Foreword by Garry Kasparov

Ask any chess fan to give a short list of his favourite games and it is sure to include games by Alekhine. Perhaps Réti-Alekhine, from Baden-Baden 1925, or Bogoljubow-Alekhine, Hastings 1922. These two games are generally reckoned to be amongst the most brilliant on record. But Alekhine’s reputation was not built solely on the wonderful quality of his games, nor, simply, on his longevity as World Champion (he held the title from 1927-35 and again from 1937-46, when he died as World Champion, sadly destitute, in Portugal). It was also Alekhine’s outstanding diligence as an annotator of his own masterpieces which has helped to establish his place in the history of chess. No serious student of chess can afford to ignore Alekhine’s notes to his games, and the most important of these are assembled here in this volume.

Alekhine’s games and writings exerted a great influence on me from a very early age. I wished to emulate the dynamic style of the first, great, Russian-born champion, who wrested the crown from Capablanca in 1927. I fell in love with the rich complexity of his ideas at the chessboard. Alekhine’s attacks came suddenly, like destructive thunderstorms that erupted from a clear sky. Max Euwe, who briefly took the world title from Alekhine between 1935 and 1937, wrote of him:

Alekhine is a poet, who creates a work of art out of something which would hardly inspire another man to send a picture postcard. The wilder and more involved a position the more beautiful the conception he can evolve.

A similar view was expressed by Dr. Emanuel Lasker:

Alekhine loves making experiments... delighted to think that his own skill and his own imagination are the cause of all that what happens on the board.

This style of Alekhine’s was what I admired and wanted to develop in my own games. I had a natural feeling for it. I hope readers of this book will feel similarly inspired by Alekhine’s masterpieces.

Garry Kasparov

Baku 1989
Introduction by John Nunn

I first came across Alekhine’s collection of games when I was about 11 years old. Up to that point, I had been quite successful in junior events and I had the feeling that chess wasn’t really a very difficult game. After playing over all 220 games in the first two volumes (covering the periods 1908-23 and 1924-37), I thought “How can anyone play like this? It’s just impossible to see so much during a game”. I was particularly struck by his game against Rubinstein from Semmering, 1926 (game 42 in this book), and the move 18...\textit{Qxf2!} in particular. It seemed incredible that there might be a stronger move than the obvious recapture on c3, but after having checked the analysis several times, I had to admit that taking on f2 was a forced win. But how did this move even enter Alekhine’s head? Today, finding this combination doesn’t seem so totally impossible as it did then, but it remains an enormously impressive game. In my opinion Alekhine’s special genius lay in his ability to discover unexpected twists in positions where a lesser player would have made an automatic, conventional move. Other examples of such twists, in addition to the 18...\textit{Qxf2} mentioned above, are the move 19 \textit{Wc7!} in game 31 and the idea of 18 dxe5 and 19 \textit{Wf4!} in game 47.

In view of my early acquaintance with Alekhine’s books, I was excited when the idea arose of producing an algebraic edition of the cream of Alekhine’s games. This gradually became a major project. Apart from the conversion to algebraic, I have corrected a surprisingly large number of notational errors in the original books, rearranged the games in chronological order, edited the text and checked the analysis. I have not commented on minor flaws in the analysis, but major errors and omissions are pointed out in footnotes (except for game 118, where the new analysis was so extensive that it had to be embedded in the text). These terse footnotes should be studied carefully, as in many cases they indicate fundamental reassessments of famous games, for example Réti-Alekhine, Baden-Baden 1925 and Alekhine-Bogoljubow, Nottingham 1936. Some readers may find it surprising that so many major analytical errors exist in Alekhine’s notes—after having worked on this book, my respect for Alekhine’s games has increased, but I have come to recognise that his annotations are influenced by the “I won the game, so I must have been winning all the way through” syndrome (which, it must be said, afflicts many annotators).

A few additional points: games 1-109 were originally annotated by Alekhine himself—the remaining games were annotated by C.H.O’D. Alexander. All footnotes are mine, except where they are marked (GB), in which case they were written by Graham Burgess. Alekhine uses the symbols ‘±’ and ‘≠’ to mean ‘clear advantage for White’ and ‘clear advantage for Black’ respectively.

The games in this book represent the distillation of the life work of one of the greatest chess geniuses of all time. As I discovered myself, it is possible to learn a great deal from them.
Game 1
Vygodchikov – Alekhine  
_Corr., Russia 1908-9_
Ruy Lopez

1 e4 e5  
2 \(\text{\(d\)f3}\) \(\text{\(c\)c6}\)  
3 \(\text{\(b\)b5}\) a6  
4 \(\text{\(a\)a4}\) \(\text{\(f\)f6}\)  
5 0-0 \(\text{\(c\)c5}\)

This move, suggested in 1908 by the Danish master Møller, is in my opinion much better than its reputation as, up to the present, it has in no way been refuted and the few games in which it has been adopted rather tend to militate in its favour.

6 \(\text{\(d\)xe5}\)

White could also play 6 c3 to which the best reply is 6...\(\text{\(a\)a7}\) as in a game Yates-Alekhine (Hastings 1922), which continued as follows: 7 d4 (interesting would be 7 \(\text{\(e\)e1}\) \(\text{\(g\)g4}\)  
8 d4 exd4 9 cxd4 \(\text{\(x\)xd4}\) 10 \(\text{\(x\)xd4}\) \(\text{\(w\)h4}\) with a winning attack) 7...\(\text{\(x\)xe4}\)  
8 \(\text{\(w\)e2}\) f5 9 dxe5 0-0 10 \(\text{\(b\)bd2}\) d5 11 exd6 \(\text{\(x\)xd6}\) 12 \(\text{\(b\)b3+}\) \(\text{\(h\)h8}\) 13 \(\text{\(c\)c4}\)  
14 \(\text{\(d\)ce5}\) \(\text{\(x\)xe5}\) 15 \(\text{\(x\)xe5}\) \(\text{\(w\)g5}\) 16 \(\text{\(d\)d2}\) \(\text{\(h\)h3}\) 17 \(\text{\(d\)d5}\) \(\text{\(a\)ae8}\) 18 \(\text{\(f\)fe1}\)  
\(\text{\(e\)e6}\)! 19 \(\text{\(w\)d3}\), and now Black, who played the surprise move 19...\(\text{\(e\)e3}\)!?, finally obtained only a draw, whereas he could have won a pawn simply by 19...\(\text{\(x\)g2}\) followed by 20...\(\text{\(x\)xe5}\).

6 ... \(\text{\(d\)xe5}\)  
7 \(\text{\(d\)d4}\) \(\text{\(x\)xe4}\)!

1 However, at the end of this line 14 dxc5 \(\text{\(x\)xc5}\) 15 b4 \(\text{\(a\)a7}\) 16 \(\text{\(w\)h5}\), threatening the deadly 17 \(\text{\(g\)g5}\), gives White a near-decisive advantage, since Black must also take into account the possibility of \(\text{\(b\)b3}\) followed by c5. Therefore 12 c4 should be met by 12...b5, with approximate equality.

8 \(\text{\(e\)e1}\)

After 8 dxc5 \(\text{\(x\)xc5}\) 9 \(\text{\(w\)d4}\) (9 \(\text{\(w\)d5}\) is similar) 9...\(\text{\(w\)e7}\)! 10 \(\text{\(f\)f4}\) \(\text{\(f\)f6}\) (Dr. Groen-Alekhine, Portsmouth 1923) White has insufficient compensation for his pawn.

If 8 \(\text{\(w\)e2}\) (as in Takacs-Alekhine, Vienna 1922), then 8...\(\text{\(e\)e7}\) 9 \(\text{\(x\)xe4}\) \(\text{\(g\)g6}\) 10 c4 0-0 11 \(\text{\(c\)c3}\) f5 with good attacking chances. The continuation of this interesting game was 12 \(\text{\(b\)f3}\) \(\text{\(h\)h4}\) 13 \(\text{\(d\)d3}\) b5 14 \(\text{\(b\)b3}\) \(\text{\(h\)h8}\) 15 \(\text{\(f\)f4}\) \(\text{\(g\)g6}\) 16 \(\text{\(d\)d2}\) \(\text{\(b\)b7}\) 17 \(\text{\(f\)fe1}\)  
\(\text{\(x\)xc4}\) 18 \(\text{\(a\)a4}\) \(\text{\(d\)d5}\) 20 \(\text{\(x\)xc4}\) \(\text{\(g\)g5}\) 21 \(\text{\(a\)a4}\) \(\text{\(e\)e4}\) 22 \(\text{\(c\)c4}\) \(\text{\(g\)g5}\)  
23 \(\text{\(f\)fc1}\) \(\text{\(x\)xd2}\) 24 \(\text{\(x\)xd2}\) \(\text{\(h\)h4}\) 25 \(\text{\(f\)f3}\) 26 g3, and now Black could have won at once by the sacrificial combination 26...\(\text{\(f\)f4}\) 27 \(\text{\(x\)xe4}\) \(\text{\(h\)h4}\), for if 28 \(\text{\(a\)a2}\), then 28...d3! 29 \(\text{\(a\)a3}\) \(\text{\(d\)ad8}\) is decisive.

8 ... \(\text{\(e\)e7}\)  
9 \(\text{\(x\)xe4}\) \(\text{\(g\)g6}\)  
10 \(\text{\(d\)c3}\) 0-0  
11 \(\text{\(d\)d5}\) \(\text{\(d\)d6}\)!

It was most important to preserve this bishop. Now that Black has overcome most of the opening difficulties, he must in the sequel obtain at least an equal game.

12 \(\text{\(f\)f3}\)

To 12 c4 Black had the powerful reply 12...\(f5\) 13 \(\text{\(e\)e1}\) c5!  
12 ... \(\text{\(f\)f5}\)

But here this advance is premature. White gains an important tempo.
by playing his light-squared bishop to b3 and Black loses the chance of ...c5. The correct plan was 12...b5 13 \#b3 \#b7, with very good chances for Black.

13 \#b3! \#h8

Evidently the rook could not be captured because of mate in four: 14 \#e7+ \#h8 15 \#xg6+ hxg6 16 \#h3+ \#h4 17 \#xh4#.

14 \#e2 f4

In preparation for 15...c6. If Black plays 14...\#h4, then 15 h3 \#xd4 16 c3 \#c5 17 \#e3 \#c6 18 \#d4, with a strong attack.\footnote{In this line Black’s queen doesn’t need to be banished to the queenside; 16...\#h4 is a big improvement, when White must prove that he has enough compensation for the pawn.}

15 c4 c6

Aiming for the rook sacrifice on move 17. 15...c5 would be met by 16 \#c2, a move which is threatened in any event, and 15...\#g5 16 c5 \#h4 would be insufficient because of 17 \#g3!.

16 c5 \#b8

17 \#b6 (D)

17 ... d5!!

This rook sacrifice is absolutely sound, and White would have been better advised not to accept it and to play instead 18 \#xc8 (not 18 \#c2 immediately because of 18...\#g5!) 18...\#xc8 19 \#c2! with a slight advantage.

It is easy to understand that White was tempted to capture the rook, considering that the strong black attack which follows was not obvious.

18 \#xa8 \#h4

19 \#c3

Naturally not 19 \#h5 because of 19...g6 20 \#h6 \#f5 followed by 21...\#xd4. If 19 \#d3! there would have been interesting complications. The probable line of play would have been: 19...\#f5 20 \#c3 (if 20 \#d1, then Black replies 20...\#g5!) 20...f3 21 \#e3! (if 21 gxf3, then 21...\#f6 22 f4 \#g4) 21...fxg2 22 f3! \#g5! (threatening ...\#xh2+) 23 \#e5 \#xe5! 24 \#xg5 \#xd4+ 25 \#xd4 \#xf3+ 26 \#xg2 \#xd4 27 \#b6 \#e4+ 28 \#g3 \#f3+ 29 \#h4 \#f5! and mate in a few moves.

The text move in some ways facilitates Black’s attack, as he now has a serious threat based on a queen sacrifice.

19 ... f3

20 \#e5

Compulsory. After the plausible reply 20 \#e3 the continuation would
be 20...\textit{w}g5! 21 g3 \textit{A}xg3! 22 hxg3 \textit{w}xg3+ 23 fxg3 f2+ 24 \textit{A}f1 \textit{A}h3+ and Black wins.

\begin{align*}
20 & \ldots \quad \textit{A}xe5 \\
21 & \textit{d}xe5 \quad \textit{A}xg2! \\
\text{Threatening } & \ldots \textit{w}h4-h3.
\end{align*}

22 \textit{w}d4 \quad \textit{w}d7 \\
Black could also win by 22...\textit{A}f4! 23 \textit{A}xf4 \textit{w}h4!, but the variation adopted is equally decisive.

23 \textit{e}6 \\
A desperate move, but after 23 \textit{A}h1 \textit{w}h3 White would have no defence against 24...\textit{A}e1!.

23 \ldots \quad \textit{w}xe6 \\
24 \textit{A}d2 \quad \textit{w}g6! \\
Stronger than 24...\textit{w}h3 25 \textit{A}c3 \textit{A}g8 26 \textit{w}e5 \textit{A}f4 27 \textit{w}g5, and Black cannot play 27...\textit{A}g4 because of 28 \textit{A}xg7+! with perpetual check!

25 \textit{A}c2 \\
Black wins after 25 \textit{A}h1 \textit{A}e1 or 25 \textit{f}f1 \textit{A}h3.

25 \ldots \quad \textit{w}xc2 \\
26 \textit{A}h1 \quad \textit{w}g6 \\
27 \textit{A}g1 \\
The only resource.

27 \ldots \quad \textit{A}h3 \\
28 \textit{A}b6 (D) \\
28 \ldots \quad \textit{A}f4! \\
This manoeuvre, prepared by Black's last few moves, is immediately decisive, for after the queen exchange White's game remains absolutely without resource.

29 \textit{A}xg6 \quad \textit{A}g2+ \\
30 \textit{A}xg2 \quad \textit{f}xg2+ \\
31 \textit{A}g1 \quad \textit{A}e2+

\begin{center}
\begin{tabular}{c}
\textbf{B} \\
\end{tabular}
\end{center}

\begin{center}
\begin{tabular}{c}
32 \textit{A}xg2 \quad \textit{A}xd4 \\
\textbf{0-1}
\end{tabular}
\end{center}

\textbf{Game 2}

\textbf{Alekhine – Levenfish}

\textit{St. Petersburg Chess Society}

\textit{Winter Tournament 1912}

\textit{Queen's Pawn Game}

\begin{align*}
1 & \textit{d}4 \quad \textit{c}5 \\
\text{The advance of this pawn is} & \text{rightly considered inferior even when} \text{prepared by } 1...\textit{A}f6 2 \textit{A}f3. \text{On the} \text{first move it constitutes, in my opinion, a grave positional error, for} \text{White at once obtains a great positional advantage by simply advancing the centre pawns.} \\
2 & \textit{d}5 \quad \textit{A}f6 \\
3 & \textit{A}c3 \quad \textit{d}6 \\
4 & \textit{e}4 \quad \textit{g}6 \\
\text{If instead of the text move Black} & \text{replies with 4...e6 White's answer} \text{would be 5 \textit{A}c4, and the sequel} \text{would not be satisfactory for Black} \text{because of the weakness at d6.} \\
5 & \textit{f}4
\end{align*}

\begin{itemize}
\item[1] In this line 27...h6 forces instant resignation.
\end{itemize}
Already threatening 6 e5.

5 ...

\( \text{d} \text{d} \text{d} \text{d} \text{7} \)

6 \( \text{d} \text{f} \text{3} \)

If now 6...\( \text{g} \text{g} \text{7} \) then 7 e5 dxe5 8 fxe5 \( \text{d} \text{g} \text{4} \) 9 e6 \( \text{d} \text{d} \text{e} \text{e} \text{5} \) 10 \( \text{b} \text{b} \text{5} \). This is why Black plays:

6 ...

\( \text{a} \text{6} \)

7 e5

8 fxe5

9 e6!

This move demolishes Black’s variation.

9 ...

\( \text{d} \text{d} \text{e} \text{e} \text{5} \)

10 \( \text{d} \text{f} \text{4} \) \( \text{D} \)

12 \( \text{c} \text{c} \text{4} \)!

This is preferable to the immediate capture of the f7-pawn, a capture which the text move renders much more threatening.

12 ...

\( \text{f} \text{xe} \text{6} \)

13 dxe6

\( \text{w} \text{b} \text{6} \)

The alternative was 13...\( \text{w} \text{d} \text{d} \text{1} \) + 14 \( \text{x} \text{d} \text{1} \) \( \text{g} \text{g} \text{7} \) 15 \( \text{c} \text{c} \text{7} \) 0-0 16 \( \text{d} \text{b} \text{6} \) and White wins a pawn, at the same time maintaining all his pressure. 13...\( \text{w} \text{b} \text{6} \), threatening two pawns at the same time, is shown to be insufficient by an unexpected sacrificial combination.

14 \( \text{w} \text{e} \text{2} \)!

The initial move.

14 ...

\( \text{w} \text{x} \text{b} \text{2} \) \( \text{D} \)

At first sight there appears to be little danger in this capture, for the reply 15 \( \text{d} \text{d} \text{2} \) would be frustrated by 15...\( \text{h} \text{h} \text{5} \) 16 \( \text{e} \text{e} \text{5} \) \( \text{h} \text{h} \text{6} \) + 17 \( \text{d} \text{d} \text{3} \) \( \text{x} \text{e} \text{6} \) 18 \( \text{x} \text{e} \text{6} \) \( \text{d} \text{d} \text{8} \), but White had a different scheme in mind.

10 ...

\( \text{d} \text{x} \text{f} \text{3} \) +

Or 10...\( \text{g} \text{g} \text{7} \) 11 \( \text{w} \text{e} \text{2} \) \( \text{x} \text{f} \text{3} \) + 12 gxf3 \( \text{f} \text{f} \text{6} \) 13 exf7+ \( \text{x} \text{f} \text{7} \) 14 0-0-0-0, with an overwhelming advantage for White\(^1\).

After the text move Black probably hopes for the reply 11 \( \text{w} \text{x} \text{f} \text{3} \) upon which he would obtain a playable game by 11...\( \text{f} \text{x} \text{e} \text{6} \)!

11 gxf3!

\( \text{f} \text{f} \text{6} \)

\(^1\) In this line 12...\( \text{x} \text{c} \text{3} \) + 13 bxc3 \( \text{w} \text{x} \text{d} \text{5} \) is more testing, although 14 fxe4! \( \text{w} \text{x} \text{h} \text{1} \) 15 0-0-0 \( \text{w} \text{c} \text{6} \) 16 exf7+ \( \text{x} \text{f} \text{7} \) 17 \( \text{g} \text{2} \) gives White an enormous attack. White could also play 11 h3 \( \text{x} \text{f} \text{3} \) + 12 \( \text{w} \text{x} \text{f} \text{3} \) \( \text{f} \text{f} \text{6} \) 13 exf7+ \( \text{x} \text{f} \text{7} \) 14 \( \text{c} \text{4} \), which gives him a clear advantage at no risk.
15 \( \text{\#b5!} \)

This attack by the knight (which cannot be captured due to 15...axb5 16 \( \text{\#xb5+ \#d8} \) 17 \( \text{\#d1+} \)) decides the issue in a few moves. Black has nothing better than to accept the sacrifice and to capture both rooks.

15 ... \( \text{\#xa1+} \)
16 \( \text{\#f2} \) \( \text{\#xh1} \)
17 \( \text{\#c7+} \) \( \text{\#d8} \)
18 \( \text{\#d2+} \) \( \text{\#d7} \)
19 exd7 1-0

The threat is 20 \( \text{\#c6#} \), and if 19...e5 (19...\( \text{\#xd7} \) 20 \( \text{\#e6} \)), then White replies 20 \( \text{\#e6+ \#e7} \) 21 d8\( \text{\#} \) + \( \text{\#xd8} \) 22 \( \text{\#xd8+ \#f7} \) 23 \( \text{\#xf8+ \#g7} \) 24 \( \text{\#e7#} \).

Game 3
Nimzowitsch – Alekhine
All-Russian Masters, Vilna 1912
Queen’s Pawn Game

1 \( \text{d4} \) \( \text{d5} \)
2 \( \text{\#f3} \) \( \text{c5} \)
3 \( \text{\#f4} \) \( \text{\#c6} \)
4 e3 \( \text{\#f6} \)

Here 4...\( \text{\#b6} \) would be premature on account of 5 \( \text{\#c3} \).

5 \( \text{\#c3} \)

Now, however, this move is out of place. The usual line of play, 5 c3 followed by 6 \( \text{\#d3} \), is certainly better.

5 ... \( \text{\#g4} \)

Equally satisfactory would be 5...a6 followed by 6...\( \text{\#g4} \).

6 \( \text{\#b5} \) \( \text{e6} \)
7 h3 \( \text{\#h5} \)

This move gives White the chance to weaken the enemy position on both wings. Black had two ways of obtaining a good game, 7...\( \text{\#xf3} \) 8 \( \text{\#xf3} \) a6 9 \( \text{\#xc6+} \) bc6 and 7...\( \text{\#xd4} \) 8 \( \text{\#xd4} \) \( \text{\#h5} \) 9 g4 \( \text{\#g6} \) 10 \( \text{\#e5} \) \( \text{\#b6} \) 11 a4 \( \text{\#b4} \).

8 \( \text{g4} \) \( \text{\#g6} \)
9 \( \text{\#e5} \) \( \text{\#b6} \)

Of course not 9...\( \text{\#c8} \), because of 10 \( \text{\#xc6} \) followed by 11 \( \text{\#a6} \). However, 9...\( \text{\#c8} \) would have been more prudent.

10 a4!

Very strong, as Black has no time to continue 10...\( \text{\#xd4} \) followed by 11...\( \text{\#b4} \), because of 11 a5. Therefore he is compelled to yield the b5-square to his opponent.

10 ... \( \text{a5} \)
11 h4 \( \text{h5} \)

This move is relatively better than 11...h6, as it forces White to make an immediate decision on the kingside.

12 \( \text{\#xg6} \) \( \text{fxg6} \) (D)

\( \text{W} \)

13 gxfh5

The variation 13 g5 \( \text{\#g8} \) 14 \( \text{\#d3} \) \( \text{\#f7} \) 15 \( \text{\#h3} \) looks stronger than it really is, as Black can resist the attack by bringing his g8-knight to e7 and then f5. The text move makes
things easy for Black. His g7-pawn, it is true, is weakened, but, on the other hand, he obtains excellent prospects in the centre.

13 ... gxh5
14 We2 0-0-0

The king's position on the queenside will be quite safe as the white bishop can easily be eliminated.

15 0-0-0! (D)

A very pretty trap.

Better would be 17 \(\text{gxg6} bxc6\) 18 \(\text{h6}\) g7, but in this case also Black's game is superior\(^1\).

17 ... c4!

Both dislodging the bishop and initiating a combined attack on both wings.

18 \(\text{g6}\)

Naturally not 18 \(\text{b5} cxd3\) 19 \(\text{xg6}+\) d7, followed by ...\(\text{xd6}\).

18 ... \(\text{e7}\)

19 \(\text{h6}\) \(\text{b4}\)

20 \(\text{d2}\) \(\text{b6}\!\) (D)

15 ... \(\text{d6}\)

Black discovers in time the opponent’s subtle plan: 15...cxd4 16 exd4 \(\text{xd4}\) 17 \(\text{xd4}\) \(\text{xd4}\) 18 \(\text{xe6}\+\) \(\text{d7}\) 19 \(\text{c6}\+\)!! bxc6 20 \(\text{a6}\#\). The text move eliminates all danger.

16 \(\text{xd6}\) \(\text{xd6}\)

17 \(\text{d3}\)

White has insufficiently weighed the consequences of this move; in particular, he has not realised that the knight will have no time to settle down at b5, and consequently Black will obtain an important advantage.

An amusing reply to White's trap on the 15th move. Black in his turn threatens mate by a queen sacrifice, a Roland for an Oliver! 21...\(\text{d6}\) 22 \(\text{xg6}\) \(\text{xb2}\) 23 \(\text{b1}\) \(\text{xc3}\+\) 24 \(\text{xg6}\) \(\text{e4}\#\). In addition the text move allows the queen to co-operate in a decisive action against the exposed g6-bishop.

21 f3

Evading the threat.

21 ... \(\text{h6}\)

\(^1\) 17 \(\text{d3}\) is a really awful move, which not only allows Black to attack b2, but also results in the almost immediate trapping of the bishop!
22 \texttt{\textit{f7}} \\
Hapless bishop, with only one square on which to shelter!
22 ... \texttt{\textit{g5}} \\
23 \texttt{\textit{h2}} \texttt{\textit{e7!}} \\
24 \texttt{\textit{b5}} \\
A desperate move. After 24 \texttt{\textit{g6}} Black would win immediately by 24...\texttt{\textit{dxe4}} since 25 \texttt{\textit{h4}} loses the queen after 25...\texttt{\textit{dxe4}}+. In giving up the bishop, White has a vague hope of complications resulting from the queen reaching b8.
24 ... \texttt{\textit{xfs7}} \\
25 \texttt{\textit{a7+}} \texttt{\textit{d7}} \\
26 \texttt{\textit{b8}} \texttt{\textit{d6}} \\
Black could have continued with the simple 26...\texttt{\textit{e8}}. But his objective, which he indeed succeeds in achieving, is the capture of the white queen.
27 \texttt{\textit{g5}} \texttt{\textit{fe8}} \\
28 \texttt{\textit{dg1}} \texttt{\textit{f6}} \\
Not, of course, 28...\texttt{\textit{xf3}} because of 29 \texttt{\textit{axg7+}}.
29 \texttt{\textit{f4}} \texttt{\textit{g6}} \\
30 \texttt{\textit{c1}} \texttt{\textit{h7}} \\
31 \texttt{\textit{c3}} \texttt{\textit{f7}} \\
32 \texttt{\textit{b1}} \texttt{\textit{e7}} \\
Taking advantage of the fact that White cannot capture the black g6-pawn because of the resulting pin by 33...\texttt{\textit{wh7}}.
33 \texttt{\textit{a2}} \texttt{\textit{f8}} \\
34 \texttt{\textit{b5}} \texttt{\textit{xb5}} \\
35 \texttt{\textit{axb5}} \texttt{\textit{c7}} \\
36 \texttt{\textit{wa7}} \texttt{\textit{d6}} \\
If now 37 \texttt{\textit{axg6}} \texttt{\textit{bxb5}} 38 \texttt{\textit{g7+}} \texttt{\textit{c6}} 39 \texttt{\textit{xa5}} \texttt{\textit{a6}}, and the queen is exchanged.

0-1

Game 4
Alekhine – Duras
Masters’ Quadrangular, St. Petersburg 1913

1 \texttt{\textit{e4}} \texttt{\textit{e5}} \\
2 \texttt{\textit{f3}} \texttt{\textit{c6}} \\
3 \texttt{\textit{b5}} \texttt{\textit{a6}} \\
4 \texttt{\textit{b4}} \texttt{\textit{f6}} \\
5 \texttt{\textit{e2}} \texttt{\textit{b5}} \\
This move, in conjunction with the next one, affords Black the simplest method of equalising.
6 \texttt{\textit{b3}} \texttt{\textit{c5}} \\
7 \texttt{\textit{a4!}} \\
The opening of the a-file is of great significance in this variation. Black cannot prevent it, for if 7...\texttt{\textit{b4}}, then 8 \texttt{\textit{axf7+}} \texttt{\textit{xf7}} 9 \texttt{\textit{c4+}} \texttt{\textit{d5}} 10 \texttt{\textit{xd5}} \texttt{\textit{d6}} 11 \texttt{\textit{xc5}} !
7 ... \texttt{\textit{xb8}} \\
8 \texttt{\textit{axb5}} \texttt{\textit{axb5}} \\
9 \texttt{\textit{d3}} \\
After 9 \texttt{\textit{xc3}} Black could simply play 9...0-0, for after 10 \texttt{\textit{xb5}} \texttt{\textit{d5}}! he obtains an attack fully equivalent to the pawn sacrificed. After the text move White can eventually play c3 and bring his knight to e3 or g3 via d2 and f1.
9 ... \texttt{\textit{d6}} \\
10 \texttt{\textit{e3}} \texttt{\textit{g4}} \\
Here Black could have obtained an even game by forcing the exchange of White’s only well-posted piece, the bishop on b3, by 10...\texttt{\textit{e6}}. It is clear that White would not have reaped any advantage by exchanging at e6 and c5, as Black would have had command of the centre,
thanks to his pawn structure and the two open files.

11 h3 h5

Consistent but not best. 11...e6 was even now preferable and would have brought about variations similar to those resulting from the immediate development of the bishop at e6.

12 Bd2 0-0
13 0-0 d4 (D)

This offer to exchange is premature and, as will be seen, gives White a distinct positional advantage. Relatively better would have been 13...e7 followed by ...d8-e6, although in this case too Black has the inferior game.

14 exd4 exf3

Forced, for otherwise the black bishop would have been in jeopardy, e.g. 14...xd4 15 g4 g6 16 exd4 exd4 17 f4, or 14...exd4 15 g4 g6 16 h4 followed by f4, with advantage to White in either variation.

15 xf3 exd4
16 e5!

The beginning of a strong attack against f7, weakened as it is by the premature exchange of Black’s light-squared bishop. Furthermore, it is interesting to observe how important the open a-file is for White’s attack.

16 ... We7

Besides this move and the sequel it implies, Black had a further choice of two lines of play:

1) 16...dxe5 17 xe5 w6 18 xd6 cxd6 19 fe1 with advantage to White.

2) 16...e8 17 e6! fxe6 18 xe6+ h8 (or 18...h8 19 g5) 19 b4! bxb4 (19...b6 20 fe1) 20 xd4 b6! 21 f3! c3 22 c6! xc6 23 xc6 xa1 24 xa1, and White has the better game as the e6-bishop is invulnerable.

17 fe1 be8
18 d2 dxe5

Forced, as 19 e6 was threatened.

19 xe5 wd6
20 g5! (D)

Forcing a further exchange which brings the knight into action.

20 ... xe5

It is clear that 20...h6 would have achieved nothing after 21 f5.
21 Qxe5

Already threatening to win by 22 Qxf7.

21 ... \(\mathbb{W}b6\)

Relatively best. 21...\(\mathcal{Q}d7\) would not be sufficient, e.g. 22 \(\mathcal{Q}xf7!\) \(\mathbb{W}xf7\) 23 \(\mathcal{A}a8+\) \(\mathcal{Q}f8\) 24 \(\mathbb{W}f5!\) \(\mathbb{W}e7\) 25 \(\mathcal{Q}xf7+\) \(\mathbb{W}xf7\) 26 \(\mathbb{W}xc5\) and wins.

The move in the text removes the immediate threat, for now 22 \(\mathbb{W}f5\) would be insufficient as a preliminary to the knight sacrifice, since Black could prepare a fresh defensive position by 22...g6, followed by ...\(\mathcal{G}g7\).

22 g4!

But this somewhat hidden preparation of the knight sacrifice wins at once, as Black is compelled to make a reply which will render his position still more precarious.

22 ... \(\mathcal{Q}d6\)

If 22...g6 then 23 \(\mathbb{W}h6\), threatening both 24 \(\mathcal{Q}xf7\) and 24 \(\mathcal{A}a8\); and if 22...\(\mathcal{Q}e7\), 23 \(\mathcal{Q}d7!\) \(\mathcal{Q}xd7\) 24 \(\mathbb{W}xe7\) \(\mathbb{W}d6\) 25 \(\mathcal{Q}xd6\) \(\mathcal{C}xd6\) 26 \(\mathcal{A}a5\) \(\mathcal{B}b8\) 27 \(\mathcal{A}a7\) \(\mathbb{H}d8\) 28 \(\mathbb{H}d7\) and wins.

23 \(\mathcal{Q}xf7!\) \(\mathcal{Q}xf7\)

24 \(\mathbb{W}f5!\)

The point of the manoeuvre initiated with 22 g4: against the double threat of 25 \(\mathbb{W}e6\) and 25 \(\mathcal{Q}xf7+\) \(\mathcal{Q}xf7\) 26 g5, Black has no defence.

24 ... \(g6\)

If 24...\(\mathcal{W}c6\), 25 g5 \(\mathbb{W}d7\) 26 \(\mathcal{Q}xf7+\) \(\mathcal{Q}xf7\) (26...\(\mathbb{W}xf7\) 27 gx6) 27 \(\mathbb{W}f3\) and White wins.

25 \(\mathbb{W}e6\) \(\mathcal{G}g7\)

26 \(\mathbb{W}xf7+\) \(\mathcal{F}h6\)

27 \(\mathcal{Q}e6!\) 1-0

Game 5

Znosko-Borovsky – Alekhine

Masters’ Quadrangular,

St. Petersburg 1913

Ruy Lopez

1 e4 e5

2 \(\mathcal{D}f3\) \(\mathcal{D}c6\)

3 \(\mathcal{Q}b5\) a6

4 \(\mathcal{Q}a4\) d6

5 d4 \(\mathcal{Q}g4\)

5...\(\mathcal{Q}d7\) is better. The variation in the text, favoured by Marshall, is unfavourable to Black should White adopt the continuation 6 d5 b5 7 dxc6 bxa4 8 c4!, as in the game Réti-Spielmann, Berlin 1920.

6 \(\mathcal{A}xc6+\)

White also obtains a good game by this move, but allows Black some counter-chances.

6 ... \(\mathcal{B}xc6\)

7 dxe5 dxe5

8 \(\mathcal{W}e2\)

It is clear that after 8 \(\mathbb{W}xd8+\) Black would protect his e-pawn by 8...\(\mathcal{Q}xd8\), mating on d1 if White plays 9 \(\mathcal{A}xe5\).

8 ... \(\mathcal{A}d6\)

9 \(\mathcal{Q}e3\) \(\mathcal{D}e7\)

10 \(h3\) \(\mathcal{H}h5\)

11 \(\mathcal{B}bd2\) 0-0

Black could equally play 11...f6 in order to withdraw his bishop to f7 in case of need. But he considered

---

1 Unnecessary, as 22 \(\mathcal{Q}xd7\) wins a piece at once.
that White would not find the time necessary to increase his pressure on the kingside due to Black’s counter-attack on the opposite wing and in the centre.

12 g4  \( \text{\textit{g6}} \)
13 h4

If 13 \( \text{\textit{h4}} \) then Black replies 13...\( \text{\textit{d5!}} \) 14 \( \text{\textit{xg6}} \) \( \text{\textit{x e3}} \) 15 \( \text{\textit{w e3}} \) fxg6 with good prospects.

13 ...  \( \text{\textit{f6}} \)
14 h5  \( \text{\textit{f7}} \)
15 \( \text{\textit{h4}} \)  \( \text{\textit{wb8!}} \)

The black queen enters into the game very effectively through this outlet.

16 b3  \( \text{\textit{wb4!}} \) (D)

17 \( \text{\textit{f3}} \)

The opening of the g-file would here be without effect: 17 \( \text{\textit{gf5}} \) \( \text{\textit{xf5}} \) 18 gxf5 \( \text{\textit{wc3!}} \) and White cannot avoid losing his c-pawn without any compensation, since 19 0-0-0 allows mate in two by 19...\( \text{\textit{xa3+}} \).

17 ...  \( \text{\textit{xd8!}} \)

Stronger than 17...\( \text{\textit{wc3}} \), where-upon White would obtain positional compensation adequate for the pawn sacrificed after 18 \( \text{\textit{f2!}} \) \( \text{\textit{xc2}} \) 19 \n
\( \text{\textit{hc1}} \) \( \text{\textit{wb2}} \) 20 \( \text{\textit{c4!}} \) \( \text{\textit{xe2+}} \) 21 \( \text{\textit{xe2}} \).

18 \( \text{\textit{f2}} \)

After 18 0-0 the ensuing reply, 18...\( \text{\textit{c5}} \), would be still stronger.

18 ...  \( \text{\textit{c5}} \)
19 \( \text{\textit{df1}} \)  \( \text{\textit{d6}} \)
20 \( \text{\textit{xc5}} \)  \( \text{\textit{xc5+}} \)
21 \( \text{\textit{e3}} \)  \( \text{\textit{ad8}} \)
22 \( \text{\textit{hd1}} \)  \( \text{\textit{wc3!}} \)

Undoubling the c-pawns by force, and in this way removing the only weakness in Black’s position.

23 \( \text{\textit{xd6}} \)

If 23 \( \text{\textit{df1}} \) Black would reply simply 23...a5 and White could only defer the exchange of rooks, which must be made sooner or later.

23 ...  \( \text{\textit{cxd6}} \)
24 \( \text{\textit{ed1}} \)  \( \text{\textit{d5!}} \) (D)

The most energetic. In exchange for the a-pawn Black obtains a dangerous passed pawn in the centre and besides, White’s own a-pawn is a ready object of attack.

25 \( \text{\textit{xa6}} \)  \( \text{\textit{d4}} \)
26 \( \text{\textit{ef5}} \)

As this knight can no longer be assisted by White’s other pieces, its
inroad on f5 loses much of its efficacy.

26 ...  \( \textit{Qxf5} \)
27 \( \textit{Qxf5} \)  \( \textit{Wxc2+} \)
28 \( \textit{We2} \)  \( \textit{Wc5} \)
29 \( \textit{Wd3} \)

29 \( \textit{Wd2} \)! would be a little better, with the double threat of 30 \( \textit{Cc1} \) followed by 31 \( \textit{Xc6} \) and 32 \( \textit{Qe7+} \), and 30 g5. But in this case also Black would secure a positional advantage by 29... \( \textit{Wf8} \)!

29 ...  \( \textit{Qe6} \)

In order to be able to dislodge the knight, at need, by ...g6, but White prefers to withdraw it himself to maintain the defence of his seriously weakened queenside.

30 \( \textit{Qg3} \)  \( \textit{Na8} \)
31 \( \textit{Qd2} \)  \( \textit{Wb4!} \)
32 \( \textit{Cc2} \)  \( \textit{c5} \)
33 \( \textit{Qf1} \)  \( \textit{c4!} \)

This temporary pawn sacrifice will allow the black pieces to break through into the hostile camp, and to co-operate in a direct attack against White’s king, an attack which will become irresistible thanks to the passed c-pawn, which fixes the white pieces far away on the other wing.

34 \( \textit{bxc4} \)  \( \textit{Aa3} \)
35 \( \textit{Wd2} \)  \( \textit{Wc5} \)
36 \( \textit{Qg3} \)

After 36 \( \textit{Qg2} \) \( \textit{Xc4} \) Black would be threatening to capture the knight with check.

36 ...  \( \textit{Xc4} \)
37 \( \textit{Wc1} \)  \( \textit{Ec3!} \)
38 \( \textit{Xc3} \)  \( \textit{dxc3} \)
39 \( \textit{Qe3} \)

Directed against the threatened ...

39 ...  \( \textit{Qxa2} \)
40 \( \textit{Qc2!} \)  \( \textit{Qe6} \)
41 \( \textit{Qd1} \)

Else Black would win easily with his passed pawn.

41 ...  \( \textit{Wg1+} \)
42 \( \textit{Qh4} \) \( (D) \)

42 ...  \( \textit{g5+!} \)

In conjunction with the following move this is the shortest road to victory.

43 \( \textit{fxg6} \)  \( \textit{h5!} \)

This pawn now shares in the attack and settles the result outright. White is helpless against the threat 44... \( \textit{Wh1+} \) 45 \( \textit{Qg3} \) h4+ 46 \( \textit{Qf2} \) \( \textit{Wh2+} \). On the other hand, 43...hxg6 would not have been so strong, for White could have still defended himself by playing 44 \( \textit{Wxe2!} \) \( \textit{Qg7} \) 45 \( \textit{Qh3} \).

44 \( \textit{Qe3} \)  \( \textit{Wxe3} \)
45 \( \textit{Qa4} \)  \( \textit{Wf2+} \)
46 \( \textit{Qh3} \)  \( \textit{h4} \)
47 \( \textit{Qe8+} \)  \( \textit{Qg7} \)
48 \( \textit{Qe7+} \)  \( \textit{Qxg6} \)

0-1
De Roszynski – Alekhine
Paris 1913
King's Knight's Opening

1 e4 e5
2 f3 c6
3 c4 d6

Although seldom played, this move is not inferior to 3...e7 (the Hungarian Defence). The present game affords a typical example of the dangers to which White is exposed if he attempts to refute this move forthwith.

4 c3 g4
5 b3 d7
6 g5

Anticipating the gain of two pawns. If at once 6 xf7+ xf7 7 xb7, then 7...d7! 8 xa8 xf3 9 gfx3 xf3 10 g1 xe4+ 11 d1 f3+ and Black has at least a draw, as White cannot play 12 c2 on account of 12...b4+.

6 ... h6 (D)

7 xf7+

After 7 xb7 b8 8 a6 b6 9 a4 e7 followed by ...0-0, Black's lead in development would be sufficient compensation for the pawn sacrificed.

7 ... xf7
8 xf7 xf7
9 xb7 d7!

The sacrifice of the exchange is entirely sound and yields Black a strong counter-attack.

10 xa8 c4!
11 f3 (D)

Evidently forced.

11 ... xf3!

By this unexpected combination Black secures the advantage. Incorrect would be, however, 11...d4 owing to 12 d3 xd3 13 cxd4 xf3 14 c3!.

12 xf3 d4!
13 d3

This move loses at once. White's only chance was perhaps 13 cxd4,
leading to the following variation: 13...\textit{W}xc1+ 14 \textit{Q}e2 \textit{W}xh1 15 d5 \textit{W}xh2+ 16 \textit{Q}d3 \textit{G}g1! 17 \textit{C}c6+ \textit{Q}d8, but Black’s position is manifestly superior.

\begin{align*}
13 & \ldots \quad \textit{W}xd3 \\
14 & \textit{C}xd4 \quad \textit{Q}e7!
\end{align*}

On this move White has the sad choice between the loss of the queen or mate. He prefers the latter.

\begin{align*}
15 & \textit{W}xh8 \quad \textit{Q}h4# 
\end{align*}

Game 7
Mieses – Alekhine
\textit{Scheveningen 1913}
Centre Game

\begin{align*}
1 & e4 \quad e5 \\
2 & d4 \quad \textit{C}xd4 \\
3 & \textit{W}xd4 
\end{align*}

It is quite evident that such displacements of the queen at an early stage in the opening are not likely to reap any advantage. However, Black is compelled to play with precision, in order to give his opponent no time to start an attack against the kingside or even in the centre. For, no doubt, the white queen installed at g3 (via e3) would exercise pressure on Black’s kingside if he eventually castles on that side.

\begin{align*}
3 & \ldots \quad \textit{C}c6 \\
4 & \textit{W}e3 \quad \textit{Q}e7
\end{align*}

Black could also have played 4...\textit{Q}f6 for the following variation is mere bluff and eventually turns to Black’s advantage: 5 e5 \textit{Q}g4 6 \textit{W}e4 d5! 7 exd6+ \textit{Q}e6 8 \textit{A}a6 (or 8 dxc7 \textit{W}d1+!) 8...\textit{W}xd6 9 \textit{U}xb7 \textit{W}b4+! 10 \textit{W}xb4 \textit{C}xb4.

\begin{align*}
5 & \textit{Q}d2 \quad \textit{Q}f6 \\
6 & \textit{C}c3 \quad 0-0 \\
7 & 0-0-0 \quad d5!
\end{align*}

This advance, which at first sight appears somewhat risky in view of the position of White’s d1-rook, will on the contrary allow Black to extract the maximum return from his advanced development. 7...d6 would result in almost a closed game and White would find time to complete his neglected development.

\begin{align*}
8 & \textit{Q}e5 \quad \textit{Q}xd5 \\
9 & \textit{W}g3 \quad \textit{Q}h4!
\end{align*}

Providing without loss of time against the threat 10 \textit{Q}h6. Black’s advantage is now evident.

\begin{align*}
10 & \textit{W}f3 \quad \textit{Q}e6 
\end{align*}

The sacrifice initiated by this move is both full of promise and devoid of risk, for Black will have an equivalent in material for his queen. It would, however, have been more logical to adopt the following variation: 10...\textit{Q}xc3 11 \textit{Q}xc3 \textit{W}g5 12 \textit{Q}d2 (else 12...\textit{W}g4) 12...\textit{W}c5! 13 \textit{Q}e3 \textit{W}a5, which would have given Black a dominating position without such complications as defy exact calculation.

\begin{align*}
11 & \textit{Q}e3! (D)
\end{align*}

Calling for the subsequent combination, for 11...\textit{Q}ce7 would be bad because of 12 \textit{Q}xd5 \textit{Q}xd5 13 \textit{W}h5 and 14 c4.

\begin{align*}
11 & \ldots \quad \textit{Q}xc3!
\end{align*}

Black obtains rook, knight and pawn for his queen while maintaining the superior position. The sacrifice is therefore fully justified. Much less strong would be 11...\textit{Q}cb4 12
Now White seems to be able to disentangle his forces, but nevertheless Black's position still remains very strong, even after the unavoidable exchange.

20 ...  
21 \textit{f}3  
22 \textit{f}e5  
22 \textit{e}2 (D)

Essential as a basis for all the subsequent combinations.

16 \textit{f}4  
16 \textit{h}1 17 \textit{h}5 18 f6 was no better, as Black threatens 18...\textit{c}4.

16 ...  \textit{f}5  
17 \textit{c}1  g6  
Black is preparing the combination ...\textit{xc}2 followed by ...\textit{b}4, which at present would not be sufficient, e.g. 17...\textit{xc}2 18 \textit{xc}2 \textit{b}4 19 \textit{d}3 \textit{c}4 20 \textit{xb}4!.

18 g4  
In order to exchange the dangerous black bishop.

18 ...  \textit{c}4  
19 \textit{h}3  \textit{f}6  
20 \textit{f}3  

\textbf{1} I am not sure what Alekhine means here. The ending seems to be dead drawn after 26 \textit{d}1, for example.
counter-attack which Black allows him no time to develop.

23 \( \text{Ag1} \)  c4
24 \( \text{h4} \)  \( \text{Od5} \)

The renewed complications resulting from this move required the most exact calculations.
25 \( \text{Oxd5} \)  \( \text{Exd5} \)
26 \( \text{f4} \)

26 g5 \( \text{Ag7} \)  27 \( \text{Ad1} \)  \( \text{Ab5} \)  28 \( \text{Ad4} \)  \( \text{Ae6} \) is also to Black's advantage.

26 ...  \( \text{Od3}! \)

Black takes immediate advantage of the weakening of the white bishop resulting from 26 f4.
27 \( \text{Af3} \)

If White had played 27 cxd3 the sequel would have been 27...\( \text{Exd3} \)  28 \( \text{Aag3} \)  \( \text{Ad4} ! \)  29 \( \text{Ac2} \) (not 29 \( \text{Ax} \text{d3} \)  cxd3 30 \( \text{Ax} \text{d4} \)  \( \text{Ale1} + \)  31 \( \text{Aa2} \)  d2! and wins) 29...\( \text{Axe} \text{e3} \)  30 \( \text{Axc4} \)  \( \text{Aed8} \) with the better game. However, this variation is more favourable than the one chosen by White, after which Black can force the win by a fresh sacrifice.

27 ...  \( \text{Ab5}! \) (D)

Decisive! Now White has to take the knight, for after 28 b3 \( \text{Aa5} \)  29 cxd3 Black could force the win by means of 29...\( \text{cxd3} \)  30 \( \text{Ac1} \)  \( \text{Aa3} \)  31 \( \text{Ad1} \)  \( \text{Aa1} + \). A curious position, for although Black has only a rook for the queen, White is defenceless.

28 \( \text{cxd3} \)  \( \text{Eh2} + \)
29 \( \text{Ac1} \)  \( \text{cxd3} \)
30 \( \text{Ad1} \)
30 \( \text{Ag2} \)  \( \text{Ac8} + \)  31 \( \text{Ad1} \) is merely an inversion of moves.

30 ...  \( \text{Ec8}! \)

Against the threat of 31...\( \text{Ec8} \), White's only defence was \( \text{Ag2} \). But it was in no way sufficient for a draw, despite the opinion of all the critics who annotated the game at the time it was played, and in this case Black would have won as follows: 31...\( \text{Ab1} + \)  32 \( \text{Ad2} \)  \( \text{Ab3} \)  33 \( \text{Ad1} \) (33 \( \text{Ae1} \)  \( \text{Ac1} + \) wins after 34 \( \text{Af2} \)  \( \text{Axh4} + \) or 34 \( \text{Axc1} \)  d2+) 33...\( \text{Ac3} ! \)  34 \( \text{Ac1} \)  \( \text{Ab4} \) ! and White is helpless against 35...\( \text{d2} \) and 35...\( \text{Ab1} \).

---
1 This is very optimistic. After 29 \( \text{Af1} \), Black can hardly prevent 30 f4 leading to further simplification and a clear advantage for White.
2 Note that in the original English edition of Alekhine's Best Games, this move is incorrectly given as 29...\( \text{cxb3} \), which loses out of hand to 30 d4.
3 The line given by Alekhine wins beautifully after 32 \( \text{Ac1} \)  \( \text{Ae1} + ! \)  33 \( \text{Xe1} \)  \( \text{Xc1} + \)  34 \( \text{Axc1} \)  d2+ 35 \( \text{Cc2} \)  \( \text{dxe1} \)  \( \text{O+} ! \). It is puzzling that, if this line was indeed Alekhine's intention, he did not give it to its conclusion.
4 However, after 31 \( \text{We4} \)! I see no win for Black, as the queen is ready to take the d3-pawn after 31...\( \text{Ac3} \) or 31...\( \text{Eh8} \), while 31...\( \text{d2} \) may be met by 32 \( \text{We2} \).
This analysis shows the correctness of the sacrifice initiated on move 11, and the soundness of the final combination.

31 g5 \(\text{Cc}2!\)
32 \(\text{Ce}1\) \(\text{Cb}1+\)
33 \(\text{Cd}1\) \(\text{Cc}3+\)

0-1

Game 8
Alekhine – Nimzowitsch
All-Russian Masters,
St. Petersburg 1914
Ruy Lopez

1 e4 e5
2 \(\text{Cf}3\) \(\text{Cc}6\)
3 \(\text{Cb}5\) a6
4 \(\text{Ca}4\) \(\text{Cf}6\)
5 0-0 \(\text{Cx}e4\)

The most analysed variation of the Ruy Lopez. In the latest practical tests the results are somewhat in White’s favour, and it occurs less and less in master play.

6 d4 b5
7 \(\text{Cb}3\) d5
8 dxe5 \(\text{Ce}6\)
9 c3 \(\text{Ce}7\)
10 \(\text{Cd}2\)

After 10 \(\text{Ce}3\) 0-0 11 \(\text{Cd}2\) \(\text{Cc}2\) 12 \(\text{Cd}2\) \(\text{Ca}5\) Black has a satisfactory game. Less recommendable, however, are 11...f5 12 exf6 \(\text{Cf}6\) 13 \(\text{Cg}5!\) and 11...\(\text{g}4\) 12 \(\text{Cxe}4\) dxe4 13 \(\text{Cg}5!\).

10 ...

\(\text{Cc}5\)

Better would have been 10...0-0 11 \(\text{Cc}2\) f5 12 exf6 \(\text{Cxf}6\), although in this case also White’s game is somewhat preferable after 13 \(\text{Cf}3\) (not 13 \(\text{Cg}5\) because of 13...\(\text{g}4\) 14 f3 \(\text{Cc}8!\)).

11 \(\text{Cf}2\) \(\text{g}4\)

11...0-0 would be insufficient because of Bogoljubow’s ingenious innovation in his game against Réti (Stockholm 1920): 12 \(\text{Cd}4!\) \(\text{Cxe}5\) 13 f4 \(\text{g}4\) 14 \(\text{Ce}1\) \(\text{Cf}4\) 15 \(\text{Cxe}5\) \(\text{Ce}8\) 16 \(\text{Cc}6\) \(\text{Cd}7\) 17 f5! and White must win.

12 \(\text{Ce}1\) 0-0
13 \(\text{Cb}3\) \(\text{Ce}4\) (D)

If 13...\(\text{Cf}6\) (Janowski-Lasker, Paris 1913) White obtains a fine attacking game after 14 \(\text{Cd}3\). The text move is an innovation which is refuted in the present game.

14 \(\text{Cf}4!\)

Not 14 \(\text{Cxe}4\) dxe4 15 \(\text{Cxd}8\) \(\text{Cxd}8\) 16 \(\text{Cxe}4\) \(\text{Cd}1+\) 17 \(\text{Ce}1\) \(\text{Cf}5\) 18 \(\text{Ce}2\) \(\text{Cd}3\) 19 \(\text{Ce}3\) \(\text{Cg}5\), with advantage to Black, whereas with the text move White threatens to win a pawn.

14 ...

f5
15 \(\text{Cxf}6\)

\(\text{Cxf}6\)
16 \(\text{Cd}3\) \(\text{Ce}4\)

This pawn offer will ultimately prove to be insufficient, but Black’s
position was already beset with difficulties. If, for instance, 16...\textit{\textbar}h5 then 17 \textit{\textbar}h4! with a great positional superiority.

17 \textit{\textbar}xc7 \textit{\textbar}d7

Obviously Black cannot afford 17...\textit{\textbar}xc7 because of 18 \textit{\textbar}xd5+.

18 \textit{\textbar}e5! \textit{\textbar}xe5
19 \textit{\textbar}xe5 \textit{\textbar}h4

It is clear that Black cannot play 19...\textit{\textbar}xf2 because of 20 \textit{\textbar}xe4.

20 \textit{\textbar}g3 \textit{\textbar}xg3
21 \textit{\textbar}hxg3 \textit{\textbar}f5

At first sight this move seems to create difficulties for White, for instance after 22 \textit{\textbar}c2, the manoeuvre 22...\textit{\textbar}g4 would force the white queen back to d3.

22 \textit{\textbar}d4!

This definitely ensures an advantage, since the threat of ...\textit{\textbar}xg3 by Black is illusory, e.g. 22...\textit{\textbar}xg3 23 \textit{\textbar}c5 \textit{\textbar}d6 24 \textit{\textbar}b3! and wins. Consequently Black is now forced to look after his weak point at d5.

22...\textit{\textbar}fd8

22...\textit{\textbar}ad8 would have been a little better, but the game was lost in any event.

23 \textit{\textbar}ad1 \textit{\textbar}c7 (D)

Renewing the threat of ...\textit{\textbar}xg3.

24 \textit{\textbar}d2!

To this move Black cannot reply with 24...\textit{\textbar}xg3 because of 25 \textit{\textbar}b3; nor is 24...\textit{\textbar}xd2 feasible, on account of the following variation: 25 \textit{\textbar}xf5 \textit{\textbar}c4 26 \textit{\textbar}e6+ \textit{\textbar}h8 27 \textit{\textbar}xd5! \textit{\textbar}xb2 28 \textit{\textbar}b1 \textit{\textbar}c4 29 \textit{\textbar}xa8! and wins.

24...\textit{\textbar}xf2

A desperate sacrifice. But similarly after 24...\textit{\textbar}g6 25 \textit{\textbar}b3 \textit{\textbar}f6 26 \textit{\textbar}f3 the win was only a question of technique.

25 \textit{\textbar}xf5 \textit{\textbar}xd1
26 \textit{\textbar}xd1 \textit{\textbar}xg3
27 \textit{\textbar}e6+ \textit{\textbar}h8
28 \textit{\textbar}xd5 \textit{\textbar}ac8
29 \textit{\textbar}e4 \textit{\textbar}h4
30 \textit{\textbar}b3 \textit{\textbar}c6
31 \textit{\textbar}f2

More straightforward would have been 31 \textit{\textbar}xc6! \textit{\textbar}xd4 32 cxd4 and the passed pawn would have quickly become irresistible. But once the queens are exchanged the ending cannot present any difficulties for White.

31...
32 \textit{\textbar}f3 \textit{\textbar}xf3

Evidently forced.

33 gxf3 g6
34 \textit{\textbar}d2 \textit{\textbar}b6
35 c4 \textit{\textbar}c4
36 \textit{\textbar}xc4 \textit{\textbar}b1+
37 \textit{\textbar}f2 a5
38 c5 \textit{\textbar}c1
39 c6 \textit{\textbar}g7
40 \textit{\textbar}c4!

Winning the exchange as well, for after 40...\textit{\textbar}c8 41 \textit{\textbar}d7+ \textit{\textbar}h6 42 \textit{\textbar}d5 Black cannot prevent 43 \textit{\textbar}d6, or if
40...\textit{Ex}d2+ 41 \textit{Q}xd2 followed by 42 c7 and Black loses at once.
40 ... \textit{E}xc4
41 \textit{Q}xd8 \textit{E}xc6
42 \textit{Q}d7+ \textit{E}h6
43 \textit{Q}g3 \textit{E}c4
Or 43...\textit{E}c2 44 f4 \textit{E}xa2 45 \textit{Q}g5 and the mate cannot be avoided.
44 \textit{Q}f2! \textit{Q}g5
If 44...\textit{E}a4 45 \textit{Q}g4+ \textit{E}h5 46 \textit{Q}d5+ g5 47 \textit{Q}d6 and mate to follow.
Or 44...g5 45 \textit{Q}g4+, followed by 46 \textit{Q}e5+ and White wins.
45 \textit{Q}d5+ \textit{E}f6
46 \textit{E}xa5 1-0

Game 9
Alekhine – Marshall
St. Petersburg International 1914
Petroff’s Defence

1 e4 e5
2 \textit{Q}f3 \textit{Q}f6
3 \textit{Q}xe5 d6
4 \textit{Q}f3 \textit{Q}xe4
5 d4 d5
6 \textit{Q}d3 \textit{Q}d6
7 e4

This variation of the Petroff does not cause Black any difficulty. White could secure better chances by 3 d4 (Steinitz), 5 \textit{W}e2 (Lasker), or even 5 \textit{Q}c3.

7 ... \textit{Q}b4+!
8 \textit{Q}bd2 \textit{Q}xd2

This exchange, which permits White quite an appreciable advantage in development, hardly appears justified. The correct line of play was 8...0-0 9 0-0 \textit{Q}xd2! 10 \textit{Q}xd2 \textit{Q}g4 with at least an equal game.

9 \textit{Q}xd2 \textit{W}e7+
10 \textit{W}e2 \textit{W}xe2+

It is interesting to notice that this plausible queen exchange is later on shown up as a decisive mistake. Black must first play 10...\textit{Q}xd2+ 11 \textit{W}xd2 \textit{W}xe2+ 12 \textit{Q}xe2 dx4 13 \textit{Q}xc4 0-0 after which White would have maintained a slight positional superiority, but Black’s game would still remain fully defensible.

11 \textit{Q}xe2 \textit{Q}xd2
12 \textit{Q}xd2 \textit{Q}e6

If now 12...dx4, then 13 \textit{Q}he1+! with still greater effect than in the actual game, White having preserved his bishop for the attack against his opponent’s undeveloped position.

13 cxd5 \textit{Q}xd5
14 \textit{Q}he1+ \textit{Q}d8
15 \textit{Q}e4! \textit{Q}xe4

Forced, for if 15...c6 White would win a pawn at once by 16 \textit{Q}xd5 cxd5 17 \textit{Q}e5.

16 \textit{Q}xe4 \textit{Q}e8

This move was absolutely necessary to prevent the threatened doubling of White’s rooks on the open e-file.

17 \textit{Q}ae1 \textit{Q}xe4
18 \textit{Q}xe4 \textit{Q}c6 (D)
19 \textit{Q}g4!

The winning manoeuvre. On the other hand, 19 \textit{Q}g5 was insufficient, on account of 19...\textit{Q}d7!. Now Black is going to lose a pawn by force.

19 ... g6
20 \textit{Q}h4! \textit{Q}e7

Best in the circumstances, for after 20...h5 21 g4 followed by 22
gxh5 White would establish a passed pawn.

21 hxh7 d8
22 h4 d5
23 e4+!

Forcing the retreat of Black’s king, for after 23...f6 24 c3, the threat of 25 e8 would have been very dangerous for the opponent.

23 ... f8
24 c3 f5

Contemplating ...e7-d5+ in order to cause White the maximum technical difficulties.

25 e2 a6

If 25...e7 White would have replied 26 e5 and the continuation of the game would scarcely be modified.

26 a3 e7
27 e5! f6

After the exchange of rooks, Black could no longer save the position.

28 d3

Preparing 29 c5, which Black prevents by his reply, but at the cost of a new weakness at c7 which White will proceed to exploit without delay.

28 ... b6
29 e2!

White, as we see from the sequel, proposes to sacrifice a pawn in order to occupy the 7th rank with his rook and thus to obtain a dangerous passed pawn. This manoeuvre is the shortest and surest means of securing victory.

29 ... d5
30 e4 f4

Or 30...e6+ 31 e5 f6+ 32 f3 and White dominates the whole board.

31 e2 xg2
32 e5!

Not at once 32 xc7 on account of 32...f4+ followed by 33...xf3, whereas now, since White threatens 33 d7+, Black cannot save his c-pawn.

32 ... e8
33 xc7 xf2
34 e4! (D)

A very important move. The white knight is going to be posted on b7, where it will support the advance of the passed d-pawn by covering d6 and d8.
34 ... b5
35 Qd6+ f8
36 d5 f6
37 Qb7! Qf4
38 b4 g5
39 d6 de6
40 Qd5!

The coup de grâce. White’s rook cannot be captured on account of 40...Qxc7 41 dxc7 Qc2 42 Qc5!.

Similarly, after 40...Ke2 White would win easily by 41 Qc6 Qd4+ 42 Qb6 so, as a last resource, Black tries to exploit his kingside pawns after the sacrifice of the rook for the passed pawn. But this manoeuvre is foredoomed to failure.

40 ... Qf4+
41 Qc6 Qxh2
42 Qc5

Preventing the sacrifice of Black’s knight for the pawn, and winning a whole rook.

42 ... Qd2
43 Qc8+ f7
44 d7 Qe6
45 Qxe6 Qxe6
46 d8W Qxd8
47 Qxd8 g4
48 Qe8+ f7
49 d2 f5
50 d5 f6
51 d4 f4
52 Qe4 g5
53 Qc2 f3
54 Qd2 Qh4
55 Qf4 Qh6

1-0

Game 10
Alekhine – Tarrasch
St. Petersburg International 1914
Falkbeer Counter-Gambit

1 f4 e5
2 e4

From’s Gambit Accepted (2 fxe5 d6 3 exd6) offers White only an equal game at best.

2 ... d5
3 exd5 e4
4 d3 Qf6

At the time the present game was played, the variations springing from this move were considered advantageous for White, thanks especially to analyses by the late Simon Alapin. Recently, however, Dr. Tarrasch succeeded in invalidating this opinion, introducing in his game against Spielmann at Mährisch-Ostrau 1924, an improvement of great importance (see note to Black’s 6th move).

5 dxe4 Qxe4
6 Qf3 Qf5

An innovation which the sequel shows to be insufficient. The correct line of play, demonstrated by Dr. Tarrasch in the game mentioned above, is 6...Qc5 7 We2 Qf5! and if

1 Here Black missed a much better defence: 34...Qc6, intending either ...b5 or ...Qe6+. After the natural reply 35 d5, it isn’t easy for White to evade the checks, for example 35...Qf4+ 36 Qd3 (36 Qe5 Qf5+ 37 Qd6 Qf6+) 36...Qf3+ 37 d4 (37 Qe2 Qf6) 37...Qf4+ 38 Qc3 Qf3+ 39 Qb4 Qf4, threatening either ...b5 or ...Qe3.
8 g4? then 8...0-0!, with a winning sacrificial attack.

7 \( \text{Ke}3 \)

This move deprives Black of his best chance on the diagonal a7-g1, and leaves him without compensation for the pawn he has given up.

7 ... \( c6 \)

8 \( \text{Ke}4 \) \( b5 \)

Trying to keep his opponent busy lest he definitely secure his position by casting.

9 \( \text{Kb}3 \)

White could equally well play 9 \( \text{Ke}2 \) \( a6 \) 10 \( a4! \) \( b4 \) 11 \( dxc6 \) \( \text{Kd}1+ \) 12 \( \text{Kxd}1 \) \( \text{Kxc}6 \), but the combination based on the text move offers better prospects.

9 ... \( c5 \)

10 \( d6! \)

Bringing about a simplification which is advantageous in view of White's extra pawn. Black cannot reply 10...\( \text{Kxd}6 \) because of 11 \( \text{Kxd}6 \) followed by 12 \( \text{Kd}5 \).

10 ... \( c4 \)

11 \( \text{Kd}5 \) \( \text{Kd}7 \)

12 \( \text{Kxf}5 \) \( \text{Kxd}6 \)

13 \( \text{Kd}5 \) \( \text{Ke}7 \)

14 0-0 0-0

15 \( \text{Cc}3 \) \( \text{Kf}6 \)

16 \( \text{Kd}2 \) \( \text{cxb}3 \)

Just in time, for White threatened 17 \( \text{Kxb}5 \).

17 \( \text{axb}3 \) (\( D \))

White's advantage in material is in no way diminished by his having a doubled pawn, for he will always be in a position to obtain a passed pawn by advancing his c-pawn.

17 ... \( b4 \)
adopt a waiting policy, which is all the more distressing as he is minus a pawn. White's next moves aim at unpinning the knight, which will take a decisive part in the final onslaught when the white rooks are doubled on the e-file.

25 ... h6
26 Whd3 Whd6
27 Whf3 Wh5

An inoffensive demonstration which cannot hinder White's plans.

28 Hf4 Whf6

Of course not 28...f5 because of 29 Hf6.

29 Hg5 Wh5
30 Hh1 Whf6
31 Hfe1

To be able to play 32 Hf5 in answer to 31...Hh5.

31 ... Whc5
32 Whh2 Hc8
33 He1e2

A subtle preparation for the following attacking move.

33 ... Hf8
34 Hf5!

Now Black cannot play 34...bxc3 35 bxc3 Whxc3 because of 36 Hc2.

34 ... Hcd8
35 Hf5

Threatening, amongst other things, 36 c4 Hxe5 37 fxe5 followed by 38 e6.

35 ... Whb6
36 Whg3 Wh5

1 Black should certainly try 39...Wh4+ 40 Hxg4 fxe6, when the continuation given by Alekhine no longer works, because thanks to the open h-file Black can pin the queen with ...Hh6 at the end.
White could also have captured on h5 and then brought his king to h4. The text move is still more simple and hinders 39...g6, which would prove disastrous for Black after 40 \textit{\texttt{W}}e7+ \textit{\texttt{G}}g8 41 \textit{\texttt{W}}e8+ \textit{\texttt{H}}h7 42 \textit{\texttt{W}}xf7+ \textit{\texttt{H}}h8 43 \textit{\texttt{G}}e7! and wins.

\begin{align*}
39 & \ldots \textit{\texttt{W}}g6 \\
40 & \textit{\texttt{W}}xb4+ \textbf{\textit{1-0}}
\end{align*}

\textbf{Game 11}
\textbf{Alekhine – Fahrni}
\textit{\texttt{Mannheim 1914}}
\textit{\texttt{French Defence}}

\begin{align*}
1 & e4 \quad e6 \\
2 & d4 \quad d5 \\
3 & \textit{\texttt{C}}c3 \quad \textit{\texttt{F}}f6 \\
4 & \textit{\texttt{G}}g5 \quad \textit{\texttt{E}}e7 \\
5 & e5 \quad \textit{\texttt{F}}d7 \\
6 & \textit{\texttt{H}}4!
\end{align*}

This energetic move has been played in off-hand games by the ingenious Paris amateur, M. Eugene Chatard, and previously by the Viennese master, A. Albin. It was during the present game that it was introduced in a master tournament.

\begin{align*}
6 & \ldots \textit{\texttt{G}}xg5 \\
6\ldots0\ldots0, \text{ adopted on several occasions in international tournaments in recent years, was refuted by Bogoljubow in his game against Spielmann at Vienna 1922, which went on 7 \textit{\texttt{D}}d3 c5 8 \textit{\texttt{H}}h3! \textit{\texttt{E}}e8 9 \textit{\texttt{B}}b5 f5 10 \textit{\texttt{D}}d6 \textit{\texttt{C}}xd4 11 \textit{\texttt{C}}xe8 \textit{\texttt{W}}xe8 12 \textit{\texttt{B}}b5! and White should win.}
\text{}6\ldots c5 seems somewhat better, and if 7 \textit{\texttt{B}}b5 then Black replies 7...f6.
7 & \textit{\texttt{H}}xg5 \quad \textit{\texttt{W}}xg5 \\
8 & \textit{\texttt{H}}h3 \quad \textit{\texttt{E}}e7
\end{align*}

After 8...\textit{\texttt{W}}h6 Black’s queen would be in a precarious position, and in this case White could gradually have strengthened his position by 9 g3 and 10 \textit{\texttt{G}}g2.

\begin{align*}
9 & \textit{\texttt{F}}f4 \quad \textit{\texttt{F}}f8 (D)
\end{align*}

White refutes this plausible move by an enterprising attack, but against any other reply he would have obtained ample compensation for the pawn sacrificed.

