–B1 N–QB1

29 B × RP B × R

30 R × B N–Q3?

The best appears to be 30 . . . R–R2, but even in that case, after 31 B × B K × B 32 Q × P, White gets more than enough compensation for the exchange.

31 B × B K × B (297)
32 Q–N5!
And here is the surprise! White quite unexpectedly offers the exchange of queens, which Black cannot accept in view of the piece that would be lost.

Black would suddenly be winning after 32 Q–Q2 QR–Q1 33 Q×N? N–B1.

32 . . . P–B3
32 . . . QR–B1 only drags out the struggle; after 33 R×N Q×Q 34 N×Q N–B3 35 N–K2 P–B6 36 B×P, White ought to realize his material advantage.

33 Q–N4 K–R2
The only defence against 34 R×N and N–B5+, but the position is already hopeless.

34 N–R4 1–0
Some might think this a somewhat premature surrender, but, with a survey of the following variations, they will be convinced that Black’s position is hopelessly indefensible:
(a) 34 . . . R–KN1 35 B×P R–N2 36 R×N Q×R 37 N4–B5 and mate can only be avoided at the cost of the queen – 37 . . . Q–Q8+, or
(b) 34 . . . N–KB1 35 N×NP with 36 R–R5+ and 37 R×N to follow.

5 B–Q3 0 N–KB3 1
6 0–0 1 Q–B2 1
7 Q–K2 8 P–Q3 2
8 P–QB4 4 P–KN3 8

PK: The German player tries an original opening system, the originator of which seems to be the Riga grandmaster Aivar Gipslis. Black boldly goes in for a considerable weakening of his dark squares and, at the same time, his QP, hoping that White will not find it so simple to utilize these circumstances in the given concrete situation.

9 N–QB3 8

RH: An interesting alternative is 9 P–QN3!? with the follow-up B–N2, B–B4 and N–Q2–B3.

9 ... B–N2 0

10 B–K3 1

PK: In the game Holmov–Gipslis, 34 USSR Ch 1967, White tried the plan of a K-side attack: 10 B–N5 0–0 11 QR–Q1 P–N3 12 K–R1 B–N2 13 P–B4 QN–Q2 14 P–KB5. However, after 14 ... QR–K1 15 P×KP P×P 16 B–B2 N–K4 17 B–QR4 R–K2 18 B–N3 B–B1 Black, having beaten off the attack, had an excellent game.

10 ... 0–0 1

11 QR–B1 9

RH: Better 11 P–B4! (Hübner only gave this a ‘!?’ in Informator 15) and if 11 ... N–B3 then 12 N×N P×N 13 P–KB5!

11 ... N–B3 6

12 N×N 4

PK: A courageous, stereotyped decision, marking the start of an interesting and deep plan. The standard tactical lunge 12 N–Q5? would have been bad in view of 12 ... P×N 13 BP×P N×N. 12 ...

P×N 4

13 P–B4 3

RH: Not 13 P–B5? P–Q4 14 P×P N×P (in Informator RH gives this as equal) 15 N×N KP×N
13 \ldots \textit{P-B4 4} \\
14 \textit{KR-Q1 16}

PK: Another unexpected move. White, apparently having prepared a K-side attack, moves the rook off the KB-file. The thought behind this becomes clear later.

14 \ldots \textit{B-N2 1}

Hübner now prefers 14 \ldots \textit{R-N1} which he gives ‘!?‘ in The Chess Player 4, while in Informator 15 he gives the text a ‘?!’ and 14 \ldots \textit{R-N1} an exclamation mark.

15 \textit{P-QR3 5} \textit{B-B3 18} \\
16 \textit{P-QN4! 9}

RH: Weaker is 16 \textit{P-K5 P\times P 17 B\times BP B-B6 18 Q\times B Q\times B+ 19 K-R1 P\times P 20 Q\times P P-QR4=}. \\
PK: White rapidly utilizes his better Q-side pawns and here generates a passed pawn – an untypical plan for a Sicilian middlegame, for this is usually Black’s sphere of influence.

16 \ldots \textit{P\times P 4} \\
17 \textit{P\times P 0} \textit{Q-N2 1}

PK: Pressure along the long diagonal – Black’s only counterchance. The move text is also played against the threat of \textit{N-Q5}.

18 \textit{P-K5 1}

RH: Alternatives are weaker: \\
(a) 18 \textit{P-N5 P\times P 19 P\times P B\times KP 20 N\times B N\times N 21 B\times N Q\times B 22 R\times P R-R7 23 R-Q2 B-Q5! and Black wins.} \\
(b) 18 \textit{B-Q2 Q\times P and now:} \\
(b1) 19 N-N5 Q-B4+ 20 B-K3 Q-R4= and \\
(b2) 19 N-Q5 Q-N1 20 N-K7+ K-R1 21 N\times B Q-N3+ 22 N-Q4! N-Q2 23 P-K5 P\times P 24 P-QB5 N\times P 25 R-N1 Q-Q1 are both good for Black.

18 \ldots \textit{P\times P 0} \\
19 \textit{P\times P 0} \textit{N-Q2 1}

PK: 19 \ldots \textit{N-K5} is bad on account of 20 B\times N B\times B 21 B-B5.

20 \textit{P-N5 1} \textit{P\times P 1} \\
21 \textit{P\times P 0} \textit{B-Q4 1} \\
22 \textit{B-Q4 8 (300)}

300

PK: Here is the position Karpov has been aiming for. In spite of the fact that there are many pieces on the board, the passed QNP is dangerous enough; in the first place its further advance greatly restricts Black. It is interesting that this is not the first time that Karpov has followed such an original plan in the Sicilian.

Compare the present position with that after White’s 27th move in the game Karpov-Stein (diagram 171, p. 162).

22 \ldots \textit{Q-N1 27} \\
23 \textit{R-K1 1} \textit{B-N2 1} \\
24 \textit{P-N6 16} \textit{R-Q1 15}

RH: Or 24 \ldots \textit{R-B1 25 B-N5 N-B4 26 R-N1=}. \\
PK: Black prevents the manoeuvre \textit{25 N-N5} on which would follow \textit{25 \ldots N\times KP!} \\
25 \textit{B-N5 2} \textit{R-R4! 1} \\
26 \textit{Q-K3 1} \textit{Q-R1? 18}

RH: I should have played 26 \textit{B-QR1} with 27 \ldots \textit{Q-N2} to follow.

27 \textit{Q-B2 8} \textit{B-QR3 3}

PK: An interesting continuation was 27 \ldots \textit{N-N1!?} with the threat of 28 \ldots \textit{N-B3}. \\
28 \textit{R-N1 9} \textit{B\times B 8 (301)}
PK: The critical moment of the struggle. How to take on QN5? The answer to that question demanded great expenditure of energy and time, but that is just exactly what both players no longer had too much of. Karpov decided to exchange rooks, in order to reduce the pressure against his KP, but, all the same, 29 NxB was stronger. After that 29 ... R-R7 would be bad because of 30 P-N7!

Also after 29 ... Q-Q4 30 N-Q6 R-R7 (30 ... NxKP is bad: 31 BxN BxB 32 QxP+ K-R1 33 N-K8. Hübben, in Informator 15, also mentions 30 ... R-KB1 31 P-N7±) 31 QxP+ K-R1 32 BxN White has the better prospects, for example:
(a) 32 ... NxKP 33 Q-K7! QxN 34 QxQ RxQ 35 BxN BxB 36 RxB R-R1 37 P-N7 R-QN1 38 R-QB5 R3-Q1 39 R-B7 with R-KB1-B7 to follow;
(b) 32 ... NxNP 33 Q-B7;
(c) 32 ... RxB 33 RxB NxKP 34 Q-K7? or
(d) 32 ... Q-B4+ 33 K-R1 NxNP 34 QxKP.

29 RxB? 5 RxB 9
30 NxR 1 Q-R4 1
31 N-Q6 3 NxKP! 6
PK: A tactical blow, saving Black.

32 BxN 12

Not 32 N-N7? on account of 32 ... N-B6+! (but not 32 ... N-N5?
33 NxB BxB 34 QxB RxQ 35 R-N1± - Hübben) 33 PxB Q-KN4+ 34 K-R1 BxB 35 Q-B2 R-Q4 and Black wins.

32 ... RxB 1

Not 32 ... BxB 33 N-B4.

33 BxB 1

White has a lot of promising looking moves, but none of them work:
(a) 33 BxR? B-Q5=+ 34 R-K3 Q-R8+;
(b) 33 R-KB1? QxP=+;
(c) 33 P-N7? and now

(c1) Kondratiev gives 33 ... R-Q1 and 34 P-N8=Q is no good because of 34 ... RxB 35 BxB R-Q5 - this is where the weakness of White's back rank becomes apparent after the exchange of rooks on move 29.

(c2) Hübben, however, chooses 33 ... R-N3! with the same idea as in c1, while after 34 R-R1 there would follow 34 ... BxB 35 RxB R-N8+ 36 Q-B1 B-Q5+ 37 K-R1 RxB mate.

33 ... KxB 1
34 B-N1 2 R-Q1 0
35 Q-N2+ 2 K-N1 0

RH: Also 35 ... P-K4!?

36 P-N7 0 R-N1?! 1

RH: More accurate is 36 ... Q-QB4+ 37 K-R1 R-N1 and then 38 R-QB1? allows 38 ... RxB, or 38 R-R1 Q-B3.

37 Q-QB2 1

Of course not 37 R-R1? RxB.

37 ... K-N2 3
38 Q-B8 2 Q-R7 1
39 Q-B3+ 2 K-N1 3
40 R-R1 2 Q-Q4 2
41 Q-B8+ 1-1

After 41 ... K-N2 42 QxB R Black has a perpetual with 42 ... Q-Q5+ 43 K-B1 QxR+ 44 K-B2 Q-Q5+. 2.37 - 2.27.
2703 Vladimir Tukmakov–AK: R3: 5 June:

Ruy Lopez

This plan in the Breyer variation is seen much less than the usual 11 QN–Q2.

11 . . . P–B3 12 B–N5 2

This move turns out to be rather harmless. The tried path is 12 P–B5 Q–B2 13 BP×P B×P 14 B–N5 P×P 15 B×N P×B 16 N×P or 16 Q×P.

A typical Lopez method of exchanging dark-squared bishops, allowing Black to equalize.

14 B×B 4 Q×B 15 BP×P RP×P 2 16 N–B3 1

More circumspect would be 16 QN–Q2 or 16 Q–B1 B–N2 17 Q–B3 N–B5 18 QN–Q2.

16 . . . P–N5 5 17 N–N1 5

Played too optimistically. 17 N–K2 is safer. White is still counting on having the advantage, but only collides with difficulties.

17 . . . N–B5 3 18 N1–Q2 5 P×P 21 19 N×P 1 (302)

19 . . . N–K4

Clearly, going into this position, White was hoping to drive away Black’s knight from its outpost, but this task is shown to be impracticable on account of a tactical nuance.

20 N2–B3 17

The threat was 20 . . . B×P 21 P×B Q–N4+.

20 . . . Q–B3 1 21 N×N 35 P×N 2 22 N–B5

‘It was probably only at this point that the grandmaster from Odessa realized that on 22 N–K2 there would follow 22 . . . R–Q1 23 Q–B2 N×RP 24 P×N Q–B6 and in order to avoid the threat of mate, White would have to play 25 B×P+, but that does not bring him any appreciable relief.’

To judge from Bronstein’s time record of the game it would seem that Tukmakov has been only too well aware of his difficulties over the last two moves.

22 . . . B×N 8 23 P×B QR–Q1 1 24 Q–B3 7

After 24 Q–B2 there is the extremely unpleasant 24 . . . R–Q7! 25 Q×R Q–N4 and White must part with his queen.

24 . . . R–Q7 6 25 R–K3 21

Very likely the best. 25 QR–B1 is a blank shot: 25 . . . Q×P 26 R×BP N×RP+! 27 Q×N Q×P+.

25 . . . R×NP 26

25 . . . Q×P deserved consideration (and, again judging from the time record, got it – eds): 26 R1–K1 Q–N3! and the days of White’s QNP are numbered.

26 R1–K1 4 R–K1 4 27 R–K4 4 N–Q4 2

The knight retreats from its advantageous post in view of the threat 28 R×N.

28 Q–N3 3 N–B6 5 29 R×NP 12

29 R–N4, calculating on 29 . . .
29 . . . N–K7 + 30 R × N R × R 1 31 R–N7?
This move was played almost instantly (White had only 12 minutes left for 10 moves). Had he had time, White could only have tried to exploit Black’s inaccuracy at move 25 with 31 Q–N6. For example: 31 . . . K–B1 32 Q–R7; 31 . . . Q–K2?
The only square for the rook. After 33 . . . R–K5 or 33 . . . R–N7 White has a miraculous saving clause: 34 Q × N6 + ! 1 Q × Q (if 34 . . . P × Q White announces perpetual check) 35 P × Q + K × P and now, accordingly, 36 B–B2 or 36 B × P + .
0–1 2.22 – 1.55.

2704 AK–Viktor Korchnoi:
R4: 7 June:

Pirc
1 P–K4 P–Q3 2 P–Q4 N–KB3 3 N–QB3 P–KN3 4 N–B3 B–N2 5 B–K2 0–0 6 0–0 N–B3 7 P–Q5
N–N1 8 P–KR3 P–B3 9 P–QR4!
P–QR4! ± White’s advantage is kept to a minimum. 10 B–KN5
B–Q2? 11 R–K1 N–R3 12 P × P?!
N–QN5! Gufeld assesses the position as unclear while Igor Zaitsev considers that Black is already better.
14 Q–K2 P–R3 15 B–KB4 P–K4!
The position is level – Kotov. 16 B–R2 (303)

e.g. 17 QR–Q1 N–B4 18 R–Q2 Q–K2 with a rather unclear position that is probably better for Black; or 18 Q–Q2 Q–N3 ⊥. Also quite good for Black is 16 . . . Q–K2 17 QR–Q1 N–Q2 18 R–Q2 N–B4 19 R–Q1 QR–Q1 with . . . P–B4 to follow.
17 QR–Q1 Q–K2 18 R–Q2 = P–R4?!

Not only with the idea of playing . . . B–R3, but also with the idea of meeting 19 Q–K3! (threatening B–N3–R4) with 19 . . . N–N5!? 20 P × N P × P 21 Q–N5 Q × Q 22 N × Q B–R3 23 P–B4 NP × P 24 N × P/3 B × R 25 N × B B × B 26 P × B N × P. But here tournament wisdom (or perhaps simply caution) prompted the players to consider that the time to operate on the principle ‘double or bust’, perhaps still had not come, and they signed a peace treaty.

French
1 P-K4 P-K3
2 P-Q4 P-Q4
3 N-Q2

The World Champion, Robert Fischer, prefers 3 N-QB3.
3 . . . P-QB4
4 KP×P KP×P
5 KN-B3 N-QB3
6 B-QN5 B-Q3

Possibly 6 . . . P×P 7 0-0 B-Q3 8 N-N3 (8 N×P B×P+!) 8 . . . KN-K2 9 N/N3×P 0-0 10 B-N5 P-B3 is more exact, and after 11 B-K3 N-K4! 12 R-K1 P-QR3 13 B-KB1 K-R1 Black’s chances are no worse, Geller–Uhlmann, Amsterdam 1970.

Vaganian, at Budapest (No. 2512), played 9 . . . B-N3 and was soon in trouble.

10 B-N5

The idea of this move is based on the idea of countering the influence of Black’s dark-squared bishop with the manoeuvre B-KR4–KN3.

10 . . .

11 B-KR4 Q-B2?

12 B-N3
13 RP×B
14 R–K1
15 P–B3

Now the attempt at getting rid of the isolated pawn is already too late.

16 B–Q3
17 Q–B2
18 P×B ±

After 18 . . . P–Q5 19 P–QB4 N–N5 20 Q–Q2 N×B 21 Q×N the QP is even weaker. 18 . . . KR–K1 was better, making defence easier by exchanging a pair of rooks.

19 P–KB4 R1–Q1
20 P–R31 (306)

White prepares to build up with 21 K–N2, 22 R–K2 and 23 R1–K1 or 23 R–QN1. Another point is that after 20 . . . P–Q5 21 P–B4 is even stronger than in the previous note.

20 . . .

This is only a gesture – Black is
unable to funnel pieces over to the K-side to support an attack.

21 K–N2 P–R5
22 R–K2+ N–B1
23 N–Q2

This knight is now needed on the other flank.

23 . . . R–R3

23 . . . N×B 24 R×N Q×BP 25
R–N3 Q–R4 26 Q–N1 Q–R2 27

*The eighth round took place on June 13. This game was postponed because of Tal being ill.
White after 41... R-QR5 in 42 R-R7. He began to seek a defence and, in his dream, he found it in 42... P-N4. His brain continued to work. Again he saw a terrible continuation for White in 43 R-R8 B-K4 44 P-B4 when, if Black takes on B5 with bishop or pawn, 45 R1-Q8 is decisive. After he woke up we found the best defence was 44... RxBP, but Tal did not play this dangerous move.’

41... R-QR5
42 R-R7! P-N4!

42... B-K4 loses quickly on account of 43 P-N3 N-Q3 44 R-K1! P-B3 45 R-N1 and there is no visible defence.

43 R-R8 B-K4
44 P-N3?

Had the dream become reality Black would have been in trouble: 44 P-B4! RxBP and now:

(a) 45 P-R7 R-QR5 46 R1-Q8 K-N2 47 RxN RxB leads to a theoretical draw – L. Zaitsev.

(b) 45 R1-Q8 B-Q5+ 46 K-R2 R-K5 47 P-R7 BxP 48 RxB reaching an ending in which Black would not find it easy to make a draw – Kotov.

44... K-K2
45 R-K1 P-B3
46 P-R7 N-B2
47 R-R8 RxB

½-½

After 48 P-B4 R-R8 the draw is inevitable. 2.57 – 2.25.

2709 AK–Miguel Quinteros:
R9: 14 June:

Sicilian

1 P-K4 P-QB4
2 N-KB3 P-Q3
3 P-Q4 PnP
4 Nxp N-KB3
5 N–QB3 P–QR3
6 B–KN5 P–K3
7 P–B4 Q–N3

This sharp line has been seen quite frequently in recent years, notably in two of the Spassky–Fischer match games.

8 N–N3

8 Q–Q2 is usual. Theory does not regard the text as being difficult for Black.

8 . . .      B–K2

The ending after 8 . . . Q–K6 + 9 Q–K2 Q x Q + 10 B x Q is rather better for White; he not only has the better development, but also the possibility of directing fire at Black’s QP.

9 Q–B3 P–R3
10 B–R4 QN–Q2

10 . . . N x P is no good: 11 B x B N x N 12 Q x N K x B 13 Q x P±.
11 0–0–0 Q–B2
12 B–N3!

One would like to play P–N4 first and then B–N3, but after 12 P–N4 a reply typical of such positions is available in the form of 12 . . . P–KN4, capturing the dark squares. After the text move it is difficult for Black to prevent the advance of White’s KP.

12 . . . P–QN4
13 P–K5 B–N2
14 Q–K2 (310)

14 . . . P x P?