A particularly interesting continuation has been suggested here by Bogoljubow: 9...a6 10 \textit{\texttt{W}}g4 g6 11 0-0-0 c5 12 \textit{\texttt{W}}g3! \textit{\texttt{B}}b6 13 \textit{\texttt{D}}xc5 \textit{\texttt{W}}xc5 14 \textit{\texttt{D}}d3 \textit{\texttt{F}}f8 15 \textit{\texttt{G}}e4!! and White’s knight will force its way into the hostile camp via e4 or d5, with decisive effect.

\begin{align*}
10 & \textit{\texttt{W}}g4! \\
\text{Threatening both 11 \textit{\texttt{W}}xg7 and taking on d5. Black’s reply is therefore compulsory.}
10 & \ldots \quad \textit{\texttt{F}}5 \\
11 & \textit{\texttt{E}}xf6 \quad \textit{\texttt{G}}xf6 \\
12 & 0-0-0
\end{align*}

White again threatens 13 \textit{\texttt{D}}xd5, his king having been removed from the e-file.
12 ... c6
13 â€œ1 â€œd8

There is no other way to develop the queenside. If 13...â€œ7 the sacrifice of the knight at d5 would once more be decisive.
14 â€œh6!

In order to tie up Black’s pieces still more, on account of the pressure on his f-pawn. From now on all Black’s moves are forced.
14 ... e5
15 â€œh4 â€œbd7
16 â€œd3

Threatening, among other moves, 17 â€œf5.
16 ... e4 (D)

17 â€œg3!

An essential preliminary for the ensuing sacrifice. White now threatens to win off-hand by 18 â€œfxd5. Black cannot play 17...â€œd6, for after 18 â€œxe4! dxe4 19 â€œxe4! he would be defenceless against 20 â€œg7!.

17 ... â€œf7

The only resource!
18 â€œxe4!

This sacrifice, which must be accepted by the opponent, wins the game in a few moves.
18 ... dxe4
19 â€œxe4 â€œg8

If 19...â€œxa2, 20 â€œxf6! â€œxf6 21 â€œg7! and wins.
20 â€œa3!

If 20 â€œd6 Black could still have defended himself by 20...â€œxa2 seeing that White’s discovered checks do not lead to mate. But after the text move he has no longer an adequate defence.

20 ... â€œg7

If 20...â€œc7, 21 â€œa5+ b6 22 â€œc3 and wins!
21 â€œd6! â€œb6
22 â€œe8!

Forcing the win of the queen, or else mate, e.g. 22...â€œd7 23 â€œxf6 or 22...â€œc4 23 â€œc5 â€œf7 24 â€œxf6.
22 ... â€œf7
23 â€œd6+ and mates in two more moves.

Game 12
Alekhine – Isakov
Moscow Championship 1919
Danish Gambit

1 e4 e5
2 d4 exd4
3 c3 dxc3
Declining the gambit by 3...d5 or 3...\textit{We}7 is, in my opinion, preferable.

4 \textit{dx}c3!

White, by giving up only one pawn, secures as vigorous an attack as in
the Danish Gambit proper, which has been completely neglected since
Schlechter's discovery 4 \textit{cc}4 exb2 5
\textit{xb}2 d5! 6 \textit{xd}5 \textit{xf}6!.

4 ... \textit{tb}4

In a game Alekhine-Verlinsky, played at Odessa in 1918, Black con-
tinued 4...\textit{cc}6. There followed: 5
\textit{cc}4 d6 6 \textit{tf}3 \textit{tf}6 7 \textit{wb}3 \textit{wd}7 8
\textit{g}5 \textit{e}5 (8...\textit{d}8 is better) 9 \textit{b}5
c6 10 f4! \textit{xb}5 11 \textit{fxe}5 \textit{dx}5 12 \textit{e}3!
\textit{d}6 13 \textit{xb}5 0-0 14 \textit{d}1 \textit{e}8 15
0-0 \textit{we}7 16 \textit{xd}6 \textit{xd}6 17 \textit{wa}3!
(not 17 \textit{wb}4 because of 17...\textit{xf}5)
17...\textit{d}8 18 \textit{xf}7 \textit{g}4 19 \textit{xd}6
\textit{e}8 20 \textit{g}5 \textit{c}7 21 \textit{wb}3 \textit{e}2 22
\textit{xe}5+ \textit{h}8 23 \textit{c}1 \textit{f}8! (D) —an
ingenious resource which very nearly
saves the game.

<table>
<thead>
<tr>
<th>W</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="" alt="Chess Board Diagram" /></td>
</tr>
</tbody>
</table>

Black need not fear 6 \textit{xf}7+
\textit{xf}7 7 \textit{wb}3+ \textit{e}6 8 \textit{xb}4 \textit{c}6! 9
\textit{xb}7 \textit{d}4, which, on the contrary,
would give him a very dangerous at-
tack.

6 \textit{f}3 \textit{xc}3+
7 bxc3 \textit{c}6
8 0-0 \textit{f}6
9 \textit{a}3

The immediate 9 e5 is more in the
spirit of the opening and if 9...dxe5
10 \textit{wb}3, with prospects of a strong
attack for White. After the text move
Black could have secured a satisfac-
tory game by 9...\textit{g}4 10 \textit{wb}3 \textit{a}5!
11 \textit{xf}7+ \textit{f}8 12 \textit{wa}4 \textit{xf}3 13
\textit{gxf}3 \textit{xf}7 14 \textit{xa}5 \textit{e}8.

9 ... 0-0
10 e5 \textit{g}4

After 10...\textit{e}8 11 h3! \textit{f}5 12
\textit{e}1 Black would have a very pre-
 precarious game, the f8-rook and e8-
 knight both being immobilised. He
therefore prefers to give back the
pawn in order to complete his de-
velopment.

11 exd6 cxd6
12 \textit{xd}6 \textit{e}8
13 \textit{e}1!

Preparing an eventual sacrifice of
the light-squared bishop. It is clear
that Black cannot play 13...\textit{xe}1+
14 \textit{xe}1 \textit{xd}6 15 \textit{e}8+ \textit{f}8 16
\textit{xf}7+ \textit{h}8 17 \textit{xf}8#.

13 ... \textit{f}5 (D)

Preferable, however, would be
13...\textit{xe}1+ 14 \textit{xe}1 \textit{f}5 15 \textit{d}1
\textit{e}8 16 \textit{d}4! and Black, although
having a slightly inferior game, is
safe from immediate disaster.

14 \textit{xf}7+!
A pretty combination. Its object is to keep the g4-knight away from f6 by forcing the black king to occupy that square.

14 ...  \textit{\textbf{Q}}xf7
15 \textit{\textbf{W}}d5+  \textit{\textbf{Q}}f6

Evidently compulsory, for example 15...\textit{\textbf{Q}}e6 16 \textit{\textbf{Q}}g5+, or 15...\textit{\textbf{Q}}g6 16 \textit{\textbf{Q}}xe8 \textit{\textbf{Q}}xe8 17 \textit{\textbf{Q}}h4+ and White wins.

16 h3  \textit{\textbf{Q}}e6
Or if 16...\textit{\textbf{Q}}h6, then 17 g4\footnote{16...\textit{\textbf{Q}}a5 offers good defensive chances, as the ending arising from 17 \textit{\textbf{W}}xa5 (17 \textit{\textbf{Q}}c5 \textit{\textbf{W}}d8) 17...\textit{\textbf{Q}}xa5 18 hxg4 \textit{\textbf{Q}}xg4 is very drawish due to the opposite-coloured bishops.}

17 \textit{\textbf{W}}d2!  \textit{\textbf{Q}}h6
18 g4
Regaining by force the piece he has sacrificed.

18 ...  g6!
The only resource.

If 18...\textit{\textbf{Q}}f7 or 18...\textit{\textbf{Q}}g8, White can win with the following problem-like variation: 19 \textit{\textbf{W}}f4+ \textit{\textbf{Q}}g6 20 \textit{\textbf{Q}}e7!!\footnote{Why not 20 \textit{\textbf{Q}}xe6+ and 21 \textit{\textbf{W}}f5+, mating at once?} \textit{\textbf{W}}xe7 21 \textit{\textbf{Q}}xe6+ and mates.

19 g5+

Also very strong would be 19 \textit{\textbf{W}}xh6 \textit{\textbf{W}}xd6 20 g5+ \textit{\textbf{Q}}f7! 21 \textit{\textbf{W}}xh7+ \textit{\textbf{Q}}f8 22 \textit{\textbf{W}}xg6 with a winning attack\footnote{After 22...\textit{\textbf{Q}}ad8 it is very hard for White to reinforce his attack, so the move Alekhine played appears much stronger.}.

After the text move, which wins back the piece, the black king contrives to escape danger temporarily.

19 ...  \textit{\textbf{Q}}f7
20 gxh6  \textit{\textbf{W}}f6
21 \textit{\textbf{Q}}g5+  \textit{\textbf{Q}}g8
22 f4  \textit{\textbf{Q}}ad8
23 \textit{\textbf{Q}}ad1  \textit{\textbf{Q}}c4 (D)

Black hopes to take advantage of the fact that White’s bishop is pinned in order to seize the open e-file, but White’s reply destroys this last hope.

24 \textit{\textbf{Q}}e7!

The same move as in the variation referred to after Black’s 18th move, but with an entirely different aim.

24 ...  \textit{\textbf{Q}}xd2
Compulsory, for both 24...\( \text{Q} \text{x} e7 \)
25 \( \text{W} \text{x} d8 \) and 24...\( \text{W} \text{x} e7 \) 25 \( \text{Q} \text{x} e7 \)
win for White.

25 \( \text{Q} \text{x} f6 \) \( \text{Q} \text{x} e1+ \)
26 \( \text{Q} \text{x} e1 \) \( \text{Q} \text{f}7 \)
27 \( \text{Q} \text{e}4 \)

Winning at least the h-pawn and
at the same time creating a mating
net.

27 ... \( \text{Q} \text{xa}2 \)
28 \( \text{Q} \text{g}7 \) \( \text{Q} \text{b}3 \)
29 \( \text{Q} \text{f}6+ \) \( \text{Q} \text{f}7 \)
30 \( \text{Q} \text{xh}7 \) 1-0

Game 13
Rabinovich – Alekhine

*All-Russian Masters’,
Moscow 1920*

Queen’s Pawn Game

1 \( \text{d}4 \) \( \text{Q} \text{f}6 \)
2 \( \text{Q} \text{f}3 \) \( \text{b}6 \)
3 \( \text{c}4 \) \( \text{e}6 \)
4 \( \text{Q} \text{c}3 \)

Rubinstein’s system, namely 4 \( \text{g}3 \)
and 5 \( \text{Q} \text{g}2 \) (or on the next move), is
considered better.

4 ... \( \text{Q} \text{b}7 \)
5 \( \text{e}3 \)

This allows Black to occupy the
e4-square with effect, and thus to se-
cure at least an equal game.

5 ... \( \text{Q} \text{b}4 \)
6 \( \text{W} \text{c}2 \) \( \text{Q} \text{e}4 \)
7 \( \text{Q} \text{d}3 \) \( \text{f}5 \)

In this manner Black has brought
about a favourable position, resem-
bling the Dutch Defence.

8 0-0

White could here have selected
another line of play: 8 \( \text{Q} \text{d}2 \) \( \text{Q} \text{x} c3 \) 9

\( \text{Q} \text{c}3 \) 0-0 10 0-0-0 after which
Black seizes the initiative by 10...\( \text{a}5 \)!
and 11...\( \text{Q} \text{a}6 \) (Sämiscz-Alekhine,
Pistyan 1922).

8 ... \( \text{Q} \text{xc}3 \)
9 \( \text{b} \text{xc}3 \) 0-0
10 \( \text{Q} \text{d}2 \)

The only way to enforce the ad-
vance of the c-pawn.

10 ... \( \text{W} \text{h}4! \)

An important developing move;
if 11 \( \text{g}3 \), then 11...\( \text{Q} \text{g}5 \) is good for
Black, since 12 \( \text{e}4 \) \( \text{fxe}4 \) leads to a
Black win.

11 \( \text{f}3 \) \( \text{Q} \text{xd}2 \)
12 \( \text{Q} \text{xd}2 \) \( \text{Q} \text{c}6 \)

12...\( \text{c}5 \) would not be so good, be-
cause of 13 \( \text{d}5 \)!

13 \( \text{e}4 \) \( \text{fxe}4 \) (D)

14 \( \text{Q} \text{xe}4 \)

White appears to overrate the
strength of his position. More ac-
curate was 14 \( \text{fxe}4 \) \( \text{e}5 \) 15 \( \text{d}5 \) \( \text{Q} \text{e}7 \) 16
\( \text{c}5 \) \( \text{Q} \text{g}6 \) (not 16...\( \text{bxc}5 \) because of
17 \( \text{d}6 \) and 18 \( \text{W} \text{b}3+ \)) 17 \( \text{cxb}6 \text{axb}6 \)
with about an equal game.

14 ... \( \text{Q} \text{a}5 \)

This secures Black a slight ad-
vantage, should White choose the
best variation 15 $\text{h}x\text{b}7 \text{g}x\text{b}7 16
\text{f}e1, by reason of White's doubled
pawns on the c-file.

15 $\text{h}a\text{e}1$

This plausible move leads to the
loss of a pawn.

15 $\ldots$ $\text{h}x\text{e}4!$
16 $\text{h}x\text{e}4$ $\text{h}h5$
17 $\text{w}a4$

There was no satisfactory defence
to the c-pawn, e.g. 17 $\text{h}e5 \text{f}f5! 18$
$cxf5 \text{w}xf5 19 \text{w}xf5 exf5 and Black
has virtually a won endgame.

17 $\ldots$ $\text{d}x\text{c}4!$

Now Black has every justification
for anticipating victory, yet in spite
of his advantage in material it is not
easy to achieve it, for White's position
contains no weak points.

18 $\text{e}2$

Clearly, after 18 $\text{w}xc4$ d5 19 $\text{w}b5$
a6 Black wins.

18 $\ldots$ b5

19 $\text{b}b3$ $\text{f}5$

20 $\text{f}e1$ $\text{a}b8$

21 $\text{c}1$ a5

22 $\text{e}4$ a4

23 $\text{d}1$ $\text{b}e8$

Having consolidated the dominating
position of his knight, Black now
prepares an action in the centre
which will enable him to shatter the
hostile position, although allowing
his opponent apparent compensations.

24 $\text{w}e2$ c5!

This temporarily increases the
range of action of White's bishop,
yet by this reason the bishop later on
becomes an object of attack. This
plan demanded an exhaustive ex-
amination of the tactical possibili-
ties of the position, and was not
undertaken until Black was per-
fectly convinced that it would ulti-
mately result in his favour.

25 $\text{d}e3$ cxd4
26 $\text{d}x\text{d}4$ e5! (D)

The beginning of a series of ex-
remely interesting complications.
White cannot play 27 $\text{d}xe5$ because
of 27...d5!, and the variation 27 $\text{c}5$
d5 28 $\text{x}c4$ bxc4 29 $\text{xf}8$ $\text{w}xf8$
would also be to Black's advantage.

27 f4!

Undoubtedly the best chance.
White intends to answer 27...d5 with
28 $\text{e}x\text{e}5 \text{g}x\text{e}5 29 \text{xe}5$, which
would give him quite a defensible
game.

---

1 The key line is 28 $\text{d}4$!, but Black can still win by 28...exd4! (28...$\text{d}8 29 \text{xf}8$

d4 30 $\text{x}g7$!) 29 $\text{xe}8 \text{xe}8 30 \text{xe}8+ \text{f}7 31 $\text{f}8+$ \text{e}6 32 $\text{xf}5$ dxc3!!

(32...$\text{xf}5$ 33 $\text{d}x\text{d}4$ is a draw) 33 $\text{f}8 \text{d}7$! 34 $\text{d}4$ (34 $\text{f}7+$ \text{c}6 35 $\text{e}7$ h6)

34...c2 35 $\text{xc}4+dxc4 36 \text{e}3 b4 and the pawns run through.
27 ... d6
Sufficing for the protection of the pawn, because of the mate after 28 fxe5 dxe5 29 ∆xe5? ∆xe5 30 ∆xe5 ∆xe5 31 ∆xe5 ∆f2+ 32 ∆h1 ∆f1+.

28 h3
Again threatening Black's e5-pawn, which he will at once defend in an indirect manner.

28 ... ∆e6!
29 fxe5 dxe5
30 ∆c5! (D)
Not 30 ∆xe5 because of 30...∆fe8 31 ∆f1 ∆g6 32 ∆xc4 ∆xe5 and wins. The text move appears full of promise, seeing that the black rook cannot leave the f-file, e.g. 30...∆d8 31 ∆f1 ∆g6 32 ∆g4 ∆h6 33 ∆f3! and wins.

30 ... ∆f7!
The initial move of a sacrificial combination intended to yield a decisive attack. As a mere defensive move, 30...∆ff6 would be adequate, as White could not answer 31 ∆b1 because of 31...∆d2!.

31 ∆b1
Seemingly recovering his pawn with a good game, for 31...∆d2 is now impossible on account of 32 ∆xd2, threatening ∆d8+.

31 ... h6
This parries the threat of mate and compels the opponent to persevere on the perilous path he is following.

32 ∆xb5 ∆d2!
33 ∆xa4
White has no longer any defence, for if 33 ∆g4 Black would win in an analogous manner to that in the text.

If 33 ∆e3, then 33...∆g6 (this diversion was the special point of playing the f8-rook to f7 instead of f6 on the 30th move) 34 ∆b8+ ∆h7 35 ∆b2 (or 35 ∆xd2 ∆f1+ 36 ∆h2 ∆f2 and wins) 35...∆f3+ 36 ∆h1 ∆xh3+! and mates next move.

33 ... ∆c2
After this move, which explains the foregoing sacrifice of two pawns, White is lost, owing to his inability to withdraw his rooks to secure the defence of the first rank.

34 ∆a8+ ∆h7
35 ∆h1 ∆f1+
36 ∆g1 (D)

36 ... ∆xg1+!
A pretty final combination.
37 \textit{D}xg1 \textit{D}c1+
38 \textit{D}f2 \textit{D}f6+
39 \textit{D}e3

If 39 \textit{D}g3 \textit{D}f1+. Now Black's next move wins the queen or mates.
39 ... \textit{D}b1+!

0-1

Game 14
Alekhine – Teichmann
Match (2), Berlin 1921
King's Gambit Declined

1 e4 e5
2 \textit{D}c3 \textit{D}c6

Here the best move is 2...\textit{D}f6 followed, if White replies 3 \textit{D}c4, by 3...\textit{D}xe4!.

3 \textit{D}c4 \textit{D}f6
4 d3 \textit{D}c5
5 f4 d6
6 \textit{D}f3

By transposition of moves White has reached a safe and very promising position from the King's Gambit Declined.

6 ... \textit{D}g4

A stronger move was 6...\textit{D}e6 and if 7 \textit{D}b5 then 7...a6 8 \textit{D}xc6+ bxc6 9 \textit{D}e2 exf4! with approximate equality (Spielmann-Dr. Tarrasch, Pistyan 1922). After the text move White obtains a slight positional advantage.

7 \textit{D}a4 (D)

The only correct move. On the other hand, the old move 7 h3 is inadequate, on account of 7...\textit{D}xf3 8 \textit{D}xf3 exf4! (but not 8...\textit{D}d4 9 \textit{D}g3! \textit{D}e7! 10 fxe5 dxe5 11 \textit{D}d1 with the better game) 9 \textit{D}xf4 (if 9 \textit{D}xf4 \textit{D}d4! 10 \textit{D}g3 \textit{D}h5) 9...\textit{D}e5 and White, due to the threat 10...\textit{D}h5, has no way to avoid the exchange of his light-squared bishop, after which Black has emerged from all the difficulties of the opening.

7 ... a6

Hardly customary, and certainly not best. His opponent's previous move clearly showed his intention to eliminate the c5-bishop, and it was therefore futile to force him to execute his threat.

1) An interesting line, which is, however, advantageous for White, was 7...\textit{D}xf3 8 \textit{D}xf3 \textit{D}d4 9 \textit{D}d1 b5 10 \textit{D}xf7+ \textit{D}xf7 11 \textit{D}xc5 dxc5 12 fxe5 followed by 13 0-0+, and here White would have formidable attacking chances, quite apart from the two pawns he has in return for the sacrificed piece.

2) In a game Alekhine-O.Tenner (a Berlin amateur), played at Cologne in 1907, the latter continued 7...exf4 8 \textit{D}xc5 dxc5 9 \textit{D}xf4 \textit{D}h5 10 \textit{D}e3 \textit{D}e5? 11 \textit{D}xe5 \textit{D}xd1 12 \textit{D}xf7+ \textit{D}e7 13 \textit{D}xc5+ \textit{D}f6 14 0-0+ \textit{D}xe5 15 \textit{D}f5#.
Comparatively best was 7...\(\text{\texttt{b}}\text{b}6\) or 7...0-0.

8  \(\text{\texttt{c}}\text{c}5\)  dxc5  
9  0-0  \(\text{\texttt{e}}\text{e}7\)  
10  h3  

Securing the advantage of two bishops against two knights.

10  ...  \(\text{\texttt{xf}}\text{f}3\)  
11  \(\text{\texttt{xf}}\text{f}3\)  0-0  
12  \(\text{\texttt{e}}\text{e}3\)  exf4  
13  \(\text{\texttt{xf}}\text{f}4\)  \(\text{\texttt{xe}}\text{e}5\)  
14  \(\text{\texttt{b}}\text{b}3\)  \(\text{\texttt{ae}}\text{e}8\)

Further loss of time, which seriously compromises Black’s game. The following was equally disadvantageous: 14...c4 15 dxc4 \(\text{\texttt{g}}\text{g}6\) 16 \(\text{\texttt{wg}}\text{g}5!\) \(\text{\texttt{wx}}\text{e}4\) 17 \(\text{\texttt{ae}}\text{e}1\) with the better game. On the other hand 14...\(\text{\texttt{ad}}\text{d}8\) would clearly have been better, as it would make the advance of White’s centre pawns more difficult.

15  \(\text{\texttt{f}}\text{f}2!\)  

With the double threat 16 \(\text{\texttt{xc}}\text{c}5\) and 16 \(\text{\texttt{g}}\text{g}5\).

15  ...  \(\text{\texttt{fd}}\text{d}7\)  
16  \(\text{\texttt{ad}}\text{d}1\)  b6  
17  c3  

Preparing 18 d4, against which there is no defence. The loss of the present game by Black can be attributed to the fact that his knights lack bases in the centre, and that in positions of this character the possession of the two bishops constitutes a decisive advantage for the opponent.

17  ...  \(\text{\texttt{g}}\text{g}6\) (D)  
18  \(\text{\texttt{f}}\text{f}5!\)  

The first move of a new regrouping, the completion of which will give White a won game. White’s dark-squared bishop is to be posted on g3, whence it will exercise pressure on Black’s c7-pawn, which will be weakened still further by the imminent opening of the c-file after White’s d4. Throughout the execution of this plan Black will find himself reduced to absolute passivity.

18  ...  \(\text{\texttt{h}}\text{h}8\)  
19  \(\text{\texttt{f}}\text{f}2!\)  \(\text{\texttt{d}}\text{d}8\)  
20  \(\text{\texttt{g}}\text{g}3\)  \(\text{\texttt{de}}\text{e}5\)  
21  d4  cxd4  
22  cxd4  \(\text{\texttt{c}}\text{c}6\)  
23  d5  \(\text{\texttt{ce}}\text{e}5\)  
24  h4!  

This threat to win a piece compels Black to weaken his position still more, thus enabling White’s rook to break through into his game.

24  ...  \(\text{\texttt{c}}\text{c}5+\)  
25  \(\text{\texttt{h}}\text{h}2\)  

Not 25 \(\text{\texttt{f}}\text{f}2\) because of the reply 25...\(\text{\texttt{d}}\text{d}6\).

25  ...  f6  

Evidently forced.

26  \(\text{\texttt{c}}\text{c}1\)  \(\text{\texttt{d}}\text{d}6\)  
27  \(\text{\texttt{c}}\text{c}6\)  \(\text{\texttt{e}}\text{e}7\)  

If 27...\(\text{\texttt{d}}\text{d}7\), 28 \(\text{\texttt{xd}}\text{d}7\) \(\text{\texttt{xd}}\text{d}7\) 29 h5 \(\text{\texttt{g}}\text{g}4+\) 30 \(\text{\texttt{h}}\text{h}3\) \(\text{\texttt{e}}\text{e}5\) 31 \(\text{\texttt{fc}}\text{c}1!\) and wins.

28  \(\text{\texttt{e}}\text{e}6!\)  \(\text{\texttt{d}}\text{d}7\)
29 h5 \( \text{\textsf{\textit{\varepsilon}_7}} \)
30 \( \text{\textsf{\textit{\varphi}_3}} \) \( \text{\textsf{\textit{\varphi}_7}} \)

Again forced, because of the double threat 31 \( \text{\textsf{\textit{\varphi}_e}} \) e5 and 31 h6.
31 \( \text{\textsf{\textit{\varphi}_4}} \) h6
32 \( \text{\textsf{\textit{\varphi}_c}} \) ! \( \text{\textsf{\textit{\varphi}_d}} \)

Permitting White a decisive sacrifice. 32...\( \text{\textsf{\textit{\varphi}_c}} \) 8 was a little better, upon which White would have continued his winning attack by 33 \( \text{\textsf{\textbf{\textit{\varphi}_b} 4}} \) and 34 \( \text{\textsf{\textit{\varphi}_a}} \) 4.

33 \( \text{\textsf{\textit{\varphi}_xh}} \) 6!

Putting an end to all resistance, for if 33...g\( \times \)h6, then 34 \( \text{\textsf{\textit{\varphi}_1}} \) xf6 \( \text{\textsf{\textit{\varphi}_g}} \) 8 35 \( \text{\textsf{\textit{\varphi}_g}} \) 3+ and White mates in a few moves.

33 ... \( \text{\textsf{\textit{\varphi}_e}} \) xe4

A desperate move.

34 \( \text{\textsf{\textit{\varphi}_e}} \) xe4 \( \text{\textsf{\textit{\varphi}_d}} \)xd5
35 \( \text{\textsf{\textit{\varphi}_c}} \) 1-0

If now 35...g\( \times \)h6, then 36 \( \text{\textsf{\textit{\varphi}_x}} \) d5 \( \text{\textsf{\textbf{\textit{\varphi}_d}} 5} \) 37 \( \text{\textsf{\textit{\varphi}_xh}} \) 6+ \( \text{\textsf{\textit{\varphi}_g}} \) 8 38 \( \text{\textsf{\textit{\varphi}_g}} \) 4+ \( \text{\textsf{\textit{\varphi}_f}} \) 7 39 \( \text{\textsf{\textit{\varphi}_xf}} \) 6+ and wins.

Game 15
Selezniev – Alekhine
Triberg 1921
Queen's Pawn Game

1 \( \text{\textsf{\textit{\varphi}_d}} \) 4 \( \text{\textsf{\textit{\varphi}_f}} \) 6
2 \( \text{\textsf{\textit{\varphi}_f}} \) 3 \( \text{\textsf{\textit{\varphi}_b}} \) 6

This move is possible before ...e6 because White has played 2 \( \text{\textsf{\textit{\varphi}_f}} \) 3, but after 2 c4 it is not good on account of 3 \( \text{\textsf{\textit{\varphi}_c}} \) 3 \( \text{\textsf{\textit{\varphi}_b}} \) 7 4 \( \text{\textsf{\textit{\varphi}_c}} \) 2!.

3 \( \text{\textsf{\textit{\varphi}_g}} \)

In my opinion best, as White's bishop on g2 is at least as strong as Black's on b7.

3 ... \( \text{\textsf{\textit{\varphi}_b}} \) 7
4 \( \text{\textsf{\textit{\varphi}_g}} \) 2 \( \text{\textsf{\textit{\varphi}_d}} \)

This system of development was introduced by the author in one of his match-games against Teichmann at Berlin 1921. Its only defect is that c6 may eventually become weak—a weakness, however, which does not present very great drawbacks.

5 0-0

In the course of the same tournament, a game Brinckmann-Alekhine continued as follows:

5 \( \text{\textsf{\textit{\varphi}_b}} \) 3 \( \text{\textsf{\textit{\varphi}_b}} \) 7 \( \text{\textsf{\textit{\varphi}_b}} \) 6 e5 7 dxe5 dxe5 8 0-0 e4! 9 \( \text{\textsf{\textit{\varphi}_e}} \) 5 \( \text{\textsf{\textit{\varphi}_d}} \) 6 10 \( \text{\textsf{\textit{\varphi}_x}} \) d7 \( \text{\textsf{\textit{\varphi}_d}} \) 7 11 \( \text{\textsf{\textit{\varphi}_d}} \) 2 \( \text{\textsf{\textit{\varphi}_e}} \) 6 12 c3 h5! 13 \( \text{\textsf{\textit{\varphi}_c}} \) 2 h4 14 \( \text{\textsf{\textit{\varphi}_c}} \) 4 \( \text{\textsf{\textit{\varphi}_c}} \) 5 15 \( \text{\textsf{\textit{\varphi}_d}} \) 1 \( \text{\textsf{\textit{\varphi}_d}} \) 5 16 \( \text{\textsf{\textit{\varphi}_a}} \) 3 h\( \times \)g3 17 h\( \times \)g3 a6 18 c4 \( \text{\textsf{\textit{\varphi}_b}} \) 7 19 \( \text{\textsf{\textit{\varphi}_c}} \) 2 \( \text{\textsf{\textit{\varphi}_f}} \) 5 20 \( \text{\textsf{\textit{\varphi}_a}} \) 3 \( \text{\textsf{\textit{\varphi}_x}} \) a3 21 \( \text{\textsf{\textit{\varphi}_x}} \) a3 \( \text{\textsf{\textit{\varphi}_x}} \) a3 22 \( \text{\textsf{\textit{\varphi}_g}} \) 4 22 \( \text{\textsf{\textit{\varphi}_c}} \) 2 \( \text{\textsf{\textit{\varphi}_h}} \) 2 23 \( \text{\textsf{\textit{\varphi}_d}} \) 2 \( \text{\textsf{\textit{\varphi}_e}} \) 7! 24 \( \text{\textsf{\textit{\varphi}_b}} \) 4 \( \text{\textsf{\textit{\varphi}_a}} \) 8 25 \( \text{\textsf{\textit{\varphi}_e}} \) 2 (D)

\[ \text{Diagram} \]

25...\( \text{\textsf{\textit{\varphi}_f}} \) 3!! 0-1.

5 ... \( \text{\textsf{\textit{\varphi}_b}} \) 7
6 \( \text{\textsf{\textit{\varphi}_f}} \) 4

To prevent 6...e5.

6 ... \( \text{\textsf{\textit{\varphi}_h}} \) 6

Threatening ...g5 in some combinative variations, but the real intention is to make this advance only when Black is assured of an immediate and definite advantage.
7 \( \text{Qc3} \)
Allowing the following demonstration aimed at the d-pawn.
7 ... \( \text{c5} \)
8 \( \text{d5} \)
8 \( \text{dxc5 Qxc5} \) would have given Black a very promising position.
8 ... \( \text{b5!} \)
Otherwise White, by playing 9 \( \text{a4!} \), would prevent Black from seizing the initiative on the queenside.
9 \( \text{Qe1} \)
White's d-pawn is certainly more valuable than Black's b-pawn.
9 ... \( \text{a6} \)
10 \( \text{a4} \) \( \text{b4} \)
11 \( \text{Qe4} \) \( \text{Qxe4} \)
12 \( \text{Qxe4} \) \( \text{g6} \)
So as to develop the bishop at g7, the object of the manoeuvre commencing with 7...c5.
13 \( \text{c4} \) \( \text{bxc3} \)
Absolutely essential to prevent White from blocking the queenside, which would have enabled him to undertake a strong attack, without fear of distraction, by advancing his centre pawns.
14 \( \text{bxc3} \) \( \text{Qg7} \)
15 \( \text{Ab1} \) \( \text{Ab8} \)
16 \( \text{c4} \) 0-0
17 \( \text{Qc2} \) \( \text{a5} \)
Preparing the following sacrifice of the exchange.
18 \( \text{Qf3} \) \( \text{Wc7} \)
19 \( \text{Qd2} \) \( \text{Qa6} \)
20 \( \text{Qd3} \) \( \text{(D)} \)

\[20 \ldots \text{Qb4!!} \]
Absolutely correct. The resulting strong passed pawn, supported by the bishop on g7, and the possibilities of attacking White's c-pawn are, on the whole, worth more than the exchange.
21 \( \text{Qxb4} \) \( \text{cxb4} \)
22 \( \text{Qd2} \) \( \text{Qc5} \)
But this move is illogical. Black could have demonstrated the correctness of his sacrifice more clearly by 22...\( \text{Qc8} \) followed by 23...\( \text{Qb6} \) or also 23...\( \text{Qe5} \), and if necessary 23...\( \text{Qc3} \).
23 \( \text{Qb3}! \)
White plays a strong move, the value of which was not appreciated in good time. If Black replies to it by 23...\( \text{Qxa4} \), White could advantageously continue 24 \( \text{Qa1}! \) \( \text{Qc5} \) 25 \( \text{Qxa5} \) \( \text{Qxa1} \) 26 \( \text{Qxa1} \) \( \text{Qh7} \) (else 27 \( \text{Qxg6}! \)) 27 \( \text{Qc6} \). Or if 23...\( \text{Qc8} \) 24 \( \text{Qxc5} \) \( \text{Wxc5} \) 25 \( \text{Qfc1} \) \( \text{Qc3} \) 26 \( \text{Wb3} \)
(not 26 \( \text{Qb3} \) \( \text{Qxc4} \) 27 \( \text{Qxc3} \) \( \text{bxc3} \) 28 \( \text{Qxg6} \), on account of 28...\( \text{Qg7}! \))

1 Here 29 \( \text{Qf5}! \) is good for White, but, by substituting 28...\( \text{Qxd5} \), Alekhine's opinion is vindicated.
26...\textit{\underline{\textbf{Wd4}}} 27 \textit{\underline{\textbf{Hxc3}}} bxc3 28 \textit{\underline{\textbf{Cc1}}} and White cannot lose.

Thus Black must submit to this temporary retreat, while threatening 24...\textit{\underline{\textbf{Ec8}}}. But White seizes the opportunity to eliminate his weak c-pawn by a counter-sacrifice which opens new lines and affords at the same time excellent chances.

24 \textit{\underline{\textbf{C5}}}! \textit{\underline{\textbf{Xxd3}}}

25 \textit{\underline{\textbf{Exd3!}}}

After 25 \textit{\underline{\textbf{Wxd3}}} dxc5 Black’s two passed pawns would soon decide the game. The text move parries this danger, whilst opening the e-file for White. On the other hand there is the drawback, very slight though it may be, of weakening the king’s position, and particularly the square f3, a weakness which Black will exploit later on.

25 ... \textit{\underline{\textbf{Dxc5}}}

26 \textit{\underline{\textbf{Hxe1}}}

Against the plausible move 26 \textit{\underline{\textbf{Wc4}}}, which was equally to be considered, Black would have retorted 26...\textit{\underline{\textbf{Wd6!}}} 27 \textit{\underline{\textbf{Qxa5}}} \textit{\underline{\textbf{Qe5}}} 28 \textit{\underline{\textbf{Wb3}}} \textit{\underline{\textbf{Na8}}} with excellent chances.

26 ... \textit{\underline{\textbf{Qe5}}}

27 \textit{\underline{\textbf{He3}}}

The attempt to give back the exchange would have been insufficient: 27 \textit{\underline{\textbf{Wxc5}}} \textit{\underline{\textbf{Qf3+}}} 28 \textit{\underline{\textbf{Kf1}}} \textit{\underline{\textbf{Wxc5}}} 29 \textit{\underline{\textbf{Qxc5}}} \textit{\underline{\textbf{Qd2+}}}! 30 \textit{\underline{\textbf{He2}}} \textit{\underline{\textbf{Qxb1}}} 31 \textit{\underline{\textbf{Qxb1}}} \textit{\underline{\textbf{Qd8!}}} and Black wins a pawn.

27 ... \textit{\underline{\textbf{Rc8}}}

28 \textit{\underline{\textbf{Cc1}}} \textit{\underline{\textbf{Wd7!}}}

\textbf{29 \textit{\underline{\textbf{Dd4}}}} \textit{\underline{\textbf{Qg4}}}

\textbf{30 \textit{\underline{\textbf{He4}}}}

If 30 dx5 \textit{\underline{\textbf{Qxe3}}} 31 fxe3, then 31...\textit{\underline{\textbf{Wxa4!}}} (but not 31...\textit{\underline{\textbf{Wxd5}}}).

30 ... \textit{\underline{\textbf{C4!}}}

Now Black’s queenside pawns become very threatening. The question is, how to maintain them! The game now enters upon its most critical phase.

\textbf{31 \textit{\underline{\textbf{Qc5}}}}

If 31 \textit{\underline{\textbf{Qxa5}}} obviously 31...\textit{\underline{\textbf{Wxd5}}} and Black wins easily.

31 ... \textit{\underline{\textbf{Wf5!}}}

32 \textit{\underline{\textbf{We2!}}} \textit{\underline{\textbf{(D)}}}

White has defended himself excellently, and hopes to obtain a decisive advantage by the text move, which threatens the knight and the c-pawn at the same time; but Black’s reply gives him a disagreeable surprise.

\textbf{32 ... \textit{\underline{\textbf{Bb3!!}}}}

Before deciding on this surprising move, Black had to visualise the following variations, apart from the

\footnote{Why not 28...\textit{\underline{\textbf{Qf3+}}} and 29...\textit{\underline{\textbf{Qd2}}?}}
continuation played in the game itself:

1) 33 $f4 \text{ Wh5 } 34 \text{ xg4 } (\text{ or } 34 \text{ Whxg4 leading to line 2) } 34...\text{b2 } 35 \text{ b1, } d1 \text{ or } e1 \text{ (if } 35 \text{ Whxb2, then } 35...\text{Whxg4 as in the game) } 35...\text{xd4 and Black's pawns become overwhelming.}

2) 33 \text{ Whxg4 b2 } 34 \text{ b1 Whg4 } 35 \text{ Whxg4 c3 } 36 \text{ Qd3 } \text{ c4 } 37 \text{ Qxb2! } \text{ Wh4! } 38 \text{ We4 } \text{ f8 with advantage to Black, for if } 39 \text{ c11 f5 } 40 \text{ Qd3 fxe4 } 41 \text{ Qxb4 axb4 } 42 \text{ a5 } \text{ xd4 } 43 \text{ a6 } \text{ f7! and wins.}

33 \text{ Whxg4 } \text{ b2 }
34 \text{ Whxb2 } \text{ Whg4 }
35 \text{ We4 }

Apparently White has chosen the simplest method of extricating himself from his difficulties, for he has eliminated the passed pawns and remains a pawn to the good. However, Black's next move creates new difficulties for him.

35 ... h5!

Profiting by the immobility of the hostile pieces to threaten a mating attack by means of ...h4-h3, followed by ...Whf3.

36 \text{ Whc2 }

The only resource for the defense, in fact, consists in playing the white queen to d3.

36 ... \text{ h4 }

Naturally not 36...\text{xd4} on account of 37 \text{ Qg2}!.

37 \text{ Whd3 } \text{ Exd8! }
37...h3 would be insufficient, as after 38 f3 \text{ Wh5 } (38...\text{Whg5? } 39 \text{ Qe4! }) 39 \text{ We4 Wh6 } 40 \text{ Qc2 White could defend himself satisfactorily. }

38 \text{ f3 } \text{ Wh5 }

Not 38...\text{Wh3} on account of 39 g4 \text{ b8 } 40 \text{ Qe4 } \text{ b2 } 41 \text{ Qc8+! } \text{ f8 } 42 \text{ Qf2 and White would win the exchange. }

39 \text{ We4 } \text{ hxg3 }
40 \text{ hxg3 } \text{ Whg5! }
41 \text{ Qg2 } \text{ Whd2+ }

After 41...\text{xd5 White would have forced the exchange of queens by } 42 \text{ f4 Whh5 } 43 \text{ Whf3 and Black would have difficulty in securing the win.}

42 \text{ Wh3 } \text{ Wh6! (D) }

In order to occupy the h-file with the rook. This is the only means of securing the win.

43 \text{ Qc2 } \text{ Whh6+ }
44 \text{ Qg2 } \text{ Whg7 }

---

1 The whole combination is refuted by 39 d6! and after 39...exd6 40 \text{ Be1? or 39...e6 } 40 \text{ Bc1! } (40...f5 41 \text{ d7 Qe7 } 42 \text{ xe6+ } \text{ Qxd7 } 43 \text{ Qxg6} the mate threat allows White to unpin with gain of tempo, leaving him a rook up. It follows that Black should play 38...cxb2, which leads to a draw.
Otherwise this pawn would be lost without any compensation.

45 ... \textit{H}h8

46 \textit{W}f2!

It must be admitted that White defends himself with remarkable coolness.

46 ... \textit{H}b8!!

The point of the manoeuvre initiated by 42...\textit{H}f6. Black’s rook was brought to the \textit{h}-file solely in order to force the entry of the queen into White’s position. Its mission accomplished, the rook returns to the queenside and contributes to an attack against the mainstay of White’s position, the pawn on \textit{d}4, a manoeuvre against which White is absolutely defenceless.

47 \textit{W}e2 \textit{H}b4
48 \textit{H}d2 \textit{W}h2+
49 \textit{H}e3

Or 49 \textit{H}d3 \textit{W}g1!.

49 ... \textit{W}g1+
50 \textit{W}e2 \textit{H}xd4

Now White could well have resigned, but, on the contrary, he tries a desperate move and by his tenacity he achieves a partial success.

51 \textit{D}d3 \textit{H}b1

51...\textit{H}c3! 52 \textit{D}xb4 \textit{W}g2+ was immediately decisive.

52 \textit{D}c1! \textit{H}c3!

With 52...\textit{H}b4 53 \textit{D}d3 (there is nothing better) Black could have brought about the same position as after White’s 51st move; but he prefers to accept the \textit{fait accompli}, as the variation in the text appears to him to be sufficiently clear and satisfactory\footnote{52...\textit{W}f2+ 53 \textit{D}d3 \textit{W}f1+ wins at once after 54 \textit{H}e2 \textit{H}f6 or 54 \textit{W}e2 \textit{H}xc1 55 \textit{H}xd4 \textit{H}b4+.}.

53 \textit{W}xb1 \textit{W}g2+
54 \textit{D}d3 \textit{W}xd2+
55 \textit{C}c4 \textit{W}d4+
56 \textit{D}b3 \textit{H}a1! (D)

The continuation which Black had in view when playing 52...\textit{H}c3. Now White will find it impossible to defend his pawns. For example, if 57 \textit{D}d3 \textit{W}xd5+ 58 \textit{A}a3 \textit{H}f6 59 \textit{D}d1 g5! 60 \textit{W}e2 \textit{W}c4! 61 \textit{W}d1 \textit{W}c3+ 62 \textit{A}a2 e6! and Black wins.

57 \textit{A}a3 \textit{W}c5+
58 \textit{A}a2 \textit{H}f6
59 g5

Another desperate attempt. As the sequel will show, White follows a plan which promises him an illusory salvation.

59 ... \textit{W}xd5+
60 \textit{D}b3 \textit{W}xg5
61...\textit{We1}

Staking his last hope on the a-pawn, but his opponent will soon destroy this last illusion, by sacrificing his bishop for the a-pawn, after which the black passed pawns on the kingside win very easily.

61...\textit{Wg2}+
62...\textit{Wd2} \textit{Wxf3}!
63...\textit{Wxa5} \textit{g5}
64...\textit{We1} \textit{Wc3}
65...\textit{Wxc3} \textit{\&xc3}
66...\textit{a5} \textit{\&xa5}
67...\textit{\&xa5} \textit{g4}
68...\textit{\&c4} \textit{g3}
69...\textit{\&d2} \textit{\&g6}
70...\textit{\&b2} \textit{\&f5}
71...\textit{\&f3} \textit{\&f4}
72...\textit{\&g1} \textit{\&e3}
73...\textit{\&c2} \textit{\&f2}
74...\textit{\&h3}+ \textit{\&f1}

0-1

A very difficult and interesting game in all its phases.

Game 16
Alekhine – Bogoljubow
Triberg 1921
Brilliancy Prize
Queen’s Pawn Game

1...\textit{d4} \textit{\&f6}
2...\textit{\&f3} \textit{e6}
3...\textit{c4} \textit{b6}

This variation, which was abandoned by Bogoljubow as a result of this game, has been played with success in recent tournaments by the masters Sämisch and Nimzowitsch. Black’s defeat in the current game cannot therefore be attributed to the opening, but solely to his inaccurate fifth move. (See note thereto.)

4...\textit{g3} \textit{\&b7}
5...\textit{\&g2} \textit{c5}

This move gives White the choice of two replies. Besides 6...\textit{dxc5}, as in the present game, White can also continue with 6...\textit{d5} ed5 7...\textit{\&h4} (proposed by Rubinstein in the latest edition of Collijn’s Lärobok), and it is difficult to see how Black is to free his game. (Compare, however, the game Alekhine-Capablanca from New York 1927.)

The correct move for Black is 5...\textit{\&e7} followed by 6...0-0 0-0 7...\textit{\&c3} d5 8...\textit{\&e5}! \textit{\&c8}! (suggested by Sämisch), with a satisfactory game. Less good however, would be either 8...\textit{\&bd7} 9...\textit{exd5} \textit{\&xe5} (9...\textit{exd5} is better) 10...\textit{d6!} (Bogoljubow-Nimzowitsch, Karlsbad 1923), or 8...\textit{c6} 9...\textit{e4} \textit{\&bd7} 10...\textit{\&xc6} \textit{\&xc6} 11...\textit{exd5} \textit{\&b7} 12...\textit{d6} and White ends up winning a pawn (a variation suggested by the author).

6...\textit{dxc5}

As the sequel shows White secures an advantage by this simple move, thanks to the pressure he will exert on the open d-file.

6...\textit{\&xc5}

The position of the black bishops is stronger in appearance than in fact, as White’s castled position is perfectly secure.

7...0-0 0-0
8...\textit{\&c3} \textit{d5}

Giving White the opportunity of unmasking the g2-bishop with advantage. Relatively better is 8...\textit{\&a6}. 

\textit{\&a6}
although in this case also the weakness of his d-pawn would have been a source of difficulty for Black.

9 \( \text{\textit{Qd4!}} \)

Not 9 \( \text{\textit{Qe5}} \) because of the reply 9...\( \text{\textit{Qc7}} \) 10 \( \text{\textit{Qf4 \textit{Qh5}}} \).

9 ... \( \text{\textit{Qxd4}} \)

Perceiving the possibility of rid-
ing himself of the troublesome d-
pawn, Black allows his opponent the advantage of having two bishops, which, in this position, implies a very marked superiority. On the other hand, it is true that the alternative 9...\( \text{\textit{Qc6}} \) 10 \( \text{\textit{Qxc6 \textit{Qxc6}}} \) 11 \( \text{\textit{Qg5 \textit{Qc7}}} \) 12 \( \text{\textit{Qc1}} \) is hardly more attract-
ive.

10 \( \text{\textit{Qxd4}} \) \( \text{\textit{Qc6}} \)

11 \( \text{\textit{Qh4 \textit{dxc4}}} \)

Black hopes to obtain an approxi-
mately equal game by ...\( \text{\textit{Qe5}} \) or ...
\( \text{\textit{Qa5}} \), once White has recaptured the c-pawn with the queen. But White is careful to refrain from that course, and prefers to launch a direct attack on the black king which, de-
spite appearances, is insufficiently defended.

12 \( \text{\textit{Qd1!}} \) \( \text{\textit{Qc8 (D)}} \)

Forced. If 12...\( \text{\textit{Qe7}} \), then 13 \( \text{\textit{Qg5 \textit{h6}}} \) 14 \( \text{\textit{Qxf6 \textit{xf6}}} \) 15 \( \text{\textit{Qxf6 \textit{gxf6}}} \) 16 \( \text{\textit{Qd7}} \) winning knight and bishop for a rook.

13 \( \text{\textit{Qg5!}} \) \( \text{\textit{Qd5}} \)

Or 13...\( \text{\textit{Qd7}} \) 14 \( \text{\textit{Qe4}} \) with a strong attack for White. With the text move Black hopes to exchange one of the white bishops by a discovered attack on the 15th move.

14 \( \text{\textit{Qxd5 \textit{exd5}}} \)

15 \( \text{\textit{Qxd5!}} \)

This unexpected capture which, at first sight, seems to expose the rook to an attack by Black's bishop, is fully justified by the sacrificial lines following White's next move.

15 ... \( \text{\textit{Qb4 (D)}} \)

It is clear that other replies would be no better.

16 \( \text{\textit{Qe4!!}} \)

Decisive, as is shown in the variations given later on. The reader will clearly perceive a similarity with other games (which also gained a brilliancy prize) namely: v. Sterk at Budapest (Game 17) and Rubinstein at Karlsbad (Game 30). The leading characteristic in these games is an unforeseen but immediately decisive
attack. The chief point in these attacks lies in the fact that none of them was prepared in the immediate vicinity of its objective. On the contrary, all the preliminary manoeuvres which tended to divert the enemy pieces from the defence of their king took place in the centre or on the opposite wing. Furthermore, it is interesting to note that the deciding move, a real hammer-blow, is played by a bishop and always involves sacrificial variations.

These repeated attacks in the same manner, in the course of games of widely different character, seem to me to constitute a very precise criterion of a player’s style, or at least, of the evolution of his style.

16 ... f5

Other variations would be no better, e.g. 16...h6 17 axh6 f5 18 wg5 c7 19 xg7 xg7 20 xg7+ xg7 21 d7+ followed by xb7 or 16...g6 17 f6 xd5 18 xd5 and White wins in both cases.

After the text move Black loses his queen for a rook and a bishop, and White’s victory is only a question of time.
17 xf5! xf5
18 d8+ xd8
19 xd8 c8
20 d1 f7
21 g4 d3

An inoffensive manoeuvre. Black is quite helpless, and can only hope for a miracle!

22 exd3 xd8
23 dxc4 d8f8
24 f4 e7
25 e2 f2 h6
26 e1 c8
27 f3 e7
28 d5 g5
29 e7 gxf4
30 gxf4 1-0

Game 17
Alekhine – Sterk
Budapest 1921
Brilliance Prize
Queen’s Gambit Declined

1 d4 d5
2 e4 f3 e6
3 c4 c3 d7
4 e3

After Black’s last move, which is probably inferior to 4...e7, White has the choice of several good continuations:

1) 5 g5 (not 5 f4? dxc4 6 e3 b6!).

2) 5 cxd5 exd5 6 xf4! (proposed by Sämisch). On the other hand, Soldatenkov’s ingenious move 6 b3 proves insufficient, as the following variation shows: 6...c6 7 e4 xe4! 8 xe4 ce7!.

3) 5 e3, the text move, less energetic perhaps, but affording White a slight advantage in development if correctly followed up.

5 ... d6

---

1 18...h5 19 c3! is decisive.
A risky move which White does not exploit in the most energetic manner. Black obtains a satisfactory game by the more solid variation 5...\textit{\texttt{e7}} 6 \textit{\texttt{d3}} dxc4 7 \textit{\texttt{xc4}} c5.

6 \textit{\texttt{b5}}

With this reply, original but of doubtful value, White lets slip his chances. The retort 6 \textit{\texttt{c5}} \textit{\texttt{e7}} 7 \textit{\texttt{b4}} followed by 8 \textit{\texttt{b2}} was indicated, and would have enabled White to exercise pressure on the queenside before Black, by reason of his loss of time, could start counterplay in the centre. The text move is intended to prevent ...\textit{\texttt{e5}}, (which would occur after 6 \textit{\texttt{d3}} dxc4 7 \textit{\texttt{xc4}} 0-0 8 0-0, for example), but the loss of time occasioned allows Black to equalise the game without difficulty.

6 ... \textit{\texttt{e7}}
7 \textit{\texttt{c2}} c6
8 \textit{\texttt{c3}} 0-0
9 \textit{\texttt{d3}} dxc4
10 \textit{\texttt{xc4}} c5!

Black, as can easily be seen, has been fortunate enough to surmount all the difficulties of the opening.

11 dxc5

After 11 0-0 \textit{\texttt{b6}} 12 \textit{\texttt{d3}} cxd4 13 exd4 \textit{\texttt{d7}} White would not have sufficient compensation for his isolated d-pawn.

11 ... \textit{\texttt{xc5}}
12 0-0 b6
13 e4

White, after his careless treatment of the opening, seeks complications which are not without danger to himself. 13 \textit{\texttt{b3}} \textit{\texttt{b7}} 14 \textit{\texttt{b2}} \textit{\texttt{c8}} 15 \textit{\texttt{we2}} would suffice to equalise.

13 ... \textit{\texttt{b7}}
14 \textit{\texttt{g5}} \textit{\texttt{b7}}

Not 14 e5 \textit{\texttt{g4!}} 15 \textit{\texttt{g5}} g6 16 \textit{\texttt{xe6}} \textit{\texttt{h4}} 17 h3 \textit{\texttt{g3}} followed by mate.

14 ... \textit{\texttt{c8}}!

A very good move which puts an end to all the opponent's fond hopes. Not only is Black out of danger, but it is actually he who is going to undertake a counter-attack.

15 \textit{\texttt{we2}}

This prevents Black's threatened 15...\textit{\texttt{xf2+}}. However, 15 \textit{\texttt{d3}} was preferable.

15 ... \textit{\texttt{b4}}!

This move marks the critical phase. White, whose game is compromised, must make a serious effort to maintain equality. What is he to do? After 16 \textit{\texttt{ac1}} (16 e5 \textit{\texttt{g4}} is also bad) 16...\textit{\texttt{xc3}} 17 \textit{\texttt{d3}} \textit{\texttt{c5}}! 18 \textit{\texttt{xc3}} \textit{\texttt{xe4}}! 19 \textit{\texttt{xf6}} \textit{\texttt{xd3}}, Black would have a good game thanks to the threat against the rook on f1. After a quarter of an hour's perplexity, White succeeded in resolving the difficulty.

16 \textit{\texttt{d3}} \textit{\texttt{xc3}} (D)
17 $\text{Ke1}!$

The saving move, because if Black now plays 17...\text{Ke5}, which is
his best, the continuation would be
18 $\text{Kxe3 Ke4} 19 \text{Kxe6 Kxd3} 20 $\text{We3}!$ (here is the difference from the preceding variation: Black’s bishop
no longer attacks White’s rook on f1)
20...gx6 21 b4 $\text{Ke6} 22 \text{bxc5 bxc5} 23 \text{Kxc5},$ followed by 24 h4, and
White will find his attacking possibilities adequate compensation for
the pawn thus sacrificed.

17 ... $\text{Kxe4}$

Black attempts to win a pawn
without compromising the position
of his king, but does not sufficiently
consider the danger to which he ex-
poses his knight on c5.

18 $\text{Kxe4} 18 \text{Kxe4}$
19 $\text{Kxe4} 19 \text{Kxe4}$
20 $\text{We2}!$

More energetic than 20 \text{Kb1}, sug-
gested by some annotators, which, after
20...$\text{b4} 21 \text{a3 We7},$ would have yielded the win of only two minor pieces for a rook, while allowing
Black numerous defensive possibilities\textsuperscript{1}.

20 ... $\text{Ka5}$
21 $\text{Kab1} 21 \text{Kab1}$
22 $\text{Kc4} 22 \text{Kc4}$

An ingenious resource (the idea is
23 b4 $\text{Kc3}!$), but inadequate. How-
ever, Black has no longer any saving move. If, for example, 22...f6 then
23 $\text{Kd4}!$.

\textbf{23 $\text{Kf6}!!$}

The initial move of a mating at-
tack as elegant as it is unexpected,
which concludes the game in a few
moves. Black is threatened with 24
$\text{Kg4 Wxe2} 25 \text{Kxg7+} and mate next
move. If 23...h5 24 $\text{Kg4! Wxe2} 25$
$\text{Kxg7+ Sh8} 26 \text{Kg5}!$ and Black has
no defence against 27 $\text{Kf7+},$ fol-
lowed by 28 $\text{Kh8} mate.$ If 23...h6 24
$\text{Ke5}!$ with the threat 25 $\text{Kg4},$ and
White wins.

23 ... $\text{Kf8}!$

The only move! White replies to
it with a new surprise.

24 $\text{Ke5}!$

The necessary corollary to the
preceding move.

24 ... $\text{Kc5}$

The following variations are also
insufficient:

1) 24...$\text{Kxc4} 25 \text{Kg5 Ke8} 26$
$\text{Kxg7+ Ke8} 27 \text{Kg8+ Kd7} 28 \text{Ke5+}$
$\text{Kc7} 29 \text{Kxf7+ and 30 Kxc4}.$

2) 24...$\text{Kxc4} 25 \text{Kg5 Kg4} 26$
$\text{Kxg4 g6} 27 \text{Kxa4}.$

\textsuperscript{1} 22 b3! actually nets a whole piece, so this would indeed have been a
straightforward win for White. Black’s 17th move is really just a blunder.
3) 24...gxf6 25 \( \text{g}4+ \) and mate in two moves.

After the text move the variation 25 \( \text{x}c5 \) gxf6 should win in the long run, but White answers with a still stronger reply.

25 \( \text{wg}3! \)

Simple and decisive.

25 ... \( \text{g}6 \)
26 \( \text{x}a4 \) \( \text{wd}3 \)
27 \( \text{f}1 \) \( \text{f}5 \)
28 \( \text{f}4 \) \( \text{c}2 \)
29 \( \text{h}6 \) 1-0

Game 18
Alekhine – Bogoljubow
Budapest 1921
Queen’s Pawn Game

1 \( \text{d}4 \) \( \text{f}6 \)
2 \( \text{c}4 \) \( \text{e}6 \)
3 \( \text{f}3 \) \( \text{b}4+ \)

3...d5 or 3...b6 would be preferable.

4 \( \text{d}2 \) \( \text{xd}2+ \)

This exchange assists White’s development. In the Queen’s Gambit, Black’s dark-squared bishop is far too valuable a defensive piece to be exchanged in the opening with loss of time.

5 \( \text{xd}2 \) 0-0
6 \( \text{c}3 \) \( \text{d}5 \)
7 \( \text{e}3 \) \( \text{bd}7 \)
8 \( \text{d}3 \) \( \text{c}6 \)
9 0-0

Allowing Black to free himself by an ingenious manoeuvre. White could have frustrated this plan by 9 \( \text{xd}1! \) and Black’s position would have remained very cramped.

9 ... \( \text{dxc}4 \)
10 \( \text{x}c4 \) \( \text{e}5! \) (D)

Taking advantage of the exposed position of White’s queen, for if now 11 \( \text{dxe}5 \), then 11...\( \text{x}e5! \), and Black equalises with ease.

11 \( \text{b}3! \)

By this move, which prevents Black from gaining time later on with ...\( \text{b}6 \), White indirectly meets 11...e4, which would now result merely in the loss of a pawn after 12 \( \text{g}5 \), and thus White still maintains a slight superiority.

The sacrifice 11 \( \text{xf}7+ \) would only lead to a draw, for example 11...\( \text{xf}7 \) (not 11...\( \text{xf}7? \) 12 \( \text{dxe}5 \) \( \text{g}4 \) 13 \( \text{ad}1! \) \( \text{e}7 \) 14 \( \text{e}6+! \) \( \text{xe}6 \) 15 \( \text{d}4 \) \( \text{ge}5 \) 16 \( \text{xe}5 \) \( \text{xe}5 \) 17 \( \text{f}4! \), and White obtains a strong attack) 12 \( \text{dxe}5 \) \( \text{g}4 \) 13 \( \text{e}6 \) \( \text{xf}3! \) 14 \( \text{exd}7 \) \( \text{xd}7 \) 15 \( \text{gxf}3 \) \( \text{xh}2! \) (and not 15...\( \text{h}4 \), because of 16 \( \text{d}6 \) 16 \( \text{h}2 \) \( \text{h}4+ \) and draws by perpetual check.

11 ... \( \text{e}7 \)

In his game against Jöhnke (Pis-tyan 1922), Grünfeld tried 11...\( \text{exd}4 \) 12 \( \text{xd}4 \) (12 \( \text{exd}4 \) also deserves
consideration) 12...\(\text{b6}\) and finally secured the draw. After the text move the superiority of White’s game is clear.

12 \(\text{e4!}\) \(\text{exd4}\)
13 \(\text{\&xd4}\) \(\text{\&c5}\)
13...\(\text{\&xe4}\) is impossible, both now and on the next move, on account of \(\text{\&e3}\) winning a piece.
14 \(\text{\&c2}\) \(\text{\&d8}\)
15 \(\text{\&ad1}\)

Threatening 16 \(\text{\&xc6}\).
15 ... \(\text{\&g4}\)
16 \(\text{f3}\) \(\text{\&e6}\)
17 \(\text{\&f2}\) \(\text{\&xd4}\)
18 \(\text{\&xd4}\) \(\text{\&e6}\)
19 \(\text{\&fd1}\)

Black was compelled to abandon the only open file in order to develop his light-squared bishop. Moreover, the white centre pawns, thanks to their mobility, will be able to attack Black’s knight and bishop successfully. As against this, the notorious ‘majority of pawns on the queenside’ is not, at the moment, of any value, for their advance, as is shown in the present game, will give rise to new weaknesses, which the opponent will turn to advantage. The game is already virtually decided.

19 ... \(\text{b6}\)

Defending his a-pawn, which was indirectly attacked.

20 \(\text{h3!}\)

Preparing the advance of the f-pawn.

---

20 ... \(\text{c5}\)

This move leads to nothing, seeing that it does not compel the exchange of rooks. It would have been rather better (now, or on the 22nd move) to take measures against the advance of White’s e- and f-pawns by playing, for example, 20...\(\text{\&e8}\) followed by ...\(\text{f6}\).

21 \(\text{\&4d2}\) \(\text{\&xd2}\)
22 \(\text{\&xd2}\) (D)

---

22 ... \(\text{c4}\)
23 \(\text{f4}\) \(\text{g6}\)

If 23...\(\text{\&c5+}\) simply 24 \(\text{\&d4!}\) and Black’s position after the exchange of queens would be untenable, despite his majority on the queenside.

24 \(\text{\&d4}\)

Threatening to win a pawn by 25 \(\text{f5}\).

24 ... \(\text{\&c8}\)
25 \(\text{g4!}\)

Decisive! Black has no adequate defence against the threats 26 \(\text{f5}\), or 26 \(\text{e5}\) followed by 27 \(\text{f5}\).

---

1 Here 14...\(\text{\&fxe4}\) is met by 15 \(\text{\&xe4}\) \(\text{\&xe4}\) 16 \(\text{\&e3}\), rather than the immediate 15 \(\text{\&e3}\), when 15...\(\text{f5}\) 16 \(\text{f3}\) \(\text{\&g5!}\) defends.
25 ...  \( \text{\textit{\textdaggerhead}xg4} \)

A desperate sacrifice which cannot defer the imminent catastrophe any more than other attempts.

26  \( h\text{xg4} \)  \( \text{\textit{\textdaggerhead}xg4} \)

27  \( \text{\textit{\textdaggerhead}g2!} \)  \( h5 \)

28  \( \text{\textit{\textdaggerhead}d5} \)  \( \text{\textit{\textdaggerhead}h4} \)

29  \( \text{\textit{\textdaggerhead}h1} \)  \( \text{\textit{\textdaggerhead}d8} \)

30  \( \text{\textit{\textdaggerhead}d1!} \)  1-0

An instructive game from the strategic point of view.

Game 19

Steiner – Alekhine

Budapest 1921

Alekhine Defence

1  \( e4 \)  \( \text{\textit{\textdaggerhead}f6} \)

This new defence was played for the first time by myself in a consultation game at Zurich (August 1921), and was introduced into master practice shortly afterwards at the Budapest Tournament in September of the same year. Its correctness now seems perfectly established. One of the most searching proofs of its vitality lies in the fact that Dr. Emanuel Lasker, ex-champion of the world, although openly opposed to this defence, successfully adopted it against Maroczy at the New York Tournament (March-April 1924), after having tried in vain to demolish it.

In the course of an encounter between Dr. Lasker and Dr. Tarrasch, Black obtained a clearly superior, if not a winning, game in the following way: 1 \( e4 \)  \( \text{\textit{\textdaggerhead}f6} \) 2 \( e5 \)  \( \text{\textit{\textdaggerhead}d5} \) 3 \( d4 \)  \( d6 \) 4 \( c4 \)  \( \text{\textit{\textdaggerhead}b6} \) 5 \( f4 \)  \( \text{\textit{\textdaggerhead}xe5} \) 6 \( \text{\textit{\textdaggerhead}xe5} \)  \( \text{\textit{\textdaggerhead}c6} \) 7 \( \text{\textit{\textdaggerhead}e3} \) 8 \( \text{\textit{\textdaggerhead}f5} \) 9 \( \text{\textit{\textdaggerhead}c3} \) 10 \( \text{\textit{\textdaggerhead}f3} \) 11 \( \text{\textit{\textdaggerhead}b4} \) 10 \( \text{\textit{\textdaggerhead}d3} \) 12 \( \text{\textit{\textdaggerhead}g4} \) 11 \( \text{\textit{\textdaggerhead}e2} \) 13 \( \text{\textit{\textdaggerhead}xf3} \) 12 \( \text{\textit{\textdaggerhead}xf4} \) 13 \( \text{\textit{\textdaggerhead}f2} \) 14 \( \text{\textit{\textdaggerhead}f4} \)!

2  \( e5 \)

In a game Bogoljubow-Alekhine (Karlsbad 1923), White tried 2 \( \text{\textit{\textdaggerhead}c3} \) upon which Black replied by 2... \( \text{\textit{\textdaggerhead}d5} \) (2... \( e5 \), transposing into the Vienna Game, is also to be considered), leading to the continuation 3 \( e5 \)  \( \text{\textit{\textdaggerhead}fd7} \) 4 \( d4 \)  \( c5 \) 5 \( \text{\textit{\textdaggerhead}b5} \)  \( \text{\textit{\textdaggerhead}c6} \) 6 \( \text{\textit{\textdaggerhead}f3} \) and now Black could have reached a very advantageous variation of the French Defence by 6... \( e6 \) in place of the risky line 6... \( a6 \) 7 \( \text{\textit{\textdaggerhead}xc6} \) \( bxc6 \) 8 \( e6 \)!

2 ...  \( \text{\textit{\textdaggerhead}d5} \)

3  \( d4 \)

In a game Sämisch-Alekhine from the same tournament, White continued by 3 \( \text{\textit{\textdaggerhead}c3} \) \( e6 \)! 4 \( \text{\textit{\textdaggerhead}xd5} \) \( exd5 \) 5 \( d4 \)  \( d6 \) 6 \( \text{\textit{\textdaggerhead}f3} \)  \( \text{\textit{\textdaggerhead}c6} \) 7 \( \text{\textit{\textdaggerhead}e2} \)  \( e7 \) 8 \( \text{\textit{\textdaggerhead}f4} \) 0-0 9 0-0  \( f6 \) 10 \( \text{\textit{\textdaggerhead}xf6} \) \( \text{\textit{\textdaggerhead}xf6} \) and Black had a slightly superior game.

3 ...  \( d6 \)

4  \( \text{\textit{\textdaggerhead}g5} \)

After this move, whose object is to hinder the advance of the hostile c-pawn, White loses his advantage, because of the difficulties he will experience in defending his own e-pawn. The most dangerous line of play for Black is undoubtedly 4 \( c4 \) followed by 5 \( f4 \).

4 ...  \( \text{\textit{\textdaggerhead}xe5} \)

5  \( \text{\textit{\textdaggerhead}xe5} \)  \( \text{\textit{\textdaggerhead}c6} \)

6  \( \text{\textit{\textdaggerhead}b5} \)  \( \text{\textit{\textdaggerhead}f5} \)!

Black is not concerned about the possibility of doubled pawns. If 7 \( \text{\textit{\textdaggerhead}xc6+} \), the possession of his two bishops, the open b-file and his better
development would constitute excellent compensation for the slight weakness on c6.

7 \textit{\text{Qf3}} \textit{\text{Qb4!}}

The win of a pawn by this last move required a minute examination of all its consequences.

8 \textit{\text{Qa3}} \textit{\text{Qxd1+}}
9 \textit{\text{Qxd1!}}

The best reply, for after 9 \textit{\text{Qxd1}} 0-0-0+ 10 \textit{\text{Qc1}} f6 Black’s position would be distinctly superior.

9 ... \textit{\text{Qxc2+}}
10 \textit{\text{Qxc2}} \textit{\text{Qxc2}}
11 \textit{\text{Qc1}} \textit{\text{Qe4}}
12 \textit{\text{Qd4}}

If 12 e6, Black would have answered simply 12...f6! followed by 13...0-0-0.

12 ... \textit{\text{Qxg2}}
13 \textit{\text{Qg1}} 0-0-0

The point of the manoeuvre initiated on the 7th move. Nevertheless, the material advantage of a pawn, which Black has succeeded in securing, seems very difficult to utilise, because of his poor development.

14 \textit{\text{Qxc6}} \textit{\text{Qxc6}}
15 \textit{\text{Qxc6}} bxc6
16 \textit{\text{Qxc6}} \textit{\text{Qd5}}
17 \textit{\text{Qf4}} e6
18 \textit{\text{Qe2}} (D)

How ought Black to strengthen his position now? For example, here are two plausible suggestions which give no satisfactory result against a correct defence:

1) 18...g6 19 \textit{\text{Qgc1}} \textit{\text{Qd7}} 20 \textit{\text{Qe3}} \textit{\text{Qb7}} 21 \textit{\text{Qc6c3}} \textit{\text{Qg7}} 22 \textit{\text{Qb3+ Qa8}} 23 \textit{\text{Qxa7! Qxe5}} 24 \textit{\text{Qc4}} with the better game for White.