14 . . . N–Q4 was necessary. Though it seems a difficult line for Black, there is no apparent way for White to extract any real advantage, e.g.:

(a) 15 P x P N x N! 16 P x Q N x Q + 17 B x N R–QB1 18 P–B5 P–K4 and Black has everything under control.

(b) 15 N x N B x N and now:
(b1) 16 P x P Q x QP 17 P–B5 seems to pose more difficult problems, but after 17 . . . P–K4! there seems to be no way for White to capitalize on the Q-file, e.g.
(b11) 18 Q–Q3 N–B3 19 Q–Q3 B3 N–K5 20 Q x P Q x Q 21 B x Q N–B7 with unclear complications.
(b2) 16 P–B5 N x P 17 P x P B x KP and the manoeuvre 18 N–Q4 0–0 19 B x N P x B 20 N x B P x N 21 Q–K4 is nipped in the bud by 18 . . . B–N5.
(c) 15 N–K4 P x P 16 P x P N x P 17 N4–B5 B x N 18 B x N B–Q3 19 B x P R–KN1.

15 P x P N–R2

After the opening of the Q-file the knight must go to the edge of the board since 15 . . . N–Q4 loses to 16 N x N B x N 17 R x B P x R 18 P–K6.

16 N–K4 B–N4 + ?!

Of course not 16 . . . N x P because of 17 N4–B5, but both Tseitlin and Kotov regard 16 . . . N–N4 17 N–B6 + P x N 18 P x P Q–QB5! as better, though Igor Zaitsev points out that White is probably still winning with 19 Q–Q2. Tseitlin also gives 17 N–Q6 + B x N
18 P × B Q–Q1 and Black seems to be surviving.
17 K–N1 0–0
18 P–KR4 B–K2
19 N–Q6 B–Q4? (311)
This allows White to sacrifice the exchange for a raging K-side attack. Better 19 . . . QR–Q1 or 19 . . . B–QB3.

311

\[ W \]

20 R × B! P × R
21 N–KB5 Q–Q1
22 Q–N4 P–N3
23 N × P + K–N2
24 N–KB5 +

White’s advantage is so great that he even has a choice of winning methods. 24 N–Q4 is also winning, e.g. 24 . . . K × N 25 N–B5 + ! P × N 26 B–KB4 + N–N4 27 Q × P K–N2 28 P × N R–R1 29 R–R6! and the rook cannot be taken. Black is apparently unable to meet the host of mating threats (B–Q3, P–K6, P–N6 etc.) e.g. 29 . . . N–B1 30 P–K6. Karpov uses what looks to be the safer winning method.

24 . . . K–R1
25 B–Q3 R–KN1

Black cannot take the knight: 25 . . . P × N 26 Q × P N/Q2–B3 27 P × N N × P 28 B–K5 and mate is inevitable.

26 N–R6 R–N2
27 P–R5 Q–K1

Black has no defence against the multiple threats. Opening the KR-file would lose even more rapidly.
28 P–K6! N/Q2–B3
29 KP × P Q–Q1
After 29 . . . Q–KB1 White would win with the pretty queen sacrifice 30 P × P! N × Q 31 N × N B–Q3 (the threat was 32 B–K5) 32 N–B6! B × B 33 N × N Q–Q3 34 N–B6 + B–R7 35 N–K8! (312)

312

\[ B \]

35 . . . R × NP 36 B × R.
30 Q–Q4 N × P
31 B–K5 B–B3
32 R–K1

Another possibility was 32 N–N4 R × P 33 B × KNP.

32 . . . B × B
33 R × B N4–B3
34 P–N4 Q–KB1
35 P–N5 N–K5
36 B × N P × B
37 Q × P 1–0
2.04 – 1.58
38 R–K8 and 38 Q × R are unanswerable threats.

4 N×P N–QB3
5 N–QB3 P–QR3
6 B–K2 Q–B2
7 0–0 N–B3
8 B–K3 B–N5

One of the most analysed variations of the Paulsen, in which forced theoretical variations sometimes stretch right up to the 25th move.
9 N–R4

The popular continuation, though 9 N×N NP×N also, quite clearly, gives White some advantage.
9 . . .

10 N×N NP×N
11 N–N6

The tempting 11 Q–Q4 does not work on account of 11 . . . B–Q3 12
N–N6 R–N1 13 N–B4 B×P+ 14
K–R1 P–Q4 15 P–K5 P×N 16
K×B R–Q1.
11 . . .
12 N×B KR×N
13 B×P R–Q1! (318)
An innovation. Though, in all honesty, this move has already been seen some time ago in Leningrad events, but little known on a wider scale.

Previously 13... R–K1 was always chosen. In connection with this it is important to have the knowledge of two circumstances: There is the black knight’s lack of squares, which, for example, gave grounds for Geller, in the 39th USSR Championship, to start a blunt chase after it with 14 B–Q3 B–Q3 15 P–KN4!? The second, less striking consideration, is that the black rook on K1 can come under attack from the queen.

Black’s last move has as its object the avoidance of such unpleasant consequences.

**14 B–Q3**  
**B–Q3**  
**15 K–R1!**

The best. After 15 P–KB4 P–K4  

**15... B–K4**

The KRP, of course, is inviolate: after 15... B×P 16 P–KB4 B–N6 17 Q–B3 White wins quickly.

Winning back material with 15... R×P, Black risks falling under attack: 16 B–Q4 R7–N1 17 B×N P×B 18 Q–R5.

**16 P–QB3**

16 P–KB4 does not promise anything more: 16... B×NP 17 R–QN1 P–Q4 18 P–K5 N–Q2 19 Q–N4, though, all the same, White does have some initiative on the K-side.

**16... R×P**  
**17 Q–B1!**

It is in just this way (with the black rook on K1) that White, time and again, gets good chances in this variation.

**17... N–N5**  
**18 P–KB4**

The rook is untouchable: 18 Q×R? B×BP! and Black mates or wins the queen.

**18... N×B**  
**19 Q×R**

19 P×B is wrong – 19... Q–N3 and the advantage is in Black’s hands.

**19... B×KBP**  
**20 Q–KB2!**

The attempt to hang on to the exchange, 20 R–B3 N–N5, does not work in White’s favour because of Black’s many threats: 21 P–KR3 (21 R1–B1) 21... B–B8!, 21 P–N3 N–K4 – highly unpleasant.

**20... N×R**  
**21 R×N**  
**P–K4 (319)**

Finally the idea behind the innovation on move 13 is revealed! With
the rook on Q1, the threat against KB2 is not so deadly.

Black has a bad game after 21... P-N4?! 22 P-N3 Q-Q3 23 B-K2 or 23 B-B2.
22 P-N3 Q-Q3
The black bishop cannot move because of mate.
23 B-K2
23 B-B4 also looks interesting. In that case after 23... B-N4 24 QxP+ K-R1 25 P-QR4 B-B3 26 P-R5 R-KB1 27 Q-R5 Q-Q7 28 QxKP P-R3 29 Q-QB5 QxBP 30 P-K5 White achieves his goal (and retains chances of qualifying for the Candidates). A more convincing defence is 27... Q-B4 28 B-B7 B-Q1 in the above, or 25... P-R3 26 P-R5 Q-B4 27 P-R6 P-Q4 28 B-Q3 QxP.
23... B-N4
24 QxP+ K-R1
25 P-QR4
The alternative (25 B-N4) also turns out in his favour.
25... B-K2
Variations on the theme of a flight-square are weaker, e.g. 25... P-R3 26 B-R5! Q-Q6 27 B-N6.
26 P-R5 R-KB1
27 Q-QB4 RxB+
28 BxR Q-B3
29 K-N2 Q-B1!
30 B-K2 B-B4
31 B-N4 Q-B7+
On 31... Q-Q3 32 Q-B7 is possible: 32... Q-Q7+ 33 K-R3 Q-R3+ 34 B-R5 Q-K3+ (34... P-N3? 35 Q-K8+) 35 QxQ with winning chances.
32 K-R3 P-Q3
33 B-Q7
According to Petrosian and Keres, analysing this position in the press-bureau, here White should play 33 Q-K6! The endgame after 33... Q-B8+ 34 K-R4 Q-B3+ 35 QxQ being considered as highly promising for White. Now the black pieces become active.
33...
P-N3
34 BxP K-N2
35 B-N5 Q-QN7!
36 P-R6 B-N8
37 Q-K2 QxP
38 B-B4 Q-B8
39 Q-B1
39 K-N2 looks better; now Black gets some initiative.
39...
Q-R3+
40 K-N2 QxP+
41 K-B3 Q-R4+
42 K-N2 (320)

320

B

Here the game was adjourned and Black sealed his move.

We now follow the comments made by Furman in a newspaper article under the title of The Knight's Move.

There is a knight's move here? the reader asks in astonishment – there is no such piece left on the board.

It turns out that a 'knight's move' can be made by other pieces. Here is how the continuation went:
42...

Q-R7+
43 K-B3 B-Q5
44 B-Q5 B-B4
45 B-B6

The advantage is on Black's side. It consists not only of an extra pawn,
but also of the unhappy position of the white king. Black has at his disposal two plans of campaign. However, with correct defence neither of these lead to a win. But one cannot utilize both possibilities. How to guess which one the opponent is least ready for? Which would be the most unexpected for him?

45 ... B–Q5 (1)

Here it is, the ‘knight’s move’. With this aimless bishop move Karpov demonstrates the lack of any kind of plan and dulls the opponent’s vigilance.

46 B–N7?

This bishop move is the decisive error. On the best continuation, 46 B–Q5, Black can play 46 ... B–N3 with the theme that the bishop can, when the opportunity arises, take part in an attack on the white king from the square ... Q1, later transferring the queen to ... Q7 and advancing the K-side pawns. During the construction of this plan White would have to speed the withdrawal of his king to a safe place.

46 ... P–N4!

47 K–N4 P–R4 +!

48 K–B5

After 48 K × NP Q × P + 49 K × P B–B7 White gets mated.

48 ... Q × P

49 K–K6 Q–B7

Now one might ask why Karpov did not follow this plan at once. The reason is that the ending is won only with White’s bishop on N7.

50 Q–N5

After 50 Q × Q B × Q 51 K–B5 P–N5 White, in order to prevent the further advance of Black’s KN, would have to play 52 P–R7, giving up his important passed pawn. With the bishop on Q5 or B6 White draws by 52 B–B4 and 52 B–N5 respectively.

50 ... Q–B3 +

51 K–Q5 P–N5

52 B–B8 Q–K2

Now Black wins, gradually preparing the advance of his passed pawns.

53 B–B5 K–R3 54 Q–B1 Q–QB2 55 Q–K2 Q–B4 + 56 K–K6 K–N4

After 66 K–B5 B–B4 White is in zugzwang: 67 B–B1 P–N7 68 B × P K–N6 securing the advance of the KRP.

66 ... B–Q5 67 P–R7 B × P 68 K × P K–N5 69 K–Q5 P–R5 70 P–K5 P–R6 71 B × P + K × B 72 P–K6 B–B4 0–1 4.06 – 4.02

Karpov’s impressions of the tournament (from 64):

‘Spassky played excellently throughout the whole tournament and completely deserved his success. As usual Korchnoi played in a fighting spirit and also at a high level.

‘I began the tournament, if you take the number of points obtained as the criterion, like never before. But all the same, even in those games which I won, such as those against Savon and Belyavsky, a feeling of dissatisfaction with my play never left me. I never felt that my game got going. When, in the all-important meeting with Spassky, I not only let slip a tremendous advantage, but even obtained the inferior position, it became clear to me that I could have wished for better form.

‘Although I was not very satisfied with the place I obtained, nevertheless I consider my overall result satisfactory, the more so because towards the end I succeeded in overcoming the slump in my play. Although in the later stages I scored fewer points than at the start, nevertheless the quality of my play was higher.’

1 N-KB3 N-KB3 2 P-B4 P-QN3
3 P-KN3 B-N2 4 B-N2 P-B4 5 0-0
P-N3 6 P-Q3 B-N2 7 P-K4 0-0
8 N-B3 N-B3 9 R-N1 N-K1 10
B-K3 N-Q5 11 N-K2 P-K4 One
of the complicated contemporary
strategic patterns. Apart from
the text, 11 . . . N×N/6+ clearly
deserves consideration: 12 B×N
P-B4 and if 13 P-QN4 then 13 . . .
N-Q3. 12 P-QN4 P-Q3 13 P×P
QP×P 14 N2×N! The start of a
far-reaching plan, which Karpov
succeeds in bringing to life. Now the
centre is hermetically sealed and
both players’ attention is focused on
flank operations. 14 . . . BP×N Also
possible is 14 . . . KP×N 15 B-B4
P-KR3. 15 B-Q2 N-B2 16 N-K1
N-K3 17 B-N4 R-K1 18 P-B4
P×P 19 P×P Q-B2 20 Q-N4
N-B4 21 B×N A concrete approach
to the position prompted this ex-
change and ceding the two bishops;
that pair remain inactive for a long
time and Black just cannot find a use
for them. 21 . . . P×B 22 R-N2
QR–N1 23 R2–KB2 B–QB1 24
26 N–B3 R×R+ 27 B×R B–KR3
28 N–Q2 K–R2 29 K–R2 B–N5 30
P–K5 P–B4 On 30 . . . P–B3 31
N–K4 is very unpleasant, but now
Black’s light-square bishop is im-
prisoned, and, not finding any
opposition on the light squares,
the white pieces threaten to infiltrate
into the enemy camp. 31 Q–N2 (330)
31 . . . R–QN1 One would think that
Black should now concentrate most
of his attention on the tactical
peculiarities of the position, weighing
up variations such as 31 . . . Q–Q1
(31 . . . Q–K2 32 K–N3 P–N4?! 33
RP×P B×P 34 P×B Q×KP+ 35
K–R4! 32 K–N3 B–N2 (threat

mate) 33 N–B3 (or 33 Q–Q5 Q–B2)
33 . . . B×N 34 Q×B B–B3 35
R–R2 R×P 36 P×R B×KP+ 37
K–R3 B×R 38 K×B Q×P+. Of
course all this is very rough, and
White, clearly, could find a way to
preserve his advantage. But Black
should be trying to create at least the
illusion of counter-threats. 32 K–N3
Karpov frequently and readily en-
lists the services of his king as an
active participant in the game. Two
successful examples come readily to
mind: v. Gligorić (No. 2408) and
v. A. Zaitsev (No. 1103), as does
Nimzowitsch’s saying ‘My king likes
to go for walks’. 32 . . . R–Q1 33

P–N3 5 19 0–0 Q–Q2 27 20 R–Q1 18
B–B4 2 21 P × P 3 P × P 6 22
P–QN4 1

It seems clear that White, who has
some potential advantage, can do
without this advance. 22 N–R3
deserved consideration.

22 . . . P × P 8 23 P × P K–R1 24
P–N5 6

This is rather rash. 24 Q–R2
makes a better impression.

24 . . . B × N! 29

This is more accurate than 24 . . .
when the chances are in White’s
favour.

25 R × B 1 N–K2 (331)
26 Q × P + 9

White wins a pawn, but loses
the initiative. The quieter 26 R–Q1 was
also very likely the strongest. Also
tempting is 26 R–R7 Q–Q1 (26 . . .
Q–K3 27 R–B5 Q–N3 28 R5–B7 is
good for White) and then 27 R–Q1
(27 Q–Q1! N × R 28 Q–R5
weak on account of 28 . . . N–B2,
while the consequences of 27 N–N4?! 
N × R 28 N × N Q–B1 29 R–QB7
R–R1 are far from clear).

Shamovich, in the Soviet bulle-
tins of the event, suggested 26 R–Q3!
e.g. 26 . . . B–B3 27 R–R7 Q–Q1
(now the pawn sacrifice is unjustifi-
able after 27 . . . R–N2 28 R ×
R × R 29 R × P) 28 Q–Q1! N–B1
29 R–R6 with a big positional
advantage.

26 . . . P × Q 2 27 R × Q 1 N–B1 2

An accurate manoeuvre which
completely equalizes.

28 R–QB7 B–Q1 14 29 R–B6 3
N–N3 30 R–N4 1 N × B 1 31
R6 × N 1 B–N3 32 K–B1

32 P–N3 P–B5! and the activity
of Black’s pieces is sufficient to draw,
e.g. 33 P × P P × P 34 R × P R × R 35
R × R B–B4 36 R–B5 R × P 37

32 . . . KR–Q1 1 33 K–K2 1 B–R4
10 34 R–N3 8 R–Q7 + 2 35 K–K3 2
P–B5 + 1 36 K–K4 R × BP 2 37
K × KP 1 R × KNP 38 N–Q4
R × RP 5 39 R–B6 2 B–N3 9 40
N–K6 4 P–B6 3 41 R × P R–R4 + 42
K–B6 R × P 2 43 R–Q6 1 R–N7 5
44 K–K7 3 B–R4 5 ½ 0.55 – 0.50

1 N–KB3 7 N–KB3 3 2 P–KN3 1 P–QN4 1 3 P–B3 6 (333)
This line is rarely seen, and on its infrequent outings 3 B–N2 is invariably played. The text is the start of an attack on the QNP of a type
which is familiar from the Sokolsky e.g. 1 P–QN4 P–QB3 2 B–N2 P–QR4. Strangely there was an article by T. D. Harding entitled *The Refutation of the Sokolsky?* in the May 1973 issue of *Chess* which included the opening of a game Harding–Alldridge, Birmingham University Open 1973: 1 N–KB3 N–KB3 2 P–KN3 P–QN4 3 P–B3 P–N3. It is interesting to speculate as to whether Korchnoi and/or Karpov had seen this article when they were at the European Team Championship in Bath.

3 ... B–N2 3 4 P–QR4 P–QR3 3 5 P–K3 3 A rather dubious move; now White's position has many weaknesses: the squares KB3, Q3 and QN3. 5 ... N–B3 6 6 P–Q4 P–K3 7 P–QN4 10 B–K2 4 8 QN–Q2 1 It is clear that White could not take the QNP neither now nor earlier. Now Black's QN is driven back to the edge of the board and White stabilizes his position. 8 ... N–R2 1 9 B–Q3 1 0–0 4 10 P–K4 3 P–Q3 1 Preparing the advance ... P–QB4 to open up the centre. 11 0–0 12 P–B4 7 12 NP×P 2 Otherwise, for example after 12 B–N2, there can follow 12 ... P×NP 13 BP×P P–Q4. 12 ... QP×P 1 13 B–N2 3 N–B3 31 The pawn sacrifice leads to a sharp game. Now after 14 RP×P RP×P 15 B×P Q–N3 16 Q–K2 N–R2 17 B–Q3 Q×B 18 QR–N1 Q×P there is material equality on the board. 14 P–K5 11 N–Q4 2 15 RP×P 7 RP×P 1 16 Q–N1 1 P×P 4 17 P×P 1 P–R3 2 18 B×P 1 Q–N3 3 19 B–K2 11 19 B–Q3, transferring the bishop to K4, was not bad. 19 ... R×R 1 20 B×R 1 Q–R2 1 Black has compensation for the sacrificed pawn: a strong knight on Q4 and rich possibilities for piece-play. Besides that the white bishop is very unfortunately placed on QR1. 21 N–B4 6 R–N1 11 22 B–N2 9 B–R3 4 23 Q–B2 5 Q–N2 8 24 B–R1 16 N–N5 12 25 Q–Q2 2 R–Q1 3 26 N–K3 10 N×N 9 27 Q×N/3 Not 27 B×B N×R, while if 27 P×N then 27 ... R–B7 is good. 27 ... B×B 4 28 Q×B 1 R–B7 1 29 Q–Q1 1 Q–B3 2 30 P–R3 3 N–Q4 2 31 Q–Q3 4 Q–R5 1 32 N–Q2 3 R–R7 7 33 N–N3 N–N5 2 34 Q–N1 1 N–Q4 1 35 R–B1 1 Q–R1 1 36 R–B8+ 1 Q×R 37 Q×R 1 Q–B5 1 38 Q–N1 1 Q–K7 39 Q–Q1 1 B–N4 40 Q–B1 1 Q–B6 (334)

Here the game was adjourned. The threat is 41 ... Q×N and if the knight moves then 41 ... N–K6 is decisive. If 41 Q–N1 there follows 41 ... N–K6 42 P×N B×P + 43 K–R2 B–B7.