2) 18...g5 19 \textit{\text{Qxg5! Qh6}} 20 \textit{\text{Qg4 Qxf4}} 21 \textit{\text{Qxf4 Qxe5+}} 22 \textit{\text{Qf1 Qb7}} 23 \textit{\text{Qc3}}, and Black has no chance of winning.

18 ... \textit{\text{Qc5!}}

...whereas this move, which at first sight does not seem better than the above-mentioned moves, is the only one enabling Black to maintain his advantage.

19 \textit{\text{b4!}}

The right reply, permitting White to force a favourable exchange. It is clear that Black’s g-pawn cannot be taken at once, owing to ...\textit{\text{Qxb7}}.

19 ... \textit{\text{Qxb4}}
20 \textit{\text{Qxg7}} \textit{\text{Qd7}}
21 \textit{\text{Qe3}}

Black is once again faced with a very difficult problem. How is he to secure the defence of his weak pawns on both wings? His lone bishop is insufficient for this task, since if it be brought to b6 via a5, thereby adequately protecting his queenside, White would transfer his attack to the opposite wing and would eventually win at least a pawn by \textit{\text{Qc4}} followed by \textit{\text{Qh4}}. On the other hand, if Black withdraws his
bishop to f8, in order to secure the protection of his kingside, White would take the queenside as his objective and would obtain a strong attack by $\text{Ng}4$ followed by $\text{Nxa}4$.

Black must therefore avoid committing his bishop, in order to be able to utilise it for the defence of whichever wing is threatened. His following moves are dictated by the above considerations.

21 ... $\text{a}5 !$
22 $\text{Exc}4$ $\text{h}5$
23 $\text{Exh}4$ $\text{c}3 !$
24 $\text{Exg}5$ $\text{Ed}5$
25 $\text{f}4$ $\text{f}6 !$

Definitely maintaining his material advantage, which the following exchanges help him to exploit.

26 $\text{Gxh}5$ $\text{hxh}5$
27 $\text{Exh}5$ $\text{fxe}5$
28 $\text{fxe}5$ $\text{xe}5$
29 $\text{Nh}7$

29 $\text{h}4$ would leave White some hope of a draw, but after the text move Black forces the exchange of this dangerous pawn.

29 ... $\text{b}5 !$
30 $\text{f}3$ $\text{b}2$
31 $\text{Nh}5$

Forced, since after 31 $\text{h}4$ $\text{xa}2$ Black's passed a-pawn would be at least as dangerous as White's passed h-pawn.

31 ... $\text{xe}2$
32 $\text{xa}5$ $\text{d}6$

The ensuing endgame, although won for Black, nevertheless offers several technical difficulties, and is not devoid of interest.

33 $\text{e}4$ $\text{d}7$

34 $\text{d}4$ $(D)$

Temporarily preventing 34...c5, which Black now prepares by the following rook manoeuvre.

34 ... $\text{d}2 !$

Hindering $\text{d}3$-c4.

35 $\text{e}3$ $\text{e}2$

36 $\text{d}3$ $\text{e}1 !$

37 $\text{d}4$ $\text{c}1$

37...e5 would still be premature, on account of 38 $\text{c}3$.

38 $\text{e}3$ $\text{d}1+$

39 $\text{e}4$ $\text{e}1$

40 $\text{d}3$ e5

At last it is playable!

41 $\text{f}2$ $\text{f}1$

42 $\text{e}3$ $\text{e}6$

43 $\text{e}4$ $\text{h}1$

44 $\text{f}2$ $\text{h}2$

45 $\text{e}3$ $\text{h}4+$

46 $\text{d}3$ $\text{b}4$

Thereby securing for his king access to the square d5, which is of great importance.

47 $\text{a}7$

Or 47 $\text{a}4$ $\text{d}5$ 48 $\text{a}3$ $\text{e}4+$ 49 $\text{c}2$

$\text{d}6$.

47 ... c5

48 $\text{a}3$ c4+
49 \text{\textit{f}e2} \text{\textit{d}d6} \\
50 \text{\textit{a}a8} \\
In order to pin the Black’s bishop by \textit{d}d8, after \ldots \textit{d}d5.
\begin{align*}
50 & \ldots \text{\textit{h}h2}+ \\
51 & \text{\textit{d}d1} \text{\textit{h}h3}! \\
52 & \text{\textit{d}d2} \text{\textit{d}d5} \\
53 & \text{\textit{a}a8} \text{\textit{c}c3}+!
\end{align*}

The \textit{coup de gr\^{a}ce}.

54 \textit{e}e2 \\
If 54 \textit{d}d3 Black had foreseen the following pretty finish: 54...c2 55 \textit{c}c8 \textit{e}e7! 56 \textit{x}xc2 \textit{g}g5 57 \textit{c}c2 \textit{c}e4+ 58 \textit{d}d2 \textit{x}xe3 59 \textit{x}xe3 \textit{d}d4 and wins.
\begin{align*}
54 & \ldots \textit{e}e4 \\
55 & \textit{x}xd6 \textit{xe}3+ \\
56 & \textit{t}f2 \textit{d}d3 \\
57 & \textit{c}c6 \textit{d}d2+ \\
58 & \textit{e}e1 \textit{d}d3 \\
59 & \textit{d}d6+ \textit{c}c2 \\
60 & \textit{e}e6 \textit{d}d5 \\
61 & \textit{e}e2 \textit{b}b3 \\
62 & \textit{c}c6 \textit{c}2
\end{align*}

0-1

Game 20

Alekhnine – Rubinstein

The Hague 1921

Queen’s Gambit Declined

1 \textit{d}d4 \textit{d}d5 \\
2 \textit{f}f3 \textit{e}6 \\
3 \textit{c}c4 \textit{a}6

A move of Janowski’s, which has been quite frequently played by Rubinstein in recent tournaments, but without appreciable success. Necessary in the greater number of the variations of the Queen’s Gambit Accepted, 3...\textit{a}6 is here merely a

loss of time, and in addition creates weaknesses on the queenside when White continues by 4 cxd5 or even 4 c5, as in the present game.

4 \textit{c}c5

4 cxd5 is quite sufficient to secure a slight superiority, as was shown by Johner-Rubinstein and Kostić-Rubinstein from the Teplitz-Schönau Tournament of 1922, among others.

The former game continued 4 cxd5 exd5 5 \textit{c}c3 \textit{f}f6 6 \textit{g}g5 \textit{e}e7 7 e3 0-0 8 \textit{d}d3 b6 (a little better, but also insufficient to equalise the game, was 8...\textit{bd}7 9 \textit{w}c2! 9 \textit{xf}6! \textit{xf}6 10 \textit{w}c2 h6, and Johner could have obtained a very strong attack against Black’s weakened kingside by 11 h4, followed by 12 0-0-0 and g4. In his game against Kostić, Rubinstein tried 5...\textit{e}7 in place of 5...\textit{f}f6, and the continuation was 6 \textit{f}f4 \textit{f}f6 7 e3 0-0 8 \textit{d}d3 \textit{bd}7 9 0-0 \textit{e}e8 10 \textit{c}c1 b6, after which White could have obtained a distinctly superior game by 11 h3 (in order to conserve his dark-squared bishop against the threat of exchange by \ldots \textit{h}h5).

In the present game, the first that I played against Rubinstein after a seven-year interval, I voluntarily adopted a new line of play in order to avoid the variations resulting from 4 cxd5 (because I rightly thought them very familiar to Rubinstein), resolving that I would do or die!

4 \ldots \textit{c}c6

Wishing to play 5...\textit{e}5, which White must oppose by every means at his disposal.
5 \( \text{\textit{f4}} \) \( \text{\textit{gge7}} \)  
6 \( \text{\textit{Cc3}} \) \( \text{\textit{gg6}} \)  
7 \( \text{\textit{Ce3!}} \)

A move rather out of the ordinary! White, while preventing 7...e5, also avoids the exchange of his dark-squared bishop. I learnt, some time after the game ended, that Rubinstein, in Collijn's \textit{Lärobok}, only examined 7 e3, a variation leading to equality.

7 ... \( \text{\textit{b6}} \)

Black, giving up hope of breaking through in the centre, at least eliminates the cramping white c-pawn, and reckons to secure an advantage in development, by reason of the unusual position of White's bishop at e3.

8 \( \text{\textit{cxb6}} \) \( \text{\textit{cxb6}} \)  
9 \( \text{\textit{h4!}} \)

The only means of weakening the dark squares of the enemy's position, and thus obtaining a future for his e3-bishop.

9 ... \( \text{\textit{Cd6}} \)

If 9...h5 then 10 \( \text{\textit{g5}} \) f6 11 \( \text{\textit{Cc2}} \) followed by \( \text{\textit{Cd2, e3, a3 and Cd3,}} \) with the better game for White.

10 \( \text{\textit{h5}} \) \( \text{\textit{Ge7}} \)

Not 10...\( \text{\textit{f4?}} \) 11 g3.

11 \( \text{\textit{h6!}} \)

The point! If Black captures the h-pawn, he weakens his own h-pawn without the slightest compensation. After other moves, White's dark-squared bishop will occupy the diagonal h4-d8, where it exercises a very embarrassing pressure.

11 ... \( \text{\textit{g6}} \)  
12 \( \text{\textit{Gg5}} \) \( \text{\textit{0-0}} \)

More prudent was first 12...f5, after which Black would not have had to fear the threat of mate at g7, although in any case White's game would have been preferable.

13 \( \text{\textit{f6}} \) (D)

An extraordinary position after the 13th move of a Queen's Gambit! During the first thirteen moves White has played his c-pawn thrice, his h-pawn thrice and his dark-squared bishop four times, after which he has obtained a position in sight of a win, if not actually a winning one. It is especially with respect to the original opening of this game that people often speak of a 'hyper-modern technique', a 'neo-romantic school', etc.

The question is, in reality, much simpler. Black has given himself over to several eccentricities in the opening (3...a6; 5...\( \text{\textit{Ge7}} \); 6...\( \text{\textit{Gg6}} \)) which, without the reaction of his opponent (for example, 7 e3 instead of 7 \( \text{\textit{Ce3}} \) or 9 g3 instead of 9 h4) would in the end have given him a good game. It is, therefore, as a necessity, and not with a preconceived
idea, that I decided upon the advance of the h-pawn, preventing Black from securing an advantage in the centre. But, as a rule, in the opening stages of a game such eccentricities are in accordance neither with my temperament nor my style, as the reader can see from the perusal of this book.

13 ... b5
14 e3 d7
15 d3 c8

Black dreams only of the possibility of an immediate attack by White (commencing by d5 or d5 followed by f3), which he hopes to thwart by a demonstration on the queenside (...a5, ...b4).

With this idea, the preparatory move 15...c8 would have been very useful. But as White is not compelled to bestir himself as long as the opponent does not trouble him seriously, it would have been better for Black to play at once 15...a5, followed by 16...b4, and thus force White, by this semblance of a counter-attack, to take some defensive measures.

16 a4! (D)

Whereas it is now White who seizes the initiative on the queenside, forcing Black to block this part of the board, and thereby allowing White to post his c3-knight in a dominating position without loss of time.

16 ... b4
17 e2 b6
18 c1!

Preventing 18...b3.

18 ... c7
19 d3 a5

Too late!

20 c5!

By this manoeuvre White transforms his positional advantage into a gain of material, Black being unable to capture the knight, for example 20...xc5 21 dxc5 xc5 22 d4 c6 23 e5 b7 24 g4, winning the exchange. If 20...c8, then 21 e5, with similar variations.

20 ... e4 (D)

This move is not a whit better than those given above. It allows White the pleasant choice between two very good variations, but it happens that White chose the less decisive one.

W
21 \( \texttt{\&xc4} \) \texttt{dxc4}
22 \( \texttt{\&e5} \)

22 \( \texttt{\&e4} \) would force the win of the exchange, and also maintain the attack, in view of the double threat of 23 \( \texttt{\&xd6} \) followed by 24 \( \texttt{\&e5} \), and 23 \( \texttt{\&g7} \) followed by 24 \( \texttt{\&f6#} \).

22 \( \ldots \) \texttt{\&xe5}
23 \( \texttt{\&xe7} \)\textsuperscript{2} \texttt{\&d6}!

With his clear judgement of position, Rubinstein at once recognises that the sacrifice of the exchange offers him the best chance. Indeed, after 23...\( \texttt{\&e8} \) 24 \( \texttt{dxe5} \) \texttt{\&xe7} 25 \( \texttt{\&e4} \) (not 25 \( \texttt{\&f3} \) f5 26 exf6 \texttt{\&f7} with defensive chances), Black would have lost more speedily than in the actual game, e.g.:

1) 25...f5 26 \( \texttt{\&d6} \) c6 27 \( \texttt{\&f6+ \&f7} \) 28 \( \texttt{\&d8}! \) \texttt{\&e8} 29 \( \texttt{\&xh7} \) and White wins.

2) 25...\( \texttt{\&e8} \) 26 \( \texttt{\&f6+ \&h8} \) 27 \( \texttt{\&d8} \) b7 28 \( \texttt{\&d1} \) c6 29 0-0, winning.

24 \( \texttt{\&xf8} \) \texttt{\&xf8}
25 \( \texttt{\&xd7} \) \texttt{\&xd7}
26 a5!

Preventing the consolidation of Black's pawn structure by 26...a5.

26 \( \ldots \) \texttt{\&c6}
27 \( \texttt{\&f3} \) \texttt{\&d5}
28 \( \texttt{\&c1}! \)

This move, which forces the advance of the c4-pawn, is intended to clear up the position on the queenside, so that White is able to commit his pieces to the most favourable squares.

28 \( \ldots \) \texttt{\&c7}
29 \( \texttt{\&e2} \) \texttt{c3}
30 \( \texttt{\&xc3} \) \texttt{\&xc3}
31 \( \texttt{\&xa6} \) \texttt{\&xa5}
32 \( \texttt{\&d3} \) \texttt{\&a3}

If 32...\( \texttt{\&a3} \) White would have continued 33 \( \texttt{\&e2} \) followed by 34 \( \texttt{\&a1} \).

33 \( \texttt{\&c2} \) \texttt{\&b2 (D)}

34 \( \texttt{\&e2}! \)

Not 34 0-0 because of 34...\( \texttt{\&h5} \) winning the h-pawn, when Black has good drawing chances.

34 \( \ldots \) \texttt{\&c6}
35 \texttt{f3} \texttt{f5}
36 \( \texttt{\&b1} \) \texttt{\&d6}

If 36...\( \texttt{\&d5} \), then 37 \( \texttt{\&f2} \) threatening 38 \( \texttt{\&xc3} \) \texttt{\&xc3} 39 \( \texttt{\&xc3} \) \texttt{\&a8} 40 \( \texttt{\&c7} \) and wins.

37 \( \texttt{\&c4} \) \texttt{\&f7}
38 \( \texttt{\&c8} \) \texttt{\&a6+}

---

1 It isn't clear that 22 \( \texttt{\&e4} \) is better than the game after 22...\( \texttt{\&f5} \).

2 White could have played 23 \( \texttt{\&xe5} \) \texttt{\&a7} 24 \( \texttt{\&e4} \) \texttt{\&d5} 25 \( \texttt{\&d6} \), followed by \( \texttt{\&c5} \), which would have won the exchange while eliminating Black's potentially dangerous dark-squared bishop, and this would probably have been the most accurate line of all.
The exchange of queens is forced, as White threatens 39 Wh8.

39 wxa6  xxa6
40 e4  g5
41 d3  g6
42 d5!

Thus obtaining a passed pawn, which decides the game in a few moves. Black’s desperate attempts to obtain a last chance on the kingside merely succeed in leading his king into a cul-de-sac.

42 ...  fxe4+
43 fxe4  exd5
44 exd5  xa4
45 d1!

Indirectly supporting the d-pawn.

45 ...  xh6
46 d6  h5
47 d7  a8
48 e4  d8
49 f5  h4
50 h1+  g3
51 h3#

Game 21
Tarrasch – Alekhine
Pistyan 1922
Brilliancy Prize
Queen’s Pawn Game

1 d4  f6
2 d3  e6
3 c4  c5

With the intention of investigating, on the next move, the gambit discovered by the Moscow amateur Blumenfeld. Since then it has been shown that this gambit is not favourable for Black if White should decline it.

4 d5  b5
5 dxe6

The acceptance of the gambit yields Black a formidable position in the centre. The right move was 5 g5!. Equally possible, although less strong, is 5 e4, played by Rubinstein against Tartakower at Teplitz-Schönau 1922.

An instructive game, Grünfeld-Bogoljubow, from the Vienna Tournament of 1922, continued 5 g5 h6 6 xxf6 xf6 7 c3 b4 8 b5 da6 9 e4! xb2 10 h3! d6 11 e5 d8 12 dx6 dx6 13 c4! xd1+ 14 xd1 b8 15 c6+ e7 16 xa7 g5 17 b5 g7 18 c6+ and mates next move.

5 ...  fxe6
6 cxb5  d5
7 e3

Black threatened to regain his pawn with the better game by means of 7...wa5+. However, 7 bd2 followed by b3 and b2 offered White better defensive chances.

7 ...  d6
8 c3  0-0
9 e2  b7
10 b3  bd7
11 b2  e7

Black has completed his development, and prepares in perfect safety the advance of his e-pawn, which, while restricting still more White’s position, will also secure him a very dangerous attack against White’s king.

12 0-0  ad8

Black has no need to hasten the advance of his e-pawn, his opponent
at present being able to attempt absolutely nothing.

13 \( \text{c2} \) e5
14 \( \text{f1} \)

In order to defend the square h2, by bringing his f3-knight via d2 to f1. From now on White defends himself in the most skilful way, but his game is already too far compromised by the strategic error of the opening, ceding the centre to his opponent in exchange for a pawn of little value.

14 ... e4
15 \( \text{d2} \) e5
16 \( \text{d1} \) \( \text{f1} \)
17 \( \text{xg4} \)

This exchange is forced, for if 17 \( \text{f1} \) then 17...\( \text{f3+!} \).

17 ... \( \text{xg4} \)
18 \( \text{f1} \) \( \text{g5!} \) (D)

by playing h2-h3 which, as we shall see by the sequel, will allow the decisive advance of Black's d-pawn.

19 h3 \( \text{h6} \)
20 \( \text{h1} \) \( \text{f5} \)
21 \( \text{h2} \)

It is clear that White's last three moves were the only ones possible to defend g2 by means of \( \text{g1} \).

21 ... d4!

This pawn becomes a new and formidable means of continuing the attack. White cannot capture it, e.g. 22 exd4 e3! 23 \( \text{xex3} \) (or 23 \( \text{g1} \) \( \text{g3!} \) and wins) 23...\( \text{xe3} \) 24 fxe3 \( \text{g}3! \) and wins.

22 \( \text{c1} \) d3
23 \( \text{c4+} \) \( \text{h8} \)
24 \( \text{b2} \) \( \text{g3}+ \)

The beginning of the final manoeuvre. It is clear that the knight cannot be taken, on account of 25...\( \text{xg3} \) forcing mate. After the following move Black could have won the exchange by 25...d2, but he preferred to wind up the game by a forced combination.

25 \( \text{g1} \) \( \text{d5} \) (D)

The correct continuation of the attack. White has adequately defended the squares f2 and h2, but the g2-point is still vulnerable. So it is against this point that Black intends to undertake a double attack, bringing the knight to h4 via h6 and f5. To parry this threat White will be compelled to weaken his position afresh.

26 \( \text{a4} \)
If 26 \( \text{w}c3 \) (or 26 \( \text{w}c1 \)) 26...\( \text{d}e2+ \), winning easily.

26 ... \( \text{d}e2+ \\
27 \text{h}h1 \text{h}f7!

There was no reason to complicate the game by the sacrifice of the \( a \)-pawn.

28 \( \text{w}a6 \text{h}5! \\
As we shall see by the continuation, this was necessary to prepare the sacrifice of the bishop on the 34th move.

29 \( \text{b}6 \text{g}g3+ \\
Not 29...\text{axb6} on account of 30 \( \text{x}e2 \text{dxe2} \) 31 \( \text{w}xe2 \), giving White possibilities of defence.

30 \( \text{g}g1 \text{AXB6} \\
31 \( \text{w}xb6 \text{d}2! \\
Now this advance of the \( d \)-pawn is absolutely decisive.

32 \( \text{f}f1 \text{xf1} \\
33 \text{xf1} \text{xe}6!! \\
After this move White can no longer defend himself against the ensuing mating attack. For example, if he had attempted to protect the square \( g2 \) by 34 \( \text{w}c6 \) followed by 35 \( \text{w}xe4 \), the game would have terminated as follows: 34 \( \text{w}c6 \text{f}f3! \) 35 \( \text{w}xe4 \text{d}5 \) 36 \( \text{w}a4 \text{w}xg2++!! \) 37 \( \text{w}xg2 \text{g}3+ \) 38 \( \text{h}2 \text{g}2+ \) 39 \( \text{h}1 \text{h}2+ \) 40 \( \text{g}1 \text{h}1\# \\
Against the plausible move 34 \( \text{h}1 \) the sacrifice of the e6-bishop wins at once.

34 \( \text{h}1 \) (D) \\
34 ... \( \text{x}h3! \\
35 \text{g}xh3 \text{f}3 \\
36 \( \text{g}3 \) \( \text{h}4! \\
The point of 28...\text{h}5! is now revealed.

37 \( \text{f}6 \\
Ingenious but doomed to failure, like all other attempts.

37 ... \( \text{xf6} \\
38 \( \text{xe}4 \text{h}3+/ \\
If now 39 \( \text{g}1 \text{h}2+ \) and Black wins the queen, or if 39 \( \text{g}2 \text{f}3+ \) and mates next move.

0-1

Game 22
Johner – Alekhine
Pistyan 1922
Queen’s Pawn Game

1 \( \text{d}4 \text{f}6 \\
2 \( \text{f}3 \) \( \text{e}6 \\
3 \( \text{c}4 \) \( \text{c}5 \\
It has been shown subsequently that this move is not quite correct (see the previous game). The right move here was 3...\text{d}5 or 3...\text{b}6.

4 \( \text{c}3 \\
This answer is insufficient to secure White an advantage. He must play 4 \( \text{d}5 \) and if 4...\text{b}5 5 \( \text{g}5! \) with the better game. But my opponent still had fresh in his memory my game against Dr. Tarrasch, played in the first round of this tournament.
(again, see the previous game), in which White, having adopted the continuation 4 d5, sustained a classic defeat. He therefore preferred the move in the text, which is more conservative, but also more dull.

4 ... cxd4
5 cxd4 d5

This move allows White, should he so desire, to simplify the position, with an almost certain draw in view. 5...b4 was more energetic, leading to a complicated game not without chances for Black.

6 cxd5 cxd5
7 Qd5!

Threatening to win a pawn: 8 Qxd5 exd5 9 Qxd5!.

7 ... d7

In order to answer 8 Qxd5 with 8...Qxb5.

8 e4 Qxc3
9 bxc3!

Much better than 9 Qxc3, after which Black could have obtained a positional edge by 9...Qc5.

9 ... Wa5
10 Qb1!

This is more energetic than the defensive move 10 Qb3. For the sacrificed c-pawn White, thanks to his two bishops, obtains a position full of promise, and Black will be compelled to return the pawn in order to complete his development.

10 ... a6

If any other move, White would defend his pawn by Qb3, or he could play 11 Qd6+ in any case.

11 Qd6+ Qxd6
12 Qxd6 Qxc3+

13 Qd2 c6
14 Qf4 (D)

White overestimates his attacking prospects, forgetting that his own king is not safe. He ought to have been content to regain his pawn, with a good game, by 14 Qb4 a5! 15 Qxb7 0-0. The text move, on the contrary, speedily allows Black to seize the initiative.

By this sacrifice Black opens up new lines for his pieces, and taking advantage of the fact that White has still not castled, undertakes a direct attack against the position of the hostile king. Against any other move White would himself have obtained a powerful attack by the advance 16 e5!.

14 ... 0-0
15 Qd3 e5

Instead 17 Qg3 Qxe4+ and 17 Qf4 Qe6, followed by 18 ...Qd7 and 19 ...Qc5, are both advantageous to Black.

17 ... Qg6!
White already finds himself in a very difficult position, since he cannot castle on account of 18...\texttt{\textit{\textbf{\textit{\textbf{h3}}}} winning the exchange. On the other hand, if 18 f4 Black would have avoided the dangerous variation resulting from 18...\texttt{\textit{\textbf{\textit{\textbf{W}}}}xg2 19 \texttt{\textit{\textbf{\textit{\textbf{g1}}}}} \texttt{\textit{\textbf{c3}}}
20 \texttt{\textit{\textbf{\textit{\textbf{W}}}}}e3 \texttt{\textit{\textbf{\textit{\textbf{x}}}}}xh2 21 \texttt{\textit{\textbf{\textit{\textbf{c}}}}c3}, and would have made certain of an advantage by 18...\texttt{\textit{\textbf{\textit{\textbf{c}}}}}c6! 19 \texttt{\textit{\textbf{f2}}} (or 19 \texttt{\textit{\textbf{\textit{\textbf{W}}}}}xd7 \texttt{\textit{\textbf{\textit{\textbf{W}}}}}xg2 20 \texttt{\textit{\textbf{\textit{\textbf{f}}}}}f1 \texttt{\textit{\textbf{d8}}}) 19...\texttt{\textit{\textbf{\textit{\textbf{f}}}}}f5!.

18 ... \texttt{\textit{\textbf{\textit{\textbf{W}}}}}xg2! (D)

This move, at first sight hazardous, was the result of a long and detailed calculation.

\begin{center}
\begin{tikzpicture}
\end{center}

23 \texttt{\textit{\textbf{\textit{\textbf{a}}}}}f6

It is manifest that with a pawn less and an exposed king, other moves would not save White. The move chosen allows Black to conclude energetically and rapidly.

23 ... \texttt{\textit{\textbf{\textit{\textbf{a}}}}}e5!

Threatening 24...\texttt{\textit{\textbf{\textit{\textbf{a}}}}}xf3+.

24 \texttt{\textit{\textbf{\textit{\textbf{a}}}}}e2 \texttt{\textit{\textbf{\textit{\textbf{b}}}}}b5!

Practically ending the game, for if 25 \texttt{\textit{\textbf{\textit{\textbf{x}}}}}xd8, then 25...\texttt{\textit{\textbf{\textit{\textbf{a}}}}}xe2 wins at once, due to the threat 26...\texttt{\textit{\textbf{\textit{\textbf{a}}}}}xf3+\textsuperscript{1}. White is therefore forced into a general liquidation, after which his position remains absolutely without the slightest hope.

25 \texttt{\textit{\textbf{\textit{\textbf{x}}}}}xe5 \texttt{\textit{\textbf{\textit{\textbf{a}}}}}xe5

26 \texttt{\textit{\textbf{\textit{\textbf{x}}}}}xb5 \texttt{\textit{\textbf{\textit{\textbf{a}}}}}xb5

27 \texttt{\textit{\textbf{\textit{\textbf{a}}}}}xb5 axb5

Threatening to force a winning pawn ending by 28...\texttt{\textit{\textbf{\textit{\textbf{d}}}}}d2!. If 28 \texttt{\textit{\textbf{\textit{\textbf{f}}}}}f1, then 28...\texttt{\textit{\textbf{\textit{\textbf{c}}}}}c2 wins.

0-1

Game 23

Alekhine – Wolf

Pistyan 1922

Brilliancy Prize

Queen’s Gambit Declined

1 \texttt{\textit{\textbf{d4}}} \texttt{\textit{\textbf{d5}}}

2 \texttt{\textit{\textbf{\textit{\textbf{c}}}}}f3 \texttt{\textit{\textbf{c5}}}

3 \texttt{\textit{\textbf{c4}}} \texttt{\textit{\textbf{\textit{\textbf{c}}}}}xd4

The usual move is 3...\texttt{\textit{\textbf{\textit{\textbf{c}}}}}6 transposing into the Tarrasch Defence. After the exchange of pawns in the centre we reach a symmetrical position in which the advantage of the move

\textsuperscript{1} And if 25 \texttt{\textit{\textbf{\textit{\textbf{x}}}}}xd8 \texttt{\textit{\textbf{\textit{\textbf{a}}}}}xe2 26 \texttt{\textit{\textbf{\textit{\textbf{c}}}}}7, then 26...\texttt{\textit{\textbf{\textit{\textbf{a}}}}}xf3.
always secures for White a slight positional advantage. If in this game he obtains a better result, that is solely due to the fact that his opponent allows himself to go in for an innovation—especially risky when his development is already retarded.

4 cxd5  
5 Qxd4  
6 a6

Black wished to avoid the variation 5...Qxd5 6 e4 Qf6 7 Qb5+ Qd7 8 e5! Qxb5 9 Qxb5 Qxd1+ 10 Qxd1 Qd5 11 Qd3, which is to the advantage of White, as mentioned in the latest edition of Collijn’s Lärobok. But this variation, like many others indicated in that work, is indeed interesting but scarcely accurate, as it can be improved by 6...Qb4! in place of 6...Qf6, after which White’s advantage would be difficult to demonstrate.

The text move does not seem risky, as Black intends to capture the d-pawn on the next move. Its refutation is therefore the more instructive.

6 e4!!

Sacrificing the e-pawn to retain the d-pawn which, as will be seen in the sequel, exercises very strong pressure on Black’s position.

6 ... Qxe4
7 Qa4+!

In order to provoke the obstruction of the d-file by a black piece, which cuts off the attack of Black’s queen on White’s d5-pawn.

7 ... Qd7

Not 7...Qd7 on account of the reply 8 Qb5.

8 Qb3 Qc5 (D)

This square is hardly indicated for the knight, but on the other hand Black must defend his b7-pawn. 8...Qc7 or 8...Qc8 is scarcely any better, seeing that Black’s queen would soon be dislodged from this file by White’s rook.

9 Qe3!

Much stronger than the plausible move 9 Qf3, upon which Black could have freed himself by 9...e5, for Black wins in the event of 10 dxe6 Qxe6 11 Qxe6 Qxe6! 12 Qxb7? Qd5!. After the text move, in contrast, the advance of Black’s e-pawn would give White the opportunity of exercising strong pressure on the e-file. Black therefore resigns himself to the development of his bishop on g7, but equally without success.

9 ... Qg6
10 Qf3!

This gain of time allows White to prevent 10...Qg7, followed by 11...0-0. By keeping Black’s king in the centre, White’s attack will be facilitated, thanks to his superior development. The opening of this
game offers some analogies with the game against Rubinstein, played at The Hague (game 20). In the one, as in the other, the advantage won results from repeated movements of the same pieces (here the first eleven moves contain four displacements of the queen and three of the king’s knight).

But the possibility of similar manoeuvres in the opening phase is solely attributable, I must reiterate, to the fact that the opponent has adopted faulty tactics, which must from the first be refuted by an energetic demonstration. It is clear, on the contrary, that in face of correct development, similar anomalous treatment would be disastrous. It cannot therefore be any question of a ‘Modern System’, but just simply of exploiting in a rational manner the opponent’s mistakes.

I cannot conceive why there is such an ardent desire to discover in a game of chess anything more subtle than it has to offer, for I am of opinion that the real beauty which it possesses should be more than sufficient for all possible demands.

10 ... \(w\)c7
11 \(w\)c3 \(g\)g8
12 \(h\)e3 b6
13 \(a\)bd2

17 g4 can be met by 17...e5!, with just an edge for White, so 17 0-0 may be a better try.

13 ... \(g\)g7
14 \(a\)d4 \(x\)xd4
15 \(w\)xd4

\(w\)a7!. White therefore prefers to complete his development before undertaking decisive action.

Now that White has rid himself of the enemy dark-squared bishop, the only piece which could inconvenience him, Black’s position will very soon become desperate.

15 ... \(b\)b5

It would be difficult to suggest another means of developing his queenside. 15...\(f\)f5 16 \(e\)e2 \(b\)bd7 would be impossible, on account of 17 g4\(^1\) \(c\)c2 18 \(c\)c1.

16 \(x\)xb5+ axb5
17 0-0 \(a\)a4

This skirmish comes to nothing. To tell the truth, it is difficult to point out a rational move.

18 b4 \(d\)d8
19 a3!

White has no reason to hurry himself, considering Black’s lack of resources.

19 ... \(b\)bd7
20 \(f\)f1 \(f\)f8 (D)
21 d6!

A preparation for the following sacrifice. If Black replies to this move with 21...e6, the continuation would be 22 \(e\)e3 \(b\)b7 23 \(d\)d3 \(a\)a8 24 \(e\)e4, winning the b-pawn to start with.

21 ... \(e\)e6
This desperate capture conceals a last trap.

36 \textit{\texttt{\textit{We}}8}+ \textit{\texttt{\textit{g}}7}  
37 \textit{\texttt{\textit{Ee}}7}+ \textit{\texttt{\textit{h}}6}  
38 \textit{\texttt{\textit{Wf}}8}+ \textit{\texttt{\textit{h}}5}  
39 \textit{\texttt{\textit{Ee}}5}+ \textit{\texttt{\textit{g}}4}  
40 \textit{\texttt{Gg}}5+! 1-0

Avoiding the trap – not 40 \texttt{f3+?} \texttt{g3 41 g5+ \texttt{xg5}! 42 \texttt{hxg5 a1\#}}.

\textbf{Game 24}

\textit{Torres – Alekhine}

\textit{Exhibition Game, Seville 1922}

\textit{Ruy Lopez}

\begin{align*}
1 & e4 & e5 \\
2 & \textit{\texttt{Qf}}3 & \textit{\texttt{Qc}}6 \\
3 & \textit{\texttt{Qb}}5 & a6 \\
4 & \textit{\texttt{Qa}}4 & \textit{\texttt{Qf}}6 \\
5 & 0-0 & \textit{\texttt{d}}6
\end{align*}

This move, endorsed by Rubinstein, seems to me less sound than 5...\texttt{e7} as White has at his disposal several good continuations; moreover, he can obtain a draw by a forced variation (see the following note).

6 \textit{\texttt{Qxc}}6+

This exchange, however, is not to be recommended. White would do better to adopt one of the following continuations:

1) 6 \texttt{c3} and if 6...\texttt{\texttt{Qxe}}4, then 7 \texttt{d4} with a fine attack.

2) 6 \texttt{Wf2}.

3) 6 \texttt{d4} and if 6...\texttt{b5}, 7 \texttt{\texttt{b3}} \texttt{exd}4 8 \texttt{c3!}, sacrificing a pawn in return for the attack. This line of play was successfully played by Yates against Rubinstein on two occasions (London 1922 and Karlsbad 1923).
4) 6 \textit{Ke}1 b5 7 \textit{Kb}3 \textit{Ka}5. A game Aurbach-Alekhine, played in Paris during October 1922, continued thus: 8 d4 \textit{Kxb}3 9 axb3 \textit{Kb}7 10 dxe5 \textit{Kxe}4 11 exd6 \textit{Kxd}6 12 \textit{Wd}4! \textit{We}7 13 \textit{Cc}3! (not 13 \textit{Wxg}7? 0-0 0-0 14 \textit{Kg}5 \textit{Kxg}5! and wins1) 13...f5 14 \textit{Kg}5 \textit{Wd}7 (if 14...\textit{Wf}7, as given in Collijn's \textit{Lärobok}, 15 \textit{Kxe}4 fxe4 16 \textit{Kxe}4+! \textit{Kxe}4 17 \textit{Wxe}4+ \textit{Wd}7 18 \textit{Kd}1 and White wins) 15 \textit{Kxe}4 fxe4 16 \textit{Kxe}4+! \textit{Kxe}4 17 \textit{Wxe}4+ \textit{Wf}7 18 \textit{Ke}1! \textit{Ke}8! 19 \textit{Wd}5+ \textit{Kf}8 (D)

\begin{center}
\begin{tikzpicture}
\end{tikzpicture}
\end{center}

20 \textit{Kc}5! \textit{Kxe}5 21 \textit{Kxe}5 \textit{We}8 22 \textit{Wf}3+ \textit{Kg}8 23 \textit{Wd}5+ and White draws by perpetual check².

6 ... bxc6
7 d4 \textit{Kxe}4!
8 \textit{Ke}1 f5
9 dxe5 d5

Now Black undoubtedly has the better game, with his two bishops and his strongly-posted knight in the centre.

10 \textit{Cd}4 \textit{Cc}5
11 c3

Sooner or later necessary in order to develop the queen's knight at d2, without leaving the d4-knight \textit{en prise} to Black's bishop.

11 ... 0-0
12 f4

It would have been rather better to dislodge the black knight by 12 f3 and then to play 13 f4. Nevertheless, in this blocked position the gain of a tempo is hardly capable of improving White's game sufficiently.

12 ... \textit{We}8
13 \textit{Kc}3 \textit{Kb}6
14 \textit{Cd}2 \textit{Kb}7

In perfect safety Black prepares the advance of his centre pawns, thus enabling his bishops to exercise pressure on the hostile king.

15 \textit{Kf}3 \textit{Kd}8
16 \textit{We}2 c5 (D)

\begin{center}
\begin{tikzpicture}
\end{tikzpicture}
\end{center}

17 \textit{Kb}3

---

1 Since 15 \textit{Kxe}7 \textit{Kxf}3+ 16 gxf3 \textit{Kxe}7 17 \textit{Wf}1 \textit{Hg}8 18 \textit{Wxh}7 \textit{Hd}1+ 19 \textit{Ke}2 \textit{Hg}1 gives Black a winning attack.

2 23 \textit{Kc}7?! is an interesting winning attempt—23...h6 24 \textit{Kxd}6 cxd6 25 \textit{Wd}5+ \textit{Kh}7 26 \textit{Wd}3+ g6 27 \textit{Wxd}6 gives White an edge.
17 \( \text{Qe2} \) at once was preferable, upon which Black would probably have continued 17...h6 followed by 18...\( \text{Qh8} \) and 19...\( \text{Bg8} \), preparing to open the g-file by ...g5. The text move allows Black to increase his pressure on the centre still more.

17 ...

c4!

Profiting by the fact that White cannot play 18 ...\( \text{Qxb6} \) on account of 18...\( \text{cxb3} \).

18 \( \text{Qbd4} \)  
c5

19 \( \text{Qe2} \)  
\( \text{Wc6} \)

20 \( \text{Qad1} \)  
h6!

Continuing with the above-mentioned plan.

21 \( \text{Qf1} \)  
\( \text{Qh8}! \)

In order that, in the event of ...d4, the c4-pawn shall not be captured by White’s queen with check, a precaution whose purpose will appear later on.

22 \( \text{Qh1} \)  
\( \text{Wg6} \)

Black intends to occupy h5 with his queen, which would make the advance of the g-pawn still more effective.

23 \( \text{Qeg1} \)

By attempting to prevent this strategically decisive advance White allows his opponent to conclude the game with a pretty combination, based upon the hidden action of his light-squared bishop on the long diagonal.

23 ...

\( \text{Wh5} \)

24 \( \text{Qh3} \) (D)

24 ...

d4!

Allowing the queen sacrifice on the 28th move, as a result of which Black wins a piece or forces mate.

\( \text{B} \)

---

Game 25
Alekhine – Yates
London 1922
Queen’s Gambit Declined

1 \( \text{d4} \)  
\( \text{Qf6} \)

2 \( \text{c4} \)  
e6

3 \( \text{Qf3} \)  
d5

4 \( \text{Qc3} \)  
\( \text{Qe7} \)

5 \( \text{Qg5} \)  
0-0

6 \( \text{e3} \)  
\( \text{Qbd7} \)

7 \( \text{Qc1} \)  
c6

8 \( \text{Wc2} \)  
\( \text{Qe8} \)

This move is inferior to 8...a6 because after 9 \( \text{Qd3} \)! Black can no longer transpose into the system of defence that offers the best chances.

9 \( \text{Qd3} \)  
\( \text{dxc4} \)

Reverting to Capablanca’s defence with the sole difference that his rook is at e8 instead of f8, which is not of much importance. If 9...a6 White could now advantageously
reply 10 cxd5! taking advantage of the fact that Black cannot now recapture the pawn with his knight.

On the other hand, after 9...h6 10 ♖f4! a6, the exchange at d5 would be entirely to White’s advantage, e.g. 11 cxd5! (but not 11 c5 ♖xc5! 12 dxc5 e5, threatening 13...e4, and thus regaining the piece with a fine position—compare the game Euwe-Spielmann, Mährisch-Ostrau 1923) 11...♖xd5 12 ♖xd5 exd5 13 0-0 ♖f6 14 h3, etc., and White will be able to undertake an attack on the queenside by ♛h1, b4, a4 and b5 leaving his opponent without appreciable counter-chances.

10 ♖xc4 ♖d5
11 ♖e4

The right move here was 11 ♖xe7. It should be noticed that in the variation 11 ♖e4 ♙a5+, the position of the rook at e8 is rather an advantage for Black.

11 ... ♖f5

Among the various replies to be considered by Black this is undoubtedly the least worthy of commendation. Quite apart from the fact that it in no way obstructs White’s castling, it also yields the splendid square at e5 to the enemy knight without the slightest compensation. From this point Black’s game may be considered strategically lost, which is not to say that the realisation of victory will be an easy matter.

12 ♖xe7 ♙xe7 (D)
13 ♖ed2 ♖b5

This move, which aims at the liberation of the useless c8-bishop, is worse than the disadvantage that it seeks to mitigate, for White will now seize control of the c-file and especially the square c5, which Black has just given up. Black would have done better to occupy White with the following diversion: 13...♕b6 14 ♕d3 g6, preparing ...e5, or 14 ♖b3 a5 15 a4 ♖d5 and ...♖b4, although in these cases too his prospects would be doubtful.

14 ♖xd5 ♖xd5
15 0-0

White’s next moves are based upon simple but indisputable logic. By occupying the square c5 with one of his knights, he will force its exchange against the opposing knight, after which he will be able to settle his other knight on the same square without fear of interference.

15 ... ♖a5
16 ♕b3 ♖a4
17 ♖c5 ♖xe5
18 ♖xc5! ♖xc5

The exchange of queens would ultimately have become inevitable. Now Black is entirely at the mercy of his opponent, who will be free to choose the best road to victory.
19 \( \text{hxc5} \) \( \text{b4} \)
20 \( \text{Kfc1} \) \( \text{Ka6} \)
21 \( \text{Qe5!} \)

The knight arrives at the right moment to prevent Black opposing his rooks on the c-file, e.g. 21...\( \text{Kec8} \) 22 \( \text{Kxc8+} \) \( \text{Kxc8} \) 23 \( \text{Kxc8+} \) \( \text{Kxc8} \) 24 \( \text{Qc6} \), with the double threat 25 \( \text{Qe7+} \) and 25 \( \text{Qxb4} \), making the win certain for White.

21 ... \( \text{Heb8} \)
22 \( \text{f3!} \)

Preparing the decisive advance of the white king.

22 ... \( \text{b3} \)
23 \( \text{a3} \) \( \text{h6} \)
24 \( \text{Qf2!} \)

The starting-point of a mating manoeuvre based on the following considerations: because Black must avoid the exchange of rooks and as his pieces are needed on the queenside to defend his pawns, the black king must sooner or later succumb to the combined assault of the four white pieces, including the king.

24 ... \( \text{Qh7} \)
25 \( \text{h4!} \)

Hindering ...\( g5 \), after \( \text{Qg3} \) and \( \text{Qf4} \).

25 ... \( \text{Qf8} \)
26 \( \text{Qg3} \) \( \text{Qfb8} \)

Black has to resign himself to complete inactivity.

27 \( \text{Qc7} \)

Threatening among other things 28 \( \text{Qd7} \) followed by 29 \( \text{Qc5} \) or \( \text{Qb6} \).

27 ... \( \text{Qb5} \)
28 \( \text{Qxc5!} \)

In order to double rooks on the 7th rank by 29 \( \text{Qe7}! \) \( \text{Qe8} \) 30 \( \text{Qf7} \) and 31 \( \text{Qc7} \).

28 ... \( \text{Qa6} \)
29 \( \text{Qc6} \) \( \text{Qe8} \)
30 \( \text{Qf4} \)

The doubling of the rooks on the 7th rank by \( \text{Qf7} \) being now assured, White brings his king towards the centre.

30 ... \( \text{Qg8} \)
31 \( \text{h5!} \)

Foreseeing the final manoeuvre, for whose success it is essential to prevent Black's king from emerging at \( g6 \) after 35 \( \text{Qd7!} \).

31 ... \( \text{Qf1} \)

It is curious to observe that the bishop, despite having full freedom, cannot take part in the defence.

32 \( \text{g3} \)

A waiting move. 32 \( \text{Qf7} \) would now be premature, because of the reply 32...\( \text{Qac8} \).

32 ... \( \text{Qa6} \)

If 32...\( \text{Qe2} \) White would have continued his attack by 33 \( \text{Qg6} \) followed by 34 \( \text{Qh4} \) and 35 \( \text{Qe5} \).

33 \( \text{Qf7} \) \( \text{Qh7} \)

Black is quite unable to forestall the mating attack by 33...\( \text{Qf8} \), since White would have very speedily concluded the game by capturing the e-pawn.

34 \( \text{Qc7} \) \( \text{Qg8} \)

---

1 This note was completely garbled in the original English edition of Alekhine's Best Games.
35 \( \text{Qd7!} \)
This threat to win the exchange forces the following reply.
35 \( \text{...} \) \( \text{Qh8} \) (D)

![Chess Diagram]

36 \( \text{Qf6!} \) \( \text{Qg7} \)
In the hope of bringing about the exchange of one rook at least.
37 \( \text{Rxg7?!} \)
This sacrificial combination leads to mate in at most seven moves.
37 \( \text{...} \) \( \text{Rxg6} \)
38 \( \text{Qe5!} \) \text{1-0}

The point of the combination! The black rook can neither retire, nor can it be defended by the other rook, without allowing a mate in two moves. But even after its capture by the white king, mate can only be delayed by desperate moves.

But in the present game I had positively to play for a win in order to make sure of first prize, whereas a draw was sufficient for my opponent to secure third prize, and hence I found myself forced to run some risks which were, after all, justified by the result.

2 \( \text{c4} \) \( \text{Qf6} \)
3 \( \text{g3} \)

It is better to prepare the flank development of the light-squared bishop in the Dutch Defence before playing c4, because now Black can advantageously exchange his dark-squared bishop, which has only a very limited range of action in this opening.

3 \( \text{...} \) \text{e6}
4 \text{Qg2} \text{b4+}
5 \text{Qd2} \text{Qxd2+}
6 \text{Qxd2}

The recapture with the queen, followed by 7 \( \text{Qc3} \), is a little better.
6 \( \text{...} \) \( \text{Cc6} \)
7 \( \text{Qg3} \) \text{0-0}
8 \text{0-0} \text{d6}
9 \text{Wb3}

This manoeuvre does not prevent Black from realising his plan, but it is already difficult to suggest a satisfactory line of play for White.

9 \( \text{...} \) \( \text{Qh8} \)
10 \text{Wc3} \text{e5!}
11 \text{e3}

If 11 dxe5 dxe5 12 \( \text{Qxe5?} \) dxe5 13 \text{Wxe5} White's knight would be en prise to Black's queen.

11 \( \text{...} \) \text{a5!}

It was very important to prevent b4 temporarily, as will be seen later.

Game 26
Bogoljubow – Alekhine
Hastings 1922
Dutch Defence

1 \( \text{d4} \) \text{f5}
A risky defence, which up to the present I have adopted only very infrequently in serious games.
12 b3
Not 12 a3 on account of 12...a4.

12 ... e8!

13 a3 h5! (D)

Now Black has secured an attacking position, for White cannot answer 14 dxe5 dxe5 15 dxe5 dxe5 16 h4 on account of 16...g4, winning outright; nor can he play 14 b4? e4 15 d1 axb4.

14 h4

A good defensive move, which secures new squares for his f3-knight and revives the threat of 15 dxe5.

14 ... g4

15 g5

White seeks to dislodge Black’s knight at once by 16 f3, which, however, weakens his pawn position still further. Possibly 15 b4 would now be preferable.

15 ... d7

16 f3

If 16 xxc6 xxc6 17 f3, then 17...exd4! 18 fxg4 dxc3 19 gxh5 cxd2 leading to the better endgame for Black.

16 ... f6

17 f4

Already compulsory, in view of the threatened 17...f4!.

17 ... e4

18 f1

In order to protect the g-pawn (which was threatened by 18...g4 and 19...h5) by f1. However, the preliminary advance 18 d5!, preventing Black from forming a centre, would have yielded White more chances of a successful defence.

18 ... h6

19 h3 d5!

By this move Black completely wrecks his opponent’s hopes in the centre, and shortly seizes the initiative on the queenside in quite unexpected fashion.

20 f1 e7

Preparing 21...a4!.

21 a4 c6!

Now this knight can penetrate right into the hostile camp via b4 and d3.

22 d2 b4

23 h1

The fact that White had to conjure up this complicated manoeuvre in order to create faint chances on the kingside shows clearly the inferiority of his position.

23 ... e8!

This strong move yields Black a new advantage in every case: either control of the square d5 after 24 cxd5, or the opening of a file on the queenside after 24 c5 b5!, or lastly, as in the actual game, the win of a pawn.

24 g2
White is still trying for 25 g4, but even this weak counter-chance will not be vouchsafed him.

24 ... dxc4
25 bxc4 Axa4
26 Qf2 Axd7
27 Qd2 b5!

The renewal of the struggle for the centre squares, a struggle whose vicissitudes will culminate in a stirring and original finish.

28 Qd1 Qd3!

Preparing the ensuing combination. 28...bxc4 would have been weak, for White’s knight would later have secured a good square at e5.

29 Axa5

In the event of 29 cxb5 Axb5 30 Axa5 Qd5 31 Wb3 Axa5 32 Wxc5 Wc6 Black has a winning attack.

29 ... b4!

30 Axa8

If 30 Aa3 31 Axa5 32 Aa5, then after 31...Wxa8! 32 Wxa8 Wxa8 Black’s rook penetrates into White’s game with decisive effect.

30 ... bxc3!

As will be seen, this continuation is much stronger than 30...Wxa8 31 Wb3 Aa4 32 Wb1, after which White could still defend himself1.

31 Axa8 (D)

31 ... c2!!

The point! White cannot prevent this pawn from queening.

32 Axf8+ Wh7

33 Qf2

It is clear that this is the only possible move.

33 ... c1W+

34 Aa1 Ae1!

Threatening an unexpected and original ‘Smothered Mate’.

35 Bh2 Wxc4

Creating a new threat of mate in a few moves, starting with 36...Axb5, which compels White to sacrifice the exchange.

36 Aa8 Axb5

37 Axb5 Axb5

38 g4

The only chance for White to prolong his resistance, but Black retorts with a fresh surprise move.

38 ... Aa3+!

39 Axf3 exf3

40 gxf5

Forced, for if 40 g5 Black would have obtained two united passed pawns after 40...Ag4.

40 ... We2!!

---

1 30...Wxa8 31 Wb3 Wa1 32 Qf1 Wb1 32 Qb2 Wb1 is a simple technical win since White’s position is a total wreck, so Alekhine’s winning combination, while spectacular, wasn’t strictly necessary.
This move leads to a problem-like position, in which White is unable to move any piece without exposing himself to immediate loss, for example 41 \(
\text{Q}h3 \text{Q}g4!\), 41 \(
\text{Q}g4 \text{Q}xg4\) or 41 \(
\text{Q}h3\) (or h1) 41...\(
\text{Q}g4\) and wins.

Hence, after two unimportant moves, he must play e4, which leads to an immediate liquidation, with a won endgame for Black.

41 d5 \text{g8!}

Not, however, the plausible move 41...h5 upon which White could have saved himself by 42 \(
\text{Q}h3\) followed by 43 \(
\text{Q}g5\).

42 h5 \text{h7}
43 e4 \text{Qxe4}
44 \text{Qxe4} \text{Wxe4}
45 d6

Being unable to defend his pawns White endeavours to dislocate those of his opponent, but his game is hopelessly lost.

45 ... \text{cxd6}
46 f6 \text{gxf6}
47 \text{d2} \text{e2!} (D)

A pretty finish, worthy of this fine game. Black forces a winning pawn endgame.

48 \text{Qxe2} \text{fxe2}
49 \text{Qf2} \text{exf1} \text{W+}
50 \text{Qxf1} \text{g7}
51 \text{Qf2} \text{f7}
52 \text{e3} \text{e6}
53 \text{e4} \text{d5+}

0-1

Game 27
Alekhine – Réti
Vienna 1922
Ruy Lopez

1 e4 \text{e5}
2 \text{Qf3} \text{Qc6}
3 \text{Qb5} \text{a6}
4 \text{Qa4} \text{Qf6}
5 \text{Qc3} \text{b5}
6 \text{Qb3} \text{Qc5}

If it was Black’s intention to develop his bishop at c5, he should have done so before playing ...b5, for after 5...b5 he has nothing better than 6...\text{Qe7} which, however, gives him a satisfactory game. The text move, on the contrary, needlessly exposes him to grave perils.

7 \text{Qxe5!}

The correct reply, yielding White an extremely dangerous attack in every variation.

7 ... \text{Qxe5}
8 d4 \text{Qd6}
9 dxe5 \text{Qxe5}
10 f4!

This move, which would be bad if Black’s b-pawn were still at b7 and White’s bishop on a4 (because of 10...\text{Qxc3+} and 11...\text{Qxe4}), shows the error of Black’s 6th move.

10 ... \text{Qxc3+}
11 bxc3 0-0
Here forced, for if 11...\(\text{dxe}4\), 12 \(\text{d}5\).

12 e5 (D)

If now 12...\(\text{e}8\) 13 0-0 d6 14 f5 with an irresistible attack for White. White appears to have secured a decisive positional advantage, for the withdrawal of the knight to e8 seems compulsory (12...\(\text{d}4\) 13 \(\text{d}5!\) and wins), but my ingenious opponent succeeds in finding the only move to give him defensive chances, and in the sequel he shows in exemplary manner how to make the most of them.

12 ... c5!

The text move threatens, should White capture the knight, to shut off the hostile bishop by 13...c4, thereby leading into an endgame with bishops of opposite colours. What is White to play to keep his advantage? The following variations, considered during the actual game, seemed to me quite inadequate:

1) 13 exf6 \(\text{e}8+\) 14 \(\text{f}1\) c4.

2) 13 c4 d5! 14 exf6 \(\text{e}8+\) 15 \(\text{f}1\) \(\text{x}f6!\) and 16...dxc4.

3) 13 0-0 c4 14 exf6 \(\text{xf}6\) 15 \(\text{d}5\) \(\text{b}6+\) and 16...\(\text{b}7\).

4) 13 \(\text{d}5\) \(\text{xd}5\) 14 \(\text{xd}5\) \(\text{b}6!\) 15 \(\text{e}3\) \(\text{b}7\) 16 \(\text{xc}5\) (16 \(\text{xc}5\) \(\text{g}6!\)) 16...\(\text{xd}5\) 17 \(\text{xc}5\) \(\text{xg}2\) 18 \(\text{e}1\) \(\text{e}4\).

Black has the better game in the first three variations and has equality in the fourth.

13 \(\text{a}3!!\)

The key move of a deep combination whose principal variation consists of some ten moves and which results in the gain of a pawn in a superior position. It was evidently quite impossible to foresee, at this stage of the game, that this material advantage would, in this particular position, prove insufficient for victory against the impeccable defence set up by Black.

13 ...

\(\text{a}5!\)

The best reply. Black indirectly defends his c-pawn whilst attacking the hostile dark-squared bishop, but White’s manoeuvre initiated by 13 \(\text{a}3!\) is based upon the temporary removal of the black queen from the centre.

14 0-0 \(\text{xa}3\)

15 exf6 \(\text{c}4\) (D)

Black is not excessively uneasy concerning the reply 16 \(\text{d}5\) (with the double threat 17 \(\text{g}5\) and 17 \(\text{xa}8\)), being convinced that he will save the situation by 16...\(\text{a}5\) followed by the capture of the bishop, which is cut off. But, as the sequel shows, this calculation is only partly correct.

16 \(\text{d}5!\) \(\text{a}5!\)
17 fxg7
Not 17 ♗xa8 owing to 17...♗b6+ and 18...♗b7, winning for Black.
17 ... ♗b6+
18 ♗h1 ♗xg7!
Again the only move. If 18...♗d8, then 19 ♗xc4! bxc4 (forced) 20 ♗xa8 ♗b7 21 ♞ab1 and White wins the exchange.
19 ♗xc4!
The point of the whole combination! This bishop, which appeared hopelessly doomed, gains a fresh lease of life, for if 19...bxc4, then 20 ♗xa8 and 21 ♞ab1, as in the preceding note. White, with his pawn plus and threats against the exposed black king, seems to have a comparatively easy win, but this is only a will-o’-the-wisp.
19 ... ♗b7!
20 ♗e5+
Equally after 20 ♗g5+ ♗g6 21 ♗d3 f5! Black would have sufficient resources available.
20 ... ♗f6
21 ♗d3 ♗f8!
An excellent defensive move by which Black sacrifices a second pawn in order to occupy the central files with his rooks. After 21...♗xe5 22 fxe5 ♞ac8 23 ♞f4 ♞xc3 24 ♞g4+ ♗h8 25 ♞h4 Black probably could not save the game.
22 ♗h5 h6
23 ♗g4+ ♗h8
24 ♗xd7 ♞e7
25 ♗d4 ♗xd4!
26 cxd4 ♞d8
Taking advantage of the fact that White’s d-pawn cannot readily be defended, e.g. 27 c3 b4! 28 cxb4 ♞xd4, followed by 29...♗xb4.
27 f5!
In order to secure an outpost by 27...♗xd4 28 f6, with good attacking chances against the hostile king, but Black prefers to temporise and to postpone the capture of the d-pawn until later, first taking a precautionary measure.
27 ... f6! (D)

28 ♞e1
Reconciling himself to giving back one pawn in order to exchange the formidable black bishop. 28 ♞f4, although temporarily preserving the advantage of two pawns, would be insufficient for victory, e.g. 28...♗g7
29 ♖f1 ♕c8! 30 ♖f2 (or 30 ♖c1) 30...♖c3 followed by 31...♖d5 or 31...♖a3, and White cannot possibly defend all his pawns.  

28 ... ♕g7!  
Of course not 28...♖xe1 29 ♖xe1 ♖xd4 because of 30 ♖e8+ followed by 31 ♖e7+ and White wins.  

29 ♖e4 ♖xd4  
30 ♖xb7 ♖xb7  
31 ♖e6  
Winning a second pawn once again, but only momentarily.  

31 ... ♕g7!  
32 ♖xa6 ♖c4  
Still more exact was 32...♖a4! although the text move is also adequate.  

33 ♖f3  
Obviously after 33 ♖f2 ♖bc7 the c-pawn cannot be defended.  

33 ... ♖xc2  
34 h3 ♕f7!  

Forestalling the threatened 35 ♖g3+ and 36 ♖g6.  

35 ♖g3 ♖f2  
36 ♖g6 ♖xf5  
37 ♖xh6 ♕g7  
38 ♖h4 ♖b4!  

After this move, which creates a permanent threat to swap the queenside pawns, White's winning prospects are reduced to vanishing point.  

39 ♖g4+ ♖f7  
40 ♖g3 ♖b5  
41 ♖b3 ♕g6  
42 ♕h2 ♖c5  
43 ♖a4 ♖ch5 (D)  

44 h4 a5b6  
45 ♕h3 ♖b8  
46 g3 ♖f5!  
47 ♖a5 ♖c8  
48 ♖f3 ♖f6  
49 ♕g2 ♖c3!  
50 ♖a8 ♖xf3  
51 ♕xf3 ♖c6  
52 ♖b8 ♖c4  
53 ♖b6+ ♕g7  
54 h5 ♖d4  
55 ♖c6! ♖e4  
56 ♖g6+ ♕f7  
57 g4  
The supreme effort!  

57 ... ♖xg4!
At once forcing the draw.
58 \( \text{xg4} \) \( \text{fxg4+} \)
59 \( \text{gxd4} \) \( \text{g7} \)
\( \frac{1}{2} - \frac{1}{2} \)

Black’s king arrives just in time to stop White’s a-pawn, e.g. 60 \( \text{f4} \) \( \text{h6} \) 61 \( \text{e4} \) \( \text{h5} \) 62 \( \text{d4} \) \( \text{g5} \) 63 \( \text{c4} \) \( \text{f5} \) 64 \( \text{xb4} \) \( \text{e6} \) 65 \( \text{b5} \) \( \text{d7} \) 66 \( \text{b6} \) \( \text{c8} \).

A splendid example of Réti’s careful defence.

great that abandoning the square e5 to the opponent cannot present any strategic inconvenience. Moreover the text move, if Black answers it in the most plausible manner, is shown to be the prelude to a beautiful final combination.

17 ... \textit{\( \text{\#e5 (D)} \)}

Black's game is untenable, for White's attack is already too strong, e.g. 17...\textit{\( \text{\#xd4} \)} 18 \textit{\( \text{\#xd4 \#e5} \)} 19 \textit{\( f6 \text{\#g6 20 \#a3!} \)} with a decisive advantage for White.

\[ \text{Diagram} \]

18 fxe6!!

This queen sacrifice, which Black is compelled to accept, decides the game in a few moves.

18 ... \textit{\( \text{\#xg3} \)}

If 18...fxe6, then 19 \textit{\( \text{\#xe6} \)}.

19 exf7+ \textit{\( \text{\#h8} \)}

Also forced.

20 \textit{\( \text{\#d5!!} \)}

The whole point of the sacrifice! 20 \textit{\( \text{\#e6} \)} would not be so good, because of 20...\textit{\( \text{\#b8} \)} 21 \textit{\( \text{\#d5 \#e5} \)} and Black could still defend himself, whereas after the text move he remains defenceless, as the following variations show:

1) 20...\textit{\( \text{\#b8} \)} 21 \textit{\( \text{\#c6 \#e5} \) (or}

21...\textit{\( \text{\#b7} \)} 22 \textit{\( \text{\#xd8} \)} 22 \textit{\( \text{\#xe5 dxe5} \)}

23 \textit{\( \text{\#xb8} \text{\#xb8} \)} 24 \textit{\( \text{\#c7!} \text{\#f8} \)} 25 \textit{\( \text{\#e6} \)}

followed by 26 \textit{\( \text{\#xf8} \)} and 27 \textit{\( \text{\#d8}, \)} and White wins.

2) 20...\textit{\( \text{\#a7} \)} 21 \textit{\( \text{\#c6 \#e5} \)} 22

\textit{\( \text{\#xe5 dxe5} \)} 23 \textit{\( \text{\#xa7} \text{\#xa7} \)} 24 \textit{\( \text{\#xb6 \#f8} \)} 25 \textit{\( \text{\#xc8} \text{\#xc8} \)} 26 \textit{\( \text{\#xd7} \)} and

White wins.

3) 20...\textit{\( \text{\#b7} \)} 21 \textit{\( \text{\#e6! \#e5} \)} 22

\textit{\( \text{\#xd8} \)} and White wins.

4) 20...\textit{\( \text{\#c5} \)} 21 \textit{\( \text{\#e6 \#e5} \)} 22

\textit{\( \text{\#xe5 dxe5} \)} 23 \textit{\( \text{\#xc5 bxc5} \)} 24 \textit{\( \text{\#c7 \#b8} \)} 25 \textit{\( \text{\#e8!} \)} is again winning for

White.

As can be seen, in all these variations White's f-pawn is stronger than Black's queen! So...

1-0

Game 29

\textbf{Grunfeld – Alekhine}

\textit{Karlsbad 1923}

Brilliancy Prize

Queen's Gambit Declined

\end{tabular}

Grunfeld is probably correct in affirming that this move is the best, but this assertion simply demonstrates that White's whole system, or rather 8 \textit{\( \text{\#c2}, \)} yields no more than equality.
9 ... h6

This advance should not be made until Black has definitely made up his mind between the two systems of defence: ...dxc4, followed by ...b5 and ...c5; or ...dxc4, followed by ...Qd5. But although this move has the advantage of weakening the attack on the point h7, when White succeeds in posting his light-squared bishop on b1 (Grünfeld's variation), it is, on the other hand, insufficient after ...dxc4 and ...Qd5, since it affords White the opportunity to keep his dark-squared bishop by a.g3, thereby leaving Black's pieces in their confined positions.

10 a.h4 a.e8!

An important improvement on the line of play adopted by Maroczy against Grünfeld in the Vienna Tournament of 1922. This game continued 10...dxc4 11 a.xc4 b5 12 a.a2 a.b7 13 a.b1 a.e8 14 a.e5! a.f8 15 0-0 and White had much the better game. The text move gains an extremely important tempo by eliminating the subsequent mating threat at h7 and thereby enables Black to free his game speedily by playing ...c5!

11 a.d3

White could have played 11 h3 without loss of time, seeing that Black has nothing better than the following capture of the c4-pawn. The question is whether this move would in the end prove useful or detrimental to him. In my game against Chajes (see Game 32) I wished to try this experiment, but my opponent, who adopted an altogether abnormal system of defence, did not give me the chance.

11 ... dxc4
12 a.xc4 b5
13 a.a2 c5 (D)

The liberating move!

14 a.d1

After this move Black gradually succeeds in seizing the initiative.

Upon 14 dxc5, Black would have replied 14 a.xc5, and if 15 a.b1 a.b7!, for the variation 16 a.xf6 a.xf6 17 a.h7+ a.f8 18 a.xb5 a.xb5 19 a.xc5 a.xb2 would be completely in his favour.

14 0-0 cxd4 (14 a.b6 is also worthy of consideration) 15 exd4 is a little better, as played by Réti and Grünfeld against Teichmann in the same tournament. Here is the continuation of the game Grünfeld-Teichmann: 15 a.b7 16 a.fd1 a.b6 17 a.e5 and now, instead of the passive move 17 a.f8, Black could have obtained a slight positional advantage by means of a pretty combination discovered by Victor Kahn: 17 a.xe5! 18 dxe5 a.c6! 19 f3
\( \mathcal{g}4! \) 20 \( \mathcal{d}5! \) (White has nothing better, for 20 \( \mathcal{x}e7 \) is refuted by 20...\( \mathcal{b}6+ \) 21...\( \mathcal{x}e5 \) 23 \( \mathcal{d}6 \) \( \mathcal{c}4 \) 22...\( \mathcal{x}h4 \) 23 \( \mathcal{x}c6 \) \( \mathcal{x}e5 \) 24 \( g3! \) 24...\( \mathcal{x}d5 \) 25 \( \mathcal{x}d5^2 \) \( \mathcal{e}1+ \) followed by ...\( \mathcal{e}a8 \) with advantage to Black.

This variation shows once again the frailty of the line 8 \( \mathcal{w}c2 \) and 9 a3.

14 ... \( \mathcal{c}xd4 \)

Simplest, for after the removal of the rook from the c-file Black could not with certainly visualise a counter-attack on the queenside.

15 \( \mathcal{x}d4 \)

Hoping to break through with his attack by a subsequent sacrifice of the exchange on d7.

15 ... \( \mathcal{w}b6 \)

16 \( \mathcal{b}b1 \)

This move appears to prevent the reply 16...\( \mathcal{b}7 \) owing to the possibility of 17 \( \mathcal{d}xb5 \) axb5 18 \( \mathcal{x}d7! \) with a winning attack for White.

But ...

16 ... \( \mathcal{b}7! \)

Black plays this move all the same, for 17 \( \mathcal{d}xb5 \) would be refuted by 17...\( \mathcal{c}6! \) 18 \( \mathcal{d}4 \) (forced) 18...\( \mathcal{w}g2 \) with a strong counter-attack. In this way Black has successfully completed his development. There consequently remains nothing else for White than castling, admitting the failure of his premature attack.

17 0-0 \( \mathcal{e}ac8 \)

18 \( \mathcal{w}d2 \)

Hindering Black’s double threat ...\( \mathcal{e}4 \) or ...\( \mathcal{c}4 \). 18 \( \mathcal{w}e2 \) would be insufficient on account of 18...\( \mathcal{x}a3 \) 19 \( \mathcal{c}xb5 \) \( \mathcal{b}4! \) and Black wins a pawn.

18 ...

\( \mathcal{e}5! \)

This knight will soon occupy e4, thereby fixing the weakness of the queenside created by 9 a3.

19 \( \mathcal{f}6 \)

In order to exchange off Black’s dangerous b7-bishop. White’s next manoeuvre is finely conceived, but insufficient to equalise.

19 ...

20 \( \mathcal{c}2 \)

21 \( \mathcal{e}2 \)

22 \( \mathcal{e}4! \)

Not at all to prevent a harmless check at h7 but rather to secure a retreat for his dark-squared bishop, whose action on the long diagonal will be very powerful.

21 \( \mathcal{w}b6 \)

22 ... \( \mathcal{e}7! \)

Feeling himself strategically inferior, Grünfeld attempts to save himself by tactical skirmishing.

Having provoked 20...g6 he now hopes for the variation 22...\( \mathcal{x}a3 \) 23 \( \mathcal{w}f3 \) \( \mathcal{x}e4 \) 24 \( \mathcal{x}e4 \) \( \mathcal{x}d4 \) 25 exd4, which would win the exchange for White.

22 ...

23 \( \mathcal{e}4! \)

But by this simple move, which is part of his plan, Black retains his advantage.

---

1 I cannot see any problem with the simple 19...\( \mathcal{c}5 \) and 20...\( \mathcal{e}5 \).

2 25 \( \mathcal{x}d5 \) \( \mathcal{d}8 \) 26 \( \mathcal{x}f7+ \) \( \mathcal{x}f7 \) 27 \( \mathcal{xf6}+ \) is better, with an immediate draw.
23 \( \Box b7 \) \( \Box b7 \)
24 \( \Box c1 \)

The threat of 24...\( \Box x a3 \) compels White to retrace his 14th move.
24 ... \( e5! \)

This advance of the e-pawn will give Black's knight a new outpost on d3, still more irksome for the opponent than its present position.
25 \( \Box b3 \) \( e4 \)

Renewing Black's threat to play 26...\( \Box x a3 \).
26 \( \Box d4 \) \( \Box e8! \)

To make the following knight manoeuvre still more effective, for now when it reaches d3 the knight will intercept the defence of the d4-knight by the white rook.
27 \( \Box f d1 \) \( \Box e5 \)
28 \( \Box a2 \)

After this move, which removes the knight from the field of action, White is definitely lost.

Comparatively better was 28 f3 upon which Black would have continued 28...exf3 29 gxf3 \( \Box c4 \) with attacking chances on both flanks, and a probable win after a long and difficult struggle.
28 ... \( \Box d3 \)
29 \( \Box x c8 \) \( \Box x c8 \) (D)
30 f3

Too late! But already there was no satisfactory reply, since after 30 \( \Box c3 \) f5 31 f3 Black would have gained the victory by the same sacrifice which occurred in the actual game: 31...\( \Box x d4! \) 32 exd4 \( \Box x d4+ \) 33 \( \Box f1 \) \( \Box f4 \) 34 \( \Box d2 \) \( \Box c4+ \) 35 \( \Box e2 \) e3! 36 \( \Box e1 \) \( \Box x b2 \) 37 \( \Box d8+ \) \( \Box f7 \) 38 \( \Box d1 \) \( \Box x a3 \)! 39 \( \Box d7+ \) \( \Box e7 \) 40 \( \Box e8+ \) \( \Box f6 \) 41 \( \Box h8+ \) \( \Box g5 \) 42 h4+ \( \Box h5 \) 43 g4+ fxg4 44 \( \Box e5+ \) g5!! and Black wins.
30 ... \( \Box x d4! \)
31 fxe4 (D)

If 31 exd4 \( \Box x d4+ \) 32 \( \Box f1 \) \( \Box f4 \) 33 \( \Box x e4 \) (or 33 \( \Box d2 \) \( \Box c4+ \) 34 \( \Box e1 \) e3! and wins) 33...\( \Box c4+ \) 34 \( \Box e1 \) \( \Box x g2+ \) 35 \( \Box d2 \) \( \Box e3+ \) and Black wins. White, who does not perceive the hidden point of the sacrifice, hopes to save himself by the text move.

---

1. There is a cunning defence by 34 \( \Box d5 \), and after 34...\( \Box x d5 \) 35 \( \Box x d4 \) \( \Box c1+ \) 36 \( \Box f2 \) e3+ 37 \( \Box g3 \) \( \Box c7+ \) 38 f4 g5 39 \( \Box d1 \) gxf4+ 40 \( \Box h3 \) there is no clear-cut route to an advantage for Black.

2. Alekhine overlooks the simple 36 b3!, which gives White a clear advantage. All this suggests that the sacrifice on d4 is simply misconceived, and that Black would have been much better off playing the line 31...\( \Box x d4 \) 32 exd4 \( \Box c4 \) 33 d5 \( \Box c5+ \) 34 \( \Box f1 \) \( \Box f4 \), which is based on the beautiful combination 35 \( \Box d2 \) e3 36 \( \Box e4 \) e2+!! 37 \( \Box x e2 \) \( \Box x d5 \) 38 \( \Box x c5 \) \( \Box x d1+ \) 39 \( \Box f2 \) \( \Box d3+. \)
31 ... $\textit{Q}f4!$
32 $\textit{exf4}$
Evidently forced.
32 ... $\textit{W}c4!!$
Winning at least a piece, but White chooses the speediest death.
33 $\textit{Wxc4}$ $\textit{Xd1+}$
34 $\textit{Wf1}$ $\textit{Ad4+}$
and mates next move.

Game 30
Alekhine – Rubinstein
Karlsbad 1923
Brilliancy Prize
Queen’s Gambit Declined

1 $d4$ $d5$
2 $c4$ $e6$
3 $Qf3$ $Qf6$
4 $Qc3$ $Qe7$
5 $g5$ $bd7$
6 $e3$ 0-0
7 $Ac1$ $c6$
8 $Wc2$

This move, which was very fashionable since the Ostend Tournaments of 1907 and which had almost completely superseded the old move (8 $Qd3$), will soon become totally obsolete, since every international tournament brings a fresh and sufficient line of play for Black.

In the Mährisch-Ostrau Tournament of 1923, Wolf played against the great theorist Grünfeld the simple continuation 8...$\textit{Qe4}$ 9 $\textit{Qxe7} Wxe7$ 10 $\textit{Qd3}$ (10 $\textit{Qxe4}$ obviously leads to nothing, for if White captures the pawn on e4 he loses his b-pawn) 10...$\textit{Qxc3}$ with an entirely defensible game which resulted in a draw.

But apart from 8...$\textit{Qe4}$ there are available to Black at least four other replies whose inadequacy has not yet been demonstrated, namely 8...$\textit{dxo4}$, 8...e5, 8...$\textit{Qe8}$ and last but not least, 8...a6!.

8 ... a6!

In my opinion better than 8...h6 upon which White can reply advantageously 9 $\textit{Qf4}$, e.g. 9...$\textit{Qe8}$ (if 9...$\textit{Qe4}$ then 10 $\textit{Qd3}$! f5 11 h4, followed at need by g3 and $\textit{Qe5}$, with advantage to White; but not 10 $\textit{Qxe4}$ $\textit{dxo4}$ 11 $\textit{Wxe4}$ $\textit{Qb4+}$ 12 $\textit{Qd2}$ $\textit{wa5}$ 13 $\textit{Wc2}$ e5! 14 $\textit{dxo5}$ $\textit{Qc5}$ and Black has a strong attack) 10 $\textit{Qd3}$ $\textit{dxo4}$ 11 $\textit{Qxc4}$ b5 12 $\textit{Qd3}$ a6 13 a4!.

From this point, the game Alekhine-Teichmann, Karlsbad 1923 unfolded in the following way: 13...$\textit{Qb7}$ 14 0-0 $\textit{Qc8}$ 15 $\textit{Wb3}$ $\textit{Wb6}$ 16 $\textit{Qe5}$ $\textit{Qe8}$ 17 $\textit{Qg6!}$ $\textit{Qf8}$ 18 $\textit{Qxf8}$ $\textit{Qxf8}$ 19 $\textit{Qe4}$ $\textit{Qxe4}$ 20 $\textit{Qxe4}$ $\textit{Qd7}$ 21 $\textit{Qd6!}$ $\textit{Qf6}$ 22 $\textit{Qc5}$ $\textit{Wc7}$ 23 $\textit{Qf3}$ a5 and White, by playing for example $\textit{Qf1}$ or $\textit{Qc2}$, instead of accepting the pawn sacrificed, which only led to a draw, would have retained a winning position.
8...c5 usually results in the isolation of White's d-pawn, but on the other hand it allows White to undertake a rather dangerous attack on the kingside. This variation admits of a complicated and very difficult game, with nearly equal chances.

Concerning 8...dxc4, see game 25 (Alekhine-Yates).

9 a4

As this identical variation had yielded me a win the previous evening against Grünfeld, who played here 9 a3 (see Game 29), I wished to avoid fighting against the defence which I considered then, and still consider now, the best. This is the reason which decided me in favour of 9 a4, a move that Rubinstein, my present adversary, had employed against me, without conspicuous success, in a similar position in the Hastings Tournament of 1922. That game continued as follows: 8...h6 9 h4 a6 10 a4 c5 11 d3 cxd4 12 exd4 dxc4 13 xc4 db6 14 a2 bd5 15 b1 b4 16 we2 d7 17 0-0 c6 18 f1 c8 19 e5 fd5 20 g3 g5 21 f4! h4 22 xc6 xc6 23 xd5 xc1 24 xc1 xd5 25 we4 g6 26 xh4 xh4 27 f5? g5! and Black won easily.

It is manifest that the move 9 a4 cannot pretend to yield any advantage, since Black can answer it by 9...e4! with greater force than on the preceding move, White's queenside being now slightly weak.

Rubinstein, however, seeks to take advantage of the weakness by a different method.

9... Ae8

If 9...h6 White replies 10 f4 with advantage.

10 d3 dxc4
11 xc4 d5 (D)

We now realise the idea conceived by Black—a fusion of the new defensive system (...a6) with the old system (...dxc4 and ...d5), in the hope of thus profiting by the weakening of the square b4 created by the advance of White's a-pawn.

12 f4!

White in his turn deviates from the beaten track. The text move is here much stronger than in the analogous position where I played it against Selезнiew at Pistoian 1922 (see Game 15) for the following reasons:

1) After 12...xb6 13 exf4 the position of the black rook at e8 is less favourable than on f8, where it hinders a subsequent attack on the point f7.

2) The manoeuvre ...b6-d5 which, in the game cited, allowed Black to undertake a counter-attack, loses its sting because White's queen...
is at c2 and he can therefore gain a tempo by \( \text{d}3 \), threatening the h-pawn.

In addition the move a4, unfavourable in other cases, here affords him the possibility of \( \text{a}2 \) and \( \text{b}1 \), a manoeuvre analogous to the Grünfeld variation (9 a3), but still more effective here because of the opening of the e-file.

We can therefore anticipate, after the ensuing exchange, a slight positional advantage for White.

12 ... \( \text{xf}4 \)
13 \( \text{exf}4 \) c5

This move, which goes against the general principle of not opening up fresh lines to a better-developed opponent, is dictated by the wish to eliminate White’s troublesome pawn on f4. White, who has not yet castled, can scarcely oppose this plan, and the game speedily assumes a most animated appearance.

14 \( \text{dxc}5 \)

Forced, for 14 0-0 would be met by 14...cxd4 and 15...\( \text{db}6 \).

14 ... \( \text{wc}7 \)!

The usual complement to the previous move. If now 15 g3 \( \text{wc}6 \) 16 \( \text{e}2 \) e5! and Black would have freed himself once and for all.

15 0-0 \( \text{xf}4 \)

The capture of the white c5-pawn would also be insufficient to maintain equality, e.g. 15...\( \text{xc}5 \) 16 \( \text{d}3 \)

\( \text{gf}6 \) 17 \( \text{ee}4 \) or 15...\( \text{xc}5 \) 16 \( \text{ee}5 \).

16 \( \text{ee}4 \)!

This pawn sacrifice is the only way to keep the initiative. The attempt to defend the c-pawn by b4 would be inadequate, as the b-pawn could not be supported by the a-pawn, e.g. 16 \( \text{ee}2 \) \( \text{wh}6 \) 17 b4 a5!.

16 ... \( \text{xc}5 \)

If 16...\( \text{xc}5 \) 17 \( \text{eg}5 \) g6 (forced, since if 17...\( \text{f}8 \) White wins by 18 \( \text{d}3 \), 18 \( \text{fe}1 \)! \( \text{f}6 \) 19 g3 \( \text{wd}6 \) 20 \( \text{ed}1 \) \( \text{we}7 \) 21 \( \text{e}5 \) with an overwhelming attack\(^1\). The text move simplifies the position and allows Black some chances of salvation.

17 \( \text{xc}5 \) \( \text{xc}5 \)
18 \( \text{d}3 \) b6

If 18...\( \text{d}6 \) then 19 \( \text{xh}7+ \) and 20 \( \text{fd}1 \), threatening \( \text{d}4 \).

19 \( \text{xh}7+ \) \( \text{h}8 \)

This seemingly plausible move (and not the next move, as the majority of annotators have thought) is the decisive mistake! After 19...\( \text{f}8 \)! Black’s king would be less endangered than after the text move, and it would have been very difficult for White to show how he could win, despite his positional superiority.

20 \( \text{e}4 \) \( \text{a}7 \)

Better was 20...\( \text{b}8 \), although in this case White would have obtained a decisive superiority by the following line of play: 21 g3 \( \text{f}6 \) (or 21...\( \text{wd}6 \) 22 \( \text{fd}1 \) \( \text{we}7 \) 23 \( \text{e}5 \) \( \text{wc}7 \)

\(^1\) After 21...\( \text{g}4 \)! White’s attack doesn’t appear too dangerous, for example 22 \( \text{gx}f7 \) \( \text{x}2 \), 22 \( \text{ex}f7 \) \( \text{xf}2+ \) 23 \( \text{h}1 \) \( \text{e}3 \) or 22 \( \text{xo}g4 \) \( \text{xf}5 \) 23 \( \text{e}2 \) \( \text{a}7 \). In this last line White has some compensation, but Black is not worse.
24 \( \text{Wc}3! \text{a5} \) 25 \( \text{Qc}6 \), followed by 26 \( \text{Wc}3 \), is winning for White) 22 \( \text{b4} \) \( \text{Qd}6 \) (else 23 \( \text{Wc}7! \) follows) 23 \( \text{Kfd}1 \) \( \text{Wc}7^1 \) 24 \( \text{Qc}6 \) \( \text{Kd}8 \) 25 \( \text{Kd}4 \) \( \text{g}6 \) 26 \( \text{Wd}2! \) \( \text{Qg}7 \) 27 \( \text{Kd}1 \) and White is winning.

21 \( \text{b}4! \)

From this point up to the end of the game Black has not a moment’s respite. Obviously he cannot capture the b-pawn, because of 22 \( \text{Wxc}8! \) and wins.

21 ... \( \text{f8} \) \( \text{(D)} \)

Therefore this retreat is absolutely forced.

22 \( \text{Wc}6 \)

Attacking the rook and the b-pawn. Black’s reply is the only way to parry this double threat.

22 ... \( \text{Ed}7 \)
23 \( \text{g}3! \) \( \text{b}8 \)

The alternative was 23...\( \text{Wd}6 \) after which White had the choice between two winning lines:

1) 24 \( \text{Kfd}1 \) \( \text{Wxd}1+ \) (or 24...\( \text{Wxc}6 \) 25 \( \text{Qxc}6 \) \( \text{Kxd}1+ \) 26 \( \text{Kxd}1 \) \( \text{Ke}7 \) 27 \( \text{Kd}8 \) and wins) 25 \( \text{Kxd}1 \) \( \text{Kxd}1+ \) 26 \( \text{Gg}2 \) \( \text{d}7 \) 27 \( \text{Wxb}6 \) \( \text{xa}4 \) 28 \( \text{Wxa}6 \) \( \text{d}7 \) 29 \( \text{Qg}5 \) \( \text{g}8 \) 30 \( \text{We}2 \) and White wins.

2) 24 \( \text{Wc}4 \) \( \text{g}8 \) (or 24...\( \text{Wc}7 \) 25 \( \text{Qe}5! \) \( \text{Ed}6 \) 26 \( \text{Qc}6^2 \) and wins) 25 \( \text{Qc}6 \) \( \text{c}7 \) 26 \( \text{Kfd}1 \) \( \text{We}7^3 \) 27 \( \text{Kd}3! \) and White wins.

24 \( \text{Qg}5! \)

Threatening 25 \( \text{Qxf}7+! \).

24 ... \( \text{Ed}8 \) \( \text{(D)} \)

25 \( \text{g}6!! \)

---

1 23...\( \text{e}5 \) is much better, releasing the c8-bishop. If 24 \( \text{Wc}6 \), then 24...\( \text{Ed}8 \), threatening both 25...\( \text{Qg}4 \) and 25...\( \text{b}7 \), and Black is at least equal, so White should prefer 24 \( \text{Wd}2 \) retaining an edge.

2 I don’t see why this wins after 26...\( \text{Ed}8 \), so it seems likely that it is a notation error, and that Alekhine intended 26 \( \text{Qg}6! \), which really does win immediately (26 \( \text{Qc}6 \) is also given in the French edition).

3 After 26...\( \text{Qxc}6 \) 27 \( \text{Wxc}6 \) \( \text{Qxc}6 \) 28 \( \text{Qxc}6 \) \( \text{b}7 \) 29 \( \text{Qc}3 \) (29 \( \text{b}5 \) \( \text{Qxc}6 \) 30 \( \text{bxc}6 \) \( \text{Qc}8 \) is good for Black) 29...\( \text{Qxb}4 \) 30 \( \text{Qb}3 \) \( \text{Qc}5 \), followed by ...\( \text{Qd}5 \), White’s winning chances appear to be very small.
The _coup de grâce_. Should Black take this bishop, the following mating variation would ensue: 25...fxg6 26 \( \text{We}4 \)! \( \text{b}b4 \) 27 \( \text{h}4+ \) \( \text{g}8 \) 28 \( \text{h}7+ \) \( \text{f}8 \) 29 \( \text{h}8+ \) \( \text{e}7 \) 30 \( \text{x}g7+ \) \( \text{e}8 \) (or 30...\( \text{d}6 \) 31 \( \text{fd}1+ \) mating next move) 31 \( \text{g}8+ \) \( \text{f}8 \) 32 \( \text{x}g6+ \) \( \text{e}7 \) 33 \( \text{xe}6# \). On the other hand, 25...\( \text{b}7 \) 26 \( \text{c}4 \)! would transpose into identical variations. Black is consequently forced to sacrifice the exchange, after which his game is hopeless.

25 ... \( \text{We}5 \)
26 \( \text{xf}7+ \) \( \text{xf}7 \)
27 \( \text{xf}7 \) \( \text{ff}5 \)
28 \( \text{fd}1! \)

Simple and decisive.

28 ... \( \text{xd}1+ \)
29 \( \text{xd}1 \) \( \text{xf}7 \)
30 \( \text{xc}8 \) \( \text{h}7 \)
31 \( \text{xa}6 \) \( \text{f}3 \)
32 \( \text{d}3+! \) 1-0

Game 31
Alekhine – Maroczy
Karlsbad 1923
Queen’s Gambit Declined

1 \( d4 \) \( \text{d}f6 \)
2 \( c4 \) \( e6 \)
3 \( \text{d}f3 \) \( d5 \)
4 \( \text{c}3 \) \( \text{e}7 \)
5 \( \text{g}5 \) \( 0-0 \)
6 \( e3 \) \( \text{e}4 \)

A defence practised on several occasions by Dr. Emanuel Lasker, and subsequently by Capablanca, in their respective matches with Marshall. It is doubtless no worse than other defences, and has the advantage of simplifying the game, without creating weaknesses in Black’s camp.

In the 1922 London Tournament Maroczy tried against me 6...c5, as recommended by Rubinstein in Colijn’s _Lärobok_, and obtained a distinctly inferior game. Here is the instructive continuation of the game:

6...c5 7 cxd5 \( \text{ex}d5 \) 8 \( \text{xc}5 \) \( \text{e}6 \)
9 \( \text{b}5! \) \( \text{xc}5 \) 10 0-0 \( \text{c}6 \) 11 \( \text{c}1 \) \( \text{e}7 \)
12 \( \text{xc}6! \) bxc6 13 \( \text{a}4 \) \( \text{e}8 \) 14 \( \text{d}4 \)
15 \( \text{xf}6! \) \( \text{xf}6 \) 16 \( \text{xc}5 \) \( \text{e}8 \)
17 \( \text{g}4 \) \( \text{b}8 \) 18 \( b3 \) \( g6 \) 19 \( \text{c}2 \) \( \text{d}6 \)
20 \( \text{fc}1 \) \( \text{e}5 \) 21 \( \text{f}3! \) \( \text{g}7 \) 22 \( \text{wa}4 \)
23 \( \text{td}4 \) \( \text{b}6 \) 24 \( h3 \) \( \text{c}5 \) 25 \( \text{d}3! \) \( \text{xd}4 \) 26 \( \text{ex}d4 \) \( \text{b}7 \) 27 \( \text{e}1 \)
28 \( \text{g}5 \) and now by 28 \( \text{e}5 \) White could have easily maintained a winning positional advantage.

7 \( \text{xe}7 \) \( \text{xe}7 \)
8 \( \text{wb}3 \)

In order to avoid the variation 8 cxd5 \( \text{xc}3 \) 9 bxc3 \( \text{ex}d5 \) 10 \( \text{wb}3 \) \( \text{d}8 \) 11 c4 \( \text{c}6 \), which seems to yield Black equality. However, 8 \( \text{c}2 \) is a better way to implement this idea, for after the text move Black need not have captured the knight, and could first have played 7...c6 followed by 8...f5.

8 ... \( \text{xc}3 \)
9 \( \text{xc}3 \) \( c6 \)

At New York 1924, in an identical position, Maroczy played against me 9...c5, but after 10 cxd5 \( \text{ex}d4 \) 11 \( \text{xd}4 \) White has an evident advantage owing to the weakness of the d5-pawn and White’s control of the open c-file.

10 \( \text{d}3 \) \( \text{d}7 \)
11 0-0 \( f5 \) (D)
The ‘Stonewall’ formation is here quite without value, for even supposing that Black’s knight were to occupy the square e4, it could be dislodged by f3, or else exchanged for White’s bishop. On the other hand, the square e5 will furnish White with an impregnable position for his knight, Black’s bishop being of a different colour from that of the square mentioned.

12 ... a3

Anticipating Black’s manoeuvre 12... d6 followed by 13... d4, to which he would have replied 13 d5, White seizes his moment’s respite to complete his development.

12  g5

But this attack, quite astonishing from a master of Maroczy’s reputation, hopelessly compromises the already insecure black king position.

13 a3  f7

This is as inexplicable as the previous move. Comparatively better was 13... d6 followed by 14... d7.

14 f3  e5

In the hope of forcing the exchange of queens on the 18th move, but without sufficiently appreciating the reply 19 c7!, although in any case the game was lost for Black.

15 cxd5  cxd5
16 e4!  fxe4
17 fxe4  xf1+
18 xf1  exd4 (D)

Still reckoning on 19 xd4 c5, but White’s next move shatters this last illusion.

19 c7!

Paralysing in a single move all the black pieces, after which Black’s position becomes hopeless.

19  g7
20 f5!  dxe4
21 dxe4  b4

Surrendering to the inevitable. If 21... h6 White wins easily by 22 h3, followed by 23 h2 and 24 d6.

22 xg5+  1-0

Game 32
Alekhine – Chajes
Karlsbad 1923
Queen’s Gambit Declined

1 d4  f6
2 c4  e6
3 \( \text{d}3 \) \( \text{d}5 \\
4 \text{c}3 \text{bd}7 \\

After this move White, apart from the text move (5 \( \text{g}5 \)), could very well have replied 5 \text{cxd}5 \text{exd}5 6 \text{f}4!, with an excellent position. This is the reason why 4...\text{e}7 is considered better.

5 \( \text{g}5 \) \text{e}7 \\

After 5...\text{c}6 6 e3 \text{a}5 7 \text{d}2 \text{b}4 8 \text{c}2 0-0 White, should he wish to avoid the line played in the game Grünfeld-Bogoljubow (Mährisch-Ostrau 1923), namely, 9 \text{e}2 e5! 10 dxe5 \text{e}4!, could continue simply 9 \text{xf}6 \text{xf}6 10 \text{d}3 \text{d}8 11 0-0 with a slight positional advantage, as played by Johner against Dr. Tarrasch at Trieste 1923.

6 e3 0-0 \\
7 \text{c}1 c6 \\
8 \text{c}2 a6! \\
9 a3 \text{e}8 \\
10 h3 \\

In order to avoid the loss of a move by 10 \text{d}3, which would have transposed into a position from the game Grünfeld-Alekhine, which is perfectly safe for Black (see Game 29) after 10...h6 11 \text{h}4.

10 ... b5 \\

A very interesting idea which may actually have some future. But its tactical realisation here lacks precision. It is on the 9th move, before 10 h3, that Black should have played 9...b5, if such was his intention, for in that case he could have answered 10 c5 by 10...e5 11 dxe5 \text{g}4 with a very promising position. On the other hand, should White, instead of 10 c5, open the c-file by 10 \text{cxd}5 or 10 \text{xb}5, this would ultimately turn in Black’s favour, White having to lose two moves to bring his king into safety.

This example emphasises once again the numerous resources afforded by the defence 8...a6! in this variation.

11 c5! \\

Whereas now Black will not succeed in breaking through in the centre, and the weakness of his c-pawn will make itself felt sooner or later. It is, however, without immediate consequences, on account of the blocked position of the two adversaries and the difficulties experienced by White in penetrating the hostile lines.

11 ... \( \text{d}h5 \\
12 \text{f}4! \\

This is the only logical reply. White must at all costs retain control of the square e5.

12 ... \text{xf}4 \\
13 \text{xf}4 (D)

\[ \text{B} \]

13 ... a5 \\
14 \text{d}3 g6!
The best line of defence. Black guards against the possibility of f5 and prepares a solid defensive position.

15 h4!

Not with the illusion of a mating attack but simply to secure, at the right moment, the opening of the h-file which will later on become a winning factor for White.

15 ... \( \mathcal{f}6 \)
16 h5 \( \mathcal{f}8 \)
17 g3

Quietly strengthening a position which Black can scarcely modify appreciably.

17 ... \( \mathcal{a}7 \)
18 \( \mathcal{d}1! \)

Threatening to post this knight on g4. Black’s next move is intended to prepare the double advance of the f-pawn and thus to shut out White’s knight from the coveted square.

18 ... \( \mathcal{g}7 \)
19 \( \mathcal{e}3 \) f5

If this move has the advantage of further strengthening the castled position, it does on the other hand leave Black with indifferent chances for the endgame.

20 \( \mathcal{w}2! \)

Preparing to occupy the square e5 with a white piece.

20 ... a4

This is the only move of Black’s in the game which can be criticised, seeing that without apparent reason it abandons the square b4 to the white knights. If Black had not modified the pawn structure, White’s right plan would have been \( \mathcal{c}2, \mathcal{f}1, \mathcal{e}1, \mathcal{b}1, \mathcal{d}3 \) and finally \( \mathcal{d}5 \).

21 \( \mathcal{c}2 \)

Now this knight can at need be brought to c5 via b4 and d3, saving time.

21 ... \( \mathcal{a}e7 \)
22 \( \mathcal{f}1 \)

In order to render innocuous the threat ...\( \mathcal{d}7 \) followed by ...\( \mathcal{x}d4! \) and ...e5, should White play, for example, 22 \( \mathcal{b}4 \) \( \mathcal{w}c7 \).

22 ... \( \mathcal{f}6 \)
23 \( \mathcal{e}5 (D) \)

This move to be sure compromises nothing, but the logical continuation was 23 \( \mathcal{b}4 \) followed by \( \mathcal{b}1, \mathcal{d}3 \) and \( \mathcal{d}5 \). Had Black made the correct reply White would have been forced to return to this plan.

23 ... \( \mathcal{x}e5 \)

Better was 23...\( \mathcal{w}c7! \) followed by 24...\( \mathcal{x}e5 \), forcing White either to recapture the bishop with the queen, which would have led to an exchange of queens, or else to recapture it with one of the pawns; in both cases his chances of winning would
have been reduced to vanishing point. In these circumstances White would have withdrawn his knight to f3, intending to carry out in perfect safety the manoeuvre sketched above.

24 \( \text{\textit{Wxe5}} \)

This exchange, provoking the weakening of the dark squares in the hostile position, yields White new winning chances.

24 ... \( \text{\textit{Wc7}} \)

25 \( \text{\textit{Wf6!}} \)

An excellent manoeuvre intended to create a new weakness at h7.

25 ... \( \text{\textit{Ef7}} \)

26 \( \text{\textit{Wh4}} \)

27 \( \text{\textit{Wxe7}} \)

27 \( \text{\textit{hxg6!}} \)

The right moment for this exchange has come at last, for Black cannot recapture with the pawn, which would allow him to oppose his rooks on the h-file. Now White has a strategic advantage sufficient for victory, but its tactical realisation is far from easy.

27 ... \( \text{\textit{Fxg6}} \)

28 \( \text{\textit{Wh5}} \)

White must avoid every exchange which would simplify Black’s defence.

28 ... \( \text{\textit{Wf6}} \)

29 \( \text{\textit{We2}} \)

White’s following moves are intended to reduce to a minimum the mobility of the black pieces, in order to undertake a long range manoeuvre with his king.

29 ... \( \text{\textit{Hg7}} \)

30 \( \text{\textit{Wf3}} \)

31 \( \text{\textit{We3}} \)

32 \( \text{\textit{Db4}} \)

33 \( \text{\textit{Hh5 (D)}} \)

This move leads to a curious position in which Black’s queen, both rooks and the bishop are immobilised. The problem of winning still needs to be solved, for at present the doubling and even the trebling of the white pieces on the h-file would lead to nothing. The rather complicated plan which White will strive to pursue, which must, of course, be modified in accordance with Black’s manoeuvres, can be summarised as follows:

1st phase – Bringing the king to the centre where, after the later exchange of queens and rooks on the h-file, it will threaten a rapid penetration of the hostile camp via a5. These tactics will logically induce a corresponding displacement of the black king, the more plausible since its presence in the centre will consolidate the weak points c6 and e6.

2nd phase – Compelling Black’s pieces to remove themselves in succession from the kingside by tactical threats aimed either at the king himself or at the enemy pawns (39th and...
41st moves). The prospect of the occupation of the square e5 by a white knight, thereby immobilising the black knight at d7, increases still more the difficulty of concerted action by the black pieces, which is already difficult enough on account of the limited space available to them.

3rd phase – Finally, at an opportune moment, namely, when Black’s pieces are at their greatest distance from the kingside, doubling rooks on the h-file. The rooks, after the forced exchange of queens and bishops, will penetrate into the heart of the hostile position.

As we shall see by the sequel, the methodical execution of this strategic plan requires no less than twenty-eight moves!

33 ... \[g6
34 \[d3

Not at once 34 e2 on account of 34...e5!

34 ... \[e8
35 \[e2 \[f8
36 \[d2 \[b7

Making way for the king.

37 \[f3 \[e7
38 \[he1 \[f8
39 \[b4

Threatening 40 \[xd5.

39 ... \[d8
40 \[d3 \[ge7
41 \[d2!

Threatening, after 42 \[a6!, the entry of the queen at a5.

41 ... \[a7
42 \[h1 \[ec7

In order to utilise the bishop for the defence of the h-pawn when the knight abandons it to guard the square e5.

43 \[h2 \[g6
44 \[e3 \[c8

Black, in order to make his rooks available for the defence of the kingside, proposes to defend his c-pawn with his king, but this manoeuvre demands far too much time, and White is now ready for the final assault.

45 \[ch1 \[b7
46 \[d2 \[e7
47 \[d3 \[d7
48 \[h5!

By this exchange of Black’s best defensive piece, White takes an important step forward.

48 ... \[a8
49 \[xg6 \[hxg6

After 49...\[xg6, Black’s h-pawn would later on prove difficult to defend.

50 \[h7 \[ae8 (D)

For the moment Black’s defence is still adequate, but White’s next move discloses the difficulties of the enemy position.

\[a5

51 \[e5!
The point of this move rests in the fact that for the first time in this game White can profitably consider the recapture at e5 with a pawn. In fact, if 51...\(\text{Q}\text{x}e5\) 52 fxe5 \(\text{Wf}8\), then 53 \(\text{Wg}5!\) and White wins the g-pawn to start with. Black’s reply is therefore forced.

51 ... \(\text{Qf}8\)
52 \(\text{Kh}8!\)

Now that it is possible for White to penetrate down the h-file, the position demands the exchange of queens and not of rooks.

52 ... \(\text{Hg}7\)
53 \(\text{Qf}3!\) \(\text{Hb}8\)

To secure freedom of movement for the knight, in case of need.

54 \(\text{Qg}5\) \(\text{He}7\)

Black is quite defenceless against White’s next move.

55 \(\text{We}5\)

After the compulsory exchange of queens, the doubling of the rooks on the eighth rank will be decisive.

55 ... \(\text{Wxe}5\)
56 fxe5 \(\text{B}a8\)
57 \(\text{Hg}8\) \text{b}4

In the hope of obtaining some last chance after 58 axb4 \(\text{Heb}7\).

58 \(\text{Ahh}8!\) \(\text{Hee}8\)
59 axb4 \(\text{B}a7\)
60 \(\text{Qc}3\) \(\text{B}a6\)
61 \(\text{Qf}7!\)

More energetic than the plausible move 61 \(\text{Qxe}6\). White now goes straight for mate.

61 ... \(\text{Ba}8\)
62 \(\text{Qd}6\) \(\text{Heb}8\)
63 \(\text{Hhl!}\) \(\text{Qd}7\)
64 \(\text{Ba}1!!\) 1-0

Game 33

Alekhine – Réti

*New York 1924*

King’s Indian Defence

1 \(\text{d}4\) \(\text{Qf}6\)
2 \(\text{c}4\) \(\text{g}6\)
3 \(\text{g}3\)

Nowadays 3 \(\text{Qc}3\) d5 4 \(\text{Qf}4\), followed by e3, is considered a promising line.

3 ... \(\text{Bg}7\)
4 \(\text{Qg}2\) 0-0
5 \(\text{Qc}3\) d6
6 \(\text{Qf}3\) \(\text{B}e6\)

If Black has nothing better (and this seems to be the case) than to induce the advance of White’s pawn to d5—where, to be sure, it shortens for the time being the diagonal of the bishop, but, on the other hand, brings considerable pressure upon Black’s position—then his plan of development surely is not to be recommended.

7 \(\text{d}5\) \(\text{Qb}8\)
8 0-0 \(\text{B}g4\)

The exchange of this bishop is not reasonable and merely lessens the power of resistance in Black’s position. Also unsatisfactory would be 8...e5 on account of 9 dxe6 fxe6 10 \(\text{B}g5\), as played in my game against Sir G. Thomas in Karlsbad 1923. On the other hand, the move 8...a5 comes into consideration in order to temporarily secure the square c5 for the knight; but in this case also White would maintain his superior position, by means of h3, \(\text{B}e3\), \(\text{Wc}2\), b3, a3 and, finally, b4.
9 h3

It was important to clarify the situation before the opponent completed his development.

9 ... \( \mathcal{A} \)xf3

10 exf3

Much better than to recapture with the bishop, when either the e2-pawn would have remained inactive a long time or, if advanced, would have restricted the action of White’s own pieces. After the text move, however, the pawn takes over guarding the important square e5, and, moreover, Black must reckon with an eventual hostile action on the e-file opened by this move.

10 ... e6

The e-pawn had to be exchanged, but it would have been relatively better for Black to have done so through 10...e5. Then White would have had only one good reply (11 dxe6), in as much as 11 f4 exf4 12 \( \mathcal{A} \)xf4 \( \mathcal{A} \)bd7 clearly would have been quite tolerable for Black. After the actual move, on the other hand, White has the pleasant choice between two good continuations.

11 f4

Even more favourable than 11 dxe6 fxe6 12 \( \mathcal{E} \)e1 \( \mathcal{W} \)d7, when it would have been by no means easy to profit from the weaknesses of Black’s centre.

11 ... exd5

12 cxd5 (D)

Now, however, Black must make a choice between three distinct evils:

1) A weakness on c7 if he allows the pawn position to remain intact;

2) A weakness on c6 if, after the sequence ...c5; dxc6, he should recapture with the pawn and later on be forced to play ...d5;

3) And, finally, the line actually selected by him, through which he obtains an isolated d-pawn, the protection of which, made difficult through the powerful co-operation of the hostile bishops, will soon result in a decisive weakening of his queenside.

12 ... c5

13 dxc6 \( \mathcal{O} \)xc6

14 \( \mathcal{A} \)e3 \( \mathcal{W} \)d7

15 \( \mathcal{W} \)a4

A most effective square for the queen, from which it will exert troublesome pressure against Black’s queenside.

15 ... \( \mathcal{E} \)ac8

16 \( \mathcal{E} \)ad1

Both players act out the same idea, namely that the b-pawn must be removed beyond the reach of the opponent’s bishop. Incidentally, 16 \( \mathcal{A} \)xa7 would not do here, of course, on account of 16...\( \mathcal{A} \)a8.

16 ... b6

17 b3
This move has the additional purpose of further protecting the queen in anticipation of the subsequent complications. How important this is will soon become apparent.

17 ... \( \text{hfd8} \)

18 \( \text{ad3} \)

It would have been premature to play \( \text{a5} \) at once, on account of 18...d5. Now, however, White threatens to make this move after doubling rooks and therefore Black endeavours, through an exchange, to relieve the pressure exerted by the white queen.

18 ... \( \text{e7?} \)

In this way, indeed, it cannot be done and Black immediately finds himself at a material disadvantage. Somewhat better would have been 18...\( \text{a5} \) 19 \( \text{wa3 ef8} \) 20 \( \text{hfd1} \), with a difficult game for Black, to be sure, but yet making defence possible.

19 \( \text{b5!} \) \( \text{d5} \)

Clearly forced.

20 \( \text{xa7} \)

This line was made possible by White’s 17th move.

20 ... \( \text{a8} \)

21 \( \text{xb6} \) \( \text{xa4} \)

Black has nothing better, because after 21...\( \text{db8} \) White would have continued simply with 22 \( \text{wd7 xd7} \) 23 \( \text{e3 b7} \) 24 \( \text{xd5 xd5} \) 25 \( \text{xd5 xa7} \) 26 \( \text{xa7 xa7} \) 27 \( \text{f1} \), with a decisive advantage.

22 \( \text{xa4} \) \( \text{d7} \)

23 \( \text{b5} \) \( \text{xa4} \)

Threatening to play 24...\( \text{b4} \) 25 \( \text{b3 xb3} \) 26 axb3 \( \text{b7} \).

24 \( \text{c3} \) \( \text{a6} \)

The position is now clarified, White having maintained his passed pawn while Black’s d-pawn remains weak.

28 \( \text{c3!} \)

The quickest method of winning. While he relinquishes the a-pawn, White in return is forces an entrance for his rook into the enemy camp, whereby the decisive pawn attack is made possible. The tame 28 a3 would have permitted the opponent a more stubborn resistance after 28...\( \text{a5} \) 29 \( \text{e3 b5} \).

28 ... \( \text{a5} \)

29 \( \text{e3} \) \( \text{b4} \)

After 29...d4 there would follow not 30 \( \text{xd4 xd4} \) 31 \( \text{xd4 dd5} \), with drawing chances, but 30 \( \text{xc6} \) dxc3 31 a4, winning.

30 \( \text{d2} \) \( \text{h6} \)

If at once 30...\( \text{e4} \) then 31 \( \text{xe4} \) dxe4 32 \( \text{d8+ f8} \) 33 f5 and wins.

31 a4!

Threatening 32 \( \text{b6} \) and thereby forcing Black’s next move.
31 ... \( \text{g}e4 \\
32 \text{dxe}4 \text{dx}e4 \\
33 \text{d}d8+ \text{h}7 \\
34 \text{xe}4 \text{xa}4 (D) \\

If 34...f5 then 35 \text{d}d7! \text{h}8 (or 35...fxe4 36 \text{d}d4 \text{d}5 37 \text{x}g7+ \text{h}8 38 \text{d}d7+, followed by the exchange of rooks, and wins) 36 \text{d}d4 \text{x}d4 37 \text{x}d4 fxe4 38 \text{x}b4 and wins.

35 f5!

The start of the decisive pawn charge. For the present, 36 fxg6+ fxg6 37 \text{d}d6 is threatened.

35 ... \text{a}6 \\
36 h4 h5 \\
Forced on account of the threat 37 h5.

37 g4! \text{a}5 \\
Or 37...hxg4 38 h5 and wins.

38 fxg6+ fxg6 \\
39 gh5 \text{hxh}5 \\
40 \text{g}5! \\
Winning at least the exchange.

40 ... \text{c}3 \\
41 \text{d}d7+ \text{g}8 \\
42 \text{x}g6 1-0 \\

Since, after 42...\text{h}8, White wins immediately by the advance of the h-pawn.

Game 34
Alekhone – Janowski
New York 1924
Irregular Defence

1 d4 \text{f}6 \\
2 c4 d6 \\
3 \text{c}3 \text{f}5? \\

This move would be reasonable if White had already developed his knight to f3, after which the control of e4 would temporarily remain in Black’s hands. But in the actual situation, the bishop, after White’s e2-e4, will have no future whatsoever. The late Janowski certainly had a very fine feeling for handling the pair of bishops—but was never a great openings connoisseur, as his contemporaries sometimes liked to represent him.

4 g3 \\
Even 4 f3 and 5 e4 would have strategically refuted Black’s bishop move.

4 ... c6 \\
5 \text{g}2 \text{bd}7 \\
6 e4 \text{g}6 \\
7 \text{ge}2 e5 \\

\text{1} 35 \text{a}8 is much simpler. \\
\text{2} Or 37...\text{xa}4 38 \text{b}1! \text{g}7 39 \text{g}2, followed by 40 \text{c}4 and 41 \text{c}2, winning as 41...\text{a}2 can be met by 42 \text{b}3.
8 h3
Prepar ing \( \text{\textsc{\&}} \text{a3} \). From now on Black has only the choice between more or less unsatisfactory moves.

8 ... \( \text{\textsc{\#}} \text{b6} \)
9 0-0 0-0-0 \((D)\)

This supplies White with an objective for a direct attack, which, owing to the unfortunate position of the black pieces, will have catastrophic consequences. Instead, 9...\( \text{\textsc{\&}} \text{e7} \) 10 \( \text{\textsc{\&}} \text{e3} \) \( \text{\textsc{\#}} \text{c7} \) would have permitted a steadier resistance.

\[\text{Diagram}1\]

10 d5!

Demolishing all Black's hopes for eventual delivery by means of ...d5. The temporary release of the square c5 is, in comparison with this main motive, altogether immaterial.

10 ... \( \text{\textsc{\&}} \text{c5} \)
11 \( \text{\textsc{\&}} \text{e3} \) cxd5
12 cxd5 \( \text{\textsc{\#}} \text{a6} \)

Acceptance of the pawn sacrifice would have led to a clearly losing position—for instance, 12...\( \text{\textsc{\#}} \text{xb2} \) 13 \( \text{\textsc{\&}} \text{xc5} \) dxc5 14 \( \text{\textsc{\#}} \text{a4} \) \( \text{\textsc{\#}} \text{b6} \) 15 f4 exf4 16 gxf4, but the continuation in the text is likewise without prospects.

13 f3

Simple and decisive—Black no longer has a defence against b4. If, for instance, 13...\( \text{\textsc{\#}} \text{d3} \), the White replies 14 \( \text{\textsc{\#}} \text{c1} \).

13 ... \( \text{\textsc{\#}} \text{b8} \)
14 b4 \( \text{\textsc{\&}} \text{cd7} \)
15 a4 \( \text{\textsc{\#}} \text{c4} \)
16 \( \text{\textsc{\#}} \text{d2} \)

Good enough, but considering White's tremendous positional advantage, there was no need for combining. The simple 16 \( \text{\textsc{\&}} \text{b1} \), followed by \( \text{\textsc{\#}} \text{d2} \) and \( \text{\textsc{\&}} \text{fc1} \), would have won without the slightest effort.

16 ... \( \text{\textsc{\#}} \text{xb4} \)

In such a position one may 'eat' anything!

17 \( \text{\textsc{\&}} \text{xa7+} \) \( \text{\textsc{\#}} \text{a8} \)
18 \( \text{\textsc{\&}} \text{fb1} \) \( \text{\textsc{\#}} \text{a5} \)
19 \( \text{\textsc{\&}} \text{e3} \) \( \text{\textsc{\&}} \text{c5} \)
20 \( \text{\textsc{\&}} \text{b5} \) \( \text{\textsc{\#}} \text{c7} \)
21 a5 \( \text{\textsc{\&}} \text{fd7} \)

Black has weathered the first onslaught more or less successfully, but in as much as White can attack the hostile king with all his seven pieces, while Black's kingside is still undeveloped and his g6-bishop has long since forgotten that it is able to move, White's win is merely a matter of time.

22 \( \text{\textsc{\&}} \text{c1} \) \( \text{\textsc{\&}} \text{c8} \) \((D)\)
23 \( \text{\textsc{\&}} \text{b3} \) \( \text{\textsc{\&}} \text{a6} \)

If 23...\( \text{\textsc{\&}} \text{xb3} \) then 24 a6! forcing 24...b6 (taking on d2 or a1 would allow mate after 25 axb7+), and only then 25 \( \text{\textsc{\&}} \text{xb3} \).

24 \( \text{\textsc{\&}} \text{a4} \) \( \text{\textsc{\&}} \text{e7} \)

Black makes up his mind to give up the exchange, knowing that, if
24...\textit{b}b8 White, with 25 \textit{c}c1 \textit{d}d8 26 \textit{c}c6, would have proceeded to institute a decisive attack.

25 \textit{b}b6+

The crisis. After 25...\textit{x}b6 26 \textit{x}b6 followed by 27 \textit{x}xa6+, White would win immediately.

25 ... \textit{b}b8
26 \textit{c}c1 \textit{d}c5
27 \textit{d}xc5 \textit{d}xc5
28 \textit{d}xc8

The first material gains.

28 ... \textit{x}xc8
29 \textit{f}f1 \textit{d}d7
30 \textit{b}b6 \textit{e}4

Or 30...\textit{d}d8 31 \textit{b}b2 still winning the pawn.

31 \textit{x}c4 \textit{x}c4
32 \textit{x}c4 \textit{x}xh3
33 \textit{g}g2

Technically simpler than 33 \textit{x}xa6, which would have won also.

33 ... \textit{x}xg2+
34 \textit{x}xg2 \textit{d}d8
35 \textit{b}b2 \textit{c}c8
36 \textit{x}xa6 \textit{b}xa6
37 \textit{b}b6 \textit{g}g5
38 \textit{c}c2+ \textit{b}b7
39 d6 \textit{f}5
40 d7 1-0

Game 35

Alekhine – Opočenský

Paris 1925

Slav Defence

1 d4 d5
2 c4 c6
3 \textit{c}c3

My second match with Dr. Euwe, in which the seemingly promising answer 3...\textit{d}xc4 was refuted in a convincing manner, has proved that the text move is at least as good as the fashionable 3 \textit{f}f3.

3 ... \textit{f}f6
4 e3 \textit{f}5
5 \textit{x}xd5 \textit{d}xd5

If 5...\textit{x}xd5 then, of course, 6 \textit{b}b3 with advantage.

6 \textit{c}c4 \textit{e}6
7 \textit{g}e2

Introduced by Rubinstein against Bogoljubow at Hastings 1922, and creating for Black a number of difficulties because of the inactive position of his light-squared bishop and his backward development.

7 ... \textit{d}d7
8 e4 \textit{xc}c3
9 \textit{xc}c3 \textit{g}g6
10 0-0 \textit{h}h4 (D)

After the more natural 10...\textit{b}b4, White would maintain his positional advantage by playing simply 11 f3. The text move prepares for queenside castling, and at the same time guarantees to the bishop the square \textit{h}5 in case White plays \textit{f}4-\textit{f}5.

11 d5!

This central action required exact calculation as Black will now force
the weakening move g3. But White had practically no other way of keeping the initiative—after 11 f3 0-0-0 Black’s prospects would have been excellent.

11 ... exd5
12 g3 w6
13 exd5 c5?

Black’s first and already decisive mistake. He now loses the possibility of castling and finally succumbs because of his inability to co-ordinate the action of his rooks. Necessary was first 13...e5 and only after 14 e2 should he play 14...c5. If in that case 15 g2, renewing the threat f4, then 15...h5! after which White would have been practically forced to answer 16 h4 followed by g5. The position in that case would remain full of dynamite, but would be by no means hopeless for Black.

14 e1+ f8
15 f4 b6
16 b3 h5
17 h4

From the 14th move onwards White has only one idea—to prevent Black’s rooks co-operating with one another.

17 ... g8
18 dxc6 bxc6
19 c1

After this Black cannot prevent the exchange of one of his bishops against the knight.

19 ... d4
20 e4 xe4
21 xe4 c5

Or 21...xb2 22 c5! d5 23 xd5 cxd5 24 xd5 with a decisive advantage.

22 w2

Starting the final attack against f7.

22 ... g6
23 g5 d6

Attacking g3.

24 w3 f8 (D)

25 xd4!

Eliminating the only active enemy piece and thus breaking down any resistance.

25 ... cxd4
26 c6! h7

After 26...g7 White would have sacrificed another rook: 27 xg6+! xg6 (27...fxg6 28 b7+ followed by mate) 28 f6+ h7 29 xf7
\[ \text{g8 f5+ g7 f6+ h8 g6+ h6+ and mate next move.} \]

27 \text{xf7 c8}

28 \text{xg6 1-0}

Game 36
Tarrasch – Alekhine
Baden-Baden 1925
Giucio Piano

1 e4 e5
2 \text{f3 c6}
3 \text{c4 c5}
4 c3 b6
5 d4 e7
6 0-0 f6(!)

This move, introduced by me instead of the usual 6...d6, leaves White less choice because his e-pawn is now attacked.

7 e1 d6
8 a4 a6
9 h3

A more or less necessary preparation for e3.

9 ... 0-0

10 g5

As White gains no advantage by provoking Black’s next move, he would have done better by playing 10 e3 at once.

10 ... h6

11 e3 (D)

If 11 h4 then of course 11...h8 followed by ...e8 and ...g5.

11 ... d8!

This paradoxical move—the most difficult in the game—is very effective. The double idea is to prepare an eventual action in the centre starting with ...exd4 followed by ...d5 and, at the same time, free the e-file for the rook.

12 d3 e8
13 b2 a7(!)

Played in view of White’s possible c4.

14 c2 exd4

At the right time, as White cannot well retake with the pawn because of 15 b4.

15 xd4 e5
16 f1 d5!

After this Black becomes at least as strong in the centre as his opponent. The tactical justification of the move is shown by the variation 17 f4 c6 e5 h5! ?

17 ad1 c5
18 b3 c7
19 f4

Also after 19 exd5 xd5 20 c4 xc4 21 xc4 xe3 22 xe3 xe3 23 fxe3 w7 Black would have kept slightly the better prospects.

19 ... f3+!
20 xf3 xf4
21 exd5?

The decisive mistake, after which the game ends rapidly. I expected instead 21 e5 and hoped to be able to
exploit the advantage of the two bishops after 21...\texttt{A}f5 22 \texttt{W}d2 \texttt{W}x\texttt{d}2 23 \texttt{A}x\texttt{d}2 \texttt{A}e4 24 \texttt{A}d\texttt{d}1 (24 \texttt{A}x\texttt{d}5? \texttt{A}e6) 24...\texttt{A}ad8.

21 ... \texttt{A}f5!

An important intermediate move, after which there is no adequate defence. 21...\texttt{A}x\texttt{h}3 would have been much less convincing because of 22 g\texttt{x}h3 \texttt{W}xf3 23 \texttt{A}g2.

22 \texttt{A}d3 (D)

Or 22 \texttt{W}d2 \texttt{W}xa4 23 \texttt{A}c1 \texttt{A}c2! 24 \texttt{A}xe8+ \texttt{A}xe8 25 \texttt{A}e1 \texttt{A}e4 26 \texttt{W}f4 c4 27 \texttt{A}d4 \texttt{A}xd4 28 cxd4 \texttt{W}b4! with a winning advantage for Black.

22 ... \texttt{A}x\texttt{h}3

And not 22...\texttt{A}x\texttt{d}3 23 \texttt{W}x\texttt{d}3 c4 because of 24 \texttt{W}d2.

23 g\texttt{x}h3 \texttt{W}xf3

24 \texttt{A}xe8+

After the immediate 24 \texttt{A}f1 and the following exchange of rooks by Black he would, of course, have lost his only hope—the passed pawn. But after the text move Black decides the game by a mating attack.

24 ... \texttt{A}xe8

25 \texttt{A}f1 \texttt{A}e5

26 c4

26 d6 would obviously not alter matters.

26 ... \texttt{A}g5+

27 \texttt{A}h2 \texttt{A}g4+

28 hxg4 \texttt{A}xg4

Threatening unavoidable mate.

0-1

Game 37

R\text{é}ti – Alekhine

\textit{Baden-Baden 1925}

King’s Fianchetto

1 g3 e5

2 \texttt{A}f3

An experiment which R\text{é}ti never repeated after the present game. White intends to play the Alekhine’s Defence with colours reversed, i.e. with one tempo more. But the way he uses that tempo (g3) could have turned to his disadvantage (see next note).

2 ... e4

3 \texttt{A}d4 d5

Black is satisfied with the free development of his pieces and roughly equal middlegame prospects. But he could obtain more by playing 3...c5! 4 \texttt{A}b3 c4 5 \texttt{A}d4 \texttt{A}c5 6 c3 \texttt{A}c6 thus bringing \textit{ad absurdum} White’s ‘development’.

4 d3 exd3

5 \texttt{W}xd3 \texttt{A}f6

6 \texttt{A}g2 \texttt{A}b4+

Trying at all costs to bring as rapidly as possible all Black’s pieces into action. But nowadays I would probably have thought more about the security of the dark squares in my position and would therefore
have avoided the following bishop exchange.

7 \( \text{d2} \) \( \text{x d2+} \)
8 \( \text{cxd2} \) 0-0
9 c4!

Apart from his eccentric first move, Réti plays the opening very well; Black would not have any advantage by answering 9...c5 because of 10 \( \text{Qb3} \) threatening both 11 \( \text{Qxc5} \) and 11 \( \text{cx d5} \).

9 ... \( \text{a6} \)

c omparatively the best; but it cannot be denied that White now obtains a sort of pressure on the half-open c-file.

10 \( \text{cx d5} \) \( \text{b4} \)
11 \( \text{c4} \) \( \text{bxd5} \)
12 \( \text{Qb3} \) c6
13 0-0 \( \text{Qe8} \)
14 \( \text{Qd1} \) \( \text{g4} \)
15 \( \text{Qd2} \)

After 15 h3 Black would have moved his bishop to e4 via h5 and g6.

15 ... \( \text{c8} \)
16 \( \text{c5} \) \( \text{h3!} \)
17 \( \text{f3} \)

By his previous move Black had offered a pawn, the acceptance of which would have been fatal for White, for instance 17 \( \text{Qh3} \) \( \text{wxh3} \) 18 \( \text{Qxb7} \) \( \text{g4} \) 19 \( \text{Qf3} \) \( \text{Qde3!} \) 20 \( \text{fxe3} \) \( \text{Qxe3} \) 21 \( \text{wxg7+} \) \( \text{Qh8} \) 22 \( \text{Qh4} \) \( \text{Qf8} \) and wins.

17 ... \( \text{Qg4} \) \( (D) \)

giving the opponent the choice between three possibilities:

1) to exchange his beloved ‘fi-
anchetto’ bishop;

2) to accept an immediate draw
by repetition of moves (18 \( \text{g2} \) \( \text{h3} \)

19 \( \text{f3} \), etc.) which at such an early stage always means a moral defeat for the first player, and;

3) to place the bishop on an infe-
rior square (h1). He finally decides
to play ‘for the win’ and thus per-
mits Black to start a most interesting
counter-attack.

18 \( \text{g2} \) \( \text{h3} \)
19 \( \text{f3} \) \( \text{g4} \)
20 \( \text{h1} \)

At last!

20 ... \( \text{h5!} \)

In order, by the exchange of h-
pawns, to weaken g3.

21 \( \text{b4} \) a6
22 \( \text{c1} \) h4
23 \( \text{a4} \) hgx3
24 \( \text{hxg3} \) \( \text{c7} \)
25 \( \text{b5} \)

Consistent, but very risky to say
the least. By playing 25 e4 \( \text{b6} \) 26
\( \text{b3} \) \( \text{bd7!} \) White could meet the immediate threats against his king, but the obstruction of the bishop’s diagonal would at the same time end his hopes on the other wing.

25 ... \( \text{axb5} \)
26 \( \text{axb5} \) \( (D) \)
26 ... \( \text{Qe3!} \)
It seems almost incredible that this spectacular move not only stops White’s attack but even brings him serious trouble. And yet it is so. It is obvious enough that the rook cannot be taken because of $27...\text{wxg3}$+, followed by $28...\text{dx}e3$ and wins; and also that White has to do something in order to parry $27...\text{hxg3}$+!

$27 \text{d}f3$

As the following shows, this natural move loses perforce. Also insufficient was $27 \text{dh}2$ due to $27...\text{a}a3$! $28 \text{dc}b3$ (not $28 \text{fxe3} \text{dx}e3$ followed by $...\text{df}1+$) $28...\text{we}5! 29 \text{bxc6 bxc6}$ with a powerful attack as $30 \text{fxe3}$ would still be bad because of $30...\text{wh}5+$ followed by $31...\text{wh}3$.

The only chance of salvation was $27 \text{df}3! \text{xf}3 28 \text{exf}3! \text{cxb5} 29 \text{dx}b5 \text{wa}5!$ still with advantage for Black, as $30 \text{hx}d5?$ would lose immediately after $30...\text{e}c1+ 31 \text{exe1 wh}e1+$ followed by $32...\text{a}1$.

$27...\text{cxb5}$

$28 \text{wb}5 \text{cc}3!$

$29 \text{wb}7$

After $29 \text{wc}4$ the answer $29...\text{b}5!$ would be decisive.

$29...\text{wb}7$

And not $29...\text{dx}e2+$ because of $30 \text{dx}e2! \text{wb}7 31 \text{dx}e3!$ with some saving chances for White.

$30 \text{dx}b7 \text{dx}e2+$

$31 \text{h}2 (D)$

Or $31 \text{f}1 \text{dxg}3+ 32 \text{fxg}3 \text{xf}3 33 \text{xf}3 \text{xf}3+ 34 \text{g}2 \text{a}a3 35 \text{d}8+ \text{h}7 36 \text{h}1+ \text{g}6 37 \text{h}3 \text{fb}3!$ and wins.

$31...\text{de}4!$

The beginning of a new combination—which, however, is the absolutely logical consequence of the previous manoeuvres—aiming, after a series of 12 practically forced moves, at the capture of the knight on b7. Black’s rook is still taboo as $32 \text{fxe3} \text{dx}d2!$ loses the exchange.

---

1 This last comment is incorrect. After $32 \text{g}2 \text{a}1 33 \text{d}8+ \text{h}7 (33...\text{e}8 34 \text{h}3) 34 \text{w}4+ \text{g}6 35 \text{f}4$ there is no mate and Black is dead lost. It follows that Black should play $32...\text{dx}d5 33 \text{w}d5 \text{a}1 34 \text{d}8+ with an immediate draw, which seems to be the correct result of the whole combination.
32  \text{\textit{Ec4!}}
Comparatively the best defence.
32  ...  \text{\textit{Exf2}}
Insufficient would be 32...\text{\textit{Exd2}}
because of 33  \text{\textit{Exd2!}}, or 32...\text{\textit{Exf3}}
due to 33  \text{\textit{Exe4!}}. The situation is still very complicated.
33  \text{\textit{Gg2}}  \text{\textit{Gg6!}}
34  \text{\textit{Ecc2}}
Here, and in the following, White, as it is easy to see, has no choice.
34  ...  \text{\textit{Gg4+}}
35  \text{\textit{Gh1}}
Not 35  \text{\textit{Gh1}} owing to 35...\text{\textit{Ga1+}}.
35  ...  \text{\textit{Gg5+}}
36  \text{\textit{Gh2}}  \text{\textit{Exf3!}}
37  \text{\textit{Exe2}}  \text{\textit{Gg4+}}
38  \text{\textit{Gh3}}  \text{\textit{Ge3+}}
39  \text{\textit{Gh2}}  \text{\textit{Exc2}}
40  \text{\textit{Exf3}}  \text{\textit{Ed4}}
If now 41  \text{\textit{Exe3}} (or 41  \text{\textit{Ef2}}) then
41...\text{\textit{Exf3+}} 42  \text{\textit{Exf3 Ge5}} (the final point!) winning a piece.
0-1
I consider this and the game versus Bogoljubow at Hastings 1922
(see Game 26) the most brilliant tournament games of my chess career. And by a peculiar coincidence they both remained undistinguished as there were no brilliancy prizes awarded in either of these contests!

Game 38
Alekhine – Treybal
Baden-Baden 1925
Queen’s Gambit Declined
1  \text{\textit{d4}}  \text{\textit{d5}}
2  \text{\textit{c4}}  \text{\textit{e6}}
3  \text{\textit{Gc3}}  \text{\textit{Gf6}}
4  \text{\textit{Gg5}}  \text{\textit{Gbd7}}
5  \text{\textit{e3}}  \text{\textit{Ge7}}
6  \text{\textit{Gf3}}  \text{\textit{0-0}}
7  \text{\textit{Ec1}}  \text{\textit{Gc6}}
8  \text{\textit{Gd3}}  \text{\textit{dxc4}}
9  \text{\textit{Gxc4}}  \text{\textit{Gd5}}
10  \text{\textit{Gxe7}}  \text{\textit{Gxe7}}
11  \text{\textit{Gf4}}
A very safe, but harmless move, for which I had a marked predilection during a certain period of my career, including the Capablanca match. Now I have come to the conclusion that the old 11 0-0, although not extremely promising, still offers more fighting chances than the knight move.
11  ...  \text{\textit{G7f6}}
After this answer, however, Black will have difficulties in freeing his game by means of ...e5 or ...c5 and therefore White’s position will soon become much preferable. Good methods in order to obtain equality are: 11...\text{\textit{Gf5f6}} and after 12  \text{\textit{Gg3}}
either 12...\text{\textit{Gb4+}} (Capablanca) or even 12...e5 (Dr. Lasker).
12  \text{\textit{Gg3}}  \text{\textit{Gb4+}}
13  \text{\textit{Gd2}}  \text{\textit{Gxd2+}}
14  \text{\textit{Gxd2}}  \text{\textit{Gd8}}
15  \text{\textit{Ghd1}}  \text{\textit{Gd7}}
16  \text{\textit{Ge5}}  \text{\textit{Ge8}}
17  \text{\textit{Ge2}}  \text{\textit{Gf8}}
18  \text{\textit{f4}}  \text{\textit{Gf6}}
It is very seldom advisable in the endgame to place the pawns on the squares of the same colour as their own bishop. A more logical plan was 18...\text{\textit{Gd7}} eventually followed by ...f6.
19  \text{\textit{Gf3}}  \text{\textit{Eac8}}
20 b3 c7
21 d2 e7
22 g4 d8 (D)

W

23 g3!

After this, Black’s preparations for ...c5 prove useless, as this move would now have fatal consequences after 24 g5—for instance 24...fd5
25 dxc5 xc5 26 xc5 xc5 27 e4 c7 28 d6, with a tremendous positional advantage for White, or
24...d7 25 xd7+ xd7 26 xc5 xc5 27 dxc5 d8 28 f2 and White would retain the extra pawn.

23 ... fd5

Hence this purely passive move, which permits White the following effective knight manoeuvre.

24 e4 d8

After 24...f6 White would exchange two minor pieces for a rook and two pawns, thereby obtaining a won position—for instance, 25 c5!
fxe5 26 xe6+ g8 27 xc7 e4+

B

27 ... f6

A desperate attempt to get some freedom for his cramped pieces. After 27...f6 (or 27...c7 28 xc7 followed by 29 d5 ±) 28 g5 d7
29 g4 g7 30 h4 he would rapidly perish from asphyxia.

28 exd5 fxe5
29 d6!

Forcing a decisive gain of material; if now 29...e4+, then 30 xe4 xd6 31 e5! cd8 32 c7 and wins.

29 ... xd6
30 fxe5 d5

30...dd8 31 xe6 would be even more hopeless.

31 xd5 xd5
32 a3

---

1 This is not so clear after 29...exd5 30 exd5 d6! 31 xc6 xe6!, so White would do better to step up the pressure by 29 g5, as in Alekhine’s main line, although the exchange of knights has relieved a little of the pressure on Black’s position.
The beginning of the rather instructive technical part. First and foremost, White must exchange the opponent's central knight.

32 ...  
g5
33 \( \text{Qb4} \) \( \text{Qe7} \)
34 \( \text{Qd3} \) \( \text{Qd5} \)
35 \( \text{h4!} \) \( \text{gxh4} \)

If 35...\( \text{h6} \) then 36 \( \text{hxg5} \) followed by \( \text{Qf2-e4} \) (or \( \text{h3} \)).
36 \( \text{Qf4} \) \( \text{Qxf4} \)
37 \( \text{Qxf4} \)

White's next manoeuvre will be the elimination of the \( \text{h4} \)-pawn and the return of the king to the centre, in order to release the rook from the protection of the \( \text{d} \)-pawn.

37 ...  
\( \text{Kd8} \)
38 \( \text{Qg5} \) \( \text{Qg7} \)
39 \( \text{Qxh4} \) \( \text{Kd5} \)
40 \( \text{Qg5} \) \( \text{Kd8} \)
41 \( \text{Qf4} \) \( \text{Kd7} \)
42 \( \text{Qe3} \) \( \text{Kb7} \)
43 \( \text{b4} \)

The start of the third phase—the fixing of Black's weak spots.

43 ...  
\( \text{a6} \)
44 \( \text{Qf1} \) \( \text{Ka7} \)
45 \( \text{Kf6} \) \( \text{Ke7} \)
46 \( \text{a4} \) \( \text{Qg8} \)
47 \( \text{a5} \) \( \text{b5} \)
48 \( \text{d5!} \)

This pawn sacrifice, in order to permit the victorious entrance of the king into the enemy's camp, is the absolutely logical conclusion of the whole procedure.

48 ...  
\( \text{exd5} \)

Or 48...\( \text{cxd5} \) 49 \( \text{Ke8} \) followed by \( \text{Ka8} \).

49 \( \text{e6} \) \( \text{Qg7} \)

50 \( \text{g5} \) \( \text{h5} \)
51 \( \text{Qd4} \) \( \text{Kc7} \)
52 \( \text{Qc5} \) \( \text{Kc8} \)
53 \( \text{Qb6} \) \( \text{d4} \)
54 \( \text{e7!} \) 1-0

Although this game and the next one do not exhibit any particularly thrilling points, I have included them in this collection because they illustrate in a convincing way the methods to follow in order to exploit an advantage in space obtained in the opening stage.

Game 39

Sir G. Thomas – Alekhine

Baden-Baden 1925

Alekhine Defence

1 \( \text{e4} \) \( \text{Qf6} \)
2 \( \text{d3} \)

A very tame continuation, which does not offer prospects of any opening advantage.

2 ...  
\( \text{c5} \)
3 \( \text{f4} \) \( \text{Qc6} \)
4 \( \text{Qf3} \) \( \text{g6} \)
5 \( \text{Ke2} \) \( \text{Qg7} \)
6 \( \text{Qb4d2} (?) \)

After this unnatural move White's game remains very cramped. A much lesser evil was 6 \( \text{c4} \) ceding the square \( \text{d4} \) but preventing the double advance of Black's \( \text{d} \)-pawn.

6 ...  
\( \text{d5} \)
7 \( \text{0-0} \) \( \text{0-0} \)
8 \( \text{Qh1} \) \( \text{b6} \)
9 \( \text{exd5} \) \( \text{Kxd5} \)

Even better than 9...\( \text{Qxd5} \), which would permit the answer 10 \( \text{Qe4} \).

10 \( \text{We1} \)
The pawn sacrifice 10 ⦽e5 would prove insufficient after 10...⦽xe5 11 fxe5 ⦽xe5 12 ⦽c4 (or 12 ⦽f3 ⦽b8 13 ⦽c4 ⦽c7) 12...⦽e6! 13 ⦽f3 ⦽d5.

10 ... ⦽b7
11 ⦽c4 ⦽d4
12 ⦽e3 ⦽c6
13 ⦽d1 ⦽d5!

Practically forcing the exchange of three minor pieces, and thus increasing by the simplest method the positional advantage already acquired.

14 ⦽xd4

The consequences of an attempt to win a pawn by 14 ⦽xd5 would be sad: 14...⦽xd5 15 ⦽xe7 ⦽fe8 16 ⦽g5 ⦽xf3 17 ⦽xf3 ⦽xg5 18 fxg5 ⦽xf3 19 gxf3 ⦽e2 +.

14 ... cxd4
15 ⦽xd5 ⦽xd5
16 ⦽f3 ⦽d7
17 ⦽xb7 ⦽xb7
18 c4

Otherwise he would remain with the awful weakness at c2.

18 ... dxc3
19 bxc3 ⦽ac8
20 ⦽b2

Only slightly better would be 20 ⦽d2.

20 ... ⦽fd8
21 ⦽f3 ⦽f6 (D)

Releases the queen from any worry about e7.

22 d4

This represents positional capitulation, after which Black will have a comparatively easy win because of his full control of the light squares. But owing to the threat of ...⦽a6 in connection with the doubling of rooks on the d-file, White already had no real choice.

22 ... ⦽d5
23 ⦽e3 ⦽b5!
24 ⦽d2 ⦽d5
25 h3 e6
26 ⦽e1 ⦽a4
27 ⦽a1 b5
28 ⦽d1 ⦽c4

Also good was 28...⦽xd1+, but Black is not in a hurry. White will not be able to avoid the exchange.

29 ⦽b3 ⦽d6
30 ⦽h2 ⦽a6
31 ⦽ff1 ⦽e7
32 ⦽h1 ⦽cc6!

Intending to force White to exchange queens after ...⦽c4 followed by ...⦽a4 and ...⦽ca6.

33 ⦽e1 ⦽h4!

Chasing the rook from the e-file, because if, for instance, 34 ⦽e2, then 34...⦽xb3! 35 axb3 ⦽xal+ 36 ⦽xal ⦽a6 37 ⦽b2 ⦽a2 38 b4 (38 ⦽h2 a5!) 38...⦽g3 39 d5 ⦽xf4 (simpler than 39...exd5 40 c4!), winning easily.