Korchnoi sealed 41 P–R4 1,
however in this case 41 ... B–K6 is
strong and if 42 Q–N2 (42 PxB
QxNP+ 43 K–R1 QxRP+ 44
K–N1 Q–N6+ 45 K–R1 N–P) then both 42 ... Q–Q8+ and 42 ...
BxBP+ are possible.
0–1 without further play. 2.30 –
2.28

2907 AK–Boris Spassky:
R7: 11 + 14 October:

Ruy Lopez

The notes are Karpov's from 64.
1 P–K4 P–K4 2 N–KB3 N–QB3 3
B–N5 1 P–QR3 1 4 B–R4 N–B3 5
0–0 B–K2 6 R–K1 1 P–QN4 1 7
B–N3 P–Q3 8 B–B3 0–0 9 P–KR3
N–QR4 10 B–B2 1 P–B4 1 11 P–Q4
Q–B2 12 QN–Q2 N–B3 1 13 P–Q5
N–Q1 1 14 P–QR4 9 R–N1 6

It is interesting that this same line
was employed in the first game of the
Spassky–Korchnoi match (Kiev
1968).

15 PxB 3

The immediate 15 P–QN4 is good
here, but the text move is also not
bad.

15 ... PxB 1
16 P–QN4 P–B5 7
17 N–B1 1 N–K1 21

In my opinion this is an inaccuracy,
since Black shows his hand too
soon, declaring his intentions. It
is not advisable to take away the...
K1 square from the black
rook at such an early stage. Taking
advantage of this I succeeded in
thinking up a comparatively new
plan involving the moves N3–R2 and
P–B4.

Apparently Black should have
played 17 ... B–Q2.

18 N3–R2 18 P–B3 9

In my opinion 18 ... B–B3 was
better.

19 P–B4 2 N–B2 1
20 N–B3 5

Here White has many varied
possibilities. Thus 20 P–B5 P–N3 21
P–N4 N–N2 seems natural, and
now, by playing 22 B–K3, White
firmly seizes the QR-file. This is
perfectly sound, but it is true that it
remains unclear what domination of
the open file would have given.

20 ... P–N3 2
21 P–B5 2 N–N2 1
22 P–N4 4 B–Q2 1
23 B–K3 1 R–R1 3
24 Q–Q2 3

Seemingly not the best, although
by this move White forces the black
queen to go to ... QN2. More
consistent, however, was 24 R–B1,
so that if 24 ... R–R7 the rook can
be repelled from the second rank
with 25 B–N1 and only then play
26 Q–Q2.

24 ... Q–N2 1
25 QR–B1 5

A crucial decision – to concede the
QR-file to the opponent. On the
other hand, if one pair of rooks is
exchanged then White is left with
fewer winning chances. If you want
to win – give your opponent
counterplay!

25 ... R–R7 6
26 N–N3 7 R1–R1 7
27 P–R4 12 B–Q1 35
28 K–R1 11 B–N3 4
29 R–KN1 7 BxB 10
30 QxB Q–R2 6
31 Q–Q2 3 B–K1 1

I do not think very much of this
manoeuvre – the black pieces have
become very passive. In guarding...
KN3 an extra time, Black finally
unties his opponent’s hands for a
K-side attack. I think that trans-
ferring the queen to ... Q1 by ... 
Q–N3–Q1 was more useful here.

32 P–N5 10 Q–K2 7
33 R/B1-B1 5 BP × P 7
Black must go in for this exchange immediately, otherwise White plays 34 N-R2 and eliminates even this possibility.

34 RP × P 1 Q-Q2
35 N-R2 6
I dare say the simplest move was 35 R-B2 keeping in reserve the threat P-B6. That would have posed Black very difficult problems, the more so because at this moment there were only four minutes left on Spassky’s clock. But instead of this I myself made some unimportant moves.

35 . . . Q-Q1 3
(335)

36 P-B6 1
It seemed to me that after 36 P×P P×P 37 N-N4 Q×P 38 N-B6+ K-R1 39 Q-R2+ Q-R3 40 R-N2 (not diverting the other rook which can still prove useful on the KB-file) 40 . . . R-R8 41 B-N1 Q×Q+ 42 R×Q+ N-R4 43 N3×N P×N there is nothing clearly forced and Black’s position is holding. If, all the same, White plays 40 R-B2 then again 40 . . . R-R8 41 Q×Q+ N×Q 42 R-R2 N-R4 43 N3×N P×N and the . . . KN1 square is protected. It is true that in all circumstances Black’s position remains shaky, and it was necessary to seek a strengthening of the play in one of these variations.

36 . . . B-Q2
Black, on the other hand, has no pretensions, he just makes the best moves.

37 P×N 1
Bondarevsky suggested sacrificing a piece instead of taking one: 37 R-B2 N-K1 38 N-B5 with an attack.

37 . . . Q×P
38 Q-N2 15
38 Q-B2 was stronger, and after the forced 38 . . . Q-B5 then 39 N-B5, and White again has the advantage, and a significant one at that.

38 . . . R-N7 1
39 R-N1 7
Again 39 Q-B2 was better here. The variations arising from that I analysed at home because they could have a bearing on the adjourned position.

39 . . . Q-K2 40 N-B5 P×N 41 P×P R1-R7 (41 . . . Q-B3 42 N-N4 Q-N4 43 R-N2±) 42 P-B6 Q-K1 43 R-B1 N-R3 44 R-N5 (preventing the bishop from going to . . . KB4) 44 . . . Q-B2 45 K-N1 B-B4 45 . . . N-B4 46 N-N4; 45 . . . P-K5 46 Q-R4 Q-B3 47 R-B1 46 Q-N6 (The tempting 46 R×B Q-N3+ 47 K-R1 N×R 48 B×N R×Q 49 B-K6+ Q-B2 50 N-N4 unfortunately does not work because of 47 . . . R×B 48 R×R R-R8+).

It is clear that 45 . . . B-B1 is preferable (instead of 45 . . . B-B4): 46 N-B1 R×B 47 R×R R×R 48 Q×R Q×BP 49 R-N2 N-N5 50 N-K3 P-R4 (50 . . . N×N 51 Q×P+ K×Q 52 P-N8=Q+) 51 N×N B×N 52 Q-B2 K×P 53 Q-K3 and White’s position is slightly better.
Instead of 39 ... Q-K2, 39 ... Q-B5 deserves consideration. Also in this case it seems possible to play 40 N-B5 Q×Q 41 R×Q P×N 42 P×P and, with P-B6 to follow, White sets his opponent difficult problems. If Black prevents this then the following piquant ending arises: 42 ... R1-R7 43 N-N4 K×P 44 N-R6+ and all the king's retreats lead to mate. If he plays immediately 41 ... R1-R7, then 42 N-K3 in conjunction with N-B3-N5-K6, also gives White the advantage.

Finally, I was aware that all the preceding variations were similar and required further checking.

39 ... R7-R7
40 Q-K2 3 Q-R5
41 R/QN1-KB1

The sealed move. In the adjourned position, despite White's extra piece, Black already has some advantage.

41 ... B-R6
42 R-B2 N-N4
43 Q-K3 B-N5

Move by move Black introduces threats, each time forcing White to make practically the only reply.

44 R1-KB1 K×P
45 B-Q1

I do not see any other satisfactory reply.

45 ... B×B
46 R×B R-R8

47 R1-KB1

47 R2-B1 is unsatisfactory on account of 47 ... R1-R7 and 47 R2-Q2 because of the same reply.

47 ... R×R +
48 R×R R-R7
49 R-B2 R-R8 +
50 R-B1 R-R7
51 R-B2 R-R8+
52 R-B1 R×R +
53 N3×R Q×P +

54×K-N1 (336)

In my opinion not a forced exchange. Black had the useful 54 ... Q-R5 (54 ... P-R3 is not possible in view of 55 Q-R7+ K-B3 56 Q-Q7) with the idea of the manœuvre ... N-R6-B5. White is practically forced to play 55 Q-R7+ K-R3 56 Q-K3. The endgame which arises is also favourable to Spassky.

55 N×Q N-K5
56 N-Q1 N-B3

Bondarevsky gave 56 ... K-B3 as practically winning.

57 N-K3 P-R4

I think the immediate king thrust, 57 ... K-R3, was better - while the white knights are unable to create a barrier.

58 N-B3 N-K5
59 N-Q1 ½-½

The ending still retains its tension e.g.: 59 ... P-N4 60 N-K1 N-B3 61 N-K3 (61 ... N-K1 62 N-B3 K-N3 63 N-Q2 N-B3 64 N2×P P×N 65 P-N5 K-B2 66 P-N6 N-Q2 67 P-N7 and the QP is lost all the same.) 61 ... K-N3 62 N1-B2 N-K1 63 N-R3 (Possibly better is the immediate 63 N×P) 63 ... N-B2 64 K-N2 P-N5 65 N/K3×BP P×N 66 P-N5 N×QP 67 N×P P-R5 68 N×QP and although Black is certainly not risking defeat,
the white pawns, in certain circumstances, can become strong.

2912 Vladimir Tukmakov–AK: R12: 17 October:

Sicilian

The notes are Tukmakov's from 64.

1 P-K4 P-QB4 3 2 N-KB3 P-K3
1 3 P-Q4 P × P 4 N × P 1 P-QR3 5
B-Q3 1 N-KB3 1 6 0-0 Q-B2 7
N-Q2 23

Here, against 7 P-QB4, 7 . . .
N-B3 8 B-K3 N-K4 is possible,
while against 8 N × N Black is
perfectly able to play 8 . . . NP × N.
7 . . . N-B3 2 8 N × N 3 NP × N 9
P-KB4 17 P-Q4 2 10 P-QN3 7
B-K2 8 11 B-N2 3 P-QR4 12 P-B4
11

The first controversial moment.
Black wants, by means of . . . P-R5
and . . . B-R3, to rid himself of his
bad pieces - the QRP and the light-
squared bishop.

12 P-QR4 does not achieve any-
thing for White after 12 . . . B-R3,
but 12 P-B4 also suffers from
weakening the QN4 square.

12 Q-K2 deserved consideration -
a more natural place for the queen
than the one I chose.
12 . . . 0-0 36

Karpov made this move after long
thought. Here 12 . . . P-R5 is no

longer so good: White replies 13
R-B1 or 13 Q-B2 and the evacuation
of the black king is again delayed.

In castling Black was obliged to
look at the consequences of the
sacrifice 13 P-K5 N-Q2 (on . . . K1
the knight is not doing anything) 14
B × P + K × B 15 Q-R5 + K-N1 16
R-B3 P-KB4 17 R-R3. After 17 . . .
R-Q1 White has a draw but no
more. I was attracted by a different
plan of attack

13 Q-B2 20 P-R3! 8

Here this is better than the
traditional Sicilian reaction . . .
P-N3.

14 K-R1 1 Q-N3 6

15 BP × P was threatened.

15 QR-K1?! 13

I thought for a long time about the
position after the exchange sacrifice
and it seemed to me very terrible (in
the sense of awe-inspiring - eds); in
reality it was not so simple. Quieter
and better was 15 N-B3.

15 . . . N-N5 10 (342)

16 KP × P 20

Now 16 N-B3 will no longer do
BP × P 2 17 P × P 2 N-B7 + 1 18
R × N Q × R 19 R-K2 3

After 19 R-KB1 Q-B4 White has
no compensation for the exchange
because 20 N-B4 P × P 21 B-R3
Q-B2 does not work - the bishop on
. . . K2 is defended.
Against 24... R-KB3 25 N-B6! is possible. 25 N-B6! is a solid threat anyway, therefore the text move is practically forced. The position is most interesting - if you add the fact that I had ten minutes left and Karpov, twenty, then the drama of the following struggle increases.

24... B-B3 12 25 B-B4! 4 Q-Q3 4

26 N×P! R×N 1 27 B×B 1

27 B×R/7+ loses to 27... K×B
28 B×B B-B4 (but not 28... Q×B
29 R-KB3 or 28... P×B 29
Q-R7+) 29 R×P + K-B1!
27... B-K3! 1

Or 27... Q×B 28 B×R/7+
Q×B (28... K×B 29 R-KB3) 29
Q×B+
28 R-Q3 1 Q-B2 4

After 28... B×B 29 R×Q R×R
30 P×B White is not risking any-
thing.

29 R-Q8+ 1 Q×R! 1

If 29... R-B1 there follows the
stunning blow 30 R×R + K×R 31
B×P+!. The bishop is immune:
31... Q×B/2 32 Q-B2+ and 33
B×R or 31... K×B 32 Q-N2+ and
33 B×R. There remains 31... K-
N1 but then 32 B-N2 and White
has two pawns for the exchange
which, together with the position
of the black king, gives White at
least equal chances.

30 B×Q 1 B×B 4 31 P-KR3!

If 31 Q×B then 31... R-QB3! -
it is impossible to defend against
the two mate threats on KB1 and QB1
and the endgame after 32 Q×R/7+
is lost for White.

Now there remained not more than
a minute on my clock, and on
my opponent's, about five.

The smoke of battle has cleared
somewhat and it has become clear
that the chances are on the side of
Black, to whom the presence of

---

19... Q×BP 10

19... Q-B4 is bad: 20 N-B4 (also
possible is 20 P×P Q×Q 21 P×P+
with sufficient compensation) 20...
P×P 21 B-R3 P×N 22 B-R7+!
K-R1 23 B×Q.

20 R-K4 3 Q-Q3 22

The queen cannot go to... B7
because after 21 B-Q4 she is trapped,
but 20... Q-N4 was possible.
White can then draw with 21 R-K5
Q-B5 (21... P-B4 is too dangerous)
22 R-K4, but it is not so easy to find
more, if indeed it is possible. How-
ever, the text move is better.

21 N-B4 11 Q×QP 22 R-N4! 6

Immediately regaining the ex-
change does not work: 22 N-N6
Q-N2 23 Q-B3 P-K4! (also possible
is 23... P-B3, but not 23... B-
B3?? 24 Q×B±) 24 N×R
Q×N and Black has an extra pawn.

22... P-K4 3 23 R-N3 R-R3 1

Here Black has a wide choice of
moves. As well as the game con-
"
opposite coloured bishops gives good attacking chances.

31 ... B-B8

In this position best of all was 31 ... B-Q4 and both 32 Q-Q3 R-Q3! and 32 Q-QB5 B-N2 are bad. 32 K-R2 should be played and a similar position is obtained to that which arises after several moves in the game.

32 Q-K4! P-R5 33 P×P R-Q3 34 B-R5 R3-KB3 35 B-K1 B-R3 36 K-R2 B-N2 37 Q-QB4 R-B3 38 Q-N3 R-KN3 39 B-N3 R-N4 40 Q-B4 B-Q4

Here the game was adjourned and I sealed ... 41 Q-B8+

On analysis it was clear that Black’s advantage was not sufficient to play for a win. The passed QRP gives sufficient counterchances.

41 ... R-B1 42 Q-B2 P-R4 43 P-R5! ½-½ 2.55 - 3.00

The ending after 43 ... P-R5 44 B×P R×P+ 45 Q×R B×Q 46 K×B cannot be won.

Karpov's first prize amounted to 125,000 pesetas. He also picked up 7,000 pesetas for the Best Game Prize and a further 5,000 pesetas for scoring the best result in the last four rounds (3½/4).

This tournament re-inforced Karpov's position as number two in the world (after Fischer), though Spassky still has some claims to share this place. Golombek, the tournament arbiter, made some interesting comments in *The Times*: 'Anyone who had watched his play at Madrid would have come away with the conviction that if he does manage to make his way successfully through the series of Candidates' matches then Karpov will give the world champion a really hard fight for the title. His play at Madrid had that sort of universal quality that characterizes the really great player and, in a tournament which was toughly contested he, as far as I could distinguish, made only one mistake, in his draw with Portisch.'

3014 AK–Lajos Portisch:
R14: 13 December:

Ruy Lopez

1973 Chess Oscar

1973 was a magnificent year for Karpov – he lost only one game (against Petrosian in the USSR Championship) and finished with the excellent overall score of +32 —1 =41 (71%) which recalls Fischer’s results of 1970: +48 —3 =23 (80%).

The year’s achievements were crowned when he was awarded the chess oscar at the end of the Madrid tournament (In 1972 Karpov had also been in the running for this prize: 1 Fischer, 2 Spassky, 3 Portisch, 4 Karpov).
If one can draw conclusions from history then the list of previous Oscar winners is most interesting: 1967 Bent Larsen; 1968, 1969 Boris Spassky; 1970, 1971, 1972 Robert Fischer.

Karpov was also voted one of the Soviet Union’s top ten sportsmen of the year (No. 1 chessplayer) in an annual poll of Soviet sports writers.
31 CANDIDATES’ QUARTER-FINAL

Moscow, 17.1–3.2.1974

1 2 3 4 5 6 7 8
Karpov ½ ½ 1 1 1 ½ 1 5½
Polugayevsky ½ ½ ½ 0 ½ 0 0 2½

3101 Lev Polugayevsky–AK: G1:
Nimzo–Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3 3
N–QB3 B–N5 4 P–K3 0–0 5 B–Q3
P–B4 6 N–B3 P–Q4 7 0–0 QP×P
8 B×BP N–B3 9 P–QR3 B–R4

A long-forgotten variation which has again become popular thanks to the efforts of grandmaster Larsen. Both players play this line as Black. The theoretical duel has become the more interesting in that Polugayevsky is obliged to demonstrate an advantage for White.

10 B–Q3

One of the most unpleasant continuations for Black to meet.

10 . . . P×P 11 P×P B–N3 12
B–K3 N–Q4 13 B–KN5!

An improvement on 13 N×N which gave Black easy equality in Gligorić–Karpov (2009). Polugayevsky’s move is a theoretical novelty which poses Black complex problems.

13 . . . P–B3

He is obliged to make this weakening of his pawn formation because if the queen moves it is difficult for Black to complete his development.

14 B–K3 N3–K2 15 Q–B2 N×B 16
P×N P–N3

White has some advantage be-

cause of his strong pawn centre. However, Black’s position is sufficiently solid, possessing the advantage of the two bishops he can count on utilizing this in the event of the game being opened up.

In the next few moves both players try to improve the position of their pieces.