34 ⦽f1 ⦽c4
35 ⦽xc4
Otherwise Black would play, as mentioned above, 35...\( \text{a}4 \), etc.

\[
\begin{align*}
35 & \rightarrow \text{x}c4 \\
36 & \text{a}3 \text{ e}7 \\
37 & \text{f}b1 \text{ d}6! \\
\end{align*}
\]

Also forcing the g-pawn on to a dark square.

\[
\begin{align*}
38 & \text{g}3 \text{ f}8 \\
39 & \text{g}2 \text{ e}7 \\
40 & \text{f}2 \text{ d}7 \\
41 & \text{e}2 \text{ c}6 \\
\end{align*}
\]

After having protected the b-pawn Black threatens ...\( \text{a} \)ca4.

\[
\begin{align*}
42 & \text{a}2 \text{ ca}4 \\
43 & \text{b}a1 \text{ d}5 (D) \\
\end{align*}
\]

\[\text{w}\]

\[
\begin{align*}
44 & \text{d}3 \text{ b}a5 \\
45 & \text{c}1 \text{ a}6 \\
46 & \text{b}2 \text{ h}5 \\
\end{align*}
\]

Threatening, of course, 47...h4.

\[
\begin{align*}
47 & \text{h}4 \text{ f}6! \\
\end{align*}
\]

After this White is without defence against ...\( \text{e}5 \).

\[
\begin{align*}
48 & \text{c}1 \text{ e}5 \\
49 & \text{f}xe5 \text{ fxe}5 \\
50 & \text{b}2 \\
\end{align*}
\]

Or 50 dxe5 \( \text{x}e5 \) 51 \( \text{f}4 \) \( \text{x}f4 \) 52 gxf4 \( \text{e}6 \)! (the simplest), and wins.

\[
\begin{align*}
50 & \rightarrow \text{ex}d4 \\
51 & \text{cxd}4 \text{ b}4! \\
0-1 \\
\end{align*}
\]

The late Nimzowitsch—who was rather reluctant to comment on the games of his colleagues—distinguished this one by including it in his remarkable book, *My System*.

Game 40

Alekhine – Marshall

*Baden-Baden 1925*

Irregular Defence

\[
\begin{align*}
1 & \text{d}4 \text{ f}6 \\
2 & \text{c}4 \text{ d}5 \\
\end{align*}
\]

This move is very seldom adopted in master play and in fact cannot be recommended. It partly succeeds, however, in the present game, because of the not quite accurate opening play of White.

\[
\begin{align*}
3 & \text{cxd}5 \text{ xd}5 \\
4 & \text{e}4 \\
\end{align*}
\]

As this advance could not be prevented by Black, it should have been delayed, and only executed after the development of the kingside pieces. A good plan here was 4 g3 followed by \( \text{g}2 \), reserving \( \text{e}4 \) for a more favourable moment.

\[
\begin{align*}
4 & \rightarrow \text{f}6 \\
5 & \text{d}3 \\
\end{align*}
\]

Also after 5 \( \text{c}3 \) Black could have obtained a roughly equal game by answering 5...\( \text{e}5 \).

\[
\begin{align*}
5 & \rightarrow \text{e}5! \\
6 & \text{dxe}5 \text{ g}4 \\
7 & \text{f}3 \text{ c}6 \\
8 & \text{g}5! \\
\end{align*}
\]

White realises that he cannot obtain any kind of advantage by trying
to keep the extra pawn. If, for instance, 8...b4! 9 b5+ d7 10 xd7+ xd7 11 xd7+ xd7 12 0-0 c2 13 d1+ c8 14 h3 (or 14 g5 c5!) 14...h6 and White’s positional advantage would not compensate for the loss of the exchange.

8 ... e7
9 xe7 xe7
10 c3 xe5
11 xe5 xe5

But here Black decidedly overestimates his position. Instead of the text move which—as the following convincingly proves—only exposes his queen to a pawn attack, he could obtain a game with even prospects by continuing 11...xe5 12 0-0 0-0 13 e2 e6.

12 h3 (D)

13 wd2!

It is certainly surprising to what extent this simple queen manoeuvre—by which White strengthens his dark squares—improves his chances for the middlegame. From now on Black will be gradually dragged into a lost position without having made a move that could be considered an actual mistake.

13 ... d7
14 e3!

Not only taking control of the squares d4 and c5 but, above all, preventing Black castling queenside.

14 ... c6
15 0-0-0 0-0

As Black cannot bring his king to safety on the queenside (if 15...a5, then 16 c4! ±) he has practically no choice.

16 f4 e6

After 16...a5 17 e5 Black would (just as in the actual game) lose a pawn by continuing 17...d5 18 xd5 xd5 19 xh7+, followed by wd3+ and xd5.

17 e5

With the main threat 18 f5.

17 ... ef8
18 e1 ed8

Better was 18...d7 after which White would have continued his attack by 19 g4. The rook move permits White to win by a forced series of moves.

19 f5 e7
20 g5 d5
21 f6 f8
22 c4 (D)

The action of this bishop on the diagonal a2-g8 proves immediately decisive. It is important to notice

1 After 9...c6! White loses a piece because of the various threats at c2, d3 and f2.
that Black cannot insert the intermediate move 22...h6 because of 23 fxg7! winning a piece.

22 ... Qxc3
23 Qxd8 Qxd8
24 fxg7!

Much more convincing than 24 e6 Qd5.

24 ...

Or 24...Qe8 25 Qxf7+! Qxf7 26 Qf1+1 Qe6 27 Qf6+ Qd5 28 Qf8 and wins.

25 Qb1!

And not 25 Qxa2 Qc5+.

25 ...
26 e6!

Now this is even stronger than 26 Qxf7+.

26 ...
27 Qa1

Also possible was 27 Qxe4 Qd1+ 28 Qc2 Qa4+ 29 b3 Qb4+ 30 Qxd1, but the text move is simpler.

27 ...
28 f5

Despair, as 28...fxe6 would lose to 28 Qxe6+ Qxe6 29 Qxd8+ Qxg7 30 Qd4+ followed by 31 Qxe4.

1 26 g8Q+! Qxg8 27 e6+ Qf8 28 Qf1+ is even more convincing.

28 e7+ Qd5
29 Qf6! Qf7
30 e8Q+

followed by mate in two.

Game 41

Alekhine – Schwartz

Blindfold Exhibition, London 1926

King’s Indian Defence

1 d4 Qf6
2 c4 g6
3 g3 Qg7
4 Qg2 0-0
5 Qc3 d6

If instead 5...c6, then 6 d5.

6 Qf3 Qe6
7 d5 Qa5

The position of this knight will cause trouble. But 7...Qb8 is also not satisfactory, as was shown by my game against Réti at New York 1924 (Game 33).

8 Qd3 b6

Intending to bring the knight as quickly as possible to c5. First 8...e5 was slightly better as the answer 9 b4 would not be effective because of 9...e4.

9 Qd4 Qb7
10 Qc6 Qd7
11 0-0 a5
12 b3

The routine method of dislodging the knight from c5.

12 ...
13 Qc2 Qb7
14 h3
Preventing Black’s manoeuvre \( \ldots \text{Qg4-e5} \).

14 \ldots \text{Na8} (D)

Neither this move nor the following exchange was advisable. Instead, he should prefer 14\ldots\text{Qf6e4} 15 \text{Qb2 Qxc3} to facilitate the defence by eliminating some material.

\[
\begin{array}{c}
15 \text{a3} \text{Qxc6} \\
16 \text{dxe6} \text{Qc8} \\
17 \text{b4} \text{axb4} \\
18 \text{axb4} \text{Qa6}
\end{array}
\]

After this the knight will be buried alive. But also 18\ldots\text{Qce4} 19 \text{Qb5!} was anything but pleasant.

19 \text{Qa4!} \text{Qb8}

Otherwise White would force this retreat by 20 \text{Wxa2}.

20 \text{b5} \text{h6} \\
21 \text{Qa7} \text{e5} \\
22 \text{Qh2}

In order not to have to reckon with the answer \ldots\text{Qh5} in case of f4.

22 \ldots \text{Qh7} \\
23 \text{f4} \text{Qc7} \\
24 \text{fxe5} \text{Qxe5} \\
25 \text{Qf4} \text{Qee8}

After 25\ldots\text{Qh5} 26 \text{Qd5 Qxd5} 27 cxd5 the rook would be trapped.

\[
\begin{array}{c}
26 \text{Qd5} \text{Qxd5} \\
27 \text{Qxd5} \text{Qd8} \\
28 \text{h4} \text{Qe7} \\
29 \text{e3} \text{Qh8} \\
30 \text{Qg2}
\end{array}
\]

Preventing 30\ldots\text{g5} by the possibility (after 31 \text{hxg5 hxg5}) of Qh1+.

30 \ldots \text{f5} \\
31 \text{Qe1} \text{Qh7} \\
32 \text{e4} \text{Qe5} \\
33 \text{exf5} \text{gxg5} (D)

\[
\begin{array}{c}
34 \text{c5!}
\end{array}
\]

The beginning of a ten-move combination (of which the point is 43 \text{Qc6!}) forcing the win of a piece.

34 \ldots \text{bxc5} \\
35 \text{b6} \text{Qc8} \\
36 \text{Qc3!} \text{Qfe8}

It is obvious that 36\ldots\text{Qxc3} 37 \text{Qxe7+} would be hopeless.

37 \text{Qxe5} \text{dxe5} \\
38 \text{Wxe5!}

Without this possibility the previous moves would be pointless.

38 \ldots \text{Wxe5} \\
39 \text{Qxe5} \text{Qxe5} \\
40 \text{Qxe7+} \text{Qxe7} \\
41 \text{bxc7} \text{Qe8} \\
42 \text{cxb8W} \text{Qxb8}
43 \( \text{e}6! \)

Decisive.

43 ... \( \text{g}6 \)
44 \( c7 \) \( \text{x}f8 \)
45 \( c8\text{w} \) \( \text{x}c8 \)
46 \( \text{xc}8 \) \( c4 \)
47 \( \text{a}6 \) \( c3 \)
48 \( \text{d}3 \) \( \text{f}6 \)
49 \( \text{f}3 \) \( \text{e}5 \)
50 \( \text{e}3 \) \( h5 \)
51 \( \text{c}2 \) \( \text{f}6 \)
52 \( \text{f}4 \) \( \text{g}7 \)
53 \( \text{xf}5 \) \( \text{h}6 \)

Still hoping that the ‘blind’ opponent will stalemate him by 54 \( \text{f}6 ... \)
54 \( \text{f}4! \) 1-0

I consider this game to be one of my best achievements in blindfold chess.

Game 42
Rubinstein – Alekhine
Semmering 1926
Brilliancy Prize
Queen’s Indian Defence

1 \( d4 \) \( \text{f}6 \)
2 \( c4 \) \( e6 \)
3 \( \text{f}3 \) \( b6 \)
4 \( g3 \) \( \text{b}7 \)
5 \( \text{g}2 \) \( \text{b}4+ \)

This simplification is hardly advisable, as White’s c1-bishop should develop less activity in the future than Black’s f8-bishop. More promising, therefore, is 5 ... \( \text{e}7 \).

6 \( \text{bd}2 \)

For the reasons just mentioned, 6 \( \text{d}2 \) seems to be the logical answer.

6 ... 0-0
7 0-0 \( d5 \)

As the following shows, this is sufficient to equalise. A good manoeuvre was also 7 ... \( \text{e}8 \) followed by ... \( \text{f}8 \).

8 \( a3 \) \( \text{e}7 \)
9 \( b4 \) \( c5 \)

The right way to keep the balance in the centre. 9 ... a5 10 b5 would be positionally unsatisfactory.

10 \( \text{bxc}5 \) \( \text{bxc}5 \)
11 \( \text{dxc}5 \)

Also 11 \( \text{b}1 \) \( \text{c}8 \) 12 \( \text{b}3 \) \( \text{a}6 \) would be satisfactory for Black.

11 ... \( \text{xc}5 \)
12 \( \text{b}2 \) \( \text{bd}7 \)
13 \( \text{e}5 \) \( \text{xe}5 \)
14 \( \text{xe}5 \) \( \text{g}4! \)

This diversion is by no means as harmless as it looks. White loses the game chiefly because he underestimates its importance.

15 \( \text{c}3 \)

And not 15 \( \text{b}2 \) \( \text{b}6 \) winning material.

15 ... \( \text{b}8 (D) \)

At this moment 15 ... \( \text{b}6 \) would have been answered by 16 e3. The text move prepares an eventual advance of the d-pawn.
16 \( \text{Nxb1} \)

Although this move cannot yet be considered a decisive mistake, it certainly facilitates the opponent’s plans. Unsatisfactory would be also 16 h3 \( \text{Nxzf2}! \) 17 \( \text{Nxf2} \) \( \text{Kg5}! \) 18 \( \text{f1} \) \( \text{xf2}+ \) 19 \( \text{xf2} \) dxc4, which would be to Black’s advantage. But by continuing 16 cxd5 \( \text{exd5}! \) 17 \( \text{f4}! \) (and not 17 e4 \( \text{xf2}! \) 18 \( \text{xf2} \) \( \text{xf2}+ \) 19 \( \text{xf2} \) \( \text{b6} \) 20 \( \text{f1} \) \( \text{b7} \)), with the subsequent dislodging of the threatening black knight, White could still obtain an even game.

16 ... d4!

17 \( \text{Nxb7}??! \)

Rubinstein does not anticipate Black’s surprising 18th move and consequently will find himself at a material disadvantage. The only possibility here was 17 \( \text{b4} \) \( \text{xg2} \) 18 \( \text{xg2} \) \( \text{c7} \) reaching a position which would be in Black’s favour too, but hardly in a decisive way.

17 ... \( \text{Nxb7} \)

18 \( \text{Nxb7} \) \( \text{xf2}! \)

By this pseudo-sacrifice Black forces the win of at least a pawn with a crushing position. Of course, the immediate 18...dxc3 would be ineffective because of 19 \( \text{e4}^2 \).

19 \( \text{xf2} \)

Other moves were no better, to say the least. For instance:

1) 19 \( \text{wa1} \) (19 \( \text{xf2?} \) dxc3 and wins) 19...dxc3 20 \( \text{b3} \) \( \text{g4}+ \) 21 \( \text{xc5} \) \( \text{d4}+ \).

2) 19 \( \text{a5} \) \( \text{xd1} \) 20 \( \text{xd8} \) d3+ 21 e3 \( \text{xe3!} \) with an easy win for Black in both cases.

19 ...

dxc3+

20 e3

Or 20 \( \text{e1} \) cxd2+ 21 \( \text{xd2} \) \( \text{b6} \) with a rapidly winning attack.

20 ...

cxd2

21 \( \text{e2} \) \( \text{b8} \)

22 \( \text{f3} \) \( \text{d8} \)

23 \( \text{b1} \) \( \text{d6} \)

Gaining the square b4 for the bishop

24 a4

f5

25 \( \text{d1} \) \( \text{b4} \)

26 \( \text{c2} \) \( \text{c5} \)

27 \( \text{f2} \) \( \text{a5} \)

28 \( \text{e2} \) \( \text{g5} \)

29 \( \text{d3} \) \( \text{f4}! \)

If now 30 \( \text{xh7+} \) \( \text{h8} \) 31 \( \text{e4} \), then 31...\( \text{xe3+} \) 32 \( \text{g2} \) f3+ 33 \( \text{h3} \) \( \text{e2}! \) 34 \( \text{g6} \) g4+ 35 \( \text{h4} \) \( \text{e7+} \) 36 \( \text{h5} \) \( \text{hxh2+} \), and Black wins.

0-1

---

1 There seems no reason why White should not play the more active 18 \( \text{f3} \), which avoids losing the pawn on c4. It follows that Black should prefer 17...\( \text{c7} \) 18 \( \text{b4} \) \( \text{xg2} \) 19 \( \text{xg2} \) \( \text{c8} \), when 20 cxd5? loses to 20...a5!. However, even here 20 \( \text{c1} \) is rather unclear.

2 At first sight Black can continue 19...\( \text{xf2} \) 20 \( \text{xf2} \) \( \text{xf2+} \) 21 \( \text{xf2} \) \( \text{b6}+ \), but White replies 22 c5! \( \text{xb7} \) 23 \( \text{c2} \) \( \text{b2} \) 24 \( \text{c1} \) \( \text{xa3} \) 25 \( \text{xc3} \) \( \text{xc3} \) 26 \( \text{xc3} \) with a very likely draw after the inevitable exchange of queenside pawns.

3 This line is not clear-cut after 22 \( \text{h1} \) \( \text{xc5} \) 23 \( \text{xc3} \), but the improvement 20...\( \text{c3} \) is crushing.
Game 43  
Rubinstein – Alekhine  
Dresden 1926  
Brilliancy Prize  
Queen’s Indian Defence

1  d4  ∆f6
2  ∆f3  e6
3  ∆f4  b6
4  h3

It was certainly not necessary to prevent Black’s ...∆h5 at this moment. The weakening of the square g3 gave me the idea of a quite unusual but, as the following proves, very effective system of development.

4 ...  b7
5  ∆bd2  d6!

After this, White has the unpleasant choice between (1) the exchange, which strengthens Black’s position in the centre; (2) 6 e3, which, after 6...∆xf4, would spoil his pawn position; and (3) 6 ∆g5 when Black would secure the advantage of the pair of bishops by means of 6...h6.

6  ∆xd6  cxd6
7  e3  0-0
8  ∆e2

And not 8 ∆d3 as he intends to play ∆xe4 after Black’s ...d5 and ...∆e4.

8 ...  d5
9  0-0  ∆c6
10  c3

If 10 ∆e5 then 10...∆e7 followed by ...d6.

10 ...  ∆e4!

Black has already obtained the initiative.

11  ∆xe4  dxe4
12  ∆d2  f5
13  f4

Otherwise Black would continue ...wg5, preventing the text move for a long time.

13 ...  g5!

Black must play most energetically before White finds time to co-ordinate the activity of his pieces.

14  ∆c4  d5
15  ∆e5  ∆xe5

Much better than 15...gx4 16 ∆xc6! followed by 17 ∆xf4.

16  dxe5

In case of 16 fxe5 Black would eventually break through by means of ...f4.

16 ...  w8h
17  a4?! (D)

White simply has no time for this counter-attack. His only chance of a successful defence was 17 g3 followed by 18 wh2. After White has missed this defensive opportunity, Black gradually develops crushing pressure.

17 ...  gg8
18  w2d  gxf4!
At the right time, since White cannot retake with the pawn on account of 19...\textit{\textit{W}}h4 with the double threat 20...\textit{\textit{W}}xh3 or 20...\textit{\textit{A}}xg2+!.

19 \textit{\textit{A}}xf4 \textit{\textit{W}}g5
20 \textit{\textit{A}}f1 \textit{\textit{W}}g3!

Forcing the following king move and thus preparing the win of a tempo at the 23rd move.

21 \textit{\textit{A}}h1 \textit{\textit{W}}g7
22 \textit{\textit{W}}d4 \textit{\textit{A}}a6!
23 \textit{\textit{A}}f2

White obviously has no choice.

23 ... \textit{\textit{W}}g3!

Compare the note to Black’s 20th move.

24 \textit{\textit{A}}c2 \textit{\textit{A}}xf1
25 \textit{\textit{A}}xf1 \textit{\textit{A}}ac8

Still working with gain of tempo, as he now threatens 26...\textit{\textit{A}}c4.

26 b3 \textit{\textit{A}}c7
27 \textit{\textit{A}}e2 \textit{\textit{A}}cg7
28 \textit{\textit{A}}f4 \textit{\textit{A}}g6! (D)

After this move a highly original position is obtained, the outstanding features of which are the following: Black’s immediate threat is 29...\textit{\textit{A}}h6 30 \textit{\textit{W}}d1 \textit{\textit{W}}g7 winning the e5-pawn, as 31 \textit{\textit{W}}d4 would be answered by 31...\textit{\textit{A}}xh3+. If White tries to parry this by playing 29 \textit{\textit{W}}d1, Black still answers with 29...\textit{\textit{A}}h6!, thus putting the opponent in a position of a complete zugzwang. As a matter of fact:

1) The f4-rook could not move because of 30...\textit{\textit{W}}xe5.
2) The e2-rook is tied by the defense of the squares e3 and g2.
3) The king could not move because Black could take on h3.
4) The queen could move neither along the first rank (due to the reply 30...\textit{\textit{W}}g7!), nor along the d-file (because of 30...\textit{\textit{A}}xh3+!).

5) Finally, in the event of 30 c4 Black would win by 30...d4!, and in the event of 30 b4 by 30...\textit{\textit{W}}g7 31 \textit{\textit{W}}d4 \textit{\textit{A}}c8! followed by 32...\textit{\textit{A}}c4.

Therefore White offers a pawn in the hope of exchanging a pair of rooks and thus weakening the enemy attack.

29 \textit{\textit{W}}b4 \textit{\textit{A}}h6
30 h4

Now this move is absolutely compulsory.

30 ... \textit{\textit{W}}g7!

Much better than the rather prosaic 30...\textit{\textit{A}}xh4+. If now 31 \textit{\textit{W}}d6, then 31...\textit{\textit{A}}g6 32 \textit{\textit{A}}ff2 f4! 33 exf4 e3! and wins.

31 c4 \textit{\textit{A}}g6
32 \textit{\textit{W}}d2 \textit{\textit{A}}g3!

Threatening 33...\textit{\textit{A}}h3+ 34 \textit{\textit{W}}gl \textit{\textit{W}}g3 and, if immediately 33 \textit{\textit{W}}gl, then 33...d4! 34 exd4 e3! 35 \textit{\textit{A}}c2 (or \textit{\textit{W}}b2) 35...\textit{\textit{A}}h3 followed by ...\textit{\textit{W}}g3 and wins. White is helpless.

33 \textit{\textit{W}}e1 \textit{\textit{A}}xg2

0-1
Game 44
Euwe – Alekhine
Second Exhibition Game,
Amsterdam 1926
Nimzo-Indian Defence

1 d4  \( \square f6 \)
2 c4  e6
3 \( \square c3 \)  \( \square b4 \)
4 \( \square f3 \)  b6
5 g3

In the second exhibition game, played after our match in 1937, Dr. Euwe played 5 \( \square g5 \) but after the right answer (5...h6 6 \( \square xf6 \) \( \square xc3+7 \) bxc3 \( \square xf6 \)), had to play very exactly in order to avoid being at a disadvantage. But also the fianchetto development in the text is perfectly harmless.

5 ...  \( \square b7 \)
6 \( \square g2 \)  0-0
7 0-0  \( \square xc3 \)
8 bxc3  d6?!

After this, White profits by the fact that Black’s b7-bishop is unprotected, and forces an advantageous transaction in the centre. Had Black made the right move (8...\( \square c8 \)), he would have come out of the opening stage with rather the better prospects.

9 d5!  exd5

Although this pawn cannot be kept, it is nevertheless better to start an open middle-game fight than to allow, after 9...e5, the formation 10 \( \square h4 \) followed by e4, f4, and so on, which is clearly advantageous for White.

10 \( \square h4 \)  \( \square e4 \)

After 10...c6 11 cxd5 \( \square xd5 \) 12 c4 \( \square b4 \) 13 a3 \( \square a6 \) 14 \( \square b2 \) White would dominate the board.

11 cxd5  \( \square e8 \) (D)

If 11...\( \square xc3 \), then 12 \( \square d3 \) \( \square a4 \) 13 \( \square e4 \) h6 14 \( \square d4 \) \( \square c5 \) 15 \( \square f5 \) f6 16 \( \square d2 \) with a decisive positional advantage.

12 \( \square b2 \)

I don’t agree here with Dr. Euwe, who in the Dutch booklet devoted to these games rather severely criticises his 12th and 13th moves. In any case, the pawn sacrifice suggested by him instead of the text move is anything but convincing, as after 12 \( \square d3 \) \( \square c5 \) 13 \( \square c2 \) b5 14 c4 Black would have an adequate defence by continuing 14...bxc4 15 \( \square b2 \) \( \square bd7 \) 16 \( \square f5 \) \( \square f6 \).

12 ...  b5

As 12...\( \square f6 \) (or 12...\( \square g5 \)) would be inferior, because of the answer 13 \( \square a4 \), Black has practically no other way to prevent c3-c4.

13 a4

Natural and good. After 13 \( \square d4 \), recommended by Dr. Euwe, Black would have the choice between:
a) the sacrifice of a pawn, in order to keep control over c4: 13...c5 14 dxc6 Qxc6 15 Wd3 Qe5 16 Wxb5 Wb6! 17 a4 Qc6;

b) the exchange of queens, which would offer fair defensive possibilities: 13...Wf6 14 f3 Wxd4+ 15 cxd4 Qd2 16 f2 Qc4 17 e4 Qd7.

13 ... Wg5!

Correctly deciding to eliminate White's d-pawn at the cost of a further delay in the development of the queenside.

14 axb5 Wxd5
15 Wa4?

But here White over-estimates his chances. He should, instead, by exchanging queens, force a favourable endgame which, however, would have been far from hopeless for Black. For instance, 15 Wxd5 Qxd5 16 Aa4! Qf6 17 e3 Qg2 18 Qg2 Qd7 19 fxa1 Wb8 20 c4 Qb7 21 Qd4 Qb6 22 Qb4 Qfd7 23 f5 (at last!) 23...g6 24 Qe7+ Qf8 25 Qc6 Qc5, with an adequate defence. And if 15 c4 (instead of 15 Wxd5) Black would not have taken the poisoned pawn, but would simply have answered 15...Wxd1, followed by 16...a6!, with an easy defence. After the text move, which contains only a rather obvious trap, White's advantage instantly vanishes.

15 ... Qd7

Of course not 15...Wd2? because of 16 b6 Qc6 17 b7! and wins.

16 c4 Wd2
17 Wa2

Under the circumstances comparatively the best.

17 ... a6!

Forcing a further simplification. 17...Wxe2 would be inferior because of 18 Qf5 f6 19 Qxg7!.

18 Qc1

The pawn sacrifice 18 b6 would be ineffective, for instance 18...Qxb6 19 Qf5 Wg5! 20 Qxg7 Qe7 21 Qh3 Qc8, followed by ...f6 ±.

18 ... Wxa2
19 Qxa2 axb5
20 Qb2

Slightly better than the alternative 20 Qxa8 Qxa8 21 cxb5 Qc3.

20 ... Qab8
21 cxb5?

After this, Black succeeds in emerging from the complications a pawn to the good. After 21 Qxe4 Qxe4 22 cxb5 Qd5!, he would have remained with only a positional advantage.

21 ... Qc3
22 Qc6 (D)

Now the only way to try to keep the balance of the position.

22 ... Qxe2!

An unpleasant surprise for White, justified by the variation 23 Qxd7 Qxb2 24 Qxb2 Qe2#!.

23 Qb3

Hardly preferable would be 23 Qd2 Qa4 24 Qa2 Qdc5.

---

1 This line includes a complete oversight by Alekhine, since 19...Qxg7 20 Qxf6+ Qxf6 defends the queen. Instead 19 c5+ and 20 c6 wins for White.
23 ... hxc6
24 hxc3 hxb5
25 hxc7  #e5

Not the most effective way to profit from the material advantage. By 25...h6! Black could prevent both 26 #df5 (because of 26...#e5) and 26 #f4 (because of 26...g5)—thus leaving White with practically no effective answer.

26 #df5?

The complications introduced by this move end in Black’s favour. 26 #f4 was necessary, with the possible line 26...h6 27 #xe5 #xe5 28 #b1 #b8 29 #f3 #d5 when Black should win, but only after a long endgame.

26 ... #f3+
27 #g2
Or 27 #h1 #e5.
27 ... #e1+!
28 #h3 #e5

This would also have been the answer to 28 #g11.

---

29 #h1

He could resist longer—but without any real hope—by giving up the exchange immediately: 29 #xe1 #xe1 30 #xd6.

29 ... #d3
30 #e7+ #f8
31 #a3

The last convulsions!

31 ... #xf2+
32 #g2 #xh1
33 #xd6 #e6
34 #c5

Or 34 #c6+ #xd6 35 #xb8 #d1, winning.

34 ... #e8!
35 #f5+ #g8 (D)

36 #e7+

If 36 #d6 then 36...#d3! 37 #xh1 #e1+ 38 #g2 #e2+ 39 #h3 h6 40 #xf7 #c2 41 #f2 #e6 and wins.

36 ... #h8

---

1 28 #g1 #e5 29 f4! offers White defensive chances, so Black might be better off retracing his steps by 28 #g1 #f3+ 29 #g2 #e5!, whereupon he wins the exchange.

2 I don’t understand this move, which allows White to fight on by 41 #d4!, whereas the alternative 40...#h1 41 #f2 #xf2 42 #xf2 #f1+ wins at once.
37 $\text{dxe4}$ $\text{e3xh1}$ $\text{d3}$
38 $\text{dxe6}$ $\text{g6}$
39 $\text{h4}$ $\text{f3}$
40 $\text{h5}$ $\text{h7}$

0-1

Game 45
Alekhine – Euwe

Third Exhibition Game,
Amsterdam 1926
King’s Indian Defence

1 $\text{d4}$ $\text{f6}$
2 $\text{c4}$ $\text{g6}$
3 $\text{c3}$ $\text{g7}$

At the period when this game was played, theGrünfeld variation was somewhat out of fashion. Nowadays thanks to Botvinnik, Flohr, Keres and other masters of the younger generation, it is played more often, although without any remarkable success.

4 $\text{e4}$ 0-0
5 $\text{e3}$

If 5 $\text{f4}$ $\text{d6}$ 6 $\text{f3}$, then 6...c5! with a good game for Black.

5 ... $\text{d6}$
6 $\text{f3}$ $\text{e5}$
7 $\text{d5}$

Better is 7 $\text{gxe2}$ and only after 7...$\text{xc6}$ (or 7...$\text{xe6}$), 8 $\text{d5}$ winning tempi. Black would in that case have to face awkward development problems.

7 ... $\text{c6}$
8 $\text{d2}$ $\text{cxd5}$
9 $\text{cxd5}$ $\text{e8}$

Preparing the counter-attack ...f5 and preventing at the same time White’s attempt to open the h-file (since 10 $\text{h4}$ may be met by 10...f5 11 $\text{h5}$ f4 followed by ...g5).

10 0-0-0 $\text{f5}$
11 $\text{b1}$

It is obvious enough that the king must be removed as soon as possible from the open file.

11 ... $\text{d7}$?

Giving White the welcome opportunity to create—without taking many chances—interesting complications by temporarily sacrificing some material. By continuing 11...a6 12 $\text{d3}$ b5 13 $\text{ge2}$ f4 14 $\text{f2}$ $\text{d7}$ followed by ...$\text{b6}$ Black would have obtained a perfectly satisfactory position.

12 $\text{h3}$!

In order to answer both 12...$\text{d6}$ and 12...$\text{b6}$ by 13 $\text{g5}$, for instance 12...$\text{b6}$ 13 $\text{g5}$ f4 14 $\text{xb6}$ $\text{wxb6}$ 15 $\text{f2}$ $\text{d7}$ 16 $\text{c1}$ $\text{c7}$ (or 16...a6 17 $\text{b6}$) 17 $\text{g4}$!, with excellent prospects on account of the open c-file.

12 ... $\text{a6}$

Also if Black had prevented the following manoeuvre by 12...f4, White’s prospects would have remained decidedly the more favourable.

13 $\text{exf5}$ $\text{gxf5}$ ($\text{D}$)
14 $\text{g4}$!

The point of his 12th move, by which he obtains the key square, e4, for his pieces.

14 ... $\text{fxg4}$

Relatively better than 14...f4 15 $\text{f2}$, which offers absolutely no counter-chances for Black.

15 $\text{g5}$ $\text{d6}$
16 \textit{\textsf{d3}} \textit{\textsf{w7}}

In case of 16...\textit{\textsf{gxf3}} I should have continued the attack by 17 \textit{\textsf{d7f1!}} and if 17...\textit{\textsf{h6}}, then 18 \textit{\textsf{e6}} \textit{\textsf{xe6}} 19 \textit{\textsf{dx6}} \textit{\textsf{g4}} 20 \textit{\textsf{d5}} with enough threats to frighten an elephant to death.

17 \textit{\textsf{f4}}

Both 17 \textit{\textsf{d7f1}} and 17 \textit{\textsf{h7g1}} were also considered. But the prospects connected with the move selected (the eventual opening of the f-file, or f5 followed by \textit{\textsf{e6}}) were extremely tempting.

17 ... \textit{\textsf{e4}}

By this counter-sacrifice Dr. Euwe secures the diagonal \textit{\textsf{h8-a1}} for his bishop, and at the same time diminishes the danger threatening his king by forcing the exchange of a couple of minor pieces. Still, even so White retains the better chances after recapturing the sacrificed pawn.

18 \textit{\textsf{gxe4}}

But this is not the most energetic method. White should have played 18 \textit{\textsf{cxc4}}, and if in that case 18...\textit{\textsf{dxe4}} 19 \textit{\textsf{xe4}} \textit{\textsf{h6}}, then 20 \textit{\textsf{e6}} \pm; or 18...\textit{\textsf{h6}} 19 \textit{\textsf{e6}} \textit{\textsf{xe6}} 20 \textit{\textsf{dx6}} \textit{\textsf{wxe6}} 21 \textit{\textsf{g3}} threatening 22 \textit{\textsf{f5}}. Black would hardly have found a way to protect his numerous weaknesses sufficiently.

18 ... \textit{\textsf{dxe4}}

19 \textit{\textsf{dxe4}}

Now forced as 19 \textit{\textsf{xe4?}} is impossible because of 19...\textit{\textsf{xc3}}.

19 ... \textit{\textsf{f5}}

20 \textit{\textsf{g3}}

Blockading the g-pawn in order to play h3 at the first opportunity. After 20 \textit{\textsf{g5}} Black would protect e6 by means of \textit{\textsf{d7c}}.

20 ... \textit{\textsf{xd3+}}

21 \textit{\textsf{xd3}} \textit{\textsf{w7f6}}

A refined tactical manoeuvre, very much in Dr. Euwe’s style; he provokes White’s \textit{\textsf{d2}} in order to deprive (after \textit{\textsf{h3}} \textit{\textsf{gxf3}}; \textit{\textsf{h7xh3}}) the first rank of its natural protection. But against the correct reply all this refinement would prove useless.

22 \textit{\textsf{d2}} \textit{\textsf{w7f7}}

Because of the threat 23 \textit{\textsf{h5}}.

23 \textit{\textsf{h3}} \textit{\textsf{gxf3}}

24 \textit{\textsf{xh3}} \textit{\textsf{g6}}

25 \textit{\textsf{f5?!}}

Only after this second inaccuracy does Black suddenly get a kind of counter-attack. Very strong here was 25 \textit{\textsf{e4!}} and after 25...\textit{\textsf{f6}} simply 26 \textit{\textsf{xd6}} \textit{\textsf{d8}} 27 \textit{\textsf{c5}}; other replies would allow White to strengthen his position further by means of \textit{\textsf{g3}} or \textit{\textsf{h2}}.

25 ... \textit{\textsf{g4}}

26 \textit{\textsf{d7h2}} \textit{\textsf{e8?!}}

In case of 26...\textit{\textsf{f6}} (which seemingly protects everything) White would play 27 \textit{\textsf{c1!}} with the strong threat \textit{\textsf{h4}}. The occupation of the c-file gives Black new opportunities.
27 f6!

The main idea of this transaction is shown by the following variation: 27...\(\text{\textbullet}\text{xf6} 28 \text{\textbullet}f5 \text{\textbullet}c4! 29 \text{\textbullet}e7+ \text{\textbullet}f7 30 \text{\textbullet}f5! \text{\textbullet}xe7 31 \text{\textbullet}e6+ \text{\textbullet}d8 32 \text{\textbullet}b6+ \text{\textbullet}c7 33 \text{\textbullet}c3 \text{\textbullet}f1+ 34 \text{\textbullet}c2 and wins.

27 ... \text{\textbullet}xf6!
28 \text{\textbullet}xh7+ \text{\textbullet}f8
29 \text{\textbullet}h1 (D)

This rather sad necessity is the direct consequence of Black's fine 21st move. But in spite of this partial success, the position of the second player is still full of danger. If, for instance, 29...\text{\textbullet}b4, then simply 30 a3 and 30...\text{\textbullet}f1+? would be refuted by 31 \text{\textbullet}xf1+. And 29...\text{\textbullet}f3 is also not satisfactory because of 30 \text{\textbullet}h6! (with the point 30...\text{\textbullet}xg3? 31 \text{\textbullet}xg3 \text{\textbullet}xg3 32 \text{\textbullet}f5+). Therefore Black decides to simplify matters.

29 ... \text{\textbullet}g6+

It would have been slightly better to delay this exchange by playing first 29...\text{\textbullet}c7 in which case White, by continuing 30 \text{\textbullet}h5! \text{\textbullet}f5+ 31 \text{\textbullet}xf5 \text{\textbullet}xf5 32 \text{\textbullet}f4, would maintain strong pressure.

After the text move he has a direct win.

30 \text{\textbullet}xg6 \text{\textbullet}xg6
31 \text{\textbullet}f5 (D)

Simply threatening 32 \text{\textbullet}xg7. If now 31...\text{\textbullet}c7 then 32 \text{\textbullet}d4! \text{\textbullet}xd4 33 \text{\textbullet}xd4 and Black is without resource.

31 ... \text{\textbullet}e5
32 \text{\textbullet}f3!

Or 32...\text{\textbullet}f6 33 \text{\textbullet}g5 \text{\textbullet}f7 34 \text{\textbullet}e7+! \text{\textbullet}xe7 35 \text{\textbullet}xd6+ and wins.

33 \text{\textbullet}h8+ \text{\textbullet}g8
34 \text{\textbullet}xg8+ \text{\textbullet}xg8
35 \text{\textbullet}e7+ 1-0

---

1 After 32...\text{\textbullet}c7 33 \text{\textbullet}e6+ \text{\textbullet}e7 I see no real advantage for White—the d5-pawn is weak and Black can liquidate by ...\text{\textbullet}f1+. Moreover, 30...\text{\textbullet}xh3 31 \text{\textbullet}xf6 \text{\textbullet}xh7 32 \text{\textbullet}xh7+ \text{\textbullet}g8 offers excellent drawing chances.

2 After 33...\text{\textbullet}g7 Black still has good drawing chances since 34 \text{\textbullet}e6+ \text{\textbullet}xe6 35 dxe6 fails to 35...\text{\textbullet}cg7!, followed by ...\text{\textbullet}e7. After the move played Black is really lost.
Game 46
Alekhone – Nimzowitsch
New York 1927
Nimzo-Indian Defence

1  d4  d6
2  c4  e6
3  c3  b4
4  c2  d6

The only fashionable move nowadays (see, for instance, my second match with Dr. Euwe) is 4...d5.

5  g5  bd7
6  e3  b6
7  d3  b7
8  f3

By retaining control of e4, White makes it very difficult for the opponent to form a suitable plan of further development.

8  ...  xh3+
9  xh3  c5
10  h3!

Black expected here either 10 xe2 or 10 d1, both permitting him to simplify matters by means of 10...d5!. The move selected permits White to make effective use of his bishops.

10  ...  h6
11  f4

And not 11 h4 because of the possibility of ...g5-g4.

11  ...  e7
12  g3!

Black threatened 12...e5 eventually followed by ...e4.

12  ...  e5?

This not too unnatural attempt to clarify the situation in the centre is probably already the decisive error. After the straightforward 12...0-0, White would not have found it very easy to exploit Black's unmistakable dark-squared weaknesses.

13  dxe5  dxe5
14  0-0-0  g6
14...e4 15 e2 would be useless, and the immediate 14...0-0-0 would have been met by 15 f5 g6 16 xe5! gxf5 17 xd7 followed by 18 xf6 or 18 xh8, with a decisive advantage.

15  c2

This bishop will prove very useful on the diagonal a4-e8.

15  ...  0-0-0
16  a4 (D)

16  ...  he8
17  f2  e6

Black wants to dislodge the ominous bishop on a4, but this plan costs

1 This is a simple oversight, since after 17...xd7 18 xh8 f6 the bishop is trapped and Black wins a piece.
a lot of time which White will utilise to decisively strengthen his pressure on the d-file. A slightly better chance of salvation was offered by 17...\texttt{Qh5} and if 18 \texttt{Qd2} then 18...\texttt{Qxg3} 19 h\texttt{xg3 Qh8}! 20 \texttt{Hhd1 Qb8}¹.

18 \texttt{Qd3} \texttt{Qe7}
19 \texttt{Hd2} \texttt{Qde8}
20 \texttt{Hhd1}

If now 20...\texttt{Qh5} then simply 21 \texttt{Qxd7+ Hxd7} 22 \texttt{Qxc5} and White wins.

20 ... \texttt{Qc6}
21 \texttt{Qc2!} \texttt{Qh5} (D)

In this rather harmless-looking position—with only one pawn exchanged and none of White’s pieces further than his third rank—Black is already completely helpless against the threats of 22 \texttt{Qxc5} followed by 23 \texttt{Qd6}, or alternatively 22 b4. If, for instance, 21...\texttt{Qc7} (in order to protect d6), then 22 b4! cxb4 23 \texttt{Qxb4 Qc5} 24 \texttt{Qd5+ Qxd5} 25 \texttt{cxd5 Qd6} 26 f4! and wins. After the text move Black loses a queen and a pawn for a rook and knight, after which the rest is merely a matter of technique.

Although this game is one of my happiest achievements in the domain of opening strategy, it has passed almost unnoticed, merely because of its length and the predilection of most of the chess journalists for short ‘brilliancies’. Yet it was certainly not my fault that Nimzowitsch (whose hopes for the second prize were more than strongly compromised by this loss) decided to fight a desperate struggle to the bitter end.

22 \texttt{Qxc5!} \texttt{Qxc5}
23 \texttt{Hd6} \texttt{Qxg3}
24 \texttt{hxg3 Qxd6}
25 \texttt{Qxd6} \texttt{Qc7}
26 b4 \texttt{Qb7}
27 \texttt{Qxc6}

It is obvious that from now on every reduction of material will be in White’s favour.

27 ... \texttt{Qxc6}
28 \texttt{Qa4} \texttt{Qee6}
29 \texttt{Qxc6} \texttt{Qxc6}
30 \texttt{Qxe5}

This particular exchange opens new fields of action for both White’s queen and king.

30 ... \texttt{Qxc4+}
31 \texttt{Qd2} \texttt{h5}
32 a3

White’s next object will be to tie up Black’s rook and knight. He succeeds in this aim by bringing his

¹ However, in this line 20 \texttt{Qg4! f6} 21 \texttt{Qd3 Qb8} 22 \texttt{Qxg6 Qxd2} 23 \texttt{Qxd2 destroys Black’s position.
queen into a very strong position in the middle of the board (see 43rd move).

32 ... \( \text{c7} \)
33 \( \text{e8}+ \) \( \text{d8} \)
34 e4 \( \text{d7}+ \)
35 \( \text{e3} \) \( \text{c7} \)
36 \( \text{f4} \)

Also good was 36 \( \text{f2} \) followed by \( \text{g1-h2} \) and eventually \( \text{f4-f5} \). But White wants his king to participate in the final battle.

36 ... \( \text{c3} \)
37 a4 \( \text{c2} \)
38 \( \text{e7} \) \( \text{c7} \)
39 \( \text{f6} \) \( \text{c2} \)
40 \( \text{e7} \) \( \text{c7} \)
41 \( \text{d6} \) \( \text{e6}+ \)
42 \( \text{e5} \)

Or 42 \( \text{e3} \), followed by \( \text{f2-g1} \), as mentioned in the previous note.

42 ... \( \text{d8} \)
43 \( \text{d5!} \) \( \text{c6} \)
44 \( \text{f4} \)

Now White decides to provoke the move ...\text{a5}, which will create a new weakness on \text{b6}.

44 ... \( \text{e6}+ \)
45 \( \text{e3} \) \( \text{c3}+ \)
46 \( \text{e2} \) \( \text{c7} \)
47 f4 \( \text{d8} \)
48 \( \text{e3} \) \( \text{c3}+ \)
49 \( \text{d4} \) \( \text{c7} \) \( D \)
50 \( \text{e5!} \) \( \text{a5} \)

Now practically forced, as after 50...\text{c6} 51 \text{f5}!, there would not be a satisfactory move left.

51 \( \text{a8}+ \) \( \text{d7} \)
52 b5 \( \text{e7} \)

Instead 52...\text{b7} 53 \( \text{f6} \) would have been perfectly useless.

53 \( \text{f5}! \)

And not 53 \( \text{b8}? \) due to the reply 53...\text{e6}! winning the queen because of the mating threat at \text{c5}.

53 ... \( \text{f6}+ \)
54 \( \text{d4} \) \( \text{d7}+ \)
55 \( \text{e3} \) \( \text{gxf5} \)
56 \( \text{exf5} \)

After this Black's h-pawn will inevitably fall.

56 ... \( \text{f7} \)
57 \( \text{f3} \) \( \text{e5} \)

This knight's position, though good, is insufficient compensation for the further material loss.

58 \( \text{wxb5} \) \( \text{d3}+ \)
59 \( \text{f2} \) \( \text{d2}+ \)
60 \( \text{f1} \) \( \text{d4} \)
61 \( \text{wxb7} \) \( \text{d6} \)

If 61...\text{f7} then 62 \( \text{w8} \) followed by \( \text{b8} \) winning the black pawn on \text{b6}.

62 \( \text{w7} \) \( \text{d7} \)
63 \( \text{c6}+ \) \( \text{e7} \)
64 \( \text{e6}+ \) \( \text{d8} \)
65 \( \text{b3} \) \( \text{b4} \)
66 \( \text{d1} \) \( \text{e7} \)
67 \( \text{e2}+ \) \( \text{d8} \)
68 \( \text{a2} \) \( \text{e7} \)
69 \( \text{e2}! \) \( \text{e4}+ \)
Or 69...\texttt{\textdaggerdbl}d8 70 \texttt{\textdagger}g8+ followed by g4-g5.  
70 \texttt{\textdagger}f3 \texttt{\texttt{\textdagger}}b4  
71 \texttt{\textdagger}e3 \texttt{\texttt{\textdagger}}c5  
72 \texttt{\textdagger}g8 \texttt{\texttt{\textdagger}}d7  
73 g4!  

This now brings a prompt decision.  
73 ... \texttt{\textdagger}xa4  
74 g5 \texttt{\textdagger}xg5  
75 \texttt{\textdagger}xg5+ \texttt{\textdagger}d6  
76 \texttt{\textdagger}g6+ \texttt{\texttt{\textdagger}}c7  
77 \texttt{\textdagger}c6+ \texttt{\texttt{\textdagger}}d8  
78 f6 \texttt{\textdagger}a1  
79 g4 \texttt{\textdagger}f1  
80 g5 \texttt{\textdagger}f5  
81 \texttt{\textdagger}a8+ \texttt{\texttt{\textdagger}}c7  
82 \texttt{\textdagger}c6+ \texttt{\texttt{\textdagger}}d8  
83 g6! 1-0  

If now 83...\texttt{\textdagger}xf6 then 84 g7 and if 83...\texttt{\texttt{\textdagger}}xf6, then 84 \texttt{\textdagger}d6+ followed by 85 g7.

Game 47  
Alekhine – Marshall  
\textit{New York 1927}  
Brilliancy Prize  
Queen’s Pawn Game

\begin{tabular}{ll}
1 & d4  \\
2 & c4  \\
3 & \texttt{\textdagger}f3  \\
4 & \texttt{\textdagger}fd2
\end{tabular}

This unnatural and time-wasting move can be successfully answered in several ways. One of the simplest is 4 \texttt{\textdagger}c2 and in the event of 4...d5 or 4...f5, then 5 \texttt{\texttt{\textdagger}}c3.  
4 \texttt{\textdagger}fd2

With the obvious idea of exchanging on e4 and developing the other knight at c3. The present game proves rather convincingly the soundness of this scheme.  
4 ... \texttt{\textdagger}b4  

A typical Marshall trap: if now 5 a3 then 5...\texttt{\textdagger}f6! with an immediate win!  
5 \texttt{\textdagger}c2 d5  
5...f5 6 a3 forces the exchange of both Black’s developed pieces,  
6 \texttt{\texttt{\textdagger}}c3 f5  
7 \texttt{\texttt{\textdagger}}dxe4

After this White will easily force the opening of the central files, by means of f3 and eventually e4. And as he is better developed, this opening must secure him a substantial positional advantage.  
7 ... \texttt{\texttt{\textdagger}}xe4  
8 \texttt{\textdagger}f4  

This bishop will protect the kingside against any sudden attack.  
8 ... 0-0  
9 e3 c6

White was threatening, by means of 10 a3, to force the exchange of the b4-bishop for the knight (as then 10...\texttt{\textdagger}d6? would lose to 11 \texttt{\textdagger}xd6 \texttt{\textdagger}xd6 12 cxd6 exd5 13 \texttt{\texttt{\textdagger}}xd5!).  
10 \texttt{\textdagger}e2 \texttt{\texttt{\textdagger}}d7  
11 a3

I considered this as being sounder than the line 11 0-0 \texttt{\textdagger}f6 12 f3 \texttt{\texttt{\textdagger}}h5!  
13 \texttt{\texttt{\textdagger}}xe4 \texttt{\texttt{\textdagger}}xf4 14 \texttt{\texttt{\textdagger}}xf4 \texttt{\texttt{\textdagger}}xf4 15 exf4 dxc4.  
11 ... \texttt{\textdagger}xe7  

After the exchange at c3 his dark squares would have remained helplessly weak.  
12 0-0 \texttt{\textdagger}g5 (D)  

There is hardly anything better for Black.
13 f3! \( \Delta xf4 \\
14 exf4 \( \Delta xf4 \\

Instead 14...exf3 15 \( \Delta xf3 \) \( \Delta f6 \\
16 c5! would be an unpleasant alternative because of the weakness at e6. By the text move, together with the three following moves, Marshall tries to save his compromised game through combinative play.

15 fxe4 \( \Delta xf1+ \\
16 \( \Delta xf1 \) e5 \\

Or 16...dxc4 17 \( \Delta xc4 \) \( \Delta b6 \\
18 \( \Delta f2! \\

with a clear advantage.

17 \( \Delta d2! \\

The initial move of the decisive manœuvre. If now 17...\( \Delta b6 \\
then 18 c5 \( \Delta a5 \\
19 exd5 exd4 20 b4! dxc3 21 \( g5 \) c7 22 d6 h6 23 \( e7 \\
and wins.

17 ... c5 \\

Trying to increase the tension at any cost, as pawn exchanges would have proved rapidly disastrous.

18 dxe5! \\

Instead 18 \( \Delta xd5 \) cxd4 19 \( \Delta b4 \\
would have been erroneous because of 19...\( \Delta f6 \\

18 ... d4 (D) \\
19 \( \Delta f4! \\

This sacrifice in connection with the 'quiet' 21st move is doubtless the safest and quickest method to force victory. Not, however, 19 \( \Delta d5? \\
allowing 19...\( \Delta xe5 \\
and 20...\( \Delta d6 \\

19 ... dxc3 \\

Forced.

20 \( \Delta f7+ \\
21 \( \Delta h8 \\
21 bxc3! \\

This alone proves the correctness of the sacrifice. Instead 21 e6 would have been tempting, but premature, because of 21...\( \Delta f6 \\
22 e7 \( g8 \\
23 \( \Delta xf6 \\
24 \( g8 \\
25 \( e7 \\
26 \( f7 \\

Game 48

Alekhine – Tartakower
Kecskemet 1927
Caro-Kann Defence

1 e4 c6 
2 d4 d5
3 \( \text{Qc3} \) \( \text{dxe4} \)
4 \( \text{Qxe4} \) \( \text{Qf6} \)
5 \( \text{Qg3} \)

In the Hastings Tournament of 1936/7 I successfully tried against W. Winter the pawn sacrifice 5 \( \text{Qd3} \), which was recommended by Dr. Tarasch shortly before his death. This game continued 5...\( \text{Wxd4} \) 6 \( \text{Qf3} \) \( \text{Wd8} \) 7 \( \text{We2} \) \( \text{Qxe4} \) (here 7...\( \text{Qbd7} \), as four(!) amateurs in consultation played against me in Majorca, January 1935, would be slightly premature—because of the unpleasant answer 8 \( \text{Qd6#} \) 8 \( \text{Qxe4} \) \( \text{Qd7} \) 9 0-0 \( \text{Qc5} \) 10 \( \text{Qd1} \) \( \text{Qc7} \) 11 \( \text{Qe5!} \) \( \text{Qxe4} \) 12 \( \text{Qxe4} \) \( \text{Qe6} \) 13 \( \text{Qf4} \) \( \text{Qc8} \) 14 \( \text{Qc4!} \) g5!? 15 \( \text{Qxg5} \) \( \text{Qg8} \) 16 \( \text{Qf4} \) \( \text{Qxc4} \) 17 \( \text{Qxc4} \) \( \text{Qg4} \) 18 g3 e5 19 \( \text{Qe1} \) (a more elegant solution was 19 \( \text{Qb3!} \), as taking on f4 would have led to an immediate disaster after 20 \( \text{Wxb7} \) 19...0-0-0 20 \( \text{Qxe5} \) and Black resigned after a few more moves.
5 ... e5

Most probably sufficient to equalise. But in order to achieve this Black must play the next moves with care.
6 \( \text{Qf3} \) \( \text{exd4} \)
7 \( \text{Qxd4} \)

Also 7 \( \text{Wxd4} \) \( \text{Wxd4} \) 8 \( \text{Qxd4} \) \( \text{Qc5} \) 9 \( \text{Qd5} \) 0-0 10 \( \text{Qe3} \), played by me against Capablanca in New York 1927, does not give any real chances of favourable complications.
7 ... \( \text{Qc5} \)

Already a rather serious loss of time. Indicated was the immediate 7...\( \text{Qe7} \), followed by castling, with a satisfactory position.
8 \( \text{We2+!} \) \( \text{Qe7} \)

Or 8...\( \text{We7} \) 9 \( \text{Qxe7+} \) \( \text{Qxe7} \) 10 \( \text{Qd5} \), which gives White some advantage.
9 \( \text{Qe3} \) c5?!

This attempt to prevent White castling queenside fails completely. A much lesser evil was 9...0-0 10 0-0-0 \( \text{We5} \) 11 \( \text{Qb1} \) \( \text{Qd5} \) 12 \( \text{Qf3} \) with no immediate danger for Black.
10 \( \text{Qd5} \) 0-0
11 \( \text{Qc4}! \)

An important move which prepares with tempo (attacking the c5-pawn) the development of the f1-bishop.
11 ... \( \text{Qe8} \)

Also after the immediate 11...b6 White would gradually obtain a winning attack by continuing 12 \( \text{Qd1} \) followed by \( \text{Wh4} \).
12 \( \text{Qd3} \) b6
13 0-0-0 \( \text{Qa6} \) (D)

It is obvious that alternatives would also lead to a more or less rapid catastrophe.

```

```

14 \( \text{Qh6+!} \)

By making this forcing combination White calculated that his opponent cannot obtain three pieces for
the queen, but—as a consequence of the weakness of the long light diagonal—only two; the remainder is compulsory for Black.

14 ... gxh6
15 \( \text{Q}x\text{h7}+! \) \( \text{Q}x\text{h7} \)

If 15...\( \text{Q}x\text{h8} \) then 16 \( \text{W}x\text{f7} \) followed by 17 \( \text{Q}f5 \) with a mating attack.

16 \( \text{W}g4+ \) \( \text{Q}h8 \)
17 \( \text{Q}x\text{d8} \) \( \text{Q}x\text{d8} \)

Or 17...\( \text{Q}x\text{d8} \) 18 \( \text{W}f3 \).

18 \( \text{W}e4 \) \( \text{Q}c6 \)
19 \( \text{W}x\text{c6} \) \( \text{Q}f8 \)
20 \( \text{Q}f5 \) \( \text{Q}c4 \)
21 \( \text{Q}x\text{h6} \) \( \text{Q}d5 \)
22 \( \text{W}c7 \) \( \text{Q}a\text{c8} \)
23 \( \text{W}f4 \) \( \text{Q}c6 \)
24 \( \text{Q}x\text{f8} \) \( \text{Q}x\text{f8} \)
25 \( \text{W}e5+ \) \( \text{Q}f6 \)
26 \( \text{Q}d6! \) 1-0

Game 49
Kmoch – Alekhine
Kecskemet 1927
Queen’s Pawn Game

1 \( \text{d}4 \) \( \text{d}5 \)
2 \( \text{Q}f3 \) \( \text{c}6 \)
3 \( \text{e}3 \)

After this tame move Black has no difficulty with his \( \text{c}8 \)-bishop. More usual and better is 3 \( \text{c}4 \), leading to the Slav Defence of the Queen’s Gambit Declined.

3 ... \( \text{Q}f5 \)
4 \( \text{Q}d3 \) \( \text{e}6 \)
5 0-0

The exchange here or on the next move certainly cannot be recommended.

5 ... \( \text{Q}d7 \)
6 \( \text{c}4 \) \( \text{Q}g6 \)
7 \( \text{W}c2 \)

It is easily comprehensible that White wants to clarify the situation in the centre as soon as possible. 7 \( \text{Q}c3 \) would have been simply answered by 7...\( \text{Q}e7 \).

7 ... \( \text{Q}xd3 \)
8 \( \text{W}xd3 \) \( \text{Q}e4 \)

In order to eliminate as many minor pieces as possible, since White will sooner or later obtain some more space by playing \( \text{e}4 \).

9 \( \text{Q}d2 \) \( \text{Q}f6 \)
10 \( \text{Q}c3 \)

After 10 \( \text{Q}xe4 \) \( \text{Q}xe4 \) 11 \( \text{f}3 \) \( \text{Q}f6 \)
12 \( \text{e}4 \) \( \text{dxc4} \) 13 \( \text{W}xc4 \) \( \text{W}b6 \)
14 \( \text{Q}c3 \) \( \text{d}8 \)
15 \( \text{Q}d1 \) \( \text{Q}e7 \), to be followed by ...0-0, White’s position would have remained rather shaky.

10 ... \( \text{Q}xd2 \)
11 \( \text{Q}xd2 \) \( \text{Q}e7 \)
12 \( \text{e}4 \)

The freedom White obtains by this move will be neutralised by the necessity for him to permanently protect his \( \text{d} \)-pawn. But he hardly had another plan at his disposal as blocking attempts would fail, e.g. 12 \( \text{c}5 \) \( \text{e}5 \)! or 12 \( \text{f}4 \) \( \text{c}5 \)!, which are both rather in Black’s favour.

12 ... \( \text{d}xe4 \)
13 \( \text{Q}xe4 \) 0-0
14 \( \text{Q}c3 \) \( \text{W}c7 (D) \)

\( \text{b}6 \) was also a good square for the queen.

15 \( \text{Q}d1 \) \( \text{Q}d8 \)
16 \( \text{Q}d2 ? \)

White loses this game not because of the opening, which was
more or less satisfactory, but chiefly because of his altogether passive and conventional play. Here, for example, he could quite safely play 16 f4 preventing the black queen from occupying that square. From now on Black’s chances can be considered as decidedly superior.

16 ... \textit{\textbf{\textsf{\textw{f4}}}}
17 \textit{\textbf{\textx{xf6}}+} \textit{\textbf{\textx{xf6}}}
18 \textit{\textbf{\textd{fd1}}} \textit{\textbf{\textd{d7}}}
19 \textit{\textbf{\textg{g3}}}

The exchange of queens would doubtless increase White’s drawing prospects, but Black can easily avoid it.

19 ... \textit{\textbf{\textw{f5}}}
20 f4

The main object of this move seems to be the prevention of ...\textit{\textbf{\textg{g5}}} or ...e5 at some point in the future.

20 ... \textit{\textbf{\textd{fd8}}}
21 \textit{\textbf{\texte{e3}}} h5!

Not only giving a loophole for the king but also restricting White’s kingside (22 h3 can now be met by 22...h4).

22 b4

This facilitates Black’s job, since he will immediately eliminate the c4-pawn, and thus obtain full control over d5.

22 ... b5!
23 \textit{\textbf{\textw{f3}}}

This attempt to save by tactical means a strategically very sick position leads to a rapid debacle. But also after the quieter 23 c5 \textit{\textbf{\textd{d5}}, followed by ...g5!}, the game could hardly last very long.

23 ... bxc4
24 \textit{\textbf{\textw{xc6}}} \textit{\textbf{\textw{xf4}}}
25 \textit{\textbf{\textw{xc4}}} e5! (D)

Obtaining a decisive material advantage.

26 \textit{\textbf{\textw{e2}}} exd4
27 \textit{\textbf{\textd{d3}}}

If this blockade would be possible Black would have had to face some technical difficulties. But as it is, he succeeds in forcing an immediate win by a keenly calculated combination.

27 ... dxc3!

The chief variation of this trans- action is both pretty and convincing:

28 \textit{\textbf{\textx{xd7}}} \textit{\textbf{\textxd7}} 29 \textit{\textbf{\textw{e8+}}} \textit{\textbf{\texth{h7}}} 30 \textit{\textbf{\textw{xd7}}} \textit{\textbf{\textw{e4!!}}} 31 \textit{\textbf{\textw{f7}}} (or 31 \textit{\textbf{\textd{d5}}}
\textit{\textbf{\textw{xd5}}} 32 \textit{\textbf{\textxd5}} c2 and wins, as 33
32 \text{\textit{W}xh5+} \text{\textit{G}h8} and wins.

28 \text{\textit{Exd7}} \text{\textit{Exd7}}
29 \text{\textit{Exd7}}
Loses instantly.
29 ... \text{\textit{A}d4+}
30 \text{\textit{G}h1}
Or 30 \text{\textit{Exd4}} \text{\textit{W}xd4+} 31 \text{\textit{G}f1} \text{\textit{W}f4+}
32 \text{\textit{G}e1} \text{\textit{Wxb4}}.
30 ... \text{\textit{W}c1+}
0-1

Game 50

Capablanca – Alekhine

Buenos Aires Wch (1) 1927
French Defence

1 e4 e6
2 d4 d5
3 \text{\textit{G}c3} \text{\textit{G}b4}
4 exd5 exd5
5 \text{\textit{E}d3} \text{\textit{G}c6}
6 \text{\textit{E}e2} \text{\textit{G}e7}
7 0-0 \text{\textit{E}f5}
8 \text{\textit{E}xf5}

Other moves like 8 a3 or 8 \text{\textit{G}g3} would also prove perfectly harmless. This game shows once more that, if White has any fighting ambitions in this variation, he must avoid the pawn exchange at the 4th move.

8 ... \text{\textit{G}xf5}
9 \text{\textit{W}d3} \text{\textit{W}d7}
10 \text{\textit{G}d1}

The beginning of a long series of slightly inferior moves. The natural developing move 10 \text{\textit{G}f4}, which Black intended to meet by 10...0-0-0, would have led to a more lively struggle.

10 ... 0-0

11 \text{\textit{G}e3} \text{\textit{G}xe3}
12 \text{\textit{G}xe3}

White’s minor pieces are now obstructing the vital e-file. This is a convincing proof of the inexactitude of his opening strategy.

12 ... \text{\textit{W}fe8}
13 \text{\textit{G}f4}

As the answer proves, the knight has no future on this square. 13 \text{\textit{G}f4} followed by c3 was natural and good enough for a draw.

13 ... \text{\textit{E}d6} (D)

Thus Black proposes a transaction whose results would be very satisfactory for himself. If, namely, 14 \text{\textit{G}xd5} \text{\textit{G}xh2+} 15 \text{\textit{G}xh2} \text{\textit{W}xd5} 16 c4, then 16...\text{\textit{W}h5+} 17 \text{\textit{G}g1} \text{\textit{E}ad8} 18 \text{\textit{G}d5} \text{\textit{G}d6} and White’s king position would be in danger.

14 \text{\textit{G}fe1}

White continues to play superficially. Indicated was first 14 c3.

14 ... \text{\textit{G}b4}
15 \text{\textit{W}b3}?

After this he will be obliged at least to spoil his pawn position in a rather ugly way. The lesser evil was 15 \text{\textit{W}d2} \text{\textit{W}f5} 16 \text{\textit{G}ec1} h5! (Black is
threatening ...\( \mathbb{H} e4 \) followed by ...h4) with some positional advantage for Black.

15  ...  \( \mathbb{W} f5 \)

16  \( \mathbb{H} ac1? \) (D)

After this further error, the game can hardly be saved as Black now wins a pawn, with a fairly good position. Necessary was 16 \( \mathbb{Q} d3 \) after which Black, it is true, would have obtained a far superior endgame by continuing 16 ... \( \mathbb{Q} xd3 \) 17 \( \mathbb{W} xd3 \) \( \mathbb{W} xd3 \) 18 cxd3 \( \mathbb{B} b4 \) 19 \( \mathbb{H} ec1 \) c6, eventually followed by ...a5!, etc.

\[ \text{Diagram: } B \]

16  ...  \( \mathbb{Q} xc2! \)

17  \( \mathbb{H} xc2 \)  \( \mathbb{W} xf4 \)

This is the possibility overlooked by Capablanca at his 16th move. He expected only 17 ... \( \mathbb{Q} xf4 \) after which he would have re-established the balance by 18 \( \mathbb{H} c5 \).

18  g3

It is merely a matter of taste whether this or 18 \( \mathbb{W} xd5 \) \( \mathbb{W} xh2+ \) 19 \( \mathbb{F} f1 \) c6 is preferable.

18  ...  \( \mathbb{W} f5 \)

Tempting was also 18 ... \( \mathbb{W} f3 \) 19 \( \mathbb{W} x b7 \) h5 20 \( \mathbb{B} b5 \) h4 21 \( \mathbb{W} e2 \) \( \mathbb{W} f5 \), with a good attack. But the decision to keep the material advantage can certainly not be blamed.

19  \( \mathbb{H} ce2 \)  b6

20  \( \mathbb{W} b5 \)  h5

21  h4  \( \mathbb{H} e4 \)

Threatening 22 ... \( \mathbb{H} x h4 \).

22  \( \mathbb{Q} d2(!) \)

This temporary sacrifice of a second pawn offers comparatively the best saving chances—in case Black accepts it. Perfectly hopeless would have been 22 \( \mathbb{W} d3 \) \( \mathbb{H} ae8 \) 23 \( \mathbb{Q} d2 \) \( \mathbb{W} e6 \).

22  ...  \( \mathbb{H} xd4 \)

This acceptance—which had to be calculated very carefully—was by no means necessary. Simple and convincing was instead 22 ... \( \mathbb{H} ae8 \) as after the exchange of the white queen for two rooks by 23 \( \mathbb{W} xe8+ \) \( \mathbb{H} xe8 \) 24 \( \mathbb{W} xe8+ \) \( \mathbb{H} h7 \) Black, owing to his considerable positional advantage, would have but little difficulty in forcing the win.

23  \( \mathbb{Q} c3 \)  \( \mathbb{H} d3 \)

Also after 23 ... \( \mathbb{G} g4 \) (23 ... \( \mathbb{E} c4? \) 24 \( \mathbb{H} e5! \)) 24 \( \mathbb{Q} e5 \) White would have finally won back one of his minus pawns.

24  \( \mathbb{Q} e5 \)  \( \mathbb{H} d8 \)

25  \( \mathbb{Q} xd6 \)  \( \mathbb{H} xd6 \)

This is technically simpler than the unaesthetic 25 ... cxd6 26 \( \mathbb{W} c6! \).

26  \( \mathbb{E} e5 \)  \( \mathbb{W} f3 \)

Of course not 26 ... \( \mathbb{G} g6 \) 27 \( \mathbb{G} g5 \).

27  \( \mathbb{H} x h5 \)  \( \mathbb{W} x h5 \)

And here 27 ... \( \mathbb{E} e6 \) would be another method of suicide (28 \( \mathbb{W} e8+! \)).

28  \( \mathbb{H} e8+ \)  \( \mathbb{H} h7 \)

29  \( \mathbb{W} x d3+ \)  \( \mathbb{W} g6 \)

30  \( \mathbb{W} d1 \) (D)
30 ... \textit{He6!}

An interesting conception. Black gives back his plus pawn in order to combine the advance of the passed d-pawn with a mating attack. 30...d4 would be much less convincing because of the answer 31 \textit{Wf3} threatening both 32 \textit{Wa8} and 32 h5.

31 \textit{La8} \textit{He5!}

Intending to place the queen behind the rook and at the same time preparing the formation of the pawn chain b6-c5-d4.

32 \textit{Xxa7} c5

33 \textit{Ed7}?!

Shortens the agony. I expected, instead, 33 \textit{Ag2} d4 34 \textit{Aa3} \textit{Wf6}! 35 \textit{Wf3} c4 followed by the decisive advance of the d-pawn.

33 ... \textit{We6}

34 \textit{Wd3+} g6

35 \textit{Ed8} d4

36 a4

Despair!

36 ... \textit{Ee1+}

This direct attack is convincing enough. But Black could also have taken immediate advantage of the exposed position of the adventurous rook—for instance, 36...\textit{Wf7}! 37 \textit{Xb8} \textit{Wc7} 38 \textit{b3} \textit{He6} 39 \textit{La8} \textit{Wb7} and the rook would be lost because of the threat 40...\textit{Ee1+}.

37 \textit{Eg2} \textit{Wc6+}

38 \textit{f3} \textit{He3}

39 \textit{Wd1} \textit{Wf6}

40 g4 \textit{He2+}

41 \textit{Cg3} \textit{Wf3}

42 \textit{Wh1} \textit{Wf4!}

After this there is no way of preventing the following rook move.

43 h5 \textit{Ef2}

0-1

Game 51

Capablanca – Alekhine

Buenos Aires Wch (11) 1927

Queen’s Gambit Declined
(Cambridge Springs Defence)

1 d4 d5

2 c4 e6

3 \textit{Cc3} \textit{Cf6}

4 \textit{Ag5} \textit{Abd7}

5 e3 c6

6 \textit{Gf3} \textit{Wf3}

7 \textit{Cd2} \textit{Ah4}

8 \textit{Wc2} \textit{Dxc4}

9 \textit{Exf6} \textit{Dxf6}

10 \textit{Dxc4} \textit{Wf7}

11 a3 \textit{Ee7}

12 \textit{Ee2}

White does not need to hurry to prevent ...c5 by playing 12 b4, since that advance would be still premature because of 12...c5 13 \textit{Db5} \textit{Wb8} 14 \textit{Dxc5} \textit{Exc5} 15 b4 \textit{Ee7} 16 \textit{Da5} ±.

12 ... 0-0

13 0-0 \textit{Eld7}

Here, too, 13...c5 would have been inadvisable for analogous reasons.
14 b4 b6
First 14...Kfd8 would be safer, followed by ...Ke8. Black's plan to continue by 15...a5 16 bxa5 b5 will be parried by the following answer.
15 Ke3!
If now 15...a5, then 16 Qe5! axb4 17 Qb5 with the advantage.
15 ... Kac8
16 Kfd1 Kfd8
17 Kac1 Ke8
18 g3
A good positional move, the immediate object of which is to prevent the answer ...Wf4 in case of e4.
18 ... Qd5
19 Qb2 Wb8
More exact was the immediate 19...Wb7 keeping in mind the possibility of ...Wa6.
20 Qd3 Kg5
With the eventual threat ...Qxe3.
21 Kb1 Wb7 (D)

23 Wxc3 We7?!
Disadvantageous, since Black's dark-squared bishop will now be driven temporarily out of play. Correct was 23...Cc7 and if 24 Kg2 then 24...f6 25 e5 Ke7 26 Bbc1 Wc8 after which Black could quietly wait for further developments.
24 h4! Kh6
25 Ke5
Threatening 26 Kg4.
25 ... g6
26 Kg4?!
Now it is White's turn to miss the best move! After 26 Qc4! Kg7 27 e5 h5 28 Qd6 Black would have nothing better than to start to fight for a draw by sacrificing the exchange for a pawn; 28...Kxd6 29 exd6 Wxd6 30 Wc4! ±.
26 ... Kg7
27 e5 h5
28 Kg3 c5!
Black profits from the opportunity to finally free his e8-bishop, correctly realising that White will be unable to take real advantage of the open b-file.
29 bxc5
If 29 dxc5 then 29...bxc5 30 Bxd8 Wxd8 31 bxc5 Wc7.
29 ... bxc5 (D)
30 d5
This attempt to complicate the position—most unusual for Capablanca—turns decidedly to Black's

---

1 At the end of this line 30...Dd8 wins the d4-pawn, so this variation looks favourable for Black—note that 31 Bbc1 Qxd4 attacks g3, so White has no time to capture on c6.
advantage. An easy draw was obtainable by 30 \( \text{Bb7} \text{Axd7} 31 \text{Ax} 7 \text{xd7} 32 \text{d5} \) (or 32 \text{dx} 5 \text{Ae8} 33 \text{c6} \text{Wc7}) 32...\text{ex} 5 33 \text{Ax} 5 \text{We6} 34 \text{Af5} \text{Ax} 5 followed by a general liquidation resulting in opposite-coloured bishops.

\[
\begin{align*}
30 & \quad \text{ex} 5 \\
31 & \quad \text{Axd5} \text{We6}
\end{align*}
\]

Of course not 31...\text{wx} e 5 32 \text{wx} e 5 \text{Ax} 5 33 \text{Ae7}+, etc.

32 \text{Af6}+?!

As the following shows, the exchange thus forced only facilitates Black’s task, as his passed pawn will largely compensate him for the dangerous white pawn on f6. Comparatively better was 32 \text{Bb7} \text{Ax} 5 33 \text{Aa} 5 \text{Ag7} 34 \text{Ax} 7 and Black’s advantage—the bishoppair—would not yet have been decisive.

\[
\begin{align*}
32 & \quad \text{Ax} 6 \\
33 & \quad \text{ex} 6 \text{Ax} 1+ \\
34 & \quad \text{Ax} 1 \text{C6}!
\end{align*}
\]

White cannot exchange bishops, as in that case he would lose his only pride—the pawn at f6.

35 \text{Ae1} \text{Wf5} \\
36 \text{Ae3} \text{C4!} \\
37 \text{a4}

Realising the inferiority of his position, White begins to ‘swindle’. If now 37...\text{Ax} a4, then 38 \text{Ae4} \text{Wg4} (38...\text{Wd7} 39 \text{Af3} \text{Ah7?} 40 \text{We5} would even lose) 39 \text{Af3} \text{Wd7} 40 \text{Ae7} \text{Wd3} 41 \text{Ax} 3 \text{cxd3} 42 \text{Ax} a7, with a draw in view. But after the following simple answer Black’s position is even better than before, as he obtains the full control over b4.

\[
\begin{align*}
37 & \quad \ldots \\
38 & \quad \text{Ag2} \text{Xg2} \\
39 & \quad \text{Xg2} \text{Wd5+} \\
40 & \quad \text{Ah2} \text{Wf5} \\
41 & \quad \text{Af3} \text{Cc5 (D)}
\end{align*}
\]

\[
\begin{align*}
42 & \quad \text{Af4}
\end{align*}
\]

After 42 \text{Ae3} \text{Wb6} White would not have any useful move at his disposal (43 \text{Af3} \text{Cc6!})\footnote{After 43 \text{Af3} \text{Cc6} 44 \text{We3} White would seem to have enough counterplay to draw, for example 44...\text{Ah7} 45 \text{Af5!} \text{Wd6} 46 \text{Xh5+} \text{xh5} 47 \text{Wg5} \text{Wf8} 48 \text{Wxh5+}, and if 48...\text{Wh6} then 49 \text{Wf5+}.}.
42 ... $\text{h7}$

This was not necessary here: it was much more important to prevent White's next move by 42...$\text{wb6}$. But the tempting 42...$\text{wb4}$ 43 $\text{we3}$ $\text{xa4}$ would be insufficient because of 44 $\text{xf5! wb4}$ 45 $\text{xh5 gxh5}$ 46 $\text{wh6 wf8}$ 47 $\text{g5+}$, with perpetual check.

43 $\text{xd4 wc6?}$

A miscalculation, which allows White the chance to save the game. 43...$\text{wb6!}$ was still correct, and if 44 $\text{xf4}$ then 44...$\text{g8}$ obtaining the same position as he could have had two moves earlier.

44 $\text{xa5}$

Forced, but good enough.

44 ... $\text{c3}$

If instead 44...$\text{xf6}$ 45 $\text{xf4}$ then after 45...$\text{g7}$ 46 $\text{d5}$, or 45...$\text{e6}$ 46 $\text{c3}$ followed by a5, there is no danger for White in either case.

45 $\text{a7! g8}$

Other moves also cannot force the win against correct replies, for instance:

1) 45...$\text{xf6?}$ 46 $\text{xf4}$ $\text{xf4}$ 47 $\text{gxf4}$ c2 48 $\text{xf7+ h8}$ (48...$\text{h6?}$ 49 $\text{f5!}$ even wins for White) 49 $\text{f6+}$.

2) 45...$\text{c7}$ 46 $\text{xc7}$ $\text{xc7}$ 47 $\text{d1}$.

3) 45...$\text{c7}$ 46 $\text{b8}$ c2 47 $\text{d8}$ $\text{xf6}$! 48 $\text{h8+!!}$ (this is the move I had overlooked when I started the combination by playing 43...$\text{c6}$) 48...$\text{hx8}$ 49 $\text{xc7}$, with salvation in all cases.

46 $\text{e7}$

If now 46...c2 then 47 $\text{d8+ xd8}$ 48 $\text{xd8+ h7}$ 49 $\text{e7 e6}$ 50 $\text{c7}$, forcing a draw.

47 $\text{d7?}$

Capablanca does not take full advantage of the opportunity given to him by my 43rd move, and the game again takes its natural course. By playing 47 $\text{d7!}$ he could have obtained a draw, as after 47...$\text{xf2?}$ (if 47...$\text{f8}$, then 48 $\text{a5 xa5}$ 49 $\text{a7}$ $\text{d5}$ 50 $\text{d7}$ $\text{a5}$ and the white rook, because of the threat $\text{xf8+}$!, would eternally persecute the enemy queen) 48 $\text{h1!}$ (48 $\text{h3}$ would lose, since in the main variation the black queen would reach the square e6 with check) 48...$\text{a2}$ 49 $\text{d8+ xd8}$ 50 $\text{xd8+ h7}$ 51 $\text{f8}$ and there would not be anything better than perpetual check, White's f6-pawn remaining invulnerable. A most unusual escape!

47 ... $\text{c5!}$

48 $\text{e4}$

This is now the only way to parry 48...c2.

48 ... $\text{xf2+}$

49 $\text{h3}$ $\text{f1+}$

50 $\text{h2}$ $\text{f2+}$

51 $\text{h3}$ $\text{f8}$
52...\textit{Wc6}
Again the only move.
52...\textit{Wf1+}
53\textit{Wh2} \textit{Wf2+}
54\textit{Wh3} \textit{Wf1+}
55\textit{Wh2} \textit{Wh7!}
56\textit{Wc4}
If 56\textit{Wxc3} then 56...\textit{Wf2+} 57\textit{Wh1} \textit{Wd8} 58\textit{We1 Wf3+} 59\textit{Wh2} \textit{Wd1} and wins.\footnote{At the end of this line White can fight on by 60\textit{Wf4} \textit{Wd3} 61\textit{We4} and there is no immediate win for Black. In view of this, Black should prefer 57...\textit{Wb8}! 58\textit{Wb4 We8}, which really does finish White off.}
56...\textit{Wf2+}
57\textit{Wh3} \textit{Wg1!}
The decisive manoeuvre. As an alternative 57...\textit{c2} would be insufficient because of 58\textit{Wf4!} followed by \textit{Wf1}.\footnote{In fact 58\textit{Wf4 Wd2} 59\textit{Wf1} fails straight away after 59...\textit{Wd7+} 60\textit{Wh2} \textit{cxc8} 61\textit{Wf4 Wd1}, but White can defend by means of 58\textit{Wc7!} \textit{Wxf6} 59\textit{We7} and Black cannot win.}

58\textit{He2 (D)}
Instead, 58\textit{g4} would have led to a pretty win: 58...\textit{c2!} 59\textit{Wxc2 He8!!}.

\begin{center}
\includegraphics[width=0.5\textwidth]{chessboard.png}
\end{center}

58...\textit{Wf1+}?
For the second time Black overlooks an easy win! The correct sequence of moves (which I actually intended when playing 57...\textit{Wg1!}) was 58...\textit{Wh1+} 59\textit{Wh2 Wf3!} after which White could not play 60\textit{c2} due to 60...\textit{Wf5+} and he would be helpless against the threat 60...\textit{xf6} (if 60\textit{Wf4}, then 60...\textit{Wd1})\footnote{There remains the question as to whether or not Black can win after 60\textit{He2 Wxf6} 61\textit{Wh2} \textit{b8} (61...\textit{xd8} 62\textit{f2} \textit{He2} 63\textit{xd2 cxd2} 64\textit{Wd5} draws) 62\textit{a5}, when White threatens to advance his pawn and force the exchange of the queenside pawns.}.
59\textit{Wh2} \textit{Wxf6}
60\textit{a5?}
Instead of securing the draw by 60\textit{He2} \textit{He8} 61\textit{Wh2}! (threatening either 62\textit{Wxc3} or 62\textit{Wf2}) Capablanca commits another error and should now lose instantly.
60...\textit{Wd8?}
An immediate decision could be obtained by 60...\textit{Wf1!} 61\textit{Wf4} \textit{He8} (or ...\textit{He8}) After the text move the win should again become quite a problem.
61\textit{a6?}
After 61\textit{Wh2} Black could only obtain a queen ending with three pawns against two which, with the right defence, should most probably end in a draw. Now at last, it is the end!
by Capablanca in the 23rd, 25th and 27th games.

8 a3!!

This tame rejoinder will be convincingly refuted (as a winning attempt, of course) in the present game. It has since completely disappeared from master practice.

8 ... h6
9 dxe4 dxc4
10 dxc4 b5!

More natural and a better move than 10...b6 which, however, in the 13th, 15th, 17th, and 19th games proved sufficient for maintaining the balance of the position.

11 e2 b7
12 0-0

In the event of 12 b4 Black would have obtained the initiative by playing 12...a5! 13 b3 axb4 14 axb4 g5 15 g3 d5.

12 ... c5
13 dxc5 xec5
14 d4

As White has not an atom of advantage, the logical course for him was to simplify matters by means of 14 dx8 f6 15 b3. Entirely wrong would be, instead of the text move, 14 xf6 xf6 15 xb5, because of 15...xd8 16 f6 17 f3 f3 18 x8 19 x3 ab5 20 xa8 xa8 +.

14 ... e8

Preventing xb5 once and for all.

15 b4

Weakening, without any necessity, the square c4. Simpler was 15 f3 b6 16 e2.

15 ... cd7! (D)

---

**Game 52**

Capablanca – Alekhine

*Buenos Aires Wch (21) 1927*

Queen's Gambit Declined

1 d4 d5
2 c4 e6
3 dxc3 f5
4 g5 bd7
5 e3 e7
6 f3 0-0
7 c1 a6

Although with this less usual defence I obtained quite a success in this match (+1, =7, -0), I now consider it as unsatisfactory because of the possible answer cxd5, adopted
16 \textit{Ag3}

In the event of 16 \textit{Af3}, I intended to play 16...\textit{Wb6} 17 \textit{De4} \textit{Xxc1} 18 \textit{Wxc1 Ac8} after which the white queen would have had no good square at her disposal, for instance: 19 \textit{Wb1}? (or 19 \textit{Wd2}?) 19...\textit{Dxe4}, 19 \textit{Wb2 g5} 20 \textit{Dxf6+ Xxf6}, or 19 \textit{Wd1} (or 19 \textit{We1}) 19...g5—all to Black’s advantage. The text move is therefore comparatively the best\footnote{A curious note, because the lines given after 19 \textit{Wb2} and 19 \textit{Wd1/e1} are hardly clear-cut. Instead Black should reply with 19...\textit{Dxe4} and only then ...g5, which simply wins a piece.}.

16 ... \textit{Db6}

17 \textit{Wb3}

In order to answer 17...\textit{Dc4} by 18 \textit{Dfd1} \textit{Wb6} 19 a4.

17 ... \textit{Dfd5}

A good move connected with the positional threat 18...\textit{Dxc3} 19 \textit{Bxc3 Ad5} 20 \textit{Wb2 Bxc3} 21 \textit{Wxc3 Wa8}, followed by ...\textit{Bc8}, with advantage to Black. White’s answer is practically forced.

18 \textit{Af3} \textit{Ac4!}

19 \textit{De4} \textit{Wc8}

20 \textit{Dxc4}

I am inclined to consider this exchange the decisive positional error, as from now on Black, taking advantage of the formidable position of his knight at c4, will gradually concentrate all his pieces for action in the centre. White’s correct move was 20 \textit{Wb1} threatening both 21 \textit{Dd6} and 21 \textit{Dd6}; if in that case 20...\textit{Dd8} then 21 \textit{Dd2 Bxc1} 22 \textit{Bxc1 Wa8} 23 \textit{Cc7} and White would succeed in exchanging some further material without further compromising his position.

Still, the text move can by no means be considered an actual blunder and Capablanca lost this game only because he did not realise in time the dangers of his position and was, in the issue, regularly outplayed.

20 ... \textit{Dxc4}

21 \textit{Cc1} \textit{Wa8!}

Threatening either 22...\textit{Dxb4} or 22...\textit{Ddx3}, and thus forcing White to abandon control of the central light squares.

22 \textit{Dc3}

If 22 \textit{Dc5} then 22...\textit{Bxc5} 23 \textit{bxc5 Ac8} 24 \textit{Dxe2 Bxc5} 25 \textit{Bxc4 Wc8}, winning a pawn.

22 ... \textit{Cc8}

Threatening 23...\textit{Dd2}.

23 \textit{Dxd5} \textit{Dxd5}

24 \textit{Dxd5} \textit{Wxd5}

25 a4
The wish to reduce the number of pawns on the queenside is natural, but White's position still remains compromised, inasmuch as his b-pawn will become a welcome object of attack in the endgame.

25 ... \textit{f6}  
26 \textit{d3}

Of course not 26 \textit{d1} because of 26...\textit{bxa4} 27 \textit{wa4} \textit{b2} 28 \textit{wa6} a8 and wins.

26 ... \textit{b2!} (D)

In order to play ...e5 without restricting the activity of the bishop. The tactical justification of this move is shown by the following variations:

1) 27 \textit{d1} bxa4! 28 \textit{xa4} \textit{b6}  
29 \textit{xd5} \textit{a4} 30 \textit{d1} \textit{c3} 31 \textit{e1} \textit{c4} 32 \textit{d6} \textit{c4} 33 \textit{e7} f6 34 \textit{b1} \textit{f7} 35 \textit{f1} \textit{e3}, with an easy win in the endgame.

2) 27 \textit{b1} \textit{a3}! 28 \textit{xb2} \textit{xb1}  
29 \textit{xb1} \textit{b3} 30 \textit{f1} bxa4 31 h3 a3 and wins.

27 \textit{e1} \textit{d8}  
28 \textit{xb5} \textit{xb5}  
29 h3

This emergency exit is absolutely necessary.

29 ... e5  
30 \textit{b1} e4!

The beginning of the end.

31 \textit{d4}

Or:

1) 31 \textit{e1} \textit{d2} 32 \textit{c2} (32 \textit{f1} \textit{a8} 33 \textit{d1} \textit{a3} and Black wins)  
32...\textit{xc2} 33 \textit{xc2} \textit{d2} 34 \textit{e1} \textit{a3} and wins.

2) 31 \textit{h2} \textit{d3}! 32 \textit{xb2}! \textit{xb3}  
33 \textit{xb3} \textit{d1}+ 34 \textit{f1} \textit{d2} 35 \textit{a3} \textit{xf1} and White is helpless.

31 ... \textit{xd4}  
32 \textit{d1}

Loses immediately. But also after 32 exd4 \textit{xd4} the game could not have lasted long.

32 ... \textit{xe3!}

0-1

This and the 34th game are, in my opinion, the most valuable of the match.

Game 53

\textbf{Alekhine – Capablanca}  
\textit{Buenos Aires Wch (32) 1927}

Queen’s Gambit Declined

1 d4 \textit{d5}  
2 c4 \textit{e6}  
3 \textit{c3} \textit{f6}  
4 \textit{g5} \textit{bd7}  
5 e3 \textit{c6}  
6 exd5 \textit{exd5}  
7 \textit{d3} \textit{e7}  
8 \textit{ge2}

This knight development was played here for the first time. Because of White’s success in the present game, it became fashionable in the following years. In my opinion it
is neither better nor worse than the usual $\text{Qf3}$, but if White elects to castle on the queenside, he has to be particularly careful because Black’s counter-attack on this wing may easily become more dangerous than his own initiative on the kingside.

8 \[...\] 0-0

In this kind of position ...h6 is generally played before castling in order not to allow White to answer this pawn move by h4. If Black had done this, my answer would have been not 9 $\text{Qh}4$ but 9 $\text{Qf}4$.

9 $\text{Qg}3$ $\text{Qe}8$

There is hardly another method of emancipation, as 9...$\text{Qe}8$ would have been very strongly met by 10 $\text{Qf}5$.

10 $\text{h}4$

The natural consequence of the whole opening plan.

10 \[...\] $\text{Qdf}6$

11 $\text{Qc}2$ $\text{Qe}6$

12 $\text{Qf}5$ $\text{Qxf}5$

13 $\text{Qxf}5$ $\text{Qd}6$

14 $\text{Qd}3$

Of course not 14 $\text{Qxf}6$ $\text{Qxf}5$ with equality. This text move forces Black to weaken his king position.

14 \[...\] h6

15 $\text{Qf}4$

In case of 15 0-0-0 Black would have been able to try a counter-attack starting with 15...b5.

15 \[...\] $\text{Qc}8$ (D)

Black intends, as soon as his opponent castles queenside, to generate activity on the c-file, and thereby overlooks the combinative reply. A more logical course was 15...$\text{Qe}8$ intending ...$\text{Qfe}4$.

16 g4!

This advance, made possible by the fact that 16...$\text{Qxe}4$? 17 $\text{Qx}d6$ followed by 18 $\text{Qf}5$ would lose the exchange for Black, considerably strengthens White’s position and leaves Black but little choice.

16 \[...\] $\text{Qfe}4$

17 g5 $\text{h}5$

18 $\text{Qxe}4$

White decides to accept Black’s (forced) pawn sacrifice, although he realises that the ensuing ending will be extremely difficult to win—if it is possible at all, considering the very effective position of the black rook on White’s second rank. A promising alternative was 18 $\text{Qxd}6$ $\text{Qxd}6$ 19 0-0-0 (not 19 g6 immediately, because of 19...$\text{Qh}4$ with counterplay) 19...$\text{Qb}5$ 20 $\text{Qb}1$ $\text{Qxc}3+$ 21 $\text{Qxc}3$ and, in spite of the opposite-coloured bishops, Black would not have found it easy to obtain a draw.

18 \[...\] $\text{Qxe}4$

19 $\text{Qxe}4$ $\text{dxe}4$

20 $\text{Qxe}4$ $\text{Qa}5+$

21 $\text{Qf}1$

White cannot risk the variation 21 $\text{Qe}2$ $\text{Qb}5+$ 22 $\text{Qf}3$ $\text{Qfe}8$. 
21 ... \( \text{Wd5} \)

The point of Black's counterplay: after the forced exchange of queens the only open file will become a very important factor in his favour.

22 \( \text{Wxd5} \) \( \text{cxd5} \)
23 \( \text{g2} \) \( \text{Cc2} \)
24 \( \text{Hc1} \)

It is obviously of importance to eliminate one pair of rooks. If now 24...\( \text{Hxb2} \), White would secure a strong endgame advantage by means of 25 \( \text{Hc1} \)!. 

24 ... \( \text{Hfc8} \)
25 \( \text{Hxc2} \) \( \text{Hxc2} \)
26 \( \text{Hb1} \) \( \text{h7} \)

Black prepares to take advantage of the fact that the light squares in White's position are insufficiently protected. White's following moves show the only appropriate defence against this plan.

27 \( \text{g3} \) \( \text{g6} \)
28 f3 f6!

And not 28...\( \text{f5} \)? because of 29 e4+. Both sides, so far, are treating the difficult endgame in the correct manner.

29 gxf6 \( \text{xf6} \)
30 a4

Preparing to relieve the rook from the defence of the queenside pawns.

30 ... \( \text{f5} \)
31 a5 \( \text{He2} \) (D)

Black is threatening now (in the event of 32 b4 for instance) 32...g5! 33 hgx5 \( \text{Xg5} \) 34 \( \text{Xg5} \) \( \text{xf5} \) after which 35 f4+ \( \text{f5} \) 36 \( \text{f3} \) \( \text{h2} \) 37 \( \text{g1} \) \( \text{h3}+ \) 38 \( \text{g3} \) \( \text{xg3}+! \) would only lead to a drawn king and pawn ending.

32 \( \text{He1} \)

If White wants to play for a win he is compelled to give back (at least temporarily) the extra pawn. But a more efficient and, taking into consideration his two last moves, logical, method of doing it, was 32 a6! After 32...bxa6 (32...b6 33 \( \text{b8} \) \( \text{h6} \)) the reply 33 \( \text{xa1} \) ! would have prevented 33...g5 because of 34 hgx5 \( \text{Xg5} \) 35 e4+!, while after 33...\( \text{b2} \) 34 \( \text{x6} \) \( \text{b7} \) 35 \( \text{a5} \) White's positional advantage would become decisive. After the move selected, Black will be able to put up a long and not altogether hopeless resistance.

32 ... \( \text{Hxb2} \)
33 \( \text{Cc5} \) \( \text{e6} \)
34 e4 \( \text{Cxd4} \)

Here, as on several future occasions in this game, Black could have played differently, but it is doubtful if it would have altered the final result. If, for instance, 34...dxe4, then 35 d5+ \( \text{f5} \) 36 d6+ \( \text{e6} \) 37 fxe4 \( \text{h3}+ \) 38 \( \text{g2} \) \( \text{xh4} \) 39 \( \text{xh5} \) followed by 40 \( \text{h7} \) and Black's fight against the central passed pawns would prove extremely difficult.

35 \( \text{Xxd5} \) \( \text{c3} \)
By playing 35...f2+ 36 h3 f3 37 e5+ f7 he could temporarily save the pawn, but his position after 38 g5! would still look very compromised.

36 xh5 a6

If 36...e1+ 37 h3 f2 then 38 e5+! followed by 39 f5+, or 39 d5+ and d3, maintaining the plus pawn.

37 c7 e1+

Or 37...b5 38 g5!.

38 g4 g2+

39 h3

Of course not 39 f4 d2#!

39 g4 f2

40 g4 g2+

41 h3 f2

42 f4! f3+

43 g2

Another method of suicide could have occurred here: 43 g4 g3#.

43 f2+

44 h3 f3+

45 g2 f2+

46 g1 (D)

46 c2

47 b6 c4

This facilitates White's task, as it enables his king to give effective support to the central pawns. Better was 47...g3 after which White would have tried to win by means of 48 e5+ d6 (48...f7 49 h5!) 49 g5.

48 g2!

By this move White at last obtains a clearly won position. It is obvious that after 48...x e4? 49 f3 Black would lose immediately.

48 g6

49 e5+ d7

50 h5! gxh5

51 f3 h4

51...c3+ 52 e2 g3 53 e3 h4 54 h5, would not be any better.

52 h5 c3+

53 g4 c4

54 f5!

Apparently falling into the trap, but in reality selecting the surest and quickest way to make use of the passed pawns.

54 x a5

55 h7+

Of course not 55 x a5 c5+ 56 g4? because of the reply 56...x h5 followed by 57...h3 winning.

55 c6

56 x a5 c5+

57 e6! x a5

58 f5 a3

59 f6 f3

---

1 I find this hard to believe; after 38...b5! Black obtains a passed pawn on the queenside, which should provide enough counterplay to draw.
60  f7  b5
61  h5!
The neat final point of this colourful ending.
61  ...  h3
62  f5  xf5
63  exf5  1-0
As if now 63...h2 64 f8  h1  wins.

Game 54
Alekhine – Capablanca
Buenos Aires Wch (34) 1927
Queen’s Gambit Declined

1  d4  d5
2  c4  e6
3  c3  f6
4  g5  bd7
5  e3  c6
6  a3

The main object of this quiet move is to avoid the Cambridge Springs Defence, but it should hardly promise White more than a comfortable equality. I selected it here merely in order to leave book variations as rapidly as possible.

6  ...  e7
7  f3  0-0
8  d3  dxc4

A sound alternative was 8...h6 9  h4 c5.
9  xc4  d5
10  xe7  xe7
Another possibility was the simplifying 10...xc3.
11  e4  f6
12  g3  c5
12...b6 followed by ...b7, as played by Maroczy against me at San Remo in 1930, is worth consideration. The text manoeuvre has the slight drawback of not yet solving the problem of developing the e8-bishop.

13  0-0  b6
14  a2  cxd4
15  xd4  g6
In order to be able to answer e4 by ...e5 without ceding the square f5 to the white knights.

16  c1
Threatening eventually to play  b5.

16  ...
17  e2  ac8
18  e5 (D)

[Diagram]

19  f3  g7
Black should here exchange both rooks, as after 19...xc1 20 xc1 xc8 21 xc8+ xc8 the move 22 g5 could have been sufficiently met by 22...e8. The text move, and especially the next one, suddenly brings his position into danger.

20  h3  h6?
21  d2!
This harmless-looking move is in reality very hard to meet. White’s
main threat is 22 \( \text{Wa5} \), and if Black should try to parry this by 21...\( \text{Ac6} \) (or 21...\( \text{Ab5} \)), then an unexpected diversion on the kingside would lead to a rapid end: 22 \( \text{Qh4!} \) \( \text{Qxe4} \) (22...\( \text{Qxe4} \) 23 \( \text{We3!} \) or 22...\( \text{Qd7} \) 23 \( \text{Wa5} \)) 23 \( \text{Qh5+} \) \( \text{gxh5} \) 24 \( \text{Qxf5+} \) \( \text{Qf6} \) 25 \( \text{Qxh6+} \) \( \text{Qxf5} \) 26 g4#!

The only move which offers some chance of a successful defence is that suggested by Dr. Lasker, 21...\( \text{Qa4!} \). In that case, White would simply strengthen his position—for instance, by means of 22 \( \text{Qfd1} \).

21 ...

\( \text{Ke6?} \)

The position has proved too difficult for Black; he now loses a pawn and, after a desperate struggle, the game and the match. The following sharp combinations, as well as the subsequent queen and rook ending, are both exciting and instructive.

22 \( \text{Qxe6} \) \( \text{Qxe6} \)
23 \( \text{Wa5} \) \( \text{Qc4} \)
Or 23...\( \text{Qb3} \) 24 \( \text{Qxe5} \) \( \text{Qc4} \) 25 \( \text{Qd4} \).±

24 \( \text{Wxa7} \) \( \text{Qxb2} \)
25 \( \text{Qxc8} \) \( \text{Qxc8} \)
26 \( \text{Qxb7} \) \( \text{Qc4} \)
27 \( \text{Qb4} \) \( \text{Qa8} \)
28 \( \text{Qa1} \) \( \text{Qc6!} \)

Threatening to blockade the a-pawn by 29...\( \text{Qa4} \), and also (at least apparently) to win the e-pawn. But White's next two moves put the situation in a true light.

29 \( \text{a4!} \) \( \text{Qxe4} \)
30 \( \text{Qe5} \)

Thus White avoids the pitfall 30 \( \text{Qxe4} \) \( \text{Qxe4} \) 31 \( \text{Qxc1} \) \( \text{Qc8} \) 32 \( \text{Qxe5}?! \)
\( \text{Qe3!} \) 33 \( \text{Qxe4} \) \( \text{Qxc1} \)+ 34 \( \text{Qh2} \) \( \text{Qf1}+ 

followed by ...\( \text{Qg3+} \) and ...\( \text{Qxe4} \), after which Black would even win.

30 ...

\( \text{Qd6!} \)

In the circumstances comparatively best, as both pairs of knights will soon disappear from the board.

31 \( \text{Qxc4} \) \( \text{Qxe5} \)
32 \( \text{Qe1} \) \( \text{Qd6} \)
33 \( \text{Qc1!} \) \( \text{Qf6} \)
34 \( \text{Qe4} \) \( \text{Qxe4} \)
35 \( \text{Qxe4} (D) \)

![Chess Board Diagram]

The winning procedure which follows is a rather elaborate one, and consists of combining threats using the passed pawn with an attack against the somewhat exposed black king. First and foremost, White will succeed in controlling the important diagonal, a1-h8.

35 ...

\( \text{Qb8} \)
36 \( \text{Qe2} \) \( \text{Qa8} \)
37 \( \text{Qa2} \) \( \text{Qa5} \)
38 \( \text{Qc7!} \) \( \text{Qa6} \)

Obviously, the only way to prevent the advance of White's passed pawn.

39 \( \text{Qc3+} \) \( \text{Qh7} \)
40 \( \text{Qd2} \)

With the deadly threat 41 \( \text{Qd8} \).
40 ... \( \text{wb6} \)
41 \( \text{Ed7} \)

The sealed move. Black's next manoeuvres offer the only chance, if not to save the game, at least to permit a longer resistance.
41 ... \( \text{wb1}+ \)
42 \( \text{h2} \) \( \text{wb8}+ \)
43 g3 \( \text{Ef5} \)
44 \( \text{d4} \)

Threatening 45 a5! followed by \( \text{d8} \).
44 ... \( \text{we8} \)
45 \( \text{Ed5} \) \( \text{Ef3} \)

The queen ending would be, of course, tantamount to resignation.
46 \( \text{h4} \)

White does not need to stop the black queen's following manoeuvre, which finally leads to an easily won rook ending.
46 ... \( \text{h8} \)
47 \( \text{b6}! \)

At this moment the exchange would be premature, as it would allow Black to bring his rook behind the passed pawn.
47 ... \( \text{a1} \)
48 \( \text{g2} \) \( \text{f6} \)

If 48...\( \text{a3} \), then White wins as follows: 49 \( \text{d7} \) \( \text{g8} \) (49...\( \text{g7} \) 50 \( \text{e6}! \) or 49...\( \text{a2} \) 50 \( \text{f6} \) 50 \( \text{d8}+ \) \( \text{g7} \) 51 \( \text{e7} \) \( \text{a2} \) 52 \( \text{e5}+ \) \( \text{h7} \) 53 \( \text{f6} \).
49 \( \text{d4} \)

Now the right moment to exchange has come, as it is the white rook that will get behind the passed pawn.
49 ... \( \text{x} \) \( \text{xd4} \)
50 \( \text{xd4} \) \( \text{g7} \)

Instead 50...\( \text{a6} \) would have lost immediately after 51 \( \text{f3} \) followed by \( \text{e4-d5} \).
51 a5 \( \text{a6} \)
52 \( \text{d5} \) \( \text{f6} \)
53 \( \text{d4} \) \( \text{a6} \)
54 \( \text{a4} \) \( \text{f6} \)
55 \( \text{f3} \) \( \text{e5} \)
56 \( \text{e3} \) \( \text{h5} \)
57 \( \text{d3} \) \( \text{d5} \)
58 \( \text{c3} \) \( \text{c5} \)
59 \( \text{a2} \) \( \text{b5} \)
60 \( \text{b3} \)

White makes use of every opportunity, by repetition of moves, to gain time with the clock, so as to avoid a slip just before the capture of the title.
60 ... \( \text{c5} \)
61 \( \text{c3} \) \( \text{b5} \)
62 \( \text{d4} \)

If now 62...\( \text{b4} \), then White plays 63 \( \text{a1}! \).
62 ... \( \text{d6}+ \)
63 \( \text{e5} \) \( \text{e6}+ \)
64 \( \text{f4} \) \( \text{a6} \)
65 \( \text{g5} \) \( \text{e5}+ \)
66 \( \text{h6} \) \( \text{f5} \) \( D \)

\[ \text{W} \]

\[ \text{B} \]
The simplest method to force capitulation was 67 \( \text{g7} \) \( \text{f3} \) 68 \( \text{g8} \) \( \text{xf6} \) 69 \( \text{f3} \) (or 69...\( \text{xf5} \) 70 f4) 70 \( \text{g7} \) \( \text{f5} \) 71 f4.

67 ... \( \text{c5}! \)
68 \( \text{a3} \) \( \text{c7} \)
69 \( \text{g7} \) \( \text{d7} \)
70 f5

Another inexact move. A more direct way was first 70 \( \text{f6} \) and only after 70...\( \text{c7} \), 71 f5 gxf5 72 \( \text{xf5} \) \( \text{c5}+ \) 73 \( \text{f6} \) \( \text{c7} \) 74 \( \text{f3} \) \( \text{xa5} \) 75 \( \text{f5}+ \) and wins.

70 ... gxf5
71 \( \text{h6} \) f4
72 gxf4 \( \text{d5} \)
73 \( \text{g7} \) \( \text{f5} \)
74 \( \text{a4} \) \( \text{b5} \)
75 \( \text{e4}! \) \( \text{a6} \)
76 \( \text{h6} \) \( \text{xa5} \)

Alternatively, 76...\( \text{b7} \) 77 \( \text{e5} \) \( \text{xf4} \) 78 \( \text{g5}! \) \( \text{f1} \) 79 \( \text{hxh5} \) f5 80 \( \text{g5} \) f4 81 \( \text{f5} \) f3 82 \( \text{g4} \) and White wins.

77 \( \text{e5} \) \( \text{a1} \)
78 \( \text{hxh5} \) \( \text{g1} \)
79 \( \text{g5} \) \( \text{h1} \)
80 \( \text{f5} \) \( \text{b6} \)
81 \( \text{xf7} \) \( \text{c6} \)
82 \( \text{e7} \) 1-0

Here White can obtain control of e4 by playing 5 \( \text{c2} \), but in that case Black would select another system: 5...\( \text{xd2}+ \) 6 \( \text{bxd2} \) d6 followed by ...e5.

5 ... b6
6 \( \text{d3} \) \( \text{b7} \)
7 \( \text{c2} \) \( \text{xd2}+ \)

In order to advance a pawn to the centre and thus indirectly prevent White’s e4.

8 \( \text{bxd2} \) c5
If now 9 e4, then 9...\( \text{c6} \) \( \mp \).
9 0-0 \( \text{c6} \)
10 a3 0-0
11 \( \text{ad1} \) g6

Preventing d5, which, especially after White’s last rook move, could eventually be disagreeable.

12 \( \text{f1} \)

A refined preparation for \( \text{e4} \), which at this moment would not be satisfactory because of 12...\( \text{xe4} \) 13 \( \text{xe4} \) d5! 14 cxd5 exd5 15 \( \text{xd5} \) \( \text{xd4} \) \( \mp \).

12 ... \( \text{a1} \)
13 \( \text{e4} \) \( \text{d8} \) (D)

13...\( \text{f8} \) was technically simpler since after 14 d5 exd5 White himself would have been obliged to exchange knights. But the move selected is at least good enough to maintain the balance of position.

14 d5

Very bold and quite in Marshall’s style; he cedes Black a queenside pawn majority without getting any real compensation elsewhere, since his pieces are not sufficiently co-ordinated to support an effective action in the centre. One must admit,
however, that White’s position, owing to the elasticity of Black’s pawn-structure, was already slightly inferior. Black threatened—after some further preparation, such as ...d6—to start an action on the c-file by ...cxd4 followed by ...a5.

14 ... exd5
15 cxd5! e4

15...exd5 would have had unfortunate consequences, e.g. 16 c4 d4 17 c3! xe4 18 xf7+ f8 19 axb4 ±.

16 xe4 a5

Of course not 16...e5 because of 17 d6.

17 d2

Black threatened 17...f5.

17 ... c4!

Profiting by the fact that d5-d6 is still not good. It becomes obvious that the transaction initiated by White’s 14th move was rather favourable to his opponent.

18 f3 e5

Threatening 19...c3.

19 e4 d6

Black could also prevent the following rook move by 19...b3, after which White would have hardly anything better than 20 c3, but he did not think this was necessary since, owing to his advantage in space, the middlegame complications should normally end to his advantage.

20 d4

It would not be like Marshall to exchange queens by 20 c3 in order to obtain a distinctly inferior endgame. Looking at this rook one cannot believe that, in the prime of its existence, it intends to commit suicide soon—and yet it is so!

20 ... b5

Now threatening to continue with 21 b3.

21 d2 a6

In order to leave a square for the knight in case of c3.

22 e4 g7

23 e7

The road to death.

23 ... b7! (D)

24 e4

Most probably a difficult decision—but under the circumstances the wisest course, for the alternative 24 g4 c5! (24...c3 25 xc8 cxd2
26 ²d1 ±) 25 e4² ½f6 26 ²d7 ²xd7 27 ²xd7 ²e7 (threatening ...²xd5) 28 ³c6 ²a5 would lead to material losses without any hope of a counter-attack.

24 ... ²f8!

A mistake would be 24...²f8 25 ³f6+ ³g7 because of 26 ²c3, with advantage for White.

25 ³xb7 ³xb7 26 ²d1

Although Black is now a clear exchange ahead and his queenside majority is as threatening as ever, the win is by no means as easy or as rapid as one would imagine. White is in a position—in case of 26...²e5, for instance—to build a good defensive position with possibilities of a pawn counter-attack on the kingside by means of 27 ³c3 a6 28 ³d4. Still, by that line Black, with further circumspection and patience, would most likely have increased his advantage in a decisive way, without having to suffer from the melodramatic complications arising from his risky next move.

26 ... a5?

Preventing 27 ³c3 (because of 27...b4) and looking for a quick victory. From now on, Marshall takes advantage of the hidden possibilities of his position in a really remarkable fashion, reminding one of his most glorious performances.

27 ³g4! ²c7

Of course not 27...f5 because of 28 ³g5 but also not, for instance, 27...²a8, because of 28 a4!.

28 ²d2!

After this the situation begins to look dangerous for Black, since the a-pawn cannot be defended in a direct way.

28 ... h6!

This is the temporary salvation, for by preventing ³g5 Black threatens 29...f5.

29 ³f3 ²c8

And after this 30 ²xa5 can be simply answered by 30...²xb2.

30 h4!

The next attacking wave, which Black tries to meet in an equally energetic way.

30 ... ²e5

If instead, 30...f5 then 31 ³c3 b4 32 axb4 axb4 33 ³e2 c3 34 bxc3 bxc3 35 ²c2 followed by the promising manoeuvre ³d4 (or ³f4)-e6.

31 h5! ³xh5

Also after 31...g5 32 g4 followed by ³g3-f5, or ³g2 and f4, Black’s defence would remain difficult.

32 ³g3 c3

33 bxc3 ²xc3

33...²xc3 would be met by 34 e4!.

34 ²e2 b4

35 axb4 axb4

At last Black has succeeded in obtaining the ‘winning’ passed pawn, but in the meantime the white forces have been concentrating against the

---

¹ White has a forced win here by 25 ³e6! ²f8 26 ³e4, so Black should have met 24 ³g4 by 24...²f6!, with a roughly equal position.
hostile king, which can be defended only by the queen, the other black pieces being, at the moment, simply onlookers.

36 $\text{Ka4!}$ (D)

Covering the diagonal b1-h7 and opening prospects to the queen. In this second half of the game Marshall always finds the best moves, and he is somewhat unlucky that Black’s resources finally prove sufficient to meet his furious assault.

36 ... $\text{Kae5!}$

Hereafter begins a very difficult queen manoeuvre, whose object is to provoke white pawn moves so as to enable at least one rook to participate in a counter-attack.

37 $\text{f4}$ $\text{Kf6}$

Otherwise White plays 38 $\text{Kxh5}$ with tempo.

38 $\text{Kxh5}$ $\text{Kg4!}$

And not 38...$\text{Kae7}$ 39 $\text{Kb2!} \text{Kxe4}$ 40 $\text{Kah8+} \text{Kf7}$ 41 $\text{Kf6+} \text{Ke8}$ 42 $\text{Kxh8+} \text{Kd7}$ 43 $\text{Kf6+}$ followed by 44 $\text{Kxd8+}$ and $\text{Kxe4}$.

39 $\text{g3}$

The weakening of the second rank will finally prove fatal—but if 39 $\text{Kf3}$ the response 39...$\text{Kae7}$ would now offer an adequate defence, since 40 $\text{Kb2}$ is met by 40...$\text{Kxe3+}$.

39 ... $\text{Kh3!}$

Possible and good because 40 $\text{Kg2}$ can be met by 40...$\text{Kd6!}$.

40 $\text{Kf3!} \quad \text{Kc3!}$ (D)

An unexpected defence against White’s two main threats (41 $\text{Kg4}$ and 41 $\text{Kb2}$) and one that involves, in the first case, an eventual sacrifice of two exchanges: to 41 $\text{Kg4}$ Black would reply 41...$\text{Kxe3!}$ 42 $\text{Kxe3}$ $\text{Kxg4}$ 43 $\text{Kxe1}$ $\text{Kxh5!}$ 44 $\text{Kae7+} \text{Kg7}$ 45 $\text{Kxd8}$ (or 45 $\text{Kxb7} \text{Kf3}$ and wins) 45...$\text{Kxd5}$ winning. With his next move the then American Champion plays out a new trump, which, however, will prove the last.

41 $\text{Kd2!}$

How now to meet the threat 42 $\text{Kd4}$ without losing the passed pawn? My lucky star—or Marshall’s unlucky one—helped me to find the right answer—but it took no less than half an hour.

41 ... $\text{Ke8!}$

The value of this sealed rejoinder is well illustrated by comparing its
consequences with the possible results of another plausible move: 41...\textit{a}6 42 \textit{d}4 \textit{c}2! 43 \textit{h}8+ \textit{e}7 44 \textit{f}6+ \textit{d}7 (44...\textit{e}8 45 \textit{g}7+) 45 \textit{x}f7+ \textit{c}8 46 \textit{e}6+ \textit{x}e6 47 \textit{d}xe6 b3 48 \textit{e}4 and, to say the least, White would not lose.

42 \textit{d}4

Instead 42 \textit{b}2 would not help either, because of 42...\textit{a}6.

42 ... \textit{c}2

43 \textit{d}2

Simplification is nearly always sad for the materially weaker party, but there was no choice, as is shown by the variation 43 \textit{h}8+ \textit{e}7 44 \textit{f}6+ \textit{d}7 45 \textit{g}4+! \textit{x}g4 46 \textit{x}f7+ \textit{d}8 47 \textit{x}e8+ \textit{x}e8 48 \textit{f}6+ \textit{e}7 49 \textit{x}g4 b3 and wins.

43 ... \textit{xd}2

44 \textit{xd}2 \textit{a}6!

45 \textit{e}1

Practically resignation. Almost an hour's reflection persuaded Marshall that the intended 45 \textit{x}b4 leads to a forced loss as follows: 45...\textit{f}1+ 46 \textit{h}2 \textit{f}2+! (but not 46...\textit{x}f3 47 \textit{x}d6+ \textit{g}8 48 \textit{f}6+ \textit{h}8 49 \textit{xa}6! and Black would not win) 47 \textit{h}3 (or 47 \textit{g}2 \textit{f}1 48 \textit{xd}6+ \textit{g}8 49 \textit{f}6+ \textit{h}8 and wins) 47...\textit{c}8+ 48 \textit{g}4 \textit{yg}4+ 49 \textit{yg}4 \textit{we}2+ 50 \textit{h}4 \textit{wh}2+ 51 \textit{g}4 \textit{f}5+ and wins.

45 ... \textit{b}3

The passed pawn's holiday!

46 \textit{d}1 \textit{b}2

47 \textit{b}4

Leads to a similar finish to that mentioned above.

47 ... \textit{f}1+

48 \textit{h}2 \textit{f}2+

49 \textit{h}3 \textit{c}8+

50 \textit{f}5 \textit{xf}5+

51 \textit{g}4 \textit{yg}4+

52 \textit{yg}4 \textit{we}2+

53 \textit{h}4 \textit{wh}2+

54 \textit{g}4 \textit{f}5+

0-1

In this kind of game the loser certainly deserves as much credit as the winner.

Game 56

\textit{Alekhine – Steiner}

\textit{Bradley-Beach 1929}

Brilliancy Prize

Queen's Gambit Accepted

1 \textit{d}4 \textit{d}5

2 \textit{c}4 \textit{dxc}4

3 \textit{xf}3 \textit{xf}6

4 \textit{e}3 \textit{e}6

5 \textit{xc}4 \textit{c}5

6 0-0 \textit{a}6

7 \textit{we}2 \textit{bd}7

If 7...\textit{xc}6, the best answer according to the latest practice (Euwe-Alekhine, 5th match-game, 1937, and Alekhine-Bööck, Margate 1938) would still be 8 \textit{xc}3!.

8 \textit{xc}3 \textit{wc}7

If Black did not want to risk the 'fianchetto' development which, in fact, is hardly recommendable, (for instance, 8...\textit{b}5 9 \textit{b}3 \textit{b}7 10 \textit{d}1 \textit{e}7 11 \textit{e}4! \textit{b}4 12 \textit{e}5 \textit{bxc}3 13 \textit{exf}6 5, as in the game Alekhine-Letelier, Montevideo 1938), he should simply play 8...\textit{e}7, since the position of the queen on c7, in case of the following d-pawn advance, will prove a very unfortunate one.
9 d5! exd5
10 ëxd5

One of Black's troubles will consist of the fact that if he exchanges this bishop, White would always recapture with tempo.

10 ... ëd6
11 e4 0-0
12 ëg5 ëg4

In order to develop his queenside pieces, Black is forced to lose time with this knight, and, moreover, facilitate the dangerous advance of White's f-pawn.

13 h3 ëge5 (D)

Because of Black's last move, White is permitted to effect this advance in spite of the possible defence 19...g6 20 ëh6 ëf8 — and this because of the following combination: 19...g6 20 ëxg6!! hxg6 (or 20...ëxg6 21 ëxf7+! ëxf7 22 ëxh7+ ëe6 23 ëxg6 and wins) 21 ëxf7+! ëxf7 22 ëxe6+ ëe6 (or 22...ëg8 23 ëf8+ ëxf8 24 ëxf8+ ëxf8 25 ëh8+ ëf7 26 ëh7+, winning the queen) 23 ëf6+ ëxe7 (or...

14 ëh4!

In view of Black's cramped position the right policy is to avoid exchanges. Besides, Black is now forced to prevent the move ëf5, and consequently has even less choice than before.

14 ... ëb6
15 f4 ëc6
16 f5!

A paradoxical, but most effective, continuation of the attack, by which White 'sacrifices' the central square e5. Instead, the 'natural' advance 16 e5 would have left White—strange as it may seem—with but an insignificant positional advantage after 16...ëe7.

16 ... ëe5
17 ëh5 ëe8

Parrying the threat 18 f6 which now would be met by 18...g6 19 ëh6 ëf8.

18 ëf4 ëe7

This will be refuted by a pretty combination, but, as Black was still unable to take the powerful bishop (18...ëxd5? loses to 19 ëxd5 ëc6 20 ëf6+ ëxf6 21 ëxf6) there was no longer an adequate defence.

19 f6! (D)
23...\(\text{d}d7\) 24 \(\text{d}d1+\) 24 \(\text{w}h7+\) \(\text{d}d8\) 25 \(\text{d}d6\#.

After the following retreat, which permits the opening of the f-file, the game is also practically over.

19 ... \(\text{f}8\)
20 \(\text{f}xg7\) \(\text{g}xg7\)
21 \(\text{a}af1\) \(\text{e}6\)
22 \(\text{d}f5\)

Threatening also \(\text{h}4\).

22 ... \(\text{d}xd5\)
23 \(\text{d}xg7!\) \(\text{g}6\)
24 \(\text{d}xe8\) \(\text{xe}8\)
25 \(\text{d}xd5\) 1-0

Game 57
Alekhine – Bogoljubow
Wiesbaden Wch (1) 1929
Slav Defence

1 \(\text{d}4\) \(\text{d}5\)
2 \(\text{c}4\) \(\text{c}6\)
3 \(\text{f}3\) \(\text{f}6\)
4 \(\text{c}3\) \(\text{d}xc4\)
5 \(\text{a}4\) \(\text{e}6\)

It has been my peculiar luck that this illogical move, instead of the natural 5...\(\text{f}5\), has been adopted against me, with a disastrous effect, no less than four times, namely (besides the present game) by Bogoljubow again (Nottingham 1936), by Dr. Euwe (19th match-game, 1935), and by the late German master, Helling, in Dresden 1936.

6 \(\text{e}4\) \(\text{b}4\)
7 \(\text{e}5\) \(\text{d}5\)

In the three other games mentioned the reply was 7...\(\text{e}4\) which is at least as bad as the text move.

8 \(\text{d}2\) \(\text{xc}3\)

If, instead, 8...b5 then 9 \(\text{e}4\) \(\text{e}7\) 10 \(\text{b}3!\), winning back the pawn with decidedly the better position.

9 \(\text{b}xc3\) \(\text{b}5\)
10 \(\text{g}5!\)

An important move with many objects, one of which, and not the least important, is to prevent Black’s 10...0-0, because of the answer 11 \(\text{b}1!\) followed by 12 axb5 ±.

10 ... \(\text{f}6\)

Prevents the manoeuvre \(\text{e}4\)-\(d6+\), but at the cost of seriously compromising Black’s central position.

11 \(\text{exf6}\) \(\text{xf6}\)

Or 11...\(\text{xf6}\) 12 axb5 cxb5 13 \(\text{e}4\) \(\text{e}7\) 14 \(\text{g}5\), followed by \(\text{h}5+\) ±.

12 \(\text{e}2\) \(\text{a}6\)
12...0-0 13 axb5 h6 (if 13...cxb5, then 14 \(\text{f}3\) \(\text{d}5\) 15 \(\text{b}1\) 14 \(\text{b}6!\) \(\text{xb}6\) 15 \(\text{f}3\) would prove positionally hopeless in the long run.

13 \(\text{f}3!\) (D)

With the threat 14 axb5, which is by no means easy to parry. If, for instance, 13...\(\text{d}5\), then 14 \(\text{b}1!\) \(g6\) 15 \(\text{x}h7\) \(\text{x}h7\) 16 \(\text{x}g6+\) \(\text{f}7\) 17 \(\text{h}5\) followed by 18 \(\text{g}8+\) and wins.
Or 13...a7 14 f4 b7 15 axb5 axb5 16 a8, also with a winning attack.

13 ... h6

Already mere desperation.

14 h5+ xh5
15 xh5+ d7
16 f7 e8
17 g6 g8
18 f4 h7

Or 18 xf8 19 e5+ d8 20 c4.

19 g3 e7
20 d6+

A bit of cat-and-mouse play.

20 ... d7
21 0-0 c5
22 dxc5 d5
23 axb5 axb5
24 xxa8 xa8
25 a1 c6
26 e5+ 1-0

Since if now 26...xe5 27 a7+ c6, then 28 e4#.

A simple and good move, but by making it here (and in the third match game, in which I adopted the less logical answer 7 f3), Bogoljubow, as the following shows, did not fully understand its real value.

7 g5 e7

Decidedly too passive: the right continuation is 7 b4 (introduced by me in a consultation game, played against Bogoljubow and Dr. Seitz immediately after the match) 8 f3 h6! (as in my eleventh match game against Dr. Euwe, Groningen 1937) obtaining at least an even game.

8 f3 h6
9 e4!

This move, which, in the position with Black’s king’s bishop at b4 would have been met by 9...hxg5 10 exf5 b5! 11 fxe6 fxe6 12 c2 0-0! f3, in the actual position virtually shuts out Black’s light-squared bishop for the rest of the game.

9 ... h7

Or 9...hxg5 10 exf5 exf5 11 xc4 0-0 12 h4!, with advantage to White.

10 e3 bd7
11 xc4 0-0
12 e2 c5

The following exchanges are decidedly in White’s favour as they do not eliminate the main defect of Black’s position—the awkward position of his light-squared bishop.

13 dxc5 xc5

Game 58
Alekhine – Bogoljubow
Wiesbaden Wch (5) 1929
Slav Defence

1 d4 d5
2 c4 c6
3 f3 f6
4 c3 dxc4
5 a4 f5
6 e5 e6

1 This allows some sort of defence by 16...d5, so 16 xb8 xb8 17 xc6+ (17...d7 18 xe6 e7 19 xd7+ xd7 20 0-0 wins) 18 e2 is stronger, with a massive advantage for White.
14 $\textit{\text{a}}$xc5 $\textit{\text{d}}$xc5
15 b4 $\textit{\text{c}}$c6

15...$\textit{\text{w}}$xd1+ was also unsatisfactory after 16 $\textit{\text{w}}$xd1 $\textit{\text{d}}$xa4 17 $\textit{\text{d}}$xa4 b5 18 $\textit{\text{c}}$cb6! axb6 19 $\textit{\text{a}}$xb5 with advantage to White.

16 $\textit{\text{w}}$xd8 $\textit{\text{e}}$fxd8 (D)

17 $\textit{\text{d}}$a2!

The only way to keep the positional advantage, as 17 b5 would cede the important square c5, and 17 $\textit{\text{a}}$b1 would have permitted Black a promising counter-attack starting by 17...$\textit{\text{d}}$d5!.

17 ... $\textit{\text{d}}$b8

White threatened 18 $\textit{\text{e}}$a5 $\textit{\text{a}}$ab8 19 $\textit{\text{a}}$xb7.

18 $\textit{\text{f}}$f2 $\textit{\text{c}}$c6
19 $\textit{\text{h}}$hd1 $\textit{\text{d}}$d4

Instead, 19...$\textit{\text{w}}$xd1 20 $\textit{\text{w}}$xd1 $\textit{\text{w}}$d8 would have been rapidly fatal: 21 b5 $\textit{\text{w}}$xd1 22 $\textit{\text{w}}$xd1 $\textit{\text{d}}$d8 23 $\textit{\text{d}}$d6, followed by 24 $\textit{\text{e}}$b4 and 25 $\textit{\text{c}}$c8!.

20 $\textit{\text{a}}$ac1 $\textit{\text{f}}$f8

The first step towards the emancipation of the h7-bishop by means of ...$\textit{\text{g}}$g8, ...$\textit{\text{e}}$e8, ...$\textit{\text{f}}$6, etc. But this plan will obviously take a long time, which White will use for a decisive strengthening of his pressure on the queenside. From now on the game develops in a perfectly logical manner.

21 $\textit{\text{a}}$f1 $\textit{\text{e}}$e8
22 $\textit{\text{c}}$c3

A strong alternative here was 22 $\textit{\text{d}}$a5, for instance 22...$\textit{\text{a}}$ab8 23 $\textit{\text{c}}$c3 b6 24 $\textit{\text{w}}$xd4! $\textit{\text{a}}$xd4 25 $\textit{\text{c}}$c6 $\textit{\text{a}}$bd8 26 $\textit{\text{e}}$e3 $\textit{\text{a}}$4d6 27 $\textit{\text{d}}$xd8 $\textit{\text{w}}$xd8 28 $\textit{\text{b}}$b5 or 22...b6 23 $\textit{\text{d}}$b7 $\textit{\text{a}}$d7 24 $\textit{\text{b}}$b5! $\textit{\text{w}}$xb7 25 $\textit{\text{w}}$xd4, with a tremendous positional advantage in both cases.

22 ... f6
23 $\textit{\text{d}}$a5 $\textit{\text{a}}$ab8 (D)

This natural-looking reply gives White the opportunity for the following combination, which wins a pawn straight away. Better was 23...b6 24 $\textit{\text{d}}$b7 $\textit{\text{a}}$d7 25 $\textit{\text{b}}$b5 $\textit{\text{a}}$xb7 26 $\textit{\text{w}}$xd4 $\textit{\text{c}}$c7 27 $\textit{\text{e}}$e2 $\textit{\text{a}}$xc1 28 $\textit{\text{d}}$xc1 $\textit{\text{a}}$c8 29 $\textit{\text{d}}$d3, with some possibilities of defence in spite of White's indisputable advantage.

24 $\textit{\text{b}}$b5!

Eliminating the enemy's central knight just at the right moment: if Black could have found time for a further consolidation by means of
...e5, there would be very little left of White's pressure on the queenside.

24 ... $\boxtimes_{xb5}$

Obviously forced.

25 $\boxtimes_{xd8}$ $\boxtimes_{xd8}$
26 $\boxtimes_{xb7}!$ $\boxtimes_{b8}$

Or 26...$\boxtimes_{d2}$+ 27 $\boxtimes_{e3}$ $\boxtimes_{bd6}$ 28 $\boxtimes_{xd2}$ $\boxtimes_{xb7}$ 29 $\boxtimes_{c8}$, followed by 30 $\boxtimes_{a8}$ and $\boxtimes_{xa7}$, winning.

27 $\boxtimes_{c5}$ $\boxtimes_{e7}$

Because of the threat 28 $\boxtimes_{d7}+$ the knight was still unable to move. The following endgame, with an extra pawn and a far better position, is actually a walk-over for White.

28 axb5!

Much more effective than 28 $\boxtimes_{xb5}$ because now Black's a-pawn becomes extremely weak.

28 ... $\boxtimes_{d6}$
29 $\boxtimes_{a1}$ $\boxtimes_{c8}$
30 $\boxtimes_{c4}$ $\boxtimes_{g8}$

After 30...e5 White would win immediately by 31 $\boxtimes_{e6}$.

31 f4 $\boxtimes_{f7}$
32 e5

All Black's pieces will be gradually stalemated, and the white king will soon be in a position to pay a significant visit to the adversary's knight in its very residence.

32 ... fxe5
33 fxe5 $\boxtimes_{b6}$
34 $\boxtimes_{e3}$ $\boxtimes_{e8}$
35 $\boxtimes_{a3}$ $\boxtimes_{d7}$
36 $\boxtimes_{d4}$ $\boxtimes_{e8}$

Black has nothing left but to wait patiently for the execution.

37 h4 $\boxtimes_{d7}$
38 $\boxtimes_{e2}$ $\boxtimes_{b8}$
39 $\boxtimes_{xd7}$ $\boxtimes_{xd7}$

40 $\boxtimes_{f3}$!

Preventing the manoeuvre ...$\boxtimes_{b7}$-c7, which would allow Black to prolong the agony.

40 ... $\boxtimes_{b6}$
41 $\boxtimes_{c5}$ $\boxtimes_{b8}$
42 h5 $\boxtimes_{d8}$
43 $\boxtimes_{c6}$ $\boxtimes_{e7}$
44 $\boxtimes_{h3}$ $\boxtimes_{f7}$
45 $\boxtimes_{e4}$ $\boxtimes_{e7}$
46 $\boxtimes_{c6}$!

Now the enemy knight must perish.

46 ... $\boxtimes_{d8}$
47 $\boxtimes_{d3}+$ $\boxtimes_{e7}$
48 $\boxtimes_{c7}$ 1-0

Game 59

Bogoljubow – Alekhine

Wiesbaden Wch (8) 1929

Queen's Indian Defence

1 d4 $\boxtimes_{f6}$
2 c4 b6

Although this system of development is by no means easy to refute, it can hardly be considered absolutely correct as it allows White at an early stage of the game to get full control of the central squares; and the fact that Black can attack the pawn centre by means of ...c5 should not offer him full compensation for the lack of space he will have to suffer over the next 10-15 moves. Undoubtedly sounder is therefore 2...e6.

3 $\boxtimes_{c3}$ $\boxtimes_{b7}$
4 f3 d5
5 cxd5 $\boxtimes_{xd5}$
6 e4 $\boxtimes_{xc3}$
7 bxc3
White's position now looks rather promising, but he spoils it in a very few moves by adopting a totally wrong middlegame plan.
7 ... e6
8 b5+

Neither better nor worse than the immediate 8 d3, as Black's a6 will not prove weakening to his position.

8 ... cd7
9 ce2 ce7
10 0-0 a6
11 d3 c5
12 b2?

A really bad move which shows an entire misconception of the needs of the position. Instead, White had the choice between at least two good bishop moves—12 e3 and 12 f4. Also 12 a4 (in order to fix Black's slight weakness at b6) came into consideration. From now on Black gradually gets the initiative.

12 ... wc7
13 f4

This allows Black to win a couple of tempi by attacking the insufficiently protected central pawns. A lesser evil was 13 e5, temporarily restricting Black's knight.

13 ... cf6
14 cg3 h5! (D)

By his last aimless moves White has provoked an immediate kingside attack.

15 w2 e4
16 dh1 dh5
17 wg4

In spite of his previous indifferent play White probably could still have held the game if he had recognised his mistake at the 12th move and had returned his bishop to c1. The seemingly more aggressive move that White actually played, in reality relieves Black from the worry about his a-pawn, and thus permits him to castle queenside with an overpowering position.

17 ... 0-0-0
18 Rae1

If 18 f5 then 18...cf6 (19 w2c7 dh7), followed by 19...e5 with advantage.

18 ... wb8
19 f5

This attempt to blockade the centre proves unsuccessful as Black can secure strong diagonals for both his bishops. But the game was already strategically lost.

19 ... e5
20 d5 e4!

Securing the future of the e7-bishop.

21 title c2 c5+
22 title f2 g6!

And after this the b7-bishop will also develop a deadly activity on the diagonal c8-h3.
23 fxg6 \(\text{Adg8}
\)
24 \(\text{Ac1}
\)

A much too belated sign of remorse!

24 ... \(\text{Ac8}
\)
25 \(\text{Wf3}
\) \(\text{Xg6}
\)
26 \(\text{Ah1}
\)

White is anxious to save his queen (which Black threatened to win by 26...\(\text{Ag4}\)) and overlooks the following mating combination. However, his position was hopeless anyhow—if, for instance, 26 \(\text{Ae3}\) then 26...\(\text{Ax e3}\) 27 \(\text{Xxe3}\) \(\text{Df4}\) 28 g3 \(\text{hxg3}\) 29 hxg3 \(\text{f5}\) followed by 30...\(\text{Wh7}\) and mate\(^1\).

26 ... \(\text{Dg3+!}
\)
27 \(\text{hxg3}
\) \(\text{hxg3+}
\)
28 \(\text{Dh3}
\) \(\text{Axh3}
\)
29 \(\text{gxh3}
\) \(\text{Xxh3+}
\)
30 \(\text{Dg2}
\) \(\text{Xh2#}
\)

Game 60
Bogoljubow – Alekhine

*Amsterdam Wch (22) 1929*

Ruy Lopez

1 e4 e5
2 \(\text{Df3}\) \(\text{Dc6}\)
3 \(\text{Ab5}\) a6
4 \(\text{Aa4}\) d6
5 c3

The fashionable move here—especially after Keres's win against me in Margate 1937—is 5 c4. But for how long? Black seems to be able to obtain quite a satisfactory position by continuing 5...\(\text{Ad7}\) 6 \(\text{Dc3}\) \(\text{Df6}\) 7 d4 \(\text{Dxd4}\) 8 \(\text{Ax d7+}\) \(\text{Whxd7}\) 9 \(\text{Dxd4}\) exd4 10 \(\text{Whxd4}\) \(\text{De7}\) and ...0-0.

5 ... \(\text{Dd7}\)
6 d4 g6
7 \(\text{Dg5}\)

As the following shows, White has no means of exploiting the diagonal b3-g8, and, on the other hand, f7 will prove a suitable square for Black's g8-knight. It looks as though, after 5 c3, White's opening advantage is bound to vanish within a few moves and that, therefore, the usual 5 \(\text{Dxc6+}\) followed by 6 d4 offers him more fighting chances.

7 ... \(\text{f6}\)
8 \(\text{De3}\) \(\text{Dh6}\)
9 0-0 \(\text{Dg7}\)
10 h3

In order to prevent ...\(\text{Dg4}\) in case of \(\text{Dbd2}\).

10 ... \(\text{Df7}\)
11 \(\text{Dbd2}\) 0-0
12 dxe5

White rightly recognises that a further maintaining of the tension in the centre would be rather to Black's advantage, and aims at simplification. The problem of the defence has been solved in this game in quite a satisfactory way.

12 ... \(\text{dxe5}\)

Also 12...fxe5—hoping to exploit the f-file—could be played. White

\(^1\) After 30 exf5 \(\text{Wh7}\) 31 \(\text{Hb1}\), not only is there no mate, but Black has wrecked his own position. However, Alekhine's assessment can be vindicated by substituting 29...\(\text{We5}\) 30 \(\text{Fe1}\) \(\text{Ah3}\), threatening both 31...\(\text{Ag2}\) and 31...\(\text{Dg2}\).
would in that case probably try to bring a knight to d5 after the moves 13 \( \text{b3} \) h6 14 a4 followed by \( \text{f1, d2, e3} \), etc. I preferred the text move because of the tempting possibility of quickly attacking White's centre by means of ...f5.

13 \( \text{c5} \)

In order to provoke ...b6, which slightly weakens Black's queenside pawn structure.

13 ... \( \text{e8} \)
14 \( \text{b3} \) b6
15 \( \text{e3} \) \( \text{e7} \)
16 \( \text{e2} \)

Or 16 \( \text{d5} \) \( \text{ad8} \) 17 \( \text{e2} \) \( \text{b8} \), followed by ...\( \text{e6} \).

16 ... \( \text{d8} \) (D)

17 \( \text{d5} \)

Still playing for simplification, which Black cannot well avoid as 17...c6 would lose a pawn after 18 \( \text{xf7+} \) followed by 19 \( \text{xb6} \).

17 ... \( \text{c6} \)
18 \( \text{c4?} \)

But this is certainly not in accordance with the requirements of the position, as the pawn at d5 will become very weak after ...f5. 18 \( \text{xc6} \) \( \text{xc6} \)

19 \( \text{f1} \) was necessary, with only a slight advantage for Black because of the possibility (after due preparation) of ...f5.

18 ... \( \text{xd5} \)
19 \( \text{cx} \)

Even worse would be 19 exd5 f5.

19 ... \( \text{f5} \)
20 \( \text{c4} \) \( \text{b7} \)

Black is by no means in a hurry to play ...f4 as the combined threat of this advance and an eventual ...fxe4 will limit White's choice of moves much more than any direct action.

21 \( \text{ac1} \) \( \text{ad8}! \)

Deliberately allowing the following transaction, which only apparently relieves White of his troubles in the centre. Instead, 21...\( \text{ed8} \) would have left the queen unprotected and thus have allowed the counter-action 22 exf5 gxf5 23 \( \text{d4!} \) \( \text{xd5} \) 24 \( \text{fe1} \) e4 25 \( \text{xe7} \) \( \text{xe7} \) 26 \( \text{e3} \).

22 \( \text{d6} \) \( \text{bxd6} \)
23 \( \text{xd6} \) \( \text{xd6} \)
24 \( \text{xa6} \) \( \text{d7}! \)

An important intermediate move securing with tempo (the threat ...f4) control of the open file.

25 \( \text{c2} \) c5
26 \( \text{a4} \) f4! (D)

Now the time has come, as the following advance of the g-pawn will be connected with the formidable threat 28...g4 29 hxg4 \( \text{hg4} \), with a mating attack.

27 \( \text{d2} \) g5
28 \( \text{b5} \)

Although practically forced, this move actually brings but little help,
as, after the queen exchange proposed here, Black not only obtains a far superior endgame, but also a very rare case—considering the reduced material—of a direct attack against the enemy king.

28 ... \textit{xb}5
29 axb5 \textit{d}3!