17 B–B4 N–B4! 18 KR–K1 K–N2 19
QR–Q1 B–Q2 20 K–R1 R–B1 21
B–R2 N–Q3 22 Q–Q3 Q–K2 23
P–K4 N–B2 (365)

An important moment in the game. By the efficient manoeuvre . . . N–K2–B4–Q3–B2 Karpov prepares to defend against his opponent’s possible central pawn thrusts.

365

24 P–K5

Polugayevsky made this move after 36 minutes’ thought. Probably
he was balancing possibilities of improving the position of his pieces against Black, at the same time, gradually preparing a Q-side pawn advance.

If 24 P–Q5 then sufficiently good is 24 . . . N–K4 25 N×N P×N and possibly Black stands a little better. 24 . . . P×P 25 N×P

In the press room the opinion was expressed that by means of 25 P–Q5 White would have retained the initiative. However, after 25 . . . B–B2 26 N–K4 P×P 27 B×P B–B3 it is not clear what advantage White can extract from the position.

25 . . . N×N 26 R×N R–KB4

Black has the possibility of playing 26 . . . Q–R5 with the threats 27 . . . B–B2 and 27 . . . Q×QP. It is obvious that Karpov did not like the fact that after 26 . . . Q–R5 White could force a draw by 27 B×P Q×QP 28 Q×Q B×Q 29 B×B B×R 30 B×R R×B 31 R–Q7+ K–R3 32 R×NP B×N 33 P×B R×P 34 P–KR4 R×P.

27 N–Q5

It is very tempting to exchange off the bishop on QN6, and Polugayevsky passes over the move 27 R5–K1, suggested in the press room by David Bronstein. In this case Black would have found it difficult to neutralize White’s central pressure. 27 . . . Q–Q3

Also 27 . . . Q–N4 was not bad.

28 N×B Q×N

After 28 . . . P×N Black gains a tempo but weakens his pawns. However, it is more to Karpov’s taste to attack enemy pawns than to defend his own.

After 32 . . . B–Q2 it is not clear that White has anything other than 33 R–Q1.

It was not good for Black to go into the ending by 32 . . . R×R 33 Q×R+ Q×Q 34 P×Q R–B4 35 R–K2 because White is the one with the chances.

3102 AK–Lev Polugayevsky: G2: Sicilian

White has an extra pawn which, paradoxically, it is not good to hang on to. Karpov himself considers that after, for example, 23 B–K3 N×RP 24 N–Q5 he would have had a strategically won position. But in the game something different happened and Polugayevsky’s pieces became quite active.

3103 Lev Polugayevsky–AK: G3: Nimzo–Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3 3 N–QB3 B–N5 4 P–K3 0–0 5 B–Q3 P–B4 6 N–B3 P–Q4 7 0–0 QP×P 8 B×BP N–B3 9 P–QR3 B–R4 10 B–R2

Remaining on the a2–g8 diagonal, the bishop covers the central square Q5, so that Black has to reckon with the advance P–Q5.

10 . . . P–QR3 11 N–QR4

This forces an exchange on Q4, after which the unpleasant (for Black) pin B–KN5 is threatened.

11 . . . P×P 12 P×P P–R3 13 B–KB4

Transferring the bishop to . . . K1, Black strengthens his KB2 square. If instead 16 . . . P–QN4 17 N–B3 and the threat of P–Q5 is becoming a real one.

17 QR–B1 B–K1 18 N–B3 R–Q3 (367)

The attempt to play for a K-side attack by 19 N–K4 N×N 20 Q×N R1–Q1 21 B–N1 was not without risk. After 21 . . . P–B4 Black beats off the immediate threats and the QP is left weak.

19 . . . P×P 20 N×P N×N 21 R×N R1–Q1 ½–½

3104 AK–Lev Polugayevsky: G4: Sicilian

3105 Lev Polugayevsky-AK: G5: Nimzo-Indian
1 P-Q4 N-KB3 2 P-QB4 P-K3 3 N-QB3 B-N5 4 P-K3 0-0 5 B-Q3 P-B4 6 N-B3 P-Q4 7 0-0 QP x P 8 B x BP N-B3 9 P-QR3 B-R4 10 B-R2 not repeating 10 B-Q3 of the first game 10 ... P-QR3 11 B-N1 Now Polugayevsky varies from the third game in which he played 11 N-QR4. 11 ... B-N3 12 Q-B2 P-N3 13 P x P B x P 14 P-QN4 B-K2 15 B-N2 P-K4 16
R–Q1 Q–K1 17 P–N5 P × P 18
N × NP B–KB4 19 Q–K2 (370)

19 . . . B × B Rather than allow
White to obtain a big positional
advantage, Karpov decides to sacri-
fice the exchange. 19 . . . P–K5 20
N–R4 B–KN5 21 P–B3 P × P 22
P × P B–R4 23 N–B7 Q–B1 24
N × R Q–R6 would lead to a similar
position as occurs in the game. 20
N–B7 Q–N1 21 N × R B–KB4 If
21 . . . P–K5 then White retains his
material advantage with 22 QR × B
P × N 23 Q × P Q × N 24 B × N. 22
N–N6 P–K5 23 N–Q4 After 23
N–K1 B–KN5 24 P–B3 P × P 25
N × P White would avoid K–side
pawn weaknesses, but Black would
get a good game with 23 . . . N–KN5
24 P–B4 P × P 25 N × P B–B4 or
24 P–N3 N5–K4. 23 . . . N × N 24
B × N B–KN5 25 P–B3 At first sight
it seems more accurate to play 25
Q–N2 B × R 26 B × N B × B 27
K–R2 31 N × P P × N 32 Q × B) 29
Q–Q4 and Black is defenceless
against the threatened 30 N–B6+. 30
However, 27 . . . Q–Q1! would be a
clear draw. 25 . . . P × P 26 P × P
B–K3 27 QR–B1 R–Q1 White's
K–side pawn weaknesses give Black
some compensation for the exchange
but it should not be enough to hold
the game. 28 Q–QN2 N–K1 29
B–K5 B–Q3 30 B × B 30 R × B looks
more effective: after 30 . . . N × R 31
Q–N4 and 32 R–Q1 White keeps his
extra piece, but 30 . . . R × R! 31
Q–N4 Q–Q1 32 B × R N × B merely
transposes to the game continuation.
30 . . . R × B (371)

31 Q–N4 Up to this point White
had played very accurately, but now
31 Q–N5! would leave Black's forces
overworked: 31 . . . Q–Q1 32
R × R and 32 . . . Q × R allows 33

Q × N+ while 32 . . . N × R 33
R–Q1 leads to a winning ending.
Also good would have been 31 R × R
Q × R 32 Q–Q4 Q × QRP 33 R–R1
with 34 R–R8 to follow, and if 32
. . . Q–K2 then 33 R–Q1. The text
move allows Black's queen to swing
over to the K–side.

31 . . . Q–Q1 32 R × R N × R 33
R–Q1 Q–N4+ 34 K–B2 N–B4 35
Q–KB4 Q–B3 36 N–R4 White was
now faced with time trouble. 36
N–Q7 would have maintained some
winning chances: 36 . . . Q–N7+
37 K–N1 Q × QRP? 38 N–B6+
K–N2 39 N–R5+! P × N 40
Q–N5+, but 37 . . . B × N 38 R × B
Q × QRP would draw safely. 36 . . .
B–N6 37 R–Q2 37 R–K1 was
better. 37 . . . P–KN4! 38 Q–N8+
38 Q–K4 is no good on account of
K–N2 39 N–N2 B–Q4 40 N–Q3
N–Q3 41 N–B4! The only move;
anything else would result in catastrophe. 41 ... P × N 42 R × B
Q–N7 + (372)
43 K–B1 P × P 44 R–K N5 +
½–½ There is nothing left after 44 . . .
K–R3 45 Q × N + K × R 46 Q–K7 +
and then 47 Q × KP.

3106 AK–Lev Polugayevsky: G6:
Sicilian

1 P–K4 P–QB4 2 N–KB3 P–Q3 3
P–Q4 P × P 4 N × P N–KB3 5
N–QB3 P–QR3 6 B–K2 P–K4 7
N–N3 B–K2 8 0–0 B–K3 9 P–B4
Q–B2 10 P–QR4 QN–Q2 11 K–R1
0–0 12 B–K3 P × P 13 R × P N–K4
thus far as in the fourth game 14
P–R5! much better than 14 N–Q4
14 ... N3–Q2 15 R–KB1 B–B3 (373)

16 N–Q5! B × N 17 Q × B! 17 P × B
only eases Black’s task. 17 . . .
Q × BP! otherwise Black has few
prospects. 18 N–Q4 Q × NP 19
QR–N1 Q–B6 20 N–B5 Q–B7 21
R/N1–K1 N–B4 if 21 . . . Q–B3, to
exchange queens, then 22 N × QP
with an excellent game for White—he
will always be able to pick up the
QNP and then it would be difficult
for Black to defend his QRP. 22
N × QP N/B4–Q6 23 B × N N × B 24
R–Q1 N–N5 25 Q × NP?! Vasyukov
prefers 25 Q–KB5 or 25 Q–R5
keeping the initiative. 25 . . . QR–N1
26 Q–R7 (374)

suggested by Shatskes, is correct,
when it is very difficult for White’s
rooks to leave the back rank and
Black threatens 27 . . . N–Q6 (or
27 . . . N–B3) followed by 28 . . .
R–N7. And on 27 R/Q1–K1 Black
would have the choice of 27 . . .
Q–R4 (or 27 . . . Q–N5) and 27 . . .
Q–R7. 27 B–B4. There was also a
possibility of 27 R × B P × R 28
B–R6, discovered by Furman in the
press room, but then White would
have to reckon with the possibility
of 28 . . . Q–B7 e.g. 29 Q–Q4?
N–Q6? or 29 R–QB1 Q–Q6 30
Q–K7 Q–Q5. Karpov prefers to
strengthen his position. 27 . . . R–R1
28 Q–B2 QR–Q1 29 Q–N3 Q–B6 30
R–B3 Q–B7 31 R1–KB1 B–Q5 32
B–R6 N–B3 33 N–B5 Q–N7 if 33
. . . B–K4 then 34 B × P wins as
Karpov pointed out in the post-
mortem: 34 ... B × Q 35 R × B P–R4
(the threat was 36 N–R6 mate) 36
B–B6 + K–R2 37 R–N7 + K–R1 38
R × P + K–N1 39 N–R6 mate. 34
B–B1! Q–N4 35 N–R6 + K–R1 36
N × P + R × N 37 R × R B–B3 38
Q × B2 K–N1 39 R × B P × R 40
Q × P 1–0

3107 Lev Polugayevsky–AK: G7:
Nimzo–Indian

1 P–Q4 N–KB3 2 P–QB4 P–K3 3
N–QB3 B–N5 4 P–K3 0–0 5 B–Q3
nothing from the opening and so chose a different plan for the quarter-final match.