Freesing the important square d6 for the knight.

30 \textit{a}1 \textit{d}6
31 \textit{a}6 \textit{b}8

If now 32 \textit{x}g5, then simply 32...\textit{f}6 33 \textit{f}3 \textit{xe}4, with sufficient positional advantage. And if 32 \textit{c}3, then 32...c4! 33 \textit{xd}3 \textit{cxd}3 34 \textit{a}3 \textit{xe}4 35 \textit{xd}3 \textit{a}8! 36 \textit{a}3 \textit{d}8, winning.

32 \textit{c}3

As useless as the rest.

32 ... \textit{xe}4
33 \textit{xe}5 \textit{xe}5
34 \textit{xe}5 \textit{d}1+
35 \textit{h}2 \textit{d}2! (D)

This sudden stroke, which threatens mate in three by 36...\textit{f}1+, should have won at least the exchange. But Bogoljubow, as so often, prefers suicide to a long agony.

36 h4 \textit{e}8

37 \textit{f}3

Or 37 \textit{g}4 \textit{ee}1 38 \textit{h}3 \textit{h}1+ 39 \textit{h}2 h5! 40 hxg5 \textit{f}1 followed by mate.

37 ... \textit{xf}3+
38 gxf3 \textit{ee}1
39 \textit{h}3 h5!

0-1

Game 61

Alekhine – Nimzowitsch

San Remo 1930

French Defence

1 e4 e6
2 d4 d5
3 \textit{c}3 \textit{b}4
4 e5 c5
5 \textit{d}2

This rather tame move, in connection with the following knight manoeuvre, should not cause Black much trouble. A more promising idea—perhaps only because less explored—seems to be 5 \textit{g}4 or even 5 dxc5.

5 ... \textit{e}7
6 \textit{b}5 \textit{xd}2+
7 \textit{xd}2 0-0
8 c3 b6
The second player’s wish to solve rapidly the problem of the c8-bishop in the French Defence is quite legitimate, but in this particular position the attempt will prove a failure as Black cannot succeed in exchanging that piece against White’s f1-bishop. Good—and natural enough—was, instead of this, 8...\(\mathcal{Q}\)f5! (preventing \(\mathcal{Q}\)d6), as played with success by the same Nimzowitsch against Dr. Lasker in Zurich 1934.

9 \(\mathcal{Q}\)f4 \(\mathcal{A}\)a6

Trying to force a4 in order to play afterwards ...\(\mathcal{Q}\)c6-a5. But, as will be seen, the second part of this plan cannot be executed.

10 \(\mathcal{Q}\)f3 \(\mathfrak{W}\)d7
11 a4 \(\mathcal{Q}\)bc6 (D)

\begin{center}
\begin{tabular}{c}
\textbf{w} \\
\textbf{b}
\end{tabular}
\end{center}

12 b4!

Strangely enough, this more or less conventional move (by which White prevents ...\(\mathcal{Q}\)a5 and at the same time clarifies the situation in the centre) created at the time a kind of small sensation; the late Dr. Tarrasch, for instance, called it in his comments ‘highly original’. To my mind, more surprising than the move itself is the fact that a player of Nimzowitsch’s class, when adopting the plan started by 8...b6, did not take this possibility into serious consideration.

12 ... cxb4

Comparatively better than 12...c4 after which White would not have much technical difficulty in exploiting, in a decisive manner, his advantage in space on the kingside.

13 cxb4 \(\mathcal{A}\)b7
14 \(\mathcal{Q}\)d6 \(\mathfrak{f}\)?

The decisive strategic error in an already compromised situation. In view of the threatened advance of White’s a-pawn, the only chance of obtaining some more space lay in 14...a5 15 \(\mathcal{Q}\)b5 (better than 15 b5 \(\mathcal{Q}\)b4) 15...axb4 16 0-0 after which White’s initiative—since he would have to spend some time regaining the b-pawn—would not develop so rapidly. By moving his f-pawn, Nimzowitsch was obviously afraid of an attack against his king, yet that was the one thing he did not have to worry about in the present game!

15 a5!

As 15...bxa5 16 b5! followed by 17 \(\mathcal{B}\)xa5 is obviously bad for Black, this advance secures for the white bishop the important square b5.

15 ... \(\mathcal{Q}\)c8

The elimination of the terrible knight at d6—which under other circumstances would signify the beginning of a complete emancipation—does not in fact bring Black any relief.

16 \(\mathcal{Q}\)xb7 \(\mathfrak{W}\)xb7
17 a6 \w_7

To his misfortune, 17...\w_e7 does not work, because of 18 \a_b5! \a_xb4? 19 \a_b1.

18 \a_b5

From now on Black may play what he likes—he will be unable to protect adequately the squares c6 and c7. The following hopeless tie-up is merely the unavoidable consequence of that organic evil.

18 ... \a_8e7
19 0-0 h6

Although \a_g5 was not yet a threat, it could become one in the near future. Besides, the immediate 19...\a_f8 would not change the situation a bit: Black loses not because of lack of time, but because of lack of space.

20 \a_f8 \a_f8
21 \a_c2

If now 21...\a_d8, then 22 \a_a1 \a_xc2 23 \a_xc2 \a_e8 24 \a_xc8 \a_xc8 25 \w_c3 followed by \w_c7, and wins.

21 ... \w_e8
22 \a_a1

This and the next move are not the most exact ones, as the winning formation with \w_c1, \a_c2 and \a_c3 could have been reached in three moves instead of five by 22 \a_a3! followed by \a_a1 and \w_c1.

22 ... \a_ab8
23 \w_e3 \a_c7 (D)
24 \a_c3!

From now on, White wins in the shortest number of moves.

24 ... \w_d7

In order to give the king the possibility of protecting the rook at c7—a desperate idea in a desperate position!

25 \a_lc2 \w_f8
26 \w_c1 \a_bc8
27 \a_a4!

The last link of the positional attack started by 15 a5. In order to save the piece threatened by 28 b5 Black must sacrifice the b-pawn. After this he succeeds in protecting the important squares with the king, but must still resign as a consequence of complete zugzwang. An instructive finish!

27 ... \w_e8
28 \a_xb5 \w_e8
29 \a_a4 \w_d8
30 b4! 1-0

After a couple of irrelevant pawn moves Black will be obliged to play ...\w_e8, after which b5 wins immediately.

Game 62
Alekhine – Maroczy
San Remo 1930
Queen's Gambit Declined

1 d4 d5
2 c4 e6
3 \(\Box c3\) \(\Box f6\)
4 \(\Box g5\) \(\Box e7\)
5 e3 \(\Box bd7\)
6 \(\Box f3\) 0-0
7 \(\Box c1\) c6

Recent praxis seems to show that the intermediate move 7...h6 gives Black more chances of solving the problem of the centre than this old-fashioned, so-called ‘Capablanca’s freeing manoeuvre’ (although it had already been played, for instance, by Mason at Hanover 1902).

8 \(\Box d3\) dxc4
9 \(\Box xc4\) \(\Box d5\)
10 \(\Box xe7\) \(\text{W}xe7\)
11 \(\Box e4\) b6

An attempt to solve the problem of the c8-bishop immediately. Although it is rewarded in the present game by a partial success (at least in the opening stage), it can hardly be recommended, as White could play the following moves more energetically. Instead, Dr. Lasker’s idea 11...\(\Box f6\) 12 \(\Box g3\) e5! (see Game 86) seems to be sufficient for equality.

12 0-0 \(\Box b7\)
13 \(\Box g3\) c5
14 e4 \((D)\)

14 \(\Box b5\) was an interesting alternative, in order to answer 14...cxd4? by 15 e4! followed by \(\Box c7\). In that case Black would face the usual problems caused by an insufficiently prepared advance of the c-pawn.

\[\]

1 At the end of this line White can force immediate resignation by 21 \(\Box h5\) f6 22 \(\text{W}xe6+\), so Black should prefer 20...\(\Box f8\) 21 \(\Box h5\) \(\text{W}f8\), intending to continue 22...\(\Box c5\), although after 22 b4, followed by \(\Box h1\) and \(\Box g1\), one cannot talk about an advantage for Black.

14 ... \(\Box f6\)
15 \(\Box e1\)

White’s previous move would have found its logical justification if he had continued here with 15 d5, for instance 15...exd5 16 exd5 \(\text{W}d6\) 17 \(\Box f5\) \(\text{W}f4\) 18 \(\Box e7+\) \(\text{h}8\) 19 \(\Box b5!\), after which the d-pawn would remain an important factor in White’s favour. By the selected quiet continuation (due chiefly to the fact that having started the tournament with five straight wins I did not want, in the sixth round, to take any chances), White still keeps a slight positional advantage—but against an endgame specialist like Maroczy, White’s winning prospects become rather problematical.

15 ... cxd4
16 \(\Box b5!\)

If instead 16 e5 then 16...\(\Box g4!\) 17 \(\text{W}xd4\) \(\Box xf3\) 18 gxf3 \(\Box gx5!\) 19 \(\Box xe5\) \(\Box xe5\) 20 \(\text{W}xe5\) \(\Box ac8\), to Black’s advantage.\[\]
162 San Remo 1930

16 ... $\text{Af}c8$
17 $\text{Wxd4}$ $\text{Sc}5$
18 $\text{Lxd7}$ $\text{Lxd7}$
19 $b4$ $\text{Exc1}$
20 $\text{Lxc1}$ $\text{Ec}8$
21 $\text{Lxc8+}$ $\text{Lxc8}$
22 $\text{Wc3}$

The position is not quite as dead a draw as one might think at first glance. Here, for instance, Black will have to lose time in order to parry White's threats on the c-file.

22 ... $\text{Wd8}$
23 $\text{Fd4}$ $\text{Lb7}$
24 $f3$

One of White's advantages is that Black's bishop, owing to the general pawn structure, has but very poor prospects.

24 ... $\text{Ff6}$

In order to oppose the queen at c7—doubtless the correct scheme.

25 $\text{Ff1}$

This knight obviously had nothing more to do at g3.

25 ... $\text{Fe8} (D)$

26 $\text{Ff3} a6$

Maroczy seems not to be in a mood to play the purely passive endgame which he could obtain by the otherwise logical 26...$\text{Cc7} 27 \text{Wxc7} \text{Dxc7}$ 28 $\text{Dc4} \text{Fe8!}$. White's advantage in space in this variation would be evident, but as the direct threat 29 $\text{Db5}$ could be parried by 29...$\text{Fa6}$, the draw would still be probable. After the move played, Black on the other hand will hardly be able to offer the exchange of queens because of the weakness at b6.

27 $a4!$

The intended a4-a5 will fulfil a double object: to fix Black's weakness at a6, and secure the strong c5-square for a knight.

27 ... $h6$
28 $h3$

Not in order to give White's king a loophole, which is unnecessary in this position, but simply planning to move the king, eventually, to the centre, and therefore putting the h-pawn on a protected square.

28 ... $h5$?

Black's 26th move, although not very logical (avoiding the exchange of queens and creating a weakness on the queenside), was hardly sufficient to compromise the situation seriously. But this peculiar pawn move—the significance of which will not be explained by Black's further play—procurcs White unmistakable winning chances by creating a new (although, one must admit, for the moment hardly perceptible) weak spot at g5.

29 $a5$ $\text{bxa5}$
30 $\text{bxa5}$ $\text{Wd6}$
31 $\text{Fb3}$ $\text{Cc6}$
The desire to bring the bishop on to a more active square (b5) is reasonable, but White seizes at once the opportunity to advance his central pawns, and thus limit the action of the hostile knight.

32 e5! \textit{\textcolor{red}{\text{\small{W}}}}c7
33 \textit{\textcolor{red}{\text{\small{Q}}}c5} \textit{\textcolor{red}{\text{\small{Q}}}b5}
34 f4

The slight weakening of the light squares occasioned by this advance does not matter any longer, as the bishop is already tied down to the a-pawn.

34 ... \textit{\textcolor{red}{\text{\small{W}}}d8}
35 f5

The only winning possibility for White consists of combining the pressure on the queenside with direct threats against the black king.

35 ... \textit{\textcolor{red}{\text{\small{Exf5}}}}
36 \textit{\textcolor{red}{\text{\small{Q}}}xf5} \textit{\textcolor{red}{\text{\small{W}}}g5}
37 \textit{\textcolor{red}{\text{\small{Q}}}d4!}

An important tactical detail (if 37...\textit{\textcolor{red}{\text{\small{W}}}xe5}, then 38 \textit{\textcolor{red}{\text{\small{Q}}}xb5}).

37 ... \textit{\textcolor{red}{\text{\small{Q}}}c7}
38 \textit{\textcolor{red}{\text{\small{Q}}}f3}

From now on Black will realise that he erred by playing ...h5.

38 ... \textit{\textcolor{red}{\text{\small{W}}}f4}

\textbf{39 \textit{\textcolor{red}{\text{\small{Q}}}f2}}

Thus showing that he is already willing to exchange queens. As a matter of fact the endgame arising after 39...\textit{\textcolor{red}{\text{\small{Q}}}d5} 40 \textit{\textcolor{red}{\text{\small{W}}}d4} \textit{\textcolor{red}{\text{\small{W}}}xd4}+ 41 \textit{\textcolor{red}{\text{\small{Q}}}xd4} \textit{\textcolor{red}{\text{\small{Q}}}c4} 42 \textit{\textcolor{red}{\text{\small{Q}}}f5}! followed by \textit{\textcolor{red}{\text{\small{Q}}}d6}, would be extremely critical, if not hopeless, for Black.

39 ... \textit{\textcolor{red}{\text{\small{W}}}f5 (D)}

![Chess Diagram]

\textbf{40 \textit{\textcolor{red}{\text{\small{W}}}d2} \textit{\textcolor{red}{\text{\small{Q}}}h7}}

Instead, 40...\textit{\textcolor{red}{\text{\small{Q}}}e6} 41 \textit{\textcolor{red}{\text{\small{Q}}}b7}! followed by \textit{\textcolor{red}{\text{\small{Q}}}d6}± would have enabled him to resist longer. The following winning procedure is instructive\footnote{In my opinion, Alekhine’s comments throughout this game show a breathtaking lack of objectivity. Up to this moment I cannot see that Black has made any error, and indeed after 40...\textit{\textcolor{red}{\text{\small{Q}}}e6} 41 \textit{\textcolor{red}{\text{\small{Q}}}b7} \textit{\textcolor{red}{\text{\small{W}}}b1} 42 \textit{\textcolor{red}{\text{\small{Q}}}d6} \textit{\textcolor{red}{\text{\small{W}}}f1}+ 43 \textit{\textcolor{red}{\text{\small{Q}}}g3} \textit{\textcolor{red}{\text{\small{Q}}}c6} White would be slightly worse due to two factors; firstly, that he has two weak pawns (on a5 and e5) while Black only has one (on a6), and secondly that his king is more exposed than Black's. It seems very likely that Maroczy, who was a great endgame specialist, spurned the earlier straightforward draws because he was (justifiably) playing for the win. The move played, 40...\textit{\textcolor{red}{\text{\small{Q}}}h7}, is simply a serious tactical error, which not only allows the knight to reach d6 with gain of tempo, but also ensures that the f7-pawn is undefended when it does arrive.}.

41 \textit{\textcolor{red}{\text{\small{Q}}}e4!}

If now 41...\textit{\textcolor{red}{\text{\small{Q}}}e8} then 42 \textit{\textcolor{red}{\text{\small{Q}}}g3} \textit{\textcolor{red}{\text{\small{W}}}g6} 43 \textit{\textcolor{red}{\text{\small{W}}}d8}, with gradual strangulation. Black prefers, therefore, to
sacrifice a pawn in order to get rid of at least one of the tedious knights.

41 ... \(\text{c}e6\)
42 \(\text{d}d6\) \(\text{w}b1\)

If 42...\(\text{w}g6\) White wins by 43 \(\text{c}xb5\) \(\text{axb5}\) 44 a6 since 44...\(\text{c}c5\) does not work because of 45 \(\text{g}g5+\) \(\text{w}xg5\) 46 \(\text{w}xg5 \text{c}e4+ 47 \text{e}3 \text{d}xg5 48 \text{a}7\).

43 \(\text{d}x7\) \(\text{c}c6\)
44 \(\text{d}7g5+\) \(\text{d}xg5\)
45 \(\text{c}xg5+\) \(\text{g}6\)
46 \(\text{h}4\)

Thus White has taken the maximum of advantage from the weakness of \(g5!\)

46 ... \(\text{f}5\)

The threat was 47 \(\text{w}d6+ \text{f}f5 48 \text{w}e6+ \text{f}f4 49 \text{g}3#\).

47 \(\text{e}6\) \(\text{w}b5\)
48 \(\text{w}c2+\)

The object of the following checks is to prevent with tempo Black’s \(\text{w}c5+\) and thus make possible the further advance of the passed pawn.

48 ... \(\text{e}5\)
49 \(\text{c}3+\) \(\text{d}6\)
50 \(\text{g}3+\) \(\text{d}5\)
51 \(\text{f}3+\) \(\text{e}5\)
52 \(\text{e}3+\) \(\text{f}6\)

Or 52...\(\text{d}6 53 \text{f}f4+!\).

53 \(\text{c}3+\) \(\text{g}6\)
54 \(\text{e}7\) \(\text{f}5+\)
55 \(\text{e}3\)

The king is here—for once—even safer than on the wing (55 \(\text{g}1 \text{w}b1+)\).

55 ... \(\text{e}8\)
56 \(\text{d}4\) \(\text{b}5\)
57 \(\text{d}6+\) \(\text{f}6\)
58 \(\text{e}4!\) 1-0

---

**Game 63**

**Alekhine – Tartakower**

*San Remo 1930*

*Dutch Defence*

1 \(\text{d}4\) \(\text{e}6\)
2 \(\text{c}4\) \(\text{f}5\)
3 \(\text{g}3\) \(\text{f}6\)
4 \(\text{g}2\) \(\text{b}4+\)
5 \(\text{d}2\) \(\text{e}4\)

Black is aiming to exchange the pieces he has just developed—a doubtful strategy, to say the least. More in the spirit of the opening chosen would be 5...0-0 6 a3 \(\text{e}7\).

6 \(\text{a}3\) \(\text{xd}4\)
7 \(\text{c}xd2\) \(\text{xd}2+\)
8 \(\text{w}d2\) 0-0
9 \(\text{h}3\)

Chiefly in order to ensure control of \(d5\) in case Black selects the development ...\(d6\) and ...\(e5\).

9 ... \(\text{d}5\)

After this the dark squares in Black’s position may sooner or later become very weak; and White, in order to exploit that weakness, decides to liquidate the central pawns as rapidly as possible. Although it was very difficult to foresee at this moment that Black, after the transaction projected, would have adequate defence against the many threats, a slower policy—such as 10 \(\text{c}c1\) (instead of 10 \(\text{c}xd5\)) 10...\(\text{c}6 11 0-0 \text{e}7\) 12 \(\text{w}e3!\) followed by \(\text{f}4—\)would have been more appropriate in order to take advantage of Black’s manoeuvre of the 5th-7th moves.

10 \(\text{c}xd5\) \(\text{exd}5\)
11 \(\text{f}4\) \(\text{c}6\)
12 0-0 \( \textbf{\textit{\#e7}} \) (\( \textbf{\textit{D}} \))

\[ \]

13 \textbf{b4!}

The real object of this move—besides a 'minority' attack which, by means of \textit{a4} and \textit{b5}, was also quite possible—is to open the queen’s way to \textit{a2}. The following will prove the importance of that diversion.

13 \textbf{... } \textbf{a6}
14 \textbf{f3}

All in accordance with the plan inaugurated by his 10th move. But Black, by keeping a cool head, succeeds in emerging from the skirmish without much damage.

14 \textbf{... } \textbf{\textit{\#d7}}
15 \textbf{e4 } \textbf{fxe4}
16 \textbf{fxe4 } \textbf{dxe4}
17 \textbf{\textit{\#a2}}+

Sadly enough, the tempting move 17 \textbf{\textit{\#xe4}} does not work—for instance, 17...\textbf{\textit{\#xe4}} 18 \textbf{\textit{\#ae1}} 19 \textbf{\textit{\#e5}} 19 \textbf{\textit{\#a2}}+ (19 \textbf{\textit{\#e6}} 20 \textbf{\textit{\#xf8}} \textbf{\textit{\#xf8}} 21 \textbf{\textit{\#f7}}! 20 \textbf{\textit{\#e8}}+ (or 20 \textbf{\textit{\#e7}}) 20 \textbf{\textit{\#f8}}—and Black escapes.

17 \textbf{... } \textbf{\textit{\#h8}}
18 \textbf{\textit{\#e6}}

Unconvincing is 18 \textbf{\textit{\#e6}} \textbf{\textit{\#e8}}!.

18 \textbf{... } \textbf{\textit{\#xf1}}+

\[ \]

19 \textbf{\textit{x}} \textbf{\textit{f1}} \textbf{\textit{\#f6}}
20 \textbf{\textit{\#g5 }} \textbf{h6}
21 \textbf{\textit{\#f7}}!

This strong move, which forces the exchange of queens because of the threat 22 \textbf{\textit{\#xf6}}!, had to be foreseen when the central action was started, otherwise Black would have even obtained the better game.

21 \textbf{... } \textbf{\textit{\#xf7}}
22 \textbf{\textit{\#xf7}} \textbf{+ } \textbf{\textit{\#h7}}
23 \textbf{\textit{\#d6}} (\( \textbf{\textit{D}} \))

This menacing knight position secures White the recapture of the sacrificed pawn, but on the other hand, Black should, in the meantime, find the opportunity to finish his development and obtain equality.

23 \textbf{... } \textbf{\textit{\#e6}}?

Obviously over-estimating the value of the central pawn. The right way was 23...\textit{a5}! 24 \textbf{\textit{\#xe4}} (if 24 \textit{b5} then simply 24...\textit{cx b5}) 24...\textit{AXB4} 25 \textbf{\textit{\#xf6}}+ (25 \textit{AXB4} \textbf{\textit{\#d5}}) 25...\textit{gxf6} 26 \textit{AXB4} \textbf{\textit{\#g7}} with a probable draw.

24 \textbf{\textit{\#xb7}} \textbf{\textit{\#d5}}
25 \textbf{\textit{\#e1}}!

Otherwise Black, in many cases, could play ...\textit{e3}. 
25 ... $\mathit{a}7
26 \mathit{D}c5 \ a5

Giving White a passed pawn; but the rook, naturally, cannot always remain tied down to the a-pawn.

27 $\mathit{b}x\mathit{a}5 \ \mathit{X}x\mathit{a}5
28 \ a4 \ \mathit{X}a8

With the object of occupying the b-file, or (as actually happens) of diminishing somewhat White’s pressure against the e-pawn.

29 $\mathit{X}a1 \ \mathit{X}a5
30 \mathit{X}a3!

Still with the object of preventing ...e3.

30 ... $\mathit{g}6

Black hopes to have just time to execute the important manoeuvre ...$\mathit{D}e8-d6, but is prevented from this by what Dr. Tartakower himself calls ‘the combinative wonder’.

31 \ \mathit{h}3 \ \mathit{f}5
32 \mathit{f}2 \ $\mathit{D}e8 (D)

Everything runs according to the preconceived plan. Instead, 32...h5 would have prevented the following surprise, but after 33 $\mathit{D}e3 the tying down of all Black’s pieces would in any case have led to material loss.

33 $\mathit{D}xe4+!

At first sight, having in view the (very poor) transaction 33...$\mathit{X}xe4
34 $\mathit{D}xe4 $\mathit{X}xe4 35 $\mathit{X}e3+ $\mathit{D}xd4 36 $\mathit{X}xe8 $\mathit{X}xa4, but in reality forcing a technically rather easily won rook endgame with an extra pawn.

33 ... $\mathit{X}xe4
34 g4+

The simple but very unkind point:

34...$\mathit{f}4 35 $\mathit{D}e6#!

34 ... $\mathit{f}6
35 $\mathit{D}xe4+ $\mathit{e}6
36 $\mathit{D}e3 $\mathit{d}6
37 $\mathit{D}d3 $\mathit{xe}4
38 $\mathit{D}xe4 \ h5

Black realises that ‘quiet’ play would leave him without any drawing chances—for instance, 38...$\mathit{D}d6 39 $\mathit{D}d3 $\mathit{d}5 40 $\mathit{X}a1 c5 41 dxc5 $\mathit{X}xc5 42 $\mathit{D}c3 would be similar to my last match game with Capablanca. Therefore he tries to create attacking objects on the kingside but only hastens the end by accepting the following pawn sacrifice.

39 g5! $\mathit{X}xg5

After 39...$\mathit{D}d6 40 h4 his situation would be even worse than before.

40 a5 $\mathit{b}5
41 a6 $\mathit{b}8
42 a7 $\mathit{a}8
43 h4! g5
44 h\mathit{x}g5 h4
45 $\mathit{X}a6 $\mathit{f}7
46 $\mathit{f}4 h3
47 $\mathit{g}3 $\mathit{g}6
48 d5! $\mathit{x}g5
49 dxc6 $\mathit{f}5
50 c7 1-0
Game 64
Ahues – Alekhine
San Remo 1930
Queen’s Indian Defence

1 d4 d6
2 c3 b6
3 e3 b7
4 Bbd2

This system of development has been favoured by Rubinstein and the late Belgian Champion, Colle. It is not particularly aggressive, but is not without sting—especially if White succeeds in quickly opening a suitable diagonal for his dark-squared bishop.

4 ... c5
5 d3 e6
6 c3 e7
7 Be2

White is over-cautious. More in the spirit of the variation selected would have been 7 e4, only playing 8 Be2 in reply to 7...d6; after the move played Black succeeds in preventing the advance of the e-pawn by the following original answer.

7 ... Bd5!

With no means hidden intentions: if 8 e4, then 8...Df4; if 8 c4, then 8...Db4.

8 dx5

With this exchange White starts an elaborate manoeuvre, the ultimate object of which is to bring the dark-squared bishop on to the diagonal a1-h8. As a matter of fact there is hardly a more promising line to be recommended for him.

8 ... bxc5

9 Df1

He does not play this knight to c4 as he intends to dislodge Black’s central knight by c3-c4.

9 ... Bc7
10 Bg3 Bc6
11 Bd2 g5! (D)

A bold idea, connected in one variation with the offer of a pawn and based on the following general considerations: Black possesses on the kingside an elastic pawn mass, not obstructed by his own pieces; the natural thing for him to do is therefore to try to gain space by gradually advancing these pawns. But which pawn shall he start with? The move 11...h5 would be met by 12 h4! stopping any further action on that side; on the other hand 11...f5 would also have been premature as it would allow White to open the position by 12 e4 fxe4 13 Bxe4!. There remains the text move, which, by the way, is more effective than the preparatory 11...0-0-0, permitting White to answer 12 a3! followed by c4.

12 c4 Bdb4
13 Bc3
One must admit that White plays at least logically—the diagonal a1-h8 is for the time being his only counter-chance.

13 ...  Qxd3+
14 Wxd3  Qb4
15 We2

The main variation considered by Black when playing 11...g5 was 15 Wb1 f6 16 Qxg5 (or 16 a3 Qc6 17 Qxg5 Qe5! ?) 16...Qxg2 17 Kg1 Qb7 18 Qxh7 0-0-0!, with more than sufficient positional compensation for the material sacrificed.

15 ... Kg8
16 a3 Qc6
17 Qd2 Qe5
18 Wh5

White, obviously dissatisfied with his position, is looking for complications. Of course Black's chances would also have remained superior (chiefly because of the possibilities offered by the pair of bishops) after the quiet 18 f3.

18 ... 0-0-0

Even more forcible would have been 18...Qxg2 19 Kg1 Qc6 20 Wh7 0-0-0+. After the text move White decides to renounce—at the cost of two tempi!—making that compromising transaction.

19 0-0  f5

Threatening 20...g4.

20 We2  h5!

No reason to give the opponent even one moment's relief!

21 Qxh5

White is forced to take this pawn, as otherwise its advance would be too painful.

21 ... Kg6

Threatening 22...Qh6 followed by ...Qd8, with deadly effect.

22 f4

The exchange thus proposed will bring the knight into an excellent defensive position—but, unfortunately for White, only for a very short time. However, as White did not have even a shade of counterplay, his king was in the long run indefensible anyhow.

22 ... gxf4
23 Qxf4 Qh6
24 h3 Kg8

With the strong threat 25...Qg6.

25 Qxe5 Qxe5
26 Qf3 Qg7 (D)

27 fad1

After this Black wins the pawn back and at the same time demolishes the last fortifications protecting the enemy king. But also the protection of the h-pawn by means of 27 Qh1 would have led to an untenable position after 27...Qd6 28 Qf2 Qg4! (threatening 29...Qxf4 30 exf4 Qxh3+!) 29 Kg1 Qxh3! 30 Qxh3 Qxh3.

27 ... e5!
28 \( \text{d5} \) \( \text{xe5} \)  
29 \( \text{d2} \) \( \text{xd5} \)  
30 \( \text{cx}d5 \) e4

0-1

Game 65

Alekhine – Kmoch

San Remo 1930

Nimzo-Indian Defence

1 d4 \( \text{f6} \)  
2 c4 e6  
3 \( \text{c3} \) \( \text{b4} \)  
4 \( \text{d2} \)

One of the most harmless answers to Black’s 3rd move. The present game shows that Black, by making even the simplest moves, can obtain a middlegame with even prospects.

4 ... 0-0  
5 e3 d5  
6 \( \text{f3} \) c5  
7 a3

Again a passive move. In playing the opening of this game I was decidedly not in my happiest mood! First 7 \( \text{wc2} \), and only after 7...\( \text{c6} \) 8 a3 \( \text{xc3} \) 9 \( \text{xc3} \), leads to a more colourful position.

7 ... \( \text{xc3} \)  
8 \( \text{xc3} \) d4

Perfectly logical as further simplification can only be in the second player’s favour.

9 \( \text{c1} \)

Even now 9 \( \text{wc2} \) was more promising.

9 ... \( \text{xc3} \)

10 \( \text{xc3} \) exd4  
11 exd4 \( \text{c6} \)!

Black does not hurry to play 11...dxc4 since after 12 c5 he would be able to start a successful battle in the centre by answering 12...e5!.

12 \( \text{e2} \)  
13 \( \text{xc4} \) (D)

It is not difficult to see that the opening play has concluded rather in Black’s favour, as White’s isolated pawn is decidedly not an ornament to his position and, on the other hand, the advantage in space which he still possesses has for the moment not much importance, because of the absence of vulnerable spots in the enemy position. White’s only chance, therefore, is to try to create a kingside attack—and the reader will see how difficult this task proved to be against the author of Die Kunst der Verteidigung.

13 ... \( \text{f6} \)  
14 0-0 \( \text{d8} \)  
15 \( \text{d3} \) \( \text{d7} \)  
16 \( \text{e1} \)

In spite of his scarcely brilliant prospects White still decides to play...
for a win, and therefore does not try to exchange the isolated pawn. Otherwise he would have played here 16 \textit{W}d2, preparing d5, which was not good immediately because of the answer 16...\textit{Q}a5!.

16 ... \textit{L}e8
17 \textit{W}d2 \textit{Q}e7

Now Black also becomes ambitious and prevents for a while d5.

18 \textit{Q}g5! \textit{Q}d5

But not 18...\textit{Q}f5 due to 19 \textit{Q}xe6! fxe6 20 \textit{N}xe6 winning.

19 \textit{H}f3 \textit{W}e7
20 \textit{H}g3

White is anxious to provoke a weakening pawn move on Black’s kingside, and therefore protects the knight in order to be able to play \textit{W}d3.

20 ... \textit{h}6
21 \textit{Q}f3

It was difficult to decide which knight retreat was best. I finally rejected 21 \textit{Q}e4 because of the possible reply 21...\textit{W}h4. However, White would also have kept fairly good attacking chances in that case after 22 h3! \textit{W}f4 23 \textit{W}e2.

21 ... \textit{W}f6
22 \textit{H}e4

Defending d4 and f4, and intending to eventually threaten \textit{H}eg4. But Black’s following knight manoeuvre again protects everything.

22 ... \textit{Q}e7
23 \textit{Q}e5 \textit{Q}f5
24 \textit{H}d3

24 \textit{H}f3 would have been a mistake owing to 24...\textit{H}c6 25 \textit{Q}xc6 bxc6 \textit{F}.

24 ... \textit{H}ac8

25 \textit{h}3! (D)

White profits from the fact that the opponent does not threaten anything of importance to secure an escape for his king. The following part of the game will clearly show the significance of this quiet preparatory move.

25 ... \textit{Q}d6?

Seizing the first opportunity for a further simplification which, however, will this time prove perfectly welcome to White. As a matter of fact the knight was at this stage too important a defensive piece to be eliminated. Instead, 25...\textit{H}c6! offered—temporarily at least—a quite sufficient defence; for instance, 26 \textit{Q}xc6 bxc6 (not 26...\textit{H}xc6 because of 27 d5!) or 26 \textit{H}e1 \textit{H}d5.

26 \textit{H}f4 \textit{Q}xc4
27 \textit{Q}xc4 \textit{W}g5

This move has been generally criticised as time-wasting, but also after 27...\textit{W}e7 28 \textit{Q}e5 White would obtain the better fighting chances. If in that case 28...f6, then 29 \textit{Q}g4 threatening eventually sacrifices at f6 or h6. Speaking in general, the
black king is from now on quite insufficiently protected.

28 Ng3  
29 De3  
An exchange of queens would, of course, be paradise for Black!

30 Wh2

This is the pleasant consequence of White's 25th move.

30 ...  
31 Wb4!  
Black hopes for 31 Wa5 Wc7, but White selects the right square for his queen.

32 Wb5!

Such an effective advance of the would-be weakling must have delighted the greatest friend of the isolated d-pawn, the late Dr. Tarrasch! It is obvious enough that in case of ...exd5 (here or on the next move) the answer Wd4 would have led to a rapid debacle for Black. But also by the defence selected he will have to give up at least the exchange.

32 ...  a5

33 We4

Of course not 33 Wd4 e5.

33 ...  
34 Wf5  
35 Wh5!

Instead the tempting move 35 Ac4 would have led to nothing after the reply 35...Ac6! and also 35 Ag4 would have brought, after 35...exd5, only the exchange for a pawn.  

35 ...  
36 Wxd5  exd5

Instead of resigning, I should have preferred 35...Wh7 36 Ag4!! gxh5 37 Af6+ followed by mate.

36 Wxd5  exd5

37 Wxh6  1-0

Game 66
Stähler – Alekhine
Hamburg tt 1930
Brilliancy Prize
Nimzo-Indian Defence

1  d4  
2  c4  e6
3  Ac3  Ab4
4  Wb3  c5
5  dx5  Ac6
6  Af3  Ad4
7  Ad2  Ac5

This move became fashionable after the game Bogoljubow-Nimzowitsch in the San Remo Tournament, brilliantly won by Black. It is doubtless more logical than the former 7...Ax2 8 Ax2 after which

1 Actually 35 Ag4 wins as well, since 35...exd5 36 Ax6+ Af8 37 Ac3 Ac6 38 Wh8+ Ae7 39 Ac8+ Ad8 40 Wh4+ f6 41 Ac6 is devastating.
White, by castling queenside, will soon obtain strong pressure on the d-file.

8 $\textit{wc}2$ f5
9 a3

Thus White obtains—at least temporarily—the pair of bishops. Oddly enough, Bogoljubow, in the above-mentioned game, delayed this move until it actually became a mistake and by making it at that moment gave his opponent the game out of hand! It came about this way: 9 e3 0-0 10 $\textit{xe}2$ b6 11 0-0-0 a5! 12 a3 a4!! $\mp$.

9 ...
10 $\textit{xc}3$
11 b4
12 e3
13 $\textit{d}3$

He could play also 13 $\textit{b}2$ but would not have obtained any real advantage, for instance 13...$\textit{b}7$ 14 $\textit{d}3$ $\textit{e}7$! and then 15 $\textit{xe}4$ $\textit{xe}4$ 16 $\textit{xe}4$ would be to Black’s advantage after 16...$\textit{xb}4$ 17 $\textit{xb}7$ $\textit{d}d3+$. 13 ...
14 $\textit{xc}3$
15 0-0

It certainly looks risky to leave the central dark squares without adequate defence, but I judged that something had to be done in order to prevent White increasing his pressure in the centre by means of c5.

16 $\textit{e}2$

Threatening to bring a rook and the queen on the open d-file with unpleasant consequences for Black.

16 ...
17 $\textit{fd}1$

Not yet 17...f4 because of 18 $\textit{exf}4$ $\textit{xf}4$ 19 $\textit{wd}2$.

18 a4

The serious defect of this otherwise strategically justified advance is that it takes decidedly too much time and thus permits Black to build up an instructive attack. Therefore, 18 $\textit{e}5$ with the strong threat 19 $\textit{c}7$ was undoubtedly better. The game would have continued in that case 18...f4! 19 $\textit{c}7$! (not 19 $\textit{exf}4$ $\textit{g}6$ 20 $\textit{c}7$ $\textit{xf}4$ $\mp$) 19...$\textit{xf}3$ 20 $\textit{xf}3$ $\textit{xe}3$ 21 $\textit{xe}3$ $\textit{f}5$ and Black has the double threat of 22...$\textit{xe}3$ and 22...$\textit{h}4$. In this line, although White would not find time to exploit the weakness of Black’s queenside, he would still have been perfectly able to protect his king—and this was for the moment the most important problem!

18 ...

19 a5

f4!

From now on until the end, all Black’s moves are very precisely timed. It is hardly possible to replace any one of them by a better one.

19 ...
20 $\textit{xe}3$

$\textit{f}5$
21 \( \text{wc3} \) d6!
A simple but very effective defence against White's \( \text{ha7} \).
22 axb6 axb6
23 \( \text{de1} \)
If 23 \( \text{ha7} \) then 23...\( \text{xd7} \) threatening to win a piece by 24...\( \text{xf3} \).
23  
\( \text{e5} \)
Securing the square d4 for the knight. As may be noticed, the weakness of the dark squares has been, without apparent effort, transformed into strength.
24 \( \text{ha7} \)
Hoping to complicate matters after 24...\( \text{ed7} \) 25 c5 with the threat 26 \( \text{hb5} \). But Black has at his disposal an important intermediate move.
24  
\( \text{d4!} \)
25 \( \text{we3} \) \( \text{ed7} \)
Threatening 26...\( \text{xf3} \).
26 \( \text{ha2} \) \( \text{df7} \)
27 f3
One would suppose that this pawn, besides being protected by its neighbour, and easily supported by three of four pieces, cannot possibly form a welcome object for Black's attack. And yet White's f3-pawn will be captured, almost inevitably. It was certainly the unusual nature of Black's winning stratagem which induced the judges to award to this game the brilliancy prize.
27  
\( \text{xf4} \)
28 \( \text{xd3} \) \( \text{wh5} \)
Threatening 29...e4!.
29 \( \text{xf1} \) \( \text{wg5!} \)
With the main threat 30...\( \text{xf3} \)! forcing the win of the queen. White's answer is forced.

30 \( \text{h2} \) h6! (D)

A move terrible in its simplicity. Black threatens 31...\( \text{xf3}! \) 32 \( \text{wg5} \) \( \text{xf2} \), and in case of 31 \( \text{wd2} \) (comparatively the best) he would have played 31...\( \text{xf3} \) 32 \( \text{xf3} \) \( \text{xf3}+ \) 33 \( \text{xf3} \) \( \text{xf3} \) 34 \( \text{wg5} \) \( \text{xf1}+ \) 35 \( \text{xf1} \) \( \text{xf1}+ \) 36 \( \text{xf1} \) \( \text{hg5} \) 37 \( \text{e2} \) \( \text{f7} \) 38 \( \text{xf3} \) \( \text{e6} \) 39 \( \text{e4} \) b5!, with a won pawn endgame. White's next move practically does not change anything.

31 \( \text{h1} \) \( \text{xf3}! \)
With the same point as mentioned above.

0-1

Game 67
Alekhine – Andersen
Prague tt 1931
Queen's Indian Defence

1 d4 \( \text{df6} \)
2 c4 b6
I have tried this fianchetto development (before ...e6) on several occasions at the beginning of my professional career in the early twenties and also with success in a
1929 match-game against Bogoljubow (see game 59). Its main disadvantage is that it allows White considerable freedom in the centre; its merit lies in forcing the opponent to select a definite opening plan possibly earlier than he would like to.

3 \( \text{Qc3} \)  \( \text{Qb7} \)
4 \( \text{Wc2} \)

For 4 f3 see the above-mentioned game.

4 \( ... \)  e6?

But this is not in accordance with 2...b6. The only logical continuation is 4...d5 5 cxd5 \( \text{Qxd5} \) 6 \( \text{Qf3} \) (in case of 6 e4 Black can play 6...\( \text{Qxc3} \) 7 bxc3 e5) 6...e6 7 e4 \( \text{Qxc3} \) 8 bxc3 \( \text{Qe7} \) followed by \( ...\text{Qd7} \) and eventually  \( ...\text{c5} \), with fighting chances.

5 e4  \( \text{Qb4} \)
6 f3!

Avoiding the doubling of pawns on the c-file. Black has now not the slightest compensation for White's predominance in the centre.

6 \( ... \)  0-0
7 \( \text{Qd3} \)

Threatening 8 e5.

7 \( ... \)  h6
8 \( \text{Qe2} \)  d5

Something had to be undertaken in order to increase the activity of Black's minor pieces—and the plan selected is probably no worse than any other; at least Black will now have, for a short time, the illusion of a 'counter-attack' starting by  \( ...\text{c5} \).

9 cxd5  exd5
10 e5  \( \text{Qfd7} \)
11 0-0  c5
If instead 11...\( \text{Qe7} \) then 12 \( \text{Qf4} \) ±.

12 a3  \( \text{Qxc3} \)

After 12...\( \text{a5} \) the pawn sacrifice 13 b4! cxb4 14 \( \text{Qb5} \) would leave Black in a hopeless position.

13 bxc3  \( \text{Qc6} \)
14 \( \text{Qe3} \) (\( D \))

Also the combination with 14 e6, followed by \( \text{Qf4} \), was sufficient; but the simple concentration of the forces, keeping the central pawn structure intact, brings a more rapid decision.

14  \( ... \)  cxd4
15 cxd4  \( \text{Qc8} \)
16  \( \text{Wd2} \)!

As Black's answer was obvious, this move must be considered as the beginning of the final combination. Another, purely positional, and much slower, method of keeping some advantage was 16 \( \text{Wb1} \) \( \text{Qa5} \) 17 f4 \( \text{Qc4} \) 18 \( \text{Qc1} \).

16  \( ... \)  \( \text{Qa5} \)

Intending, if nothing special occurs, to force the exchange of one of White's bishops by 17...\( \text{Qc4} \).

17  \( \text{Qxh6} \)!

Of course the offer cannot be accepted: this is by far the easiest part
of the combination. But the complications issuing from the best defence, actually selected by Black, demanded a thorough examination.

17 ... b3
18 \textit{W}f4 e6!

If instead 18...\textit{Q}xa1 then 19 \textit{W}g3
g6 20 \textit{A}xg6 h8 21 \textit{A}f5 g8 22
\textit{W}h3 and wins.

19 \textit{A}g5 f6

White was also threatening 20
\textit{W}h4.

20 \textit{exf6} \textit{Q}xa1

His last chance, which will he an-
nihilated by the following intermedi-
ate check.

21 \textit{Q}h7+!

The alternative was 21...\textit{Q}xh7 22
\textit{W}h4+ \textit{Q}g6 (22...\textit{Q}g8 23 f7+) 23
\textit{Q}f4+ \textit{Q}f5 24 g4#.

22 \textit{W}h4! \textit{xf6}

As if now 23...g6, then 24 \textit{W}h6!
with a debacle.

Game 68

Alekhine – Nimzowitsch

Bled 1931

French Defence

1 \textit{e}4 e6
2 d4 d5
3 \textit{Q}c3 \textit{Q}b4
4 \textit{Q}e2

This move, which is quite satis-
factory in the MacCutcheon Vari-
ation (1 e4 e6 2 d4 d5 3 \textit{Q}c3 \textit{Q}f6 4
\textit{Q}g5 \textit{Q}b4 5 \textit{Q}e2), is perfectly harm-
less at this moment. I selected it,
however, in the present game since I
knew that on a previous occasion

(against Sir G. Thomas at Marien-
bad 1925) Nimzowitsch had shown an
exaggerated voracity (6...f5) with-
out having been duly punished for it.

4 ... dx e4
5 a3 \textit{Q}xc3+

Also 5...\textit{Q}e7 is good enough for
equality.

6 \textit{Q}xc3 f5

Played against all the principles of
a sound opening strategy, as the
dark squares in Black's position will
become very weak, especially be-
cause of the exchange of his king's
bishop. The correct reply, which se-
cures Black at least an even game, is
6...\textit{Q}c6! and if 7 \textit{Q}b5 then 7...\textit{Q}e7
followed by ...0-0.

7 f3

The sacrifice of the second pawn
is tempting, most probably cor-
rect—but unnecessary, as White
could obtain an excellent game
without taking any chances, by play-
ing first 7 \textit{Q}f4 and if 7...\textit{Q}f6 then 8
f3 \textit{exf3} 9 \textit{Wxf3} after which 9...\textit{Wxd4}
would be refuted by 10 \textit{Q}b5.

7 ... \textit{exf3}

8 \textit{Wxf3} \textit{Wxd4}

Contrary to the opinion of the
theorists, this move is as good—or
as bad—as 8...\textit{W}h4+ 9 g3 \textit{Wxd4}: in
that case White would play 10 \textit{Q}b5
and Black would not have had, as he
did in the actual game, the defence
10...\textit{W}h4+ 11 g3 \textit{Q}c7.

9 \textit{W}g3!

A by no means obvious continu-
ation of the attack. White’s main
threats are 10 \textit{Q}b5 (10...\textit{W}e4+ 11
\textit{Q}e2) and 10 \textit{Q}f4 (or c3).
9 ... \( \hef6 \)

This bold move is comparatively Black's best chance. \( 9 ... \hef7 \) would be insufficient because of \( 10 \hef3! \hef6 11 0-0-0 \pm. \)

10 \( \hef x g7 \) (D)

10 ... \( \hef e5+\)?

Inconsistent and therefore fatal. Black—in order to keep a fighting chance—should also give up the c-pawn, as after \( 10 ... \hef g8 11 \hef x c7 \hef c6 \) there would not be a win for White by means of \( 12 \hef b5 \) because of \( 12 ... \hef h4+1 13 \hef g3 \hef e4+14 \hef f2 \hef x c2+, followed by \( ... \hef e4 \). The check actually played allows White to win a development tempo—and time in such a tense position is a decisive factor.

11 \( \hef e2 \) \( \hef g8 \)

12 \( \hef h6 \) \( \hef g6 \)

13 \( \hef h4 \)

White does not need to protect his g-pawn by \( 13 \hef h3 \) as after \( 13 \hef h4 \hef x g2 \) the answer \( 14 \hef f4 \) would have been decisive.

13 ... \( \hef d7 \)

14 \( \hef g5 \) \( \hef c6 \)

15 0-0-0 \( \hef x g2 \) (D)

Under normal circumstances this capture should be considered as another mistake but, owing to White's tremendous lead in development, Black's game is hopeless (if, for instance, \( 15 ... \hef b d7 \) then still \( 16 \hef h e1 \), followed by a move with the e2-bishop), so his morbid appetite cannot spoil anything more.

16 \( \hef h e1 \) \( \hef e4 \)

17 \( \hef h 5 \) \( \hef x h 5 \)

18 \( \hef d 8+ \) \( \hef f 7 \)

19 \( \hef w x h 5 \) 1-0

Nimzowitsch quite correctly resigned here, as there are no decent moves for Black—even \( 19 ... \hef g7 \) would lose the queen after \( 20 \hef x e 4 \) fxe4 \( 21 \hef h 6+. \) This was, I believe, the shortest defeat in his career.

Game 69
Pirc – Alekhine
Bled 1931
Tarrasch Defence

1 \( d 4 \) \( d 5 \)

2 \( c 4 \) \( e 6 \)

3 \( \hef c 3 \) \( c 5 \)

4 \( c x d 5 \) \( c x d 4 \)
This interesting pawn-offer (instead of the usual 4...exd5) has been analysed by some German amateurs, and introduced in international practice—if I am not mistaken—by Dr. Tartakower. As subsequent investigations have proved, Black, in spite of the superiority of his development, should not be able, against adequate defence, to prevent the opponent emerging from the opening with an extra pawn and a safe position.

5 \textit{\texttt{\textbf{\textit{a4}}}}

Better than 5 \textit{\texttt{\textbf{\textit{a4}}}} d4 c6,
5 ... \textit{\texttt{\textbf{\textit{d7}}}}
5...\textit{\texttt{\textbf{\textit{d7}}}} would be an error here because of 6 \textit{\texttt{\textbf{\textit{b5}}}} ! ±.
6 \textit{\texttt{\textbf{\textit{xd4}}}} exd5
7 \textit{\texttt{\textbf{\textit{xd5}}}} c6

Black could also play 7...\textit{\texttt{\textbf{\textit{f6}}}}, after which 8 \textit{\texttt{\textbf{\textit{xc7}}}} c6 would have been decidedly too risky for White, but 8 \textit{\texttt{\textbf{\textit{d1}}}} followed by e3 would have led to the same variations as could easily occur after the move played.

8 \textit{\texttt{\textbf{\textit{g5}}}}

On account of White’s backward development it would be safer for him to use this bishop for defensive purposes on the queenside, and to play instead 8 e3 (8...\textit{\texttt{\textbf{\textit{f6}}}} 9 \textit{\texttt{\textbf{\textit{d1}}}}). However, the text move cannot be considered an actual mistake.

8 ... \textit{\texttt{\textbf{\textit{f6}}}}
9 \textit{\texttt{\textbf{\textit{d2}}}} h6

This rather harmless attempt to create (in case of the natural answer 10 \textit{\texttt{\textbf{\textit{h4}}}}) new threats in connection with ...\textit{\texttt{\textbf{\textit{b4}}}}, followed by ...\textit{\texttt{g5}} and ...	extit{\texttt{e4}}, has unexpected and pleasant consequences.

10 \textit{\texttt{\textbf{\textit{xf6}}}}

This certainly gives Black more attacking chances than the retreat mentioned, but would not have proved too bad if White had taken full advantage of the square d5 which he gains by this exchange.

10 ... \textit{\texttt{\textbf{\textit{xf6}}}}
11 e3 0-0-0
12 0-0-0

The decisive error, allowing Black to regain the gambit pawn with persisting pressure. 12 \textit{\texttt{\textbf{\textit{d5}}}}! was necessary and if 12...\textit{\texttt{\textbf{\textit{g6}}}} (best), then 13 \textit{\texttt{\textbf{\textit{e2}}}} followed by \textit{\texttt{\textbf{\textit{ef4}}}} or c3, with possibilities of defence. Black has now the opportunity to carry out an attack on the king in the ‘good old style’.

12 ... \textit{\texttt{\textbf{\textit{g4}}}}
13 \textit{\texttt{\textbf{\textit{d5}}}} (D)

Too late!

\textbf{D}

13 ... \textit{\texttt{\textbf{\textit{xd5}}}}!
14 \textit{\texttt{\textbf{\textit{xd5}}}} a3!

After 14...\textit{\texttt{\textbf{\textit{xd1}}}} 15 \textit{\texttt{\textbf{\textit{xd1}}}} \textit{\texttt{\textbf{\textit{xf2}}}} 16 \textit{\texttt{\textbf{\textit{g4+}}}} f5 17 \textit{\texttt{\textbf{\textit{e2}}}} \textit{\texttt{\textbf{\textit{xe2}}}} followed by ...\textit{\texttt{\textbf{\textit{c5}}}}, Black would probably
have won after a long endgame. The move chosen by him is a result of the decision, plainly justified under the circumstances, to find a winning solution in the middlegame.

15 \[b3\]

There is nothing better; if, for instance, 15 \[d2\] (or 15 bxa3 \[c3+ 16 \[b1 \[d8! 17 \[xd8+ 1 \[xd8 with the double threat of 18...\[xd1 and 18...\[f5+) 15...\[xb2+! 16 \[xb2 \[c3+ 17 \[b1 (or 17 \[c2 \[a1+ followed by ...\[d8+) 17...\[e1+ 18 \[c2 \[d8 and wins.

15 ...
16 \[xa3
17 \[d3
And not 17...\[d8 because of 18 \[h3! \[f6 19 \[c3, with chances of salvation.

18 \[f3 \[xf3

Also here 18...\[d8 would have been out of place because of the reply 19 \[e2.

19 \[f5+ \[b8
20 \[xf3 \[e1+
21 \[c2 (D)

If he had given up the pawn the agony would not have lasted long: 21 \[d1 \[xe3+ 22 \[d2 \[e6! 23 \[b1 \[d8 24 \[f4+ \[a8, with quite a few deadly threats.

21 ...
22 \[g3+ \[e5+!
23 \[b3 \[d1+
24 \[a3 \[c5!

---

Quick death is now unavoidable—for instance 25 b4 \[c3+ 26 \[b2 \[c1#, 25 b3 \[a5+ 26 \[b4 \[d2# and the prettiest line, 25 \[b4 \[d2+! 26 \[xc5 b6+ 27 \[b5 \[a5#. 0-1

Game 70

Alekhine – Flohr

Bled 1931

Queen’s Gambit Accepted

1 d4 d5
2 c4 dxc4
3 \[f3 \[f6
4 e3 e6
5 \[xc4 c5
6 0-0 \[c6
7 \[e2 a6
8 \[d1

Oddly enough, this move, which does not contain any real threat and is therefore at this particular moment, to say the least, inexact—was almost unanimously adopted at the

---

1 Here White has a much better defence: 17 \[e2! \[xd5 18 \[xg4+ f5 19 \[xd5 fxg4
20 \[e2 \[c4 21 \[d2 \[e4+ 22 \[c1 \[xg2 23 \[g3 with just a slight advantage for Black. Therefore Black should prefer 15...\[a1+ 16 \[c2 \[xd1+ 17 \[xd1 \[xa2+ 18 \[c1 \[xa3+ 19 \[b1 \[d8, with a decisive attack.
time the actual game was played. After Euwe's win against me in the 5th match-game, 1937, and my win against Böök at Margate 1938, 'theory' will probably recognise the natural move 8...\textit{c}3! as best.

8 \textit{...} b5
9 dxc5

The positional refutation of 9 d5!? consists of 9...exd5 10 \textit{x}d5 \textit{x}d5 11 e4 \textit{c}7! 12 \textit{x}d5 \textit{e}6 \textit{\mp}.

9 \textit{...} \textit{c}7
10 \textit{d}3 \textit{xc}5
11 a4

Hoping to disorganise Black's position on the queenside, and succeeding only because of the following inferior rejoinder.

11 \textit{...} b4?

After this, a number of squares on the queenside will remain insufficiently protected and, what is more, Black will remain without any hope of a counter-attack as White's position is practically without weaknesses. A quite different situation would have been produced by the right answer 11...bxa4!, which would give Black, as compensation for the weak a-pawn, counter-threats against White's b-pawn.

12 \textit{bd}2 0-0

Slightly better, although not entirely satisfactory, was 12...\textit{a}5 as played, for instance, by Flohr in a match game against Euwe in 1932.

13 \textit{b}3 \textit{e}7
14 e4 \textit{d}7

The possibility of 15 e5 in connection with \textit{e}4 was certainly unpleasant.

15 \textit{e}3 \textit{de}5

The intended exchange of knights does not bring relief as it does not help to solve the important problem of the co-ordination of Black's rooks. 15...\textit{b}7 16 \textit{ac}1 \textit{b}8 was therefore slightly preferable.

16 \textit{xe}5 \textit{xe}5
17 \textit{ac}1 \textit{b}8 (D)

18 \textit{c}5!

From now on every exchange will facilitate the exploitation of the organic pawn weaknesses created by Black's 11th move.

18 \textit{...} \textit{xc}5
19 \textit{xc}5 \textit{b}6
20 \textit{h}5! \textit{d}7

As the knight was Black's only active piece, it would have been advisable not to remove it unless necessary. By playing 20...f6 he could offer some more resistance, although White's advantage after 21 \textit{f}1 \textit{d}8 22 \textit{d}4! followed by \textit{d}1, would still be considerable.

21 \textit{e}2 \textit{g}6

In order to open, without loss of time, a 'hole' for the king; but, as the following shows, this move weakens
the kingside, especially as White is by no means in a hurry to exchange queens. Black should take the knight immediately.

22 \( \text{Wg5} \) \( \text{Dxc5} \)
23 \( \text{Dxc5} \) \( a5 \)

One of White’s positional threats was 24 a5.

24 \( h4 \)
The punishment for 21...g6.
24 ... \( \text{Aa6} \)
25 \( \text{Af3!} \) \((D)\)

White’s bishop is stronger than Black’s. Now White has threats everywhere (26 h5; 26 \( \text{Axa5} \); 26 \( \text{Ad7} \), etc.).

25 ... \( f6 \)
26 \( \text{We3} \)

And now White begins to speculate on the unprotected position of the enemy’s queen!

26 ... \( \text{Ad8} \)
27 \( \text{Dxd8} \) \( \text{Dxd8} \)

Or 27...\( \text{Wxd8} \) 28 e5 f5 29 \( \text{Cc6} \) \( \text{Cc8} \) 30 \( \text{Cc5} \), with a winning position.

28 \( e5! \)
Forcing either the win of a pawn with an overwhelming position after

28...\( \text{fxe5} \) 29 \( \text{Wxe5} \) (even stronger is perhaps first 29 h5!), or the catastrophe which occurs in the actual game. The immediate 28 \( \text{Cc8} \) was not convincing because of 28...\( \text{Wd6} \).

28 ... \( f5 \)
29 \( \text{Cc8!} \) \( 1-0 \)

White wins at least a rook.

Game 71
Alekhine – Maroczy
Bled 1931
Queen’s Gambit Declined

1 \( d4 \) \( d5 \)
2 \( c4 \) \( e6 \)
3 \( \text{Cc3} \) \( \text{Cf6} \)
4 \( \text{Ag5} \) \( \text{Ce7} \)
5 \( e3 \) \( \text{Bbd7} \)
6 \( \text{Df3} \) \( 0-0 \)
7 \( \text{Cc1} \) \( h6 \)
8 \( \text{Ah4} \) \( c6 \)
9 \( \text{Ad3} \) \( a6 \)

The fashionable continuation, after which Black actually has little to fear, is 9...\( \text{Dxc4} \) 10 \( \text{Dxc4} \) b5 11 \( \text{Dd3} \) a6 and if 12 a4 (12 e4? \( \text{Dxe4} \) \( \text{f6} \) was Euwe-Alekhine, 28th game, 1935), then simply 12...\( \text{Bxa4} \).

10 \( 0-0 \) \( \text{Dxc4} \)
11 \( \text{Dxc4} \) \( c5 \)

It is rather risky to delay the development of the queenside. Instead, 11...\( b5 \) followed by ...\( \text{Bb7} \) and ...\( c5 \) was still a fairly good alternative.

12 \( a4! \)

This move, in connection with the following isolation of the central pawn, gives the game its character. After 12 \( \text{Dd3} \) or 12 \( \text{Wxe2} \) b5, it would probably develop on conventional
lines—and end with an honourable draw.

12 ... \( \text{W}a5 \)

From now on Maroczy plays very enterprising chess, combining defensive moves with counter-attacks against White's weaknesses at a4 and d4.

13 \( \text{W}e2 \) \( \text{cxd4!} \)

At the right moment as 14 \( \text{Q}xd4 \) \( \text{Q}e5 \) 15 \( \text{b}3 \) \( \text{g}6 \) 16 \( \text{g}3 \) e5 would be in Black's favour.

14 \( \text{exd4} \) \( \text{b}6 \)

Practically leaving the a-pawn to its fate. For the moment, it is true, it cannot well be taken because of 16 \( \text{Q}e4 \) with a very strong attack; but it remains weak almost until the dramatic end.

15 ... \( \text{d}7 \)

16 \( \text{Q}e5 \)

Threatening 17 \( \text{xf}6 \) followed by 18 \( \text{W}e4 \).

16 ... \( \text{Kfd8} (D) \)

17 \( \text{f}4 \)

White had decided already, by 12 a4, to conduct the whole game in a fortissimo style. Although the result justified this method, I am by no means sure that it was the most logical way to exploit White's unquestionable advantage in space. Here, for instance, the simple move 17 \( \text{W}f3 \) was to be seriously taken into consideration as:

1) 17...\( \text{Qxa4} \) would still be answered by 18 \( \text{Q}e4! \) ±;

2) 17...\( \text{Qxa4} \) would obviously be unsatisfactory because of 18 \( \text{W}xb7 \); and

3) after 17...\( \text{c}6 \) 18 \( \text{Qxc6} \) bxc6 19 \( \text{Kfd1} \) Black's pawns would be at least as vulnerable as White's.

17 ... \( \text{e}8 \)

18 \( \text{Q}g4 \)

The logical consequence of the previous move. White offers the d-pawn, as its defence by 18 \( \text{Kfd1} \) or 18 \( \text{f}2 \) would permit Black to parry the important threats by playing a knight to d5.

18 ... \( \text{Kxd4} \)

Black, on the other hand, has nothing better than to accept the offer, as by other moves White's attack would remain—with even material—at least as strong as in the actual game.

19 \( \text{xf6} \) \( \text{xf6} \)

20 \( \text{xf6+} \) \( \text{gxf6} \)

21 \( \text{Q}e4 (D) \)

Black's king's position is now dangerously compromised, especially as he cannot well protect the square f6 (if 21...\( \text{Q}d7 \) then 22 \( \text{f}5! \) with a strong attack).

21 ... \( \text{Kad8} ? \)

But he could—and should—save the f6-pawn by playing 21...\( \text{f}5 \) to
which White would reply 22 \( \text{Qf6}^+ \) \( \text{Qf8} \) (or 22...\( \text{Qg7} \) 23 \( \text{Qh5}^+ \) followed by b3) 23 b3! and try afterwards to exploit the weakness of Black's dark squares, with an uncertain result. The counter-attack initiated by the text move will be refuted chiefly because White will succeed in protecting his bishop indirectly, without any loss of time.

22 \( \text{Qxf6}^+ \) \( \text{Qf8} \)
23 \( \text{Qh7}^+! \)

Perhaps Maroczy had underestimated this check. If now 23...\( \text{Qg8} \), then 24 \( \text{Qg4}^+ \) \( \text{Qh8} \) 25 \( \text{Qh5}^! \) \( \text{Qxd3} \) 26 \( \text{Qxh6} \) and wins.

23 ... \( \text{Qe7} \)
24 \( \text{f5} \! \)

White's first indirect defence: if 24...\( \text{Qxd3} \)? then 25 \( \text{f6}^+ \) followed by 26 \( \text{Qxd3}^+ \).

24 ... \( \text{Qd8} \) \( D \)

But after this everything seems to be again in order, as the king has a comfortable escape at d8. However, the following reply, which was by no means easy to find, turns the tables.

25 \( \text{b4}!! \)

A surprising solution of the attacking problem, the idea of which is as follows: White succeeds either (in case of 25...\( \text{Qxb4} \)) in playing 26 \( \text{Qh5}! \) without permitting the strong answer 26...\( \text{Qd2}! \) or (as in the actual game) by entering with the queen into Black's position via e5.

25 ... \( \text{Qxb4} \)

An interesting finish would have occurred after 25...\( \text{Qxb4} \) 26 \( \text{Qh5}! \) e5! 27 \( \text{f6}^+ \) \( \text{Qd8} \) 28 \( \text{Qh6}^! \) \( \text{Qxd3} \) 29 \( \text{Qf8} \) \( \text{Qd7} \) 30 \( \text{Qc5} \) \( \text{Qxa4} \) 31 \( \text{Qxe5} \) and wins.

26 \( \text{Qe5}! \)

Threatening 27 \( \text{Qf6}^+ \) \( \text{Qd7} \) 28 \( \text{Qf8}^! \).

26 ... \( \text{Qd7} \)

Protects both critical squares and, apparently, at last wins the bishop.

---

1 Rather amusingly, Vuković, in his book *The Chess Sacrifice*, gave analysis showing that White could play more strongly here by 22 \( \text{Qxh6}^+ \); in case readers are baffled by this suggestion, I should add that Vuković incorrectly gave White's 18th move as \( \text{Qe4} \) instead of \( \text{Qg4} \).
27 \( \text{Wh8! (D)} \)

27 ... \( \text{Kxd3} \)

Losing one move earlier than he should. The best reply 27...\( \text{Wb6} \) would have forced White to disclose the last point of the combination started by his 25th move—28 a5! (the triumph of the neglected pawn!) with the variations 28...\( \text{Wxa5} \) 29 \( \text{Cc8} \) and 28...\( \text{Wa7} \) 29 f6+, as in the actual game\(^1\).

28 f6+! 1-0

As 28...\( \text{Qxf6} \) is met by 29 \( \text{Wxf6+} \) and 30 \( \text{Qf8#} \); if 28...\( \text{Qd8} \), then 29 \( \text{Wxe8+!} \) and 30 \( \text{Cc8#} \).

---

\(^1\) Vuković, who was by now back on track, correctly pointed out that 27...\( \text{Cc6} \) is a much better defence.

His analysis continued 28 \( \text{Bxc6 bxc6} \) 29 fxе6 fxе6 30 \( \text{Qf6 Qf7} \) 31 \( \text{Qxd7} \) (31 \( \text{Qxa6 Qf4} \) is equal) 31...\( \text{Qxd7} \) 32 \( \text{Wf6+ Qd6} \) 33 \( \text{Qxa6 Wb6+} \) 34 \( \text{Qh1 Wxa6} \) 35 \( \text{Qd1+ Qc7} \) 36 \( \text{Qxd7+ Qxd7} \) 37 \( \text{Wf7+} \) and this ending should be a draw. However, White can improve on this line by 32 \( \text{Qg6 Wc5+} \) 33 \( \text{Qh1 Wf2} \) 34 \( \text{Qa1! Wxf1+} \) 35 \( \text{Wxf1 Qxg6} \), when he has some advantage, although it is obviously going to be very hard to win this ending. Black himself has an alternative earlier, namely 30...\( \text{Qxf6} \) 31 \( \text{Wxf6+ Qd7} \) 32 \( \text{Qg7+ Qd8} \) 33 \( \text{Qb1 Wd6} \), with a slight advantage for White. This is no way detracts from Alekhine’s combination, since even perfect defence by Maroczy would have left Alekhine with some advantage; in the game itself, as so often happens, a long period of defence takes its toll and Maroczy blunders, allowing mate in three.
\( \text{\textit{x}}f3 10 \text{\textit{g}}xf3 \text{\textit{Q}}xc3 \) made the curious miscalculation 11 \( \text{\textit{Q}}xc6+ \) \text{\textit{b}}xc6 12 \( \text{\textit{W}}b7? \) — and after 12...\text{\textit{Q}}d5+ 13 \( \text{\textit{Q}}d2 \text{\textit{W}}b6! \) 14 \( \text{\textit{W}}xa8+ \text{\textit{Q}}d7 \) 15 0-0 \( \text{\textit{Q}}c7 \), was forced to give up a piece by 16 \( \text{\textit{Q}}a5 \), making further resistance practically hopeless. However, 8...\text{\textit{W}}a5 is, as the present game demonstrates, decidedly too risky. The correct line is 8...\text{\textit{Q}}c8 9 h3 \( \text{\textit{Q}}xf3 10 \text{\textit{W}}xf3 \text{\textit{e}}6 (D) \)

9 \( \text{\textit{W}}b3! \) \( \text{\textit{Q}}xf3 \)
10 \( \text{\textit{g}}xf3 \) \( \text{\textit{Q}}xc3 \)
11 \( \text{\textit{b}}xc3 \) \( \text{\textit{e}}6 (D) \)

Black has obtained, it is true, the better pawn position, but as the following effective pawn sacrifice will show, his king position is by no means safe. The next part of the game is highly instructive, since White's attack needed, in order to succeed, a particularly exact calculation.

\( \text{12} \ldots \text{exd}5 \)
\( \text{13} 0-0 \) \( 0-0-0 \)

The only move. After 13...\text{\textit{Q}}e7 14 \( \text{\textit{Q}}e1 \) the pin on the e-file would be deadly.

14 \( \text{\textit{Q}}xc6 \) \( \text{\textit{b}}xc6 \)
15 \( \text{\textit{Q}}b1 \) \( \text{\textit{W}}c7 \)

Or 15...\text{\textit{Q}}d7 16 c4!, with a tremendous attack.

16 \( \text{\textit{W}}a4 \) \( \text{\textit{Q}}d7 \)
17 \( \text{\textit{Q}}d2! \)

A difficult move, much more effective than 17 \( \text{\textit{Q}}f4 \) or 17 \( \text{\textit{Q}}e3 \). In spite of his accurate defence, Black will be unable to prevent a gradual demolition of his king's residence.

17 \( \ldots \) \( \text{\textit{Q}}c5 \)
18 \( \text{\textit{c}}4 \) \( \text{\textit{Q}}d8 \)

Again comparatively the best, as 18...\text{\textit{Q}}b6 would fail because of 19 \( \text{\textit{c}}5! \) \( \text{\textit{Q}}xc5 \) 20 \( \text{\textit{W}}a6+ \) \( \text{\textit{Q}}d8 \) 21 \( \text{\textit{Q}}a5 \) \( \text{\textit{Q}}b6 \) 22 \( \text{\textit{Q}}xb6 \).