11... 0-0 12 B-K3

White retains the move P-KB5 as a threat and invites Black to exchange on KB4.

12... P×P

Black gains the K4 square for his knight but cedes control of important central squares, notably ... Q5.

13 R×P N-K4 14 P-R5!

In the fourth game Karpov played 14 N-Q4, but Black rapidly equalized.

The idea behind 14 P-R5 is to prevent Black from placing a rook on Q1, as he did in the fourth game, after which Black gets counterplay with ... P-Q4.

14... KR-K1

In the sixth game Polugayevsky failed to obtain counterplay with 14... N3-Q2; now he tries to strengthen Black’s play.

15 B-N6 Q-Q2 (376)

3108 AK–Lev Polugayevsky: G8:

Sicilian

1 P–K4 P–QB4 2 N–KB3 P–Q3
3 P–Q4 P×P 4 N×P N–KB3 5
N–Q3 P–QR3 6 B–K2 P–K4 7
N–N3 B–K2 8 0–0 B–K3 9 P–B4
Q–B2 10 P–QR4 QN–Q2 11 K–R1

It was customary to play 11 P–B5 and after 11... B–B5 12 P–R5 as in Geller–Fischer, Curacao 1962. After the exchange of white square bishops, White increases his control over Q5, but with accurate play Black has adequate resources. In the game Karpov–Byrne (2711) White got

16 R–QR4!

Otherwise Black plays ... P–Q4. The alternative 16 N–Q5 is met strongly by 16... N–N3.

16... QR–B1

This allows White to transfer his rook to the Q-file, increasing the pressure on the QP, but if 16... N–B3 then 17 N–Q5 is strong and 16... B–Q1 is answered by 17 R–Q4 and
Black has no time to exchange off the troublesome bishop because of 18
R×P.

17 R–Q4 Q–B3

The tactical 17 . . . R×N 18
P×R Q–B3 founders upon 19
Q–K1! and Black does not have
sufficient compensation for the ex-
change after 19 . . . N3–Q2 20
R–QN4. If, instead, 18 . . . R–QB1
then again 19 Q–K1 and the most
that Black could hope to get in
return for the exchange would be
one pawn.

18 R–Q2

Clearing a retreat for the bishop
on QN6 and threatening N–Q4.

18 . . . B×N 19 P×B N3–Q2 20
B–N1

The bishop stands well on N1. 20
B–K3 also merited consideration; it
is true that the bishop stands worse
on K3 than on N1, but it would have
denied Black his following tactical
operation.

20 . . . B–N4!?

The best practical chance.

21 R×QP B×R 22 R×Q R×R 23
P–QN4 N–B3

23 . . . R1–QB1, uniting the rooks,
was preferable to this plan of laying
siege to the KP.

24 P–N5 R3–K3 25 P×P P×P

(377)

26 P–KN3!

This seems to be the only way for
White to realize his advantage. The
straightforward P–QN4–N5 robs
the knight of its support and would
allow Black’s rooks to penetrate
along the QB-file. If 26 Q–N3 then
26 . . . B–Q7 follows with real
threats against the KP. For the same
reason (26 . . . B–Q7) the move 26
Q–KB1 is unjustified.

After 26 N–Q5 (apparently forcing
Black to exchange knights because
of the dual threats 27 N×B and 27
defending against both threats. After
27 N×B N×N 28 B–B4 R×P 29
B×RP White, with accurate play,
should win. However, Black’s rooks
would have a great deal of scope and
Karpov’s task would be much more
difficult than in the game.

Forcing the bishop to occupy the
least possible square (furthest away
from the Q-side).

27 . . . B–R3 28 B–N6

The start of a well-thought-out
plan of attack on the QRP. The
tactical solution 28 P–KN4, and on
28 . . . P–N4 then 29 B–K3, looks
tempting, but after 29 . . . N–N3 30
P×P N×KP Black has counter-
chances.

28 . . . N4–Q2

Now it seems that the bishop
cannot be maintained on QN6, but
Karpov has taken everything into
account.

29 B–B4 R–K4 30 Q–N3

30 B–N1, threatening to take
the QRP, was also good; the KP is
immune because the knight on . . .
Q2 would be left undefended, and
after 30 . . . N–N1 31 Q–B3 White’s
clear advantage is not in any doubt.
Karpov, however, chooses a more
energetic method: after 30 Q–N3
both the BP and the QRP are
threatened.
30 ... R-N1 31 B×BP + K-R1 32 Q-B4! B-Q7

If 32 ... N×B 33 P×N R-K2 then 34 P-K5! and on 34 ... R×KP 35 P-N7 and 36 Q-B8+ cannot be prevented.

33 B-B7 R-QB4

The only reply. If 33 ... R-QB1 then 34 Q×P! Now White exchanges into a won ending.

34 Q×R N×Q 35 B×R B×N 36 P×B N3×P 37 P-B4 N-Q2 38 B-B7 P-N3 39 B-K6 N5-B4 40 B×N N×B 41 B-Q6 (378) 1-0

And now for Spassky!

3109–3116 – next edition

3117 AK–Boris Spassky: G9:

Sicilian

1 P–K4 P–QB4 2 N–KB3 P–K3
3 P–Q4 P×P 4 N×P N–KB3 5 N–QB3 P–Q3 6 B–K2 B–K2 7 0–0 0–0
12 B–B3 B–B3 13 N–Q4 P–KN3
14 R–B2! P–K4 15 N×B P×N 16 P×P P×P 17 Q–B1! Karpov con-
trives to bring his pieces to the best available squares; the queen has a
great future on QB4. 17 ... Q–B1
18 P–R3 N–Q2? 19 B–N4! A bad
bishop for a good knight! 19 ...
P–R4 20 B×N Q×B 21 Q–B4
B–R5 22 R–Q2 Q–K2 23 R–KB1
R/B1–Q1? (379)

24 N–N1!! An updated version of
Nimzowitsch–Rubinstein, Dresden
1926, where Nimzowitsch also focused
his knight on to KN5 with an equally sensational N/KN3–R1!!
24 ... Q–N2 25 K–R2 K–N2 26 P–B3 N–R3 27 R–K2! The rook is a real
gentleman; on move 14 it made way for the queen to pass via KB1, and
now it allows the knight use of Q2.
27 ... R–KB1 28 N–Q2 B–Q1 29
N–B3 P–B3 30 R–Q2 B–K2 31
Q–K6! R/R1–Q1 32 R×R B×R
33 R–Q1 N–N1 34 B–B5 R–R1 35
R×B! 1–0 If 35 ... R×R 36 B–K7
wins easily.

The game is a fine example of
Karpov’s genius in bringing out the
very best in each and every one of
his pieces.

32 APPENDIX: MISCELLANEOUS

This chapter gives a selection of games played by Karpov in lightning tournaments and simultaneous displays.

Moscow Blitz Tournament 31.3.1971
This was a ‘five-minute’ tournament.

1 Petrovsky 0 1 1 1 1 1 1 1 1 1 1 1 1 1 1 14½
2 Korchnoi 0 0 1 0 ½ 1 1 1 1 0 1 1 1 1 1 1 11½
3 Balashov 0 0 1 ½ 1 ½ 1 1 1 ½ ½ 1 1 1 1 10½
4 Karpov 0 0 1 ½ 1 0 0 1 1 1 0 0 1 1 1 9½
5 Tal 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 9½
6 Holmov 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 9½
7 Vasyukov 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 8½
8 Taimanov 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 8½
9 Lein 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 8½
10 A. Zaitsev ½ 1 0 0 0 0 1 0 ½ 1 0 1 0 1 1 7
11 Kotov 0 0 0 0 0 0 0 0 0 0 0 0 ½ ½ 1 1 5½
12 Suetin 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 4½

Clock Simultaneous

Moscow, November 1972

Six teams of six juniors from Pioneer Palaces played, in turn, against Tal, Spassky, Petrosian, Bronstein, Smyslov and Karpov, with the exception of their team captain.

The grandmasters' scores: Tal 25½/30, Petrosian 24½, Smyslov 24½, Spassky 24, Karpov 23½, Bronstein 21.

Placings in the tournament were determined by adding the
team score to that of the captain, thus: 1 Moscow (Smyslov) 35, 2 Leningrad (Spassky) 32\(\frac{1}{2}\), 3 Riga (Tal) 31, 4 Kiev (Bronstein) 27\(\frac{1}{2}\), 5 Chelyabinsk (Karpov) 27\(\frac{1}{2}\), 6 Tbilisi (Petrosian) 26\(\frac{1}{2}\).

Simultaneous Display  London Central YMCA, 22.1.1972

Karpov concluded a successful exhibition tour with this display \((+17-5=4)\) in which he had more difficulties than in his previous two displays \((20/20\text{ and }35\frac{1}{2}/36!)\).