19 \( \text{\textit{Q}}a5 \) \( \text{\textit{Q}}b6 \)
20 \( \text{\textit{Q}}xb6 \) \( \text{axb6 (D) \) \)

\( \text{12} \text{d}5! \)

It is necessary to sacrifice the pawn at once, as after 12 0-0 \( \text{\textit{Q}}d8 \) Black would obtain a satisfactory position.

\( \text{21} \text{\textit{W}}a8+! \)

The objects of this rather profound queen's manoeuvre are the following: firstly, in some important variations a white rook has to be
posted at a4, so the queen frees that square in view of that eventuality; secondly, if White plays at once 21 exd5 Black can answer 21...\(\textbf{N}xd5\) 22 \(\textbf{N}fd1\) \(\textbf{W}e7\)! 23 \(\textbf{N}xd5\) cxd5 24 \(\textbf{N}e1+\) \(\textbf{W}f6\) 25 \(\textbf{Wh}4+\) \(\textbf{Ng}6\) and White would have no more than perpetual check. Therefore he has to prevent the black king escaping via e7.

21 ... \(\textbf{W}c8\)
22 \(\textbf{Wa3}\) \(\textbf{W}b8\)
23 cxd5 cxd5

The alternative is 23...\(\textbf{N}xd5\) 24 \(\textbf{N}fd1\) \(\textbf{W}e8\) 25 \(\textbf{N}xd5+\) cxd5 26 \(\textbf{N}d1\) and now, after either 26...\(\textbf{W}e5\) or 26...\(\textbf{Ne}5\), White replies 27 f4 and Black has no adequate defence.

24 \(\textbf{N}b4!\)

The winning move, as Black has no time to play 24...\(\textbf{Ne}8\) on account of 25 \(\textbf{Na}4\).

24 ... \(\textbf{W}d6\)
25 \(\textbf{N}e1!\) \(\textbf{N}c7\)

Or 25...\(\textbf{N}e7\) 26 \(\textbf{N}d1\), with a winning attack.

26 \(\textbf{W}b3\) \(\textbf{N}e8\)
27 \(\textbf{N}d1\) \(\textbf{N}e5\)

Obviously, Black cannot protect both his pawns.

28 \(\textbf{N}xb6\) \(\textbf{N}c6\)
29 \(\textbf{N}xc6\) \(\textbf{N}g5+\)

Forced (29...\(\textbf{W}xc6\) 30 \(\textbf{W}b8+\)).

30 \(\textbf{N}h1\) \(\textbf{W}xc6\) \((D)\)
31 \(\textbf{N}e1!\)

Initiating the final attack.

31 ... \(\textbf{W}f6\)
32 \(\textbf{W}b8+\) \(\textbf{N}d7\)
33 f4 \(\textbf{N}g6\)

I expected here 33...\(\textbf{Nh}5\) 34 \(\textbf{W}e8+\) \(\textbf{Nd}6\) 35 \(\textbf{N}c1!\) \(\textbf{Nh}2+\) 36 \(\textbf{N}g1!\) forcing the win.

\(\textbf{W}e8+\) \(\textbf{c}7\)
35 \(\textbf{N}c1+\) \(\textbf{b}6\)
36 \(\textbf{N}b1+\) \(\textbf{c}5\)
37 \(\textbf{W}b5+\) 1-0

Game 73

Alekhine – Koltanowski

London 1932

Brilliancy Prize

Ruy Lopez

1 e4 e5
2 \(\textbf{Q}f3\) \(\textbf{Q}c6\)
3 \(\textbf{N}b5\) a6
4 \(\textbf{N}a4\) d6
5 \(\textbf{N}xc6+\) bxc6
6 d4 exd4

The usual defensive scheme is here 6...f6 followed by ...\(\textbf{Q}e7\)-g6. But Black in this game obviously wants a free diagonal for his dark-squared bishop.

7 \(\textbf{Q}xd4\) \(\textbf{Q}d7\)
8 0-0 g6
9 \(\textbf{Q}e3\)

White has nothing better than this calm development of forces—in the hope that the slight weakness of Black’s dark squares will sooner or later give him real chances.
9 ... $g7
10 $e1 $e7
11 $f4 0-0
12 $d2 c5
13 $b3

Not 13 $f3 because of 13...$g4. But 13 $de2 came seriously into consideration.

13 ... $c6
14 $h6 $e6
15 $xg7 $xg7
16 $d5 $f6 (D)

As the sequel shows, here Black should play 21...$xd5—but after 22 exd5 $d4 23 $xd4 cxd4 24 $xd4 $xb2 25 $d2 White would still keep a real, if not easily realisable, positional advantage.¹

![Chess Diagram]

22 $xc7!

As a rule, so-called ‘positional’ sacrifices are considered more difficult, and therefore more praiseworthy, than those which are based exclusively on an exact calculation of tactical possibilities. The present position offers, I believe, an exception, as the multitude and complexity of the variations following the knight sacrifice demanded much greater intensive mental work than any general evaluation of mutual possibilities.

22 ... $xc7
23 $xd6 $c4

Black had several other answers, but all of them would lose in the end.

¹ After 25...$a1+ 26 $h2 $b1 no advantage for White can be discerned—indeed, the impending ...$h1+ followed by ...$g1 or ...f5 would appear to give Black slightly the better chances.
as the following variations demonstrate:
1) 23...\textit{\&}xb3? 24 \textit{\&}xf6+ and then 25 \textit{\&}xb3.
3) 23...\textit{\&}c4 24 \textit{\&}xc5!.
4) 23...\textit{\&}d8 24 \textit{\&}f3 \textit{\&}f7 25 \textit{\&}xc5.
5) 23...\textit{\&}f7 24 \textit{\&}xf6! \textit{\&}d4 25 \textit{\&}xd4 exd4 26 \textit{\&}xc7 \textit{\&}xf6 27 \textit{\&}f3+.
6) 23...\textit{\&}e8 24 \textit{\&}xc5 \textit{\&}d8 25 b4 \textit{\&}f7 26 \textit{\&}xe6!.
7) 23...\textit{\&}f7 24 \textit{\&}f3 \textit{\&}e7 25 a4 \textit{\&}b6 (best) 26 \textit{\&}xe6+ \textit{\&}xe6 27 \textit{\&}xc5+ \textit{\&}d6 (or 27...\textit{\&}f7 28 \textit{\&}xf6 \textit{\&}g8 29 \textit{\&}e6!) 28 \textit{\&}xf6+ \textit{\&}xc5 29 \textit{\&}c3+ \textit{\&}b4 30 \textit{\&}d6+ and wins.

- 24 a4! \textit{\&}xa4
- 25 \textit{\&}xc5 \textit{\&}b5
- 26 \textit{\&}xf6+ \textit{\&}g8
- 27 \textit{\&}d7! \textit{\&}d8

Or 27...\textit{\&}e8 28 \textit{\&}c3 and wins.

- 28 \textit{\&}f3 \textit{\&}b4
- 29 c3 \textit{\&}b5
- 30 \textit{\&}e5! \textit{\&}dc8
- 31 \textit{\&}xc6 1-0

Since if now 31...\textit{\&}xc6, then 32 \textit{\&}d8 winning.

Game 74

Alekhine – Tartakower

\textit{London 1932}

Budapest Defence

1 d4 \textit{\&}f6
2 c4 e5
3 dxe5 \textit{\&}e4

Less usual, but not better than the alternative 3...\textit{\&}g4, against which I have had (excepting the Gilg game, Semmering 1926) rather pleasant experiences, too. Here, for instance, are two typical short 'Budapest' stories.

1) Alekhine-Rabinovich, Baden-Baden 1925: 1 d4 \textit{\&}f6 2 c4 e5 3 dxe5 \textit{\&}g4 4 e4 \textit{\&}xe5 5 f4 \textit{\&}g6 6 \textit{\&}f3 \textit{\&}c5 7 f5! \textit{\&}h4 8 \textit{\&}g5! \textit{\&}e7 9 \textit{\&}g4 f6 10 \textit{\&}h5+! g6 11 \textit{\&}xh4 fxg5 12 \textit{\&}xg5 \textit{\&}f7 13 \textit{\&}e2 0-0 14 \textit{\&}f1 \textit{\&}c6 15 \textit{\&}c3 \textit{\&}d4 16 fxg6 \textit{\&}xg6 17 \textit{\&}xf8+ \textit{\&}xf8 18 \textit{\&}h5 \textit{\&}b6 19 0-0-0 \textit{\&}g7 20 \textit{\&}f1 \textit{\&}e6 21 \textit{\&}f7+ \textit{\&}h8 22 \textit{\&}xe6 dxe6 23 \textit{\&}h6! 1-0.

2) Alekhine-Seitz, Hastings 1925/6: 1 d4 \textit{\&}f6 2 c4 e5 3 dxe5 \textit{\&}g4 4 e4 \textit{\&}xe5 5 f4 \textit{\&}ec6 6 \textit{\&}e3 \textit{\&}b4+ 7 \textit{\&}c3 \textit{\&}e7 8 \textit{\&}d3 f5 9 \textit{\&}h5+ g6 10 \textit{\&}f3 \textit{\&}xc3+ 11 bc3 fxe4 12 \textit{\&}xe4 0-0 13 \textit{\&}d5+! \textit{\&}h8 14 \textit{\&}h3 d6 15 0-0 \textit{\&}xh3 16 \textit{\&}xh3 \textit{\&}d7 17 f5! gxf5 18 \textit{\&}ab1! f4 19 \textit{\&}xf4 \textit{\&}xh3 20 \textit{\&}e5+ 1-0.

4 \textit{\&}d2 \textit{\&}c5

If 4...\textit{\&}b4 then 5 \textit{\&}f3 followed by a3 in order to obtain the advantage of the two bishops.

5 \textit{\&}gf3 \textit{\&}c6
6 g3 \textit{\&}e7
7 \textit{\&}g2 g6
8 \textit{\&}b1!
This at first sight surprising move is in reality perfectly logical. After Black has clearly shown his intention to develop the bishop at g7, White has no longer to reckon with any action on the diagonal a5-e1. There is no reason, therefore, for delay in placing his knight on the dominating square d5.

8 ... \( \text{a}xe5 \)
9 \( \text{a}xf3+ \)
10 \( \text{e}xf3 \) \( \text{a}g7 \)
11 \( \text{a}e1 \) \( \text{a}e6 \)
12 \( \text{a}c3 \) 0-0
13 \( \text{a}d5 \) \( \text{w}d8 \)
14 f4 c6

He must expel the white knight, thus creating a vulnerable weakness at d6, because after the immediate 14...d6 the temporary sacrifice 15 f5 would be too dangerous for Black.

15 \( \text{a}c3 \) d6
16 \( \text{a}e3 \) \( \text{w}c7 \)
17 \( \text{a}c1 \) \( \text{a}d7 \)
18 \( \text{w}d2 \) \( \text{a}d8 \)
19 \( \text{w}d1 \) \( \text{a}c8 \)
20 \( \text{a}e4 (D) \)
20 ... \( \text{a}c5 \)

This will be refutted by the combination starting with White’s 24th move, but owing to the weakness on d6, Black’s position was already very difficult. For instance, unsatisfactory would be 20...d5 21 cxd5 \( \text{a}xd5 \) 22 \( \text{a}f6+ \) and 23 \( \text{a}xd5 \), winning the exchange; or 20...c5 21 f5\! \( \text{g}xf5 \) 22 \( \text{a}c3 \) \( \text{a}d4 \) 23 \( \text{a}d5 \) \( \text{w}b8 \) 24 \( \text{a}g5 \) \( \pm \); and after the comparatively safest 20...b6, White could also easily increase his space advantage by 21 b4.

21 \( \text{a}xd6! \) \( \text{a}a4 \)
22 c5 \( \text{a}xb2 \)
23 \( \text{a}e1 \) b5 (D)

This rejoinder, the logical upshot of the three previous moves, will prove insufficient, but Black did not have any saving course, for instance 23...\( \text{a}e6 \) 24 \( \text{a}d4! \) or 23...\( \text{a}f5 \) 24 g4\! \( \text{x}g4 \) 25 \( \text{a}d4 \), in each case with a decisive advantage for White.

---

1 This is certainly wrong, as the latter line may be continued by 25...\( \text{a}xd6! \) 26 cxd6 \( \text{w}xd6 \) and now 27 \( \text{a}e5 \) \( \text{a}a4! \), 27 \( \text{a}e4 \) \( \text{a}d8 \) 28 \( \text{w}xb2 \) \( \text{a}xd4 \) and 27 \( \text{w}xb2 \) \( \text{a}xd4 \) 28 \( \text{w}xb7 \) \( \text{w}xf4 \) are all clearly in Black’s favour. Moreover, even the relatively superior 23...\( \text{a}f5 \) 24 \( \text{a}f1 \) b6 cannot be assessed as anything more than ‘unclear’. However, Alekhine could have played much more accurately by 22 \( \text{w}b4! \) \( \text{a}xb2 \) 23 \( \text{a}d2 \). The idea is the same—trapping the knight on b2—but with the important difference that White’s rook can stay on the d-file. There are many threats, e.g. 24 c5, 24 \( \text{a}xa7 \) and 24 \( \text{a}xc8 \), and after 23...b6 24 c5 bxc5 25 \( \text{w}xc5 \) (25 \( \text{a}xc5 \) is also strong) Black will simply lose his queenside pawns.
24 cxb6!

A surprising but not very complicated combination. The only difficulty was the necessity of foreseeing this possibility several moves before, when making the capture 21 Qxd6.

24 ... Wxd6
25 Wxd6 Hxd6
26 bxa7 Hb7
27 Hc5 Hdd8
28 Hxf8 Hxf8
29 Hxc6 Hxc6
30 Hxc6 Hc8

Black's moves were practically forced and, his position being absolutely hopeless, he prefers a quick end. If, instead of this, 30...Hd4, then 31 Hd6 also wins immediately.

31 Hb6 Hxa7
32 Hb8#

Game 75
Alekhine – Sultan Khan
Berne 1932
Caro-Kann Defence

5 Hc3 Hc6
6 Hf3 Hg4
7 exd5 Hxd5
8 Hb5 a6

For 8...Wa5 see the game against Winter (game 72). The point of the text move is a positional pawn offer, by no means easy to refute over the board.

9 Hxc6+ bxc6
10 Wd4! Ac3

The logical consequence of his 8th move, since 10...Ad7 11 He5 would obviously be to White's advantage.

11 Wxc6+ Ad7
12 Wxc3 Ae8
13 We3 Hb5

It becomes evident that Black is not without compensation for the minus pawn: White's d-pawn is isolated and—what is more important—he will be forced, in order to castle, to weaken his queenside by the following moves.

14 a4 Ac4
15 b3 Ad5
16 0-0 Wb6 (D)

17 Hd2!
Protecting the b-pawn by 17 \( \text{Nb1} \) would be a poor strategy, after which Black would have found time to finish his development by 17...e6, ...\( \text{Nd6/e7} \) and ...0-0.

17 ... e6

Or 17...\( \text{wx}b3 \) 18 \( \text{Afc1}! \xanch x1+ 19 \xanch x1 \text{wx}e3 20 fxe3 e6 (or 20...\( \text{Axf3} \) 21 gxf3 \( \text{Ad7} \) 22 \( \text{Aa5} \)) 21 \( \text{Ac7} \) followed by \( \text{Aa7} \) ±.

18 \( \text{Afc1} \) \( \text{Ab8} \)

Comparatively better than the exchange of rooks.

19 \( \text{De5} \) f6

Underestimating the strength of the reply; but 19...\( \text{Ae7} \) was also unsatisfactory, for instance 20 \( \text{Dc4} \) \( \text{wx}b3 \) 21 \( \text{wx}b3 \xanch x3b3 22 \( \text{Dd6} \) ±.

20 \( \text{Dc6}! \)

The object of this knight manoeuvre is to definitely end Black's attacks against the b-pawn.

20 ... \( \text{Aa8} \)

The only move, as 20...\( \text{Ac8} \) would be inferior because of 21 \( \text{Db4} \) !.

21 \( \text{Aa5} \)

Intending 22 \( \text{Ac6} \) !.

21 ... \( \text{Af7} \)

This king position at an early stage of the game is more familiar to Sultan Khan than to European or American players, as in Indian Chess castling is effected in three moves: (1) ...\( \text{Ae7} \), d7 or f7; (2) a rook move from its original square; (3) a knight's move, with the king back on the first rank and on the side originally occupied by the rook—this provided the king has not been under check in the meantime. Returning to the present game, one must admit that Black, owing to the threat mentioned above, did not have anything better than the king move.

22 \( \text{Cc4} \) \( \text{wb7} \)

23 \( \text{Wg3} \) \( \text{Be7} \)

24 a5

The initial move of the decisive plan: the establishment of the knight at b6 will permit White to take full advantage of the c-file.

24 ... \( \text{Cc6} (D) \)

25 \( \text{Db6} \)

26 \( \text{Cc4}! \)

This had to be precisely calculated, because of the possible answer 26...e5, in which case White had decided to give back the extra pawn in order to obtain a strong direct attack. The continuation would be 27 \( \text{Aac1}! \xanch xd4 28 \xanch x6 \xanch xd2 29 \text{Wg4}! \text{Afd8} \) 30 \( \text{We6}+ \text{Af8} 31 \text{h3} \xanch d1+ 32 \xanch xd1 \xanch xd1+ 33 \text{Ahe2} \) ±.

26 ... \( \text{He8} \)

27 \( \text{Aac1} \) \( \text{Ae5} \)

28 \( \text{Ac7} \) \( \text{We4} \)

29 d5!

Instead of the simple continuation 29 \( \text{Ad3} \)—which in the long run would probably also prove to
sufficient—White decides to force the game by a sharply calculated combination. If Black had now tried his best practical chance 29...fxd5, the following variation would have occurred: 30 \text{Re}1 \text{Se}2 31 \text{Qa}4! (one of the important links of White’s combination) 31...d4 32 \text{Cc}5 \text{Wc}2 33 \text{Exe}2 \text{Wd}1+ 34 \text{Re}1 \text{Wxd}2 35 \text{Qf}1! and Black would be defenceless against the many threats. The remaining moves would probably be 35...\text{Qg}8 36 \text{De}6 \text{g}6 37 \text{Qxd}8 \text{Wxe}1+ 38 \text{Bxe}1 \text{Qd}6+ 39 \text{Qd}2 \text{Qxg}3 40 \text{hxg}3 \text{Exd}8 41 \text{Cc}6 \text{Qd}5 42 \text{b}4 after which Black would have to resign.

\text{29} ... \text{Qg}8

Leads to an even more rapid debacle because of White’s 31st move.

30 \text{Re}1 \text{Wf}5
31 \text{Qb}4! \text{Ad}7

As useless as anything else.

32 \text{Exd}7 \text{Qxd}7
33 \text{Qxe}7 \text{exd}5

Or 33...\text{Exe}7 34 \text{Wd}6 and wins.

34 \text{Wd}6 1-0

Game 76
Alekhone – Flohr
\textit{Berne 1932}
Colle System

1 \text{d}4 \text{d}5
2 \text{Qf}3 \text{Qf}6
3 \text{e}3

This quiet move—the idea of which is to postpone the fight for the centre until White has brought his king into safety—procured the regretted Belgian champion a long series of brilliant victories. Its objective value had been already put in question by the variation 3...\text{Qf}5 4 \text{Qd}3 \text{e}6! introduced in Colle-Alekhone, San Remo 1930 and adopted since, for instance, by Dr. Euwe against me in a match game, 1935. The defence chosen here by Flohr allows White to fulfil his plan of development.

3 ... \text{e}6
4 \text{Qd}3 \text{c}5
5 \text{c}3 \text{Qc}6
6 \text{Qbd}2 \text{Wc}7
7 0-0 \text{Qe}7
8 \text{We}2 0-0
9 \text{e}4

As I found out afterwards, this rather natural move had not been tried before. By adopting the usual 9 \text{dxc}5 \text{Qxc}5 10 \text{e}4 I would have been put in the not altogether pleasant position of having to fight against another innovation of mine (Gilg-Alekhone, Kecskemet 1927), namely 10...\text{Qd}6! 11 \text{Re}1 \text{Qg}4!, with approximately even prospects.

9 ... \text{dxe}4

9...\text{cxd}4 would be unsatisfactory because of 10 \text{e}5! \text{Qd}7 (or 10...\text{Qh}5 11 \text{Qb}3 threatening g4) 11 \text{cxd}4 \text{Qb}4 12 \text{Qb}5! \text{a}6 13 \text{Qa}4 with a clear advantage for White.

10 \text{Qxe}4 \text{cxd}4
11 \text{Qxd}4

Not 11 \text{cxd}4 as it is in White’s interest to exchange the maximum number of pieces able to attack his isolated pawn.

11 ... \text{Qxd}4
12 \text{cxd}4 \text{Qxe}4
Instead 12...\(\text{d}5\) 13 \(\text{w}f3\)! would have led to a more complicated middlegame position. However, the text move should have been sufficient for equality.

13 \(\text{x}e4\) \(f5\)

But from now on Flohr decidedly overestimates his position, which he very seldom does. After the simple line 13...\(\text{d}7\) 14 \(\text{w}f3\) \(\text{c}6\), the natural outcome would have been a draw.

14 \(\text{f}3\) \(\text{f}6\)

This move and the next one are the logical consequences of the unfortunate attempt to exploit the ‘weakness’ at \(d4\). It was still comparatively better to play 14...\(\text{d}7\).

15 \(\text{d}1\) \(\text{d}8\) (\(D\))

This pawn is poisoned, as the answer shows. But also 18...\(\text{b}8\) 19 \(\text{a}3\)!, threatening 20 \(\text{b}4\), was already practically hopeless for Black.

19 \(\text{a}5\)!

If the rook leaves the d-file, then 20 \(\text{c}4\)! wins immediately.

20 \(\text{xd}4\)!

This is the convincing refutation of Black’s ultra-materialistic tendencies in this game.

20...

21 \(\text{xe}6+\)

21...

22 \(\text{xc}8+\)

23 \(\text{xc}8\)

24 \(\text{xb}7\)

25 \(\text{h}3\)

Not 25 \(\text{c}3\)? due to 25...\(\text{xc}3\)!

25...

26 \(\text{c}5\)

27 \(\text{d}5+\)

28 \(\text{xe}7\)

1-0

Game 77
Alekhine – Steiner
Pasadena 1932
Ruy Lopez

1 \(\text{e}4\) \(\text{e}5\)
2 \(\text{f}3\) \(\text{c}6\)
3 \(\text{b}5\) \(a6\)
4 \(\text{a}4\) \(\text{f}6\)
5 0-0 \(\text{c}5\)

Having been for a period rather partial towards this move (see, for example, game 1), I must, to my regret, now admit that it is not quite sufficient against accurate play. And as 5...\(d6\) has recently been also
somewhat discredited, Black has been practically brought back to the old choice between the speculative $5...\text{dxe}4$ (Open Defence) and the cautious $5...\text{c}e7$ (Closed Defence).

\begin{align*}
6 & \text{c3} & \text{dxe}4 \\
7 & \text{d}4 & \text{a}7 \\
8 & \text{w}e2 & \\
\end{align*}

I decided to follow here the line of play adopted against me by Yates at Hastings 1922; although White obtained in that game only a draw I hoped to find over the board some better moves than those made by Yates—but actually there happened to be none. Much better than the queen move is $8 \text{e}e1$ (which is also more logical, as it brings a new piece into action), and if $8...\text{f}5$ then $9 \text{bd}2 \text{0-0} 10 \text{dxe}4 \text{fxe}4 11 \text{g}5$ followed by $12 \text{exe}4$ with a clear advantage.

\begin{align*}
8 & \text{...} & \text{f}5 \\
9 & \text{dxe}5 & \text{0-0} \\
10 & \text{b}3 & \text{h}8 \\
11 & \text{bd}2 & \text{we}8 \\
\end{align*}

An interesting idea à la Marshall: Black sacrifices 1-2 pawns for rapid development, after which White’s position will, for a while, look somewhat critical. However, the attempt can, and will, be refuted; therefore much to be preferred was (as happened in the Hastings game mentioned) $11...\text{d}5 12 \text{exd}6 \text{dxe}6 13 \text{c}4 \text{f}4! 14 \text{d}5 (or 14 \text{xd}6 \text{cxd}6! 15 \text{d}1 \text{g}4) 14...\text{exe}5 15 \text{exe}5 \text{wg}5$, with fairly good prospects for Black.

\begin{align*}
12 & \text{dxe}4 & \text{fxe}4 \\
13 & \text{w}e4 & \text{d}5! \\
\end{align*}

This is the point of the first sacrifice—Black will develop his c8-bishop with tempo.

\begin{align*}
14 & \text{xd}5 \\
\text{Better than 14 \text{xd}5 \text{g}4 15 \text{g}5 \text{exe}5, with unpleasant threats.} \\
14 & \text{...} & \text{f}5 \\
15 & \text{w}h4 & \text{exe}5 (D) \\
\end{align*}

16 \text{xb}7!

The only way to successfully meet Black’s attack against f2. 16 \text{dxe}5 \text{exe}5 17 \text{xb}7 would be unsatisfactory because of 17...\text{d}3! 18 \text{xa}8 \text{xf}2+! 19 \text{h}1 \text{we}8! (better than 19...\text{xf}1 20 \text{we}4!) with strong pressure for Black.

\begin{align*}
16 & \text{...} & \text{b}8 \\
17 & \text{dxe}5 & \text{xb}7 \\
\text{If now 17...\text{exe}5 then 18 \text{xa}6! parrying Black’s main threat ...\text{d}3. This was the point of White’s 16th move.} \\
18 & \text{e}1! \\
\text{Black has no means of profiting from this momentary weakening of f2.} \\
18 & \text{...} & \text{b}5 \\
19 & \text{f}3 & \text{c}8 \\
20 & \text{c}4 & \text{b}7 \\
\end{align*}
21 b3
In connection with the next move a much more rapid solution than the passive 21 h3.
21 ... \text{h}4 (D)

Hoping, after 26 \text{W}xg5+ \text{h}7, to transpose into the last variation mentioned.
26 \text{W}h5! \text{e}6
27 \text{D}d7! 1-0

After 27...\text{W}xd7, White forces the win like this: 28 \text{W}xg5+ \text{f}7 29 \text{W}f6+ \text{g}8 30 \text{h}8+! \text{f}7 31 \text{W}xh7+ \text{e}8 32 \text{g}6+ \text{e}7 33 \text{D}ad1! \text{c}6 34 \text{g}5+ \text{f}7 35 \text{W}f6+ followed by mate in two.

Game 78
Alekhine – Kimura
*Blindfold Exhibition on 15 boards,*
_Tokyo 1933_
Ruy Lopez

1 e4 e5
2 \text{D}f3 \text{D}c6
3 \text{D}b5 a6
4 \text{D}xc6 \text{bxc6}

Although playable, this move is seldom adopted, since 4...dxc6 gives Black quite a satisfactory game.
5 d4 exd4
6 \text{W}xd4 \text{d}6

More natural than 6...\text{W}f6 tried by me against Duras in Mannheim 1914, which can be advantageously answered by 7 e5! \text{W}g6 8 0-0, for the acceptance of the pawn sacrifice (8...\text{W}xc2) would be decidedly too dangerous for Black.

7 0-0 \text{e}6
8 \text{D}c3 \text{D}f6
9 \text{D}g5

The positional advantage that White could obtain by playing here on the next move e5 did not look convincing enough after ...\text{D}d5.
9 ... \( \text{\text{"e7}} \)
10 \( \text{\text{"a4}} \) \( \text{\text{"d7}} \)
11 \( \text{\text{"ad1}} \) 0-0 \( (D) \)

12 \( \text{\text{"e5!}} \)

Now this advance secures White a clear supremacy in one form or another. The main variation I considered was 12...\( \text{\text{"d5}} \) 13 \( \text{\text{"xe7}} \) \( \text{\text{"xe7}} \) (or 13...\( \text{\text{"xc3}} \) 14 \( \text{\text{"h4!}} \) 14 \( \text{\text{"xd5}} \) \cxd5 15 \( \text{\text{"a3!}} \), bringing Black into trouble.

12 ... \( \text{\text{"e8}} \)
13 \( \text{\text{"xe7}} \) \( \text{\text{"xe7}} \)
14 \( \text{\text{"exd6}} \) \cxd6
15 \( \text{\text{"f61}} \) \( \text{\text{"d8}} \)

A sad necessity for Black, since 15...\( \text{\text{"f6}} \) 16 \( \text{\text{"e5!}} \) would be practically decisive.

16 \( \text{\text{"d4!}} \)

If now 16...c5, then 17 \( \text{\text{"c6}} \) \( \text{\text{"c7}} \) 18 \( \text{\text{"d5!}} \) \( \text{\text{"b7}} \) 19 \( \text{\text{"c7+}} \) \( \text{\text{"h8}} \) 20 \( \text{\text{"h4}} \) (threatening \( \text{\text{"e4}} \) followed by \( \text{\text{"xh7+!}} \)) with a strong attack on Black’s king.

16 ... \( \text{\text{"c7}} \)
17 \( \text{\text{"e7}} \) \( \text{\text{"f6}} \)
18 \( \text{\text{"f5!}} \)

The simpler move 18 \( \text{\text{"de1}} \) would maintain White’s advantage without complications, but the line selected was tempting—and proved correct.

18 ... \( \text{\text{"d8}} \)

The comparatively most embarrassing answer for White, whose pieces begin to ‘hang’. The alternative 18...\( \text{\text{"xe8}} \) would give him an easier job: 19 \( \text{\text{"e4!}} \) \( \text{\text{"xe4}} \) 20 \( \text{\text{"xe4}} \) \( \text{\text{"xe7}} \) 21 \( \text{\text{"xe7}} \) \( \text{\text{"e8}} \) 22 \( \text{\text{"xd6 \text{"xd6}} \) \cxd6 23 \( \text{\text{"c4 \text{"c2}} \) 24 \( \text{\text{"c3}} \) \( \text{\text{"c2}} \) 25 \( \text{\text{"e3}} \) and wins.

19 \( \text{\text{"xd6}} \) \( \text{\text{"e8}} \) \( (D) \)

Seems to force the variation 20 \( \text{\text{"xe8+}} \) \( \text{\text{"xe8}} \) 21 \( \text{\text{"e3}} \), after which Black, by playing, for instance, 21...\( \text{\text{"b8}} \) could still set the ‘blind’ opponent some problems. All the more surprising is the following manoeuvre, which in a couple of moves deprives Black of any fighting chances.

20 \( \text{\text{"e4!}} \)

The first point of the attack started with 18 \( \text{\text{"f5}} \), by which White only seemingly allows a desirable transaction for Black.

20 ... \( \text{\text{"xe7}} \)

Forced, as 20...\( \text{\text{"xe4}} \) 21 \( \text{\text{"xd7}} \) would be hopeless.
21 \( \texttt{Qxf6+} \) \( \texttt{Qh8} \)
Or 21...\( \texttt{Qf8} \) 22 \( \texttt{Qxh7+} \) \( \texttt{Qg8} \) 23 \( \texttt{Qf6+} \) \( \texttt{Qf8} \) 24 \( \texttt{Qxe7} \) \( \texttt{gx6} \) 25 \( \texttt{Qxc6} \) \( \texttt{We8} \) 26 \( \texttt{Wb4!} \) a5 27 \( \texttt{Wc3} \) and wins\(^1\).
22 \( \texttt{Qxe7} \) \( \texttt{Wxe7} \)

Expecting not without pleasure the variation 23 \( \texttt{Qe4} \) \( \texttt{Qf5} \) 24 \( \texttt{Qd4} \) c5 25 \( \texttt{Qc4} \) \( \texttt{Qd8} \), with a counter-attack.
23 \( \texttt{We4}! \)

A most disagreeable surprise for Black: not only is the mate protected, but White himself threatens a mate at h7 and thus forces the simplification.
23 ... \( \texttt{Wxe4} \)
24 \( \texttt{Qxe4} \) \( \texttt{Qe6} \)
25 b3 g6

Still hoping for 26 \( \texttt{Qxc6} \) ? \( \texttt{Qd5} \). But after White also avoids this 'trap', Black could just as well quietly resign.
26 \( \texttt{Qc5} \) \( \texttt{Qf5} \)
27 \( \texttt{Qxc6} \) \( \texttt{We8} \)

I was mistaken—there was still a chance to give a mate on the 8th rank!
28 f3 \( \texttt{Qe2} \)
29 \( \texttt{Qxa6} \) \( \texttt{Qxc2} \)
30 \( \texttt{Qe4} \) \( \texttt{Qe6} \)
31 h4 \( \texttt{Qg7} \)
32 \( \texttt{Qh2} \) \( \texttt{Qh6} \)
33 \( \texttt{Qg3} \) \( \texttt{Qd7} \)
34 a4 f5
35 \( \texttt{Qg5} \) \( \texttt{Qc3} \)
36 \( \texttt{Qa7} \) \( \texttt{Qd3} \)
37 a5 \( \texttt{Qh5} \)
38 \( \texttt{Qxh7} \) 1-0

---

\( \texttt{\textsuperscript{1}} \) Actually 27 \( \texttt{Qxa5} \) is clearer, since 27 \( \texttt{Wc3} \) sheds a piece after the reply 27...\( \texttt{Qc8} \)
(admittedly for a lot of pawns, but why make life difficult?).
Black to weaken—by answering ...a5—the b5-square.

7 ... 0-0  
8 ạe3 h6  

Preventing 9 wd2, followed by ạh6, which would eliminate the only more or less active black piece.  
9 wd2 ạh7  
10 h3  

In order not to have to reckon with the possibility ...ạf6 and if e5, then ...ạg4.  

10 ...  c6  

This, obviously, weakens d6—an effect which, however, should not have had a decisive character. Besides, it is already extremely difficult to indicate a suitable plan of further development for Black.  

11 ạf4  d5  

Also unsatisfactory was 11...e5 12 dxex5 dxex5 (in case of retaking with pieces on e5, Black would, after the exchange of queens, finally lose his f-pawn) 13 ạe3 ±. But by playing 11...ạb6 12 ạd3 a5 Black could obtain a comparatively steadier position than after the compromising pawn move that he actually chose.  

12 ạd3  a6? (D)  

Black does not realise that the d6-square has to be protected at all costs. From now on, the dominating position of White's dark-squared bishop will alone prove enough to decide the battle. Thus 12...ạf6 was necessary, heading for e8, with a playable game for Black, although White would find it easy to increase his pressure—for instance, by 13 a5.  

13 ạd6  f5  

Or 13...ạf6 14 e5 ạe8 15 ạa3 followed by h4, with an easy kingside attack.  

14 e5 ạg8  
15 h4  

White's overwhelming positional advantage allows him quietly to select the method he prefers for entering Black's inadequately protected fortress. Besides the text move, which inaugurates an irresistible plan (status quo on the kingside, and opening of a file on the other wing), he could also start a kingside attack with the spectacular coup 15 ạg5. However, this would not produce any immediate results after the right answer 15...ạf8 and if 16 ạe2 (or 16 ạh4 ạg5 17 ạh5 ạg6) then 16...ạg7 with at least a temporarily sufficient defence.  

15 ...  b6!  

Preparing ...ạf8, which, if played directly, would be a mistake because of 16 ạg5!. But from now on the queen offer can be met by ...ạa7!.  

16 ạe2 ạf8  
17 a5  

Before breaking in, White weakens to a maximum the dark squares
in Black’s position; the final section of the game will illustrate the usefulness of this procedure.

17 ... b5
18 g3!

In connection with the next two moves, a prophylactic manoeuvre, by which White prevents once and for all any serious attempt by Black to obtain a counter-attack against his king.

18 ... h8
19 g2 g8
20 h1 f7

The king is no better here than at h7. But as Black is not yet in a mood to resign he has willy-nilly to move something...

21 f4 g8
22 b3

After this, White’s strategic plan becomes quite obvious—there is no more defence against c4 in connection with the opening of the b- or c-file.

22 ... h7
23 c4 d7
24 ac1 f8 (D)

This frees the square d3 for the knight, and at the same time stops the advance of Black’s g-pawn—for instance 25...g5? 26 hxg5 dxg5 27 xg5+ hxg5 (or 27...xg5 28 h3 followed by h5+ and White wins) 28 h5+ g7 29 x6+ x6 30 xg5+, followed by mate.

25 ... c8
26 cxd5

It does not often happen that a game is strategically decided long before the first capture, which here signifies not the beginning, but practically the end of the fight.

26 ... cxd5

Or 26...xd6 27 dxe6+ xxe6 28 xxe6 xxe6 29 xxc6 and wins.

27 xf8

The bishop has done more than his duty and can now quietly disappear.

27 ... xf8
28 ec5 a7
29 d3 g7

As a consequence of his 18th-20th moves, the rejoinder ...g5 would obviously be entirely in White’s favour.

30 hc1 c8
31 xec8 xc8
32 wc3

The dark squares in Black’s camp are as many open wounds. No wonder that he decides to try the following desperate diversion.

32 ... h7
33 wc5 g7 (D)
34 wb6!

All very simple, but with deadly effect. The knight, after having been
brought to c5, will undertake the final execution.

34 ... \textit{We}7
35 \textit{Ce}5 g5

At last! But as the following convincingly proves, this attempt to generate counterplay is now perfectly harmless.

36 h\textit{xg}5 h\textit{xg}5
37 \textit{de}1!

In order to meet 37...f4 by 38 \textit{g}4! and 37...g4 by 38 \textit{ed}3 followed by \textit{df}4.

37 ... \textit{G}g6
38 \textit{ed}3 f4
39 \textit{h}1+ \textit{G}g8
40 \textit{g}4 fxg3
41 fxg3

The agglomeration of forces on the g-file is rather picturesque. Instead of the following ‘sacrifice’, Black could as well resign.

41 ... \textit{h}4+
42 gxh4 gxh4
43 \textit{f}2 \textit{f}7
44 \textit{xe}6 \textit{h}7
45 \textit{d}6 1-0

A strangulation game \textit{à la} Rubinstein or Dr. Tarrasch of the early days.

---

\textbf{Game 80}
\textit{Znosko-Borovsky – Alekhine}
\textit{Paris 1933}
Ruy Lopez

1 e4 e5
2 \textit{df}3 \textit{Cc}6
3 \textit{b}5 a6
4 \textit{a}4 \textit{df}6
5 0-0 d6

Safer is first 5...\textit{e}7 as after the text move White, according to the latest investigations, can obtain an advantage by continuing 6 \textit{xc}6+ bxc6 7 d4 \textit{xe}4 8 \textit{e}1 f5 9 dxe5 d5 10 \textit{d}4 c5 11 \textit{e}2, followed by \textit{d}4.

6 c3 \textit{dd}7
7 \textit{e}1 \textit{e}7
8 d4 0-0
9 \textit{bd}2 \textit{ce}8

This original move (the idea of which is to keep the central position intact by means of ...\textit{d}7 and utilise—after ...f6—the light-squared bishop on the diagonal h5-d1) was introduced by me (after the moves 9...\textit{h}8 10 h3) in my game against L. Steiner in Kecskemét 1927. Afterwards it was baptised (not by me) the ‘Kecskemét Variation’. This denomination is illogical, in as much as ...\textit{e}8 is the key-move, not of a ‘variation’, but of a system!

The present game presents some theoretical interest as it shows that White, even if he is playing only for a draw, cannot, after the text move, obtain absolute equality by liquidating the tension in the centre.

10 \textit{xc}6 \textit{xc}6
11 dxe5 dxe5
12 ∆xe5 ∆xe4
13 ∆xe4 ♕xd1!

13...∆xe4 would be a mistake because of 14 ∆d7!.

14 ∆xf6+

After 14 ∆xd1 ∆xe4 there would still be sufficient material left for complicating the fight. After the exchange of the knights White expected to reach a ‘drawn’ position by 14...∆xf6 15 ∆xd1 ∆xe5 16 ∆xe3, but ...

14 ... gxf6!

The only way—and an absolutely safe one—to play ‘for the win’.

15 ∆xd1 fxe5 (D)

The endgame position reached is by no means as easy to conduct—especially for the first player—as it appears. Black’s plan—which will prove a complete success—is divided into the following parts:

1) Exchange one pair of rooks.

2) Bring the king to e6 where he will be protected from a frontal attack by the e-pawn and can prevent the entrance of the remaining white rook at d7.

3) By operating with the rook on the open g-file and advancing the h-pawn, force the opening of the h-file.

4) After this the white king—and eventually also the bishop—will be kept busy in order to prevent the intrusion of the black rook at h1 or h2.

5) In the meantime Black, by advancing his a- and b-pawns, will sooner or later succeed in opening one file on the queenside.

6) As, at that moment, the white king will still be on the other wing, White will not have sufficient force to prevent the final intrusion of the black rook on his first or second rank.

Granted that if White had, from the beginning, realised that there actually existed a danger of losing this endgame, he probably would, by extremely careful defence, have saved it. But as it happened, Black played with a definite plan, and White only with the conviction that the game must be a draw. And the result was a very instructive series of typical stratagems much more useful for inexperienced players than so-called ‘brilliancies’.

16 ♖h6

Certainly not an error but a proof that White has not as yet grasped the spirit of the position. Otherwise he would not have been anxious to ‘force’ the exchange of one pair of rooks which, as mentioned, is quite welcome to the opponent.

16 ... ♕fd8
17 ♕f1
A more aggressive line starting by 17 g4 would perhaps be advisable. But Black in this case too would maintain opportunities for complicating matters after 17...f6 followed by ...\(\text{f7-e6}\).

17 ... \(\text{f5}\)
18 \(\text{\textcolor{red}{x}d8+}\) \(\text{\textcolor{red}{x}d8}\)
19 \(\text{g3}\)

19...f4 was a serious threat.

19 ... \(\text{\textcolor{red}{f7}}\)
20 \(\text{\textcolor{red}{e}e3}\) \(\text{h5}\)
21 \(\text{\textcolor{red}{e}e2}\) \(\text{\textcolor{red}{e}e6}\)
22 \(\text{\textcolor{red}{d}d1}\) \(\text{\textcolor{red}{g}g8}\)

If now 23 h4, then 23...\(\text{\textcolor{red}{x}g4}\) with the strong threat 24...f4. White is therefore practically forced to allow the opening of the h-file.

23 \(\text{f3}\) \(\text{h4}\)
24 \(\text{\textcolor{red}{f}f2}\) \(\text{hxg3}\)
25 \(\text{hxg3}\) \(\text{\textcolor{red}{h}h8}\)
26 \(\text{\textcolor{red}{g}g1}\) \(\text{\textcolor{red}{d}d6}\)
27 \(\text{\textcolor{red}{f}f1}\)

In order to meet 27...e4 by 28 fxe4 fxe4 29 \(\text{\textcolor{red}{g}g2}\).

27 ... \(\text{\textcolor{red}{g}g8}\)
28 \(\text{\textcolor{red}{f}f2}\) \(\text{b5!} \ (D)\)

Now Black shows his cards. In the event of White leaving his pawn position on the queenside intact, the attacking plan would be ...c5-c4 followed by ...a5 and ...b4; his next pawn move shortens the procedure.

29 \(\text{b3?}\) \(\text{a5}\)
30 \(\text{\textcolor{red}{g}g2}\) \(\text{a4}\)
31 \(\text{\textcolor{red}{d}d2}\)

In case of 31 b4 the intention was 31...\(\text{\textcolor{red}{c}c8}\) 32 \(\text{\textcolor{red}{c}c5}\) \(\text{\textcolor{red}{a}a8}\) followed by ...\(\text{\textcolor{red}{a}a6-c6}\) \(\text{\textcolor{red}{f}}\).

31 ... \(\text{axb3}\)
32 axb3 \(\text{\textcolor{red}{a}a8}\)

Thus Black has reached the position he aimed for when starting this endgame. His positional advantage will now prove sufficient for victory, especially as he can always succeed in forcing the advance of his king by tying the white rook down to the defence of one of the weak pawns.

33 \(\text{c4}\)

Practically the only attempt, as 33 b4 would prove immediately fatal after 33...\(\text{\textcolor{red}{a}a1}\) 34 \(\text{\textcolor{red}{d}d3}\) \(\text{\textcolor{red}{a}a3}\).

33 ... \(\text{\textcolor{red}{a}a3!}\)
34 \(\text{c5}\) \(\text{\textcolor{red}{e}e7}\)
35 \(\text{\textcolor{red}{b}b2}\) \(\text{b4}\)
36 \(\text{g4}\)

One of the last resources: he tries to create a passed pawn which may become a potent force in case of an exchange of bishops. But Black does not need to hurry with that exchange.

36 ... \(\text{f4}\)
37 \(\text{\textcolor{red}{f}f1}\) \(\text{\textcolor{red}{a}a1+}\)
38 \(\text{\textcolor{red}{e}e2}\) \(\text{\textcolor{red}{c}c1}\)

The possibility of 39...\(\text{\textcolor{red}{c}c3}\) ties down all White’s pieces. White’s following rook expedition is therefore merely desperation.
39 \textit{\text{Aa2}} \textit{\text{Cc3}}
40 \textit{\text{Aa7}} \textit{\text{\textcolor{Gray}{d7}}}
41 \textit{\text{Ab7}} \textit{\text{\textcolor{Gray}{xb3}}}

\textbf{Game 81}

\textbf{Alekhine – Bogoljubow}

\textit{\textbf{Baden-Baden Wch (2) 1934}}

\textbf{Slav Defence}

\begin{center}
\begin{tabular}{ll}
1 & d4 \textit{\textcolor{Gray}{\textbf{\textbf{f6}}}}
2 & c4 \textit{\textcolor{Gray}{c6}}
3 & \textit{\textbf{\textcolor{Gray}{c3}}} \textit{\textcolor{Gray}{d5}}
4 & e3 \textit{\textcolor{Gray}{e6}}
5 & \textit{\textcolor{Gray}{\textbf{\textbf{d3}}} \textit{\textcolor{Gray}{bd7}}}
6 & \textit{\textcolor{Gray}{\textbf{f3}}} \textit{\textcolor{Gray}{dxc4}}
7 & \textit{\textbf{\textcolor{Gray}{\textbf{x}}c4}} \textit{\textcolor{Gray}{b5}}
8 & \textit{\textbf{\textcolor{Gray}{d3}}} \textit{\textcolor{Gray}{a6}}
9 & 0-0
\end{tabular}
\end{center}

Nowadays the leading masters consider that the line 9 e4 c5 10 e5 cxd4 11 \textit{\textcolor{Gray}{\textbf{\textbf{x}}}xb5} \textit{\textcolor{Gray}{\textbf{x}e5}} 12 \textit{\textcolor{Gray}{\textbf{\textbf{x}}}xe5} axb5 13 \textit{\textcolor{Gray}{\textbf{\textbf{w}}}f3!} is decidedly advantageous for White. But in 1934 the 13th move of White in this variation had not yet been sufficiently considered and the Meran Variation’s shares stood pretty high. Therefore the quiet move in the text.

9 \ldots \textit{\text{c5}}
10 \textit{\text{a4}}

Instead of this, 10 \textit{\textcolor{Gray}{\textbf{\textbf{w}}}e2} was tested experimentally in the games Sämisc-Capablanca, Moscow 1925 and Dr. Vidmar-Bogoljubow, Bled 1931, but brought to the players with White—at least in the opening stages—only disappointment.

10 \ldots \textit{\text{b4}}
11 \textit{\textcolor{Gray}{\textbf{\textbf{e4}}} \textit{\textcolor{Gray}{\textbf{b7}}}}
12 \textit{\textcolor{Gray}{\textbf{\textbf{d}}ed2}}

After his tame 9th move, White has hardly any other way to complicate matters without disadvantage than this attempt to blockade Black's queenside.
12 ... \( \text{b7} \)

Black does not need to prevent White's next move as he is sufficiently developed to start almost immediately a counter-action in the centre.

13 a5 \( 0-0 \)
14 \( \text{Cc4} \) \( \text{C7} \)
15 \( \text{Ce2} \) \( \text{g4} \) \( (D) \)

Black has obtained a fairly good position, but from now on begins to over-estimate his chances. Instead of the adventurous text move, which finally leads to the win of a pawn but allows the intrusion of the white knight at b6, with a powerful effect, he would have done better to simplify the position—for instance, by means of 15...\( \text{Ce4} \).

\begin{center}
\includegraphics[width=0.5\textwidth]{chess_diagram}
\end{center}

16 \( \text{e4!} \)

A surprise for Black, who most likely expected only the half-suicidal 16 \( g3 \)...

16 ... \( \text{cxd4} \)
17 \( h3 \) \( \text{g5} \)

To 17...\( \text{g6} \) White would have answered 18 \( \text{g5} \) \( \text{c5} \) 19 \( \text{b6} \) \( \text{ad8} \) 20 \( \text{ac1} \) \( \text{wb8} \) \( ^1 \) (these moves are recommended by Bogoljubow in the match book as the best ones for Black) and now not 21 \( e5 \)? (Bogoljubow) but 21 \( \text{xf6!} \) \( \text{gxf6} \) 22 \( \text{c4} \) \( e5 \) 23 \( \text{h4} \), with ample positional compensation for the minus pawn.

18 \( \text{fxe5} \) \( \text{xe5} \)
19 \( \text{f4} \) \( \text{d6} \)
20 \( \text{xe5} \) \( \text{xe5} \)
21 \( \text{b6} \)

The point of the sacrificial combination initiated by the 16th move. From now on the knight will paralyse the whole black queenside.

21 ... \( \text{a7} \)

In case of 21...\( \text{ad8} \) White would not have taken the a-pawn at once, but would have first prevented the eventual advance of the d-pawn by playing 22 \( \text{fd1!} \), with a distinct positional advantage.

22 \( \text{ac1} \) \( \text{d6} \)

Or 22...\( \text{wd8} \) 23 \( \text{d2!} \) \( \text{d6} \) 24 \( f4 \)\( \pm \).

23 \( \text{c4} \) \( f5? \)

The opening of the e-file leads, owing to Black's multiple pawn weaknesses, to a rapid catastrophe. But also the quieter move 23...\( \text{f4} \)

\footnote{Black has a virtually forced win here with 20...\( \text{fxe4} \) 21 \( \text{xe4} \) \( \text{xe4} \) 22 \( \text{xc5} \) (22 \( \text{xe4} \) \( \text{xg5} \) 23 \( \text{xc5} \) \( \text{xe4} \) 24 \( \text{xc7} \) \( \text{dg5} \) gives Black two extra pawns) 22...\( \text{xc5} \) 23 \( \text{xe7} \) \( \text{xf3} \) 24 \( \text{xf8} \) \( \text{xe2} \) 25 \( \text{xc5} \) \( d3 \) and White will end up the exchange down. Since White obtains reasonable compensation after the move played, 17...\( \text{g6} \) seems to be a substantial improvement for Black.}
recommended by Bogoljubow is not satisfactory, as after 24 \text{Qd}1 \text{e}5 25 \text{We}1, White would have regained the pawn, still maintaining strong pressure.

\begin{center}
\begin{tabular}{c}

\end{center}

and mate in three.

\textbf{Game 82}

\textbf{Bogoljubow – Alekhine}

\textit{Pforzheim Wch (9) 1934}

Benoni Defence

1 \textit{d}4 \textit{c}5

I consider the choice of this move (which, as a consequence of my success in this game, became fashionable for a time) as one of my chess sins. Because if a world champion, being human, cannot sometimes help adopting inferior opening moves, he must at least avoid those which he himself considers not quite satisfactory.

\begin{center}
\begin{tabular}{c}
2 \textit{d}5 \textit{e}5
3 \textit{e}4 \textit{d}6
4 \textit{f}4
\end{tabular}
\end{center}

This decidedly premature rejoinder can only be explained by the fact that Bogoljubow had again missed a win in the previous game, and was particularly anxious to make a better show in this one. A natural and good line is, instead, 4 \text{Q}c3 and in case of
4...a6, 5 a4 followed by Qf3-d2-c4., which would secure White the initiative for a long time.

4 ... exf4
5 Qxf4 Wh4+

It was hardly worthwhile to provoke the weakening move g3 at the cost of a development tempo. The simple 5...Qe7, followed by ...Bg6, would keep the control of e5, with a fairly good game.

6 g3

The pawn sacrifice 6 Qg3 would not be correct because 6...Wxe4+ 7 Qe2 Qf5.

6 ... We7
7 Qc3? (D)

It was essential to prevent Black’s following move by 7 Qf3! after which 7...Wxe4+ 8 Qf2 would be too risky; Black would play instead 7...Bg4 8 Qc3 a6, followed by ...Qd7, with roughly even chances.

9 Qf3 h6
10 Qd2

10 Qb5 Qd8! would have been aimless.

10 ... Qg6
11 0-0-0 Qg4
12 Qe2

Also 12 Qh3 (recommended by Bogoljubow) 12...Qxe3 13 Wxe3 Qg7, would not have relieved White of his troubles.

12 ... Qg7
13 Qf1 Qxe3

It was certainly tempting to add the advantage of the two bishops to that already acquired. But as the knight at g4 was well posted and White’s e3-bishop was harmless for the time being, the immediate 13...a6 was possibly even more accurate.

14 Wxe3 a6
15 Qg1 b5
16 Qe1 Qb7
17 Qd1

This knight must be brought to f5—the only strong point in White’s position.

17 ... 0-0-0
18 Qg4

As the bishop has not many prospects, its exchange against the dangerous black knight can hardly be criticised.

18 ... Bb8
19 Qxd7 Qxd7
20 Wd2

Again the natural consequence of the manoeuvre started by his 17th move.

20 ... g4!
Immobilising the knight on g1 and thereby securing the important square e5 for the queen.

21 \( \text{Qe}3 \) \( \text{We}5 \)
22 \( \text{c3} \) \( \text{h5} \)
23 \( \text{Qf5} \) \( \text{Lf6} \)
24 \( \text{Wf4?} \)

The exchange of queens transforms a difficult, but by no means hopeless, position (White could, for instance, try 24 \( \text{b}1 \) in preparation for 25 \( \text{h}4 \)) into a lost one. It is interesting that Bogoljubow is rather prone to make this mistake, for instance, in the 11th game of the same match, in the position reached after Black’s 34th move, namely:

\[ \text{Bogoljubow – Alekhine} \]

Here, instead of trying a counter-attack, with an uncertain result, by 35 \( \text{Wa}6 \), he preferred to exchange queens: 35 \( \text{wc}3? \) \( \text{Wxc}3 \) 36 \( \text{c}3 \) \( \text{Ha}2 \)
37 \( \text{Cc4} \) \( \text{b}8 \)—and had to resign after a few more desperate moves.

About the same thing, if not in quite such typical form, occurred in the 5th and 22nd games of our first match. But also, strangely enough, my other match opponent, Dr. Euwe, has the same peculiar tendency to exchange queens at inappropriate moments: compare, for instance, the 7th and 24th games of the 1935 match, the second match game and especially the third exhibition game of 1937.

I am mentioning these coincidences by no means in order to put undue blame on my opponents, but merely to remind the average amateur how particularly difficult the question of an opportune queen exchange is, and how much attention this question deserves. If even the leading exponents of our game are often inclined to assess incorrectly their endgame chances, what, really, is to be expected from the ‘di minimos’?

24 \( \ldots \) \( \text{Wxf4+} \)
25 \( \text{gxf4} \) \( \text{dd}8! \) \((D)\)

Threatening to dislodge the white knight at f5, whose position has been weakened through the obstruction of the f-file by a pawn. Besides his other advantages, Black also has the pawn majority on the opposite
wign to the white king. The game is strategically over.

26 c4

This attempt to find another safe square (c4) for the knight will be refuted by Black’s 27th move. But otherwise 26...\(\mathcal{B}c8\) would rapidly prove fatal for White.

26 ... bxc4
27 \(\mathcal{B}e3\) c3!
28 b3 \(\mathcal{B}d4\)
29 \(\mathcal{B}c4\) f5!

At last activating the other bishop, after which White could resign.

30 e5 dxe5
31 fxe5 \(\mathcal{B}xd5\)
32 \(\mathcal{B}xf5\) \(\mathcal{B}df8\)
33 \(\mathcal{B}xf8+\) \(\mathcal{B}xf8\)
34 e6 \(\mathcal{B}e8\)
35 e7 \(\mathcal{B}xc4\)
36 bxc4 \(\mathcal{B}xg1\)
37 \(\mathcal{B}xg1\) \(\mathcal{B}xe7\)
38 h3 gxh3
39 \(\mathcal{B}c2\) h2
40 \(\mathcal{B}b1+\) \(\mathcal{B}b7\)
41 \(\mathcal{B}h1\) \(\mathcal{B}b2+\)
42 \(\mathcal{B}xc3\) \(\mathcal{B}xa2\)
43 \(\mathcal{B}d3\) \(\mathcal{B}c7\)
44 \(\mathcal{B}e4\) \(\mathcal{B}c6\)
45 \(\mathcal{B}f5\) a5
46 \(\mathcal{B}g5\) a4

0-1

Game 83
Alekhine – Bogoljubow
Bayreuth Wch (16) 1934
Ruy Lopez

4 \(\mathcal{A}a4\) \(\mathcal{A}f6\)
5 \(\mathcal{A}xc6\) dxc6

I believe Bogoljubow is right in stating that 5...bxc6 is an even more convincing answer to the rather artificial fifth move of White. As a matter of fact, I chose in this game the exchange variation of the Lopez chiefly because, although playing with the white pieces, I did not cherish any particular ambitions; as a consequence of the match arrangements, I had spent the whole previous night in travelling by car from Munich to Bayreuth and hardly felt fit for intensive mental work.

6 \(\mathcal{A}c3\) \(\mathcal{A}d6\)
7 d3 c5
8 h3 \(\mathcal{A}e6\)
9 \(\mathcal{A}e3\) h6
10 a4!

If immediately 10 \(\mathcal{A}d2\) then the reply is 10...b5 11 a4 c6. But now White ‘threatens’ to obtain an absolutely safe position by \(\mathcal{A}d2\)-c4.

10 ... c4?!

By opening the position in the centre at this particular moment, Black only increases the activity of the opponent’s pieces. A reasonable manoeuvre, instead, would be 10...\(\mathcal{A}d7\) followed by ...\(\mathcal{A}b8\)-c6.

11 d4 exd4
If 11...\(\mathcal{A}b4\) then 12 d5 ±.
12 \(\mathcal{A}xd4\) \(\mathcal{A}b4\)
13 0-0 c6?!

A strange move which weakens b6 without any necessity. He should, instead, castle and would probably obtain a draw after 13...0-0 14 e5 \(\mathcal{A}xc3\) 15 \(\mathcal{A}xc3\) \(\mathcal{A}d5\) 16 \(\mathcal{W}d2\), etc.
14 e5 \( \text{\textdollar d5} \)

Now practically forced, because 14...\( \text{\textdollar xc3} \) 15 exf6! \( \text{\textdollar xd4} \) 16 \( \text{\textdollar xd4} \) \( \text{\textw xf6} \) 17 \( \text{\textdollar xe6 fxe6} \) 18 \( \text{\textw h5+!} \), followed by 19 \( \text{\textw c5} \), would have been decidedly to White’s advantage.

15 \( \text{\texte e4} \) \( \text{\textf4 (D)} \)

A lesser evil was 15...0-0.

\[ \text{Diagram} \]

16 \( \text{\textc c5!} \)

The logical method of exploiting Black’s weak dark squares.

16 ... \( \text{\textxc5} \)

17 \( \text{\textw xd8+} \) \( \text{\textxd8} \)

18 \( \text{\textdxc5} \) \( \text{b6? (D)} \)

A miscalculation. 18...\( \text{\textb8} \) was necessary, although after 19 \( \text{\textdxe6} \) \( \text{\textxc6} \) (19...fxe6 is no better) 20 a5! (threatening both 21 \( \text{\textxa4} \) and 21 \( \text{\textd2} \)) his position would remain anything but pleasant.

19 \( \text{\textb7?} \)

Black’s a-pawn was by no means poisoned and its capture would have been rapidly decisive. For instance, 19 \( \text{\textxa6} \) \( \text{\textc8} \) 20 \( \text{\textc7+} \) \( \text{\textd7} \) 21 \( \text{\texta8} \) (this is the move I had overlooked in my calculations) 21...\( \text{\textd5} \) 22 a5 (also 22 \( \text{\textfd1} \) is good enough) 22...bxa5 23 \( \text{\textxa5} \) \( \text{\textb7} \) 24 \( \text{\texta7} \) \( \text{\textb8} \) 25 \( \text{\texte1! c5} \) 26 e6+, and Black would obviously not succeed in capturing the adventurous knight\(^1\).

After the timid text move Black temporarily recovers.

19 ... \( \text{\textd7} \)

20 \( \text{\textd6+} \) \( \text{\texte7} \)

21 \( \text{\textd4} \) \( \text{\textd5 (D)} \)

22 g3!

The value of this bold move—by making which White, after having missed the win at his 19th move.

---

\(^1\) This analysis is not very convincing. For example, instead of \( \text{25...c5} \), Black should play 25...\( \text{\textxc8} \) (threatening 26...\( \text{\textd8} \)), and it is hard to see how White can avoid losing material, since 26 e6+ may be met by 26...\( \text{\textd6} \). Alekhine’s alternative suggestion of 22 \( \text{\textfd1} \) looks better because although 22...\( \text{\texte7} \) virtually forces White to give up the exchange on d5, the resulting position is rather good for him, e.g. 23 \( \text{\textxd5} \) cxd5 24 \( \text{\textd4!} \) \( \text{\textb7} \) 25 \( \text{\textxb6} \), and with two pawns for the exchange, including the dangerous a-pawn, White has a definite advantage.
played only for a draw—has been completely misapprehended by the critics—Dr. Lasker, Nimzowitsch, Bogoljubow, and others. They all claim that White, without any necessity, is taking chances and should now get into difficulties. In reality the defences of the g-pawn would prove unsatisfactory, for example:

1) 22 f3 would he answered by 22...g6! threatening both 23...c5 and 23...f6.

2) after 22 Q6f5+ Ff8 Black would again threaten 23...c5.

3) in the event of 22 Q4f5+, Black would be perfectly entitled to play 22...e6! 23 Qxg7+ xe5 and if 24 Qde8 then simply 24...Qxg2, with advantage.

After the acceptance of the sacrifice by the opponent, White, even by an adequate defence, would have no trouble in obtaining a draw.

22 ... Qxh3+
23 Qh2 Qg5
24 f4 Qe4
25 Q6f5+ Qd8?

Playing for a counter-attack and obviously not taking into consideration White's interesting 27th move. It was necessary to play 25...Ff8, which would be answered by 26 Qe3 Qg8 27 f5 Qh7 28 e6, with ample compensation for the pawn.

26 Qxg7 f6
27 Kd1!

The tempo thus gained (since 27...Qxg7? loses to 28 Qe6+) secures White a clear, if not yet a decisive, advantage.

27 ... Qe8
28 Qdf5 (D)

28 ... fxe5

The alternative 28...Qg8 would also have left White with the better

---

1 This line contains a tactical oversight. At the end White can win by 25 f4+! Qxf4 26 Qae1+ Qe4 27 Qxe4+ Qxe4 28 Qf6+ Qe3 29 Qf5+ Qe2 30 Qg3+ Qe3 31 Qxd7. Black should prefer 24...Qe2+ 25 Qh2 Qe4, but in any case White can force a draw by 26 Qae1 (26 Qa3!? is an interesting winning attempt) 26...Qd2 27 f4+ Qxf4 28 Qxe4+ Qxe4 29 Qf6+ Qe3 30 Qg4+. In view of this, 22 Q4f5+ is probably the most accurate move.
endgame chances, for instance 29
\( \text{Qh5 fxe5 30 fxe5 } \text{Ke8 31 Qf6!} \)
\( \text{Qxf6 32 exf6 } \text{Ke2+ 33 Kh3 and now either} \)
either 33...\( \text{Kxe6} 34 g4 \text{Qxf5 35 gxf5,} \)
or 33...\( \text{Qg2+ 34 Qg4 } \text{Qxf1 35 Qxd7} \)
\( \text{Qxd7 36 f7 Qe8 37 fxe8Q+ } \text{Qxe8} \)
38 c3! followed by \( \text{Qxh6—both to} \)
White’s advantage.

29 fxe5 \( \text{Qg8?} \)

After the previous exchange this
move is already a decisive mistake,
instead of which 29...\( \text{Qg5} 30 \text{Qxd5!} \)
\( \text{Qxd5} \) (better than 30...\( \text{cx} d5 31 \text{e6 ±} \))
31 \( \text{Qe7+ Kh7 32 Qxd5} \text{cx} d5 33 \text{Kf6} \)
\( \text{Qg8 still offered chances of salvation.} \)

30 e6!

A short, sharp combination with a
promotional point.

30 ...
\( \text{Adxg7} \)
31 \( \text{Qxg7} \text{Qxg7} \)
32 \( \text{Qxd5} \)

The bishop must be eliminated as
it protects f7.

32 ...
\( \text{cx} d5 \)
33 \( \text{Qf8+ Qc7} \)
34 \( \text{Qf7+ Qd6} \)

A sad necessity, as after 34...\( \text{Qxf7} \)
35 \( \text{exf7} \text{the pawn could not be} \)
prevented from promoting.

35 \( \text{Qxg7} \text{Qxe6} \)
36 \( \text{Qg6+ Qe5} \)
37 \( \text{Qg2} \)

The black pawns won’t run away!

37 ...
\( \text{b5} \)
38 a5 \( \text{d4} \)
39 \( \text{Qxa6 b4} \)

40 \( \text{Qf3 c3} \)
41 \( \text{bxc3 bxc3} \)
42 \( \text{Ke6+! Qxe6} \)
43 \( \text{Qxe4 1-0} \)

Game 84

Bogoljubow – Alekhine
Kissingen Wch (17) 1934
Queen’s Gambit Accepted

1 d4 \( \text{d5} \)
2 c4 \( \text{dxc4} \)
3 \( \text{Qf3 Qf6} \)
4 \( \text{Qc3} \)

Unusual, but playable. The logi-
cal course, however, is the imme-
diate regaining of the gambit pawn (4
\( \text{e3} \) followed by 5 \( \text{Qxc4} \)).

4 ...
\( \text{a6} \)
5 e4?

But this is merely an adventure,
which could be selected only by a
player who had already but little to
lose (the state of the match was at
that moment 5 to 1 in my favour).
Necessary was 5 a4 followed by 6
e3↑.

5 ...
\( \text{b5} \)

Of course! As Black has no really
weak spots, the following attacking
moves of White are easy to meet.

6 e5 \( \text{Qd5} \)
7 \( \text{Qg5 e6} \)
8 \( \text{Qf3} \)

8 \( \text{Wh5 We7} \) would also prove
harmless.

8 ...
\( \text{Qd7} \)

1 The current view, anno 1996, is that the position after 5 e4 is not at all easy for
Black (GB).
9 \( \texttt{\text{cxd5}} \) \texttt{exd5}

10 \( \texttt{a3 (D)} \)

It is most certainly unpleasant to be compelled to make such defensive moves while in material deficit, but the threat of 10...\( \texttt{\text{b4+}} \) was too strong.

\[
\begin{array}{c}
\text{B} \\
\text{X}
\end{array}
\]

10 ... \( \texttt{c6} \)

11 \( \texttt{e3} \) \( \texttt{d8} \)

As the following shows, this relieves the queen of the defence of the d-pawn.

12 \( \texttt{e2} \) \( \texttt{f5!} \)

Since if 13 \( \texttt{xd5?} \), then 13 ...\( \texttt{b7} \) wins the queen.

13 \( \texttt{g3} \) \( \texttt{h6} \)

14 \( \texttt{h3} \)

Or 14 \( \texttt{f3} \) \( \texttt{g4} \).

14 ... \( \texttt{c6} \)

Prepares Black’s following successful escapade.

15 \( \texttt{f4} \) \( \texttt{c2!} \)

16 \( \texttt{f2 (D)} \)

Apparently defending everything, because both 16...\( \texttt{xb2} \) 17 0-0 and 16...\( \texttt{c3} \) 17 \( \texttt{b4!} \) would be dangerous for Black. But there is a big surprise coming.

16 ... \( \texttt{xa3!} \)

It becomes more and more difficult to find original combinations in chess, especially in the earlier stages of the game. This, I think, is one of them: although the bishop move has been made in analogous positions (for instance, with White’s pawn on a2 and his bishop on c1) it has not, to my knowledge, ever before been combined with the idea of trapping the rook after \( \texttt{xa3} \) \( \texttt{xb2} \).

17 0-0

There is no choice, because 17 \( \texttt{xa3} \) \( \texttt{xb2} \) 18 \( \texttt{a5} \) \( \texttt{b4+} \) 19 \( \texttt{d2 c3} \) would lose rapidly.

17 ... \( \texttt{xb2} \)

18 \( \texttt{ae1} \) \( \texttt{f5} \)

The idea of posting this bishop at e4 and then castling Queenside is doubtless good enough. But in view of Black’s overwhelming material advantage (three pawns!) he had every reason to simplify the position: 18...\( \texttt{xh3} \) 19 \( \texttt{gxh3} \) \( \texttt{c6} \) and if 20 \( \texttt{f5} \), then the reply 20...\( \texttt{g5} \) would probably settle matters even more quickly.

19 \( \texttt{g4} \) \( \texttt{e4} \)

20 \( \texttt{f5} \) \( \texttt{b7} \)

21 \( \texttt{f4} \)
If 21 $\mathbb{W}h4$—in order to prevent Black’s next move—the answer 21...c5! would be very strong.

21 ... 0-0-0!
22 $\mathbb{W}g3$ g5

One of the easiest methods, as White’s activity on the f-file will be rapidly paralysed by the still threatening (and unavoidable) counter-attack ...c5.

23 fxg6 fxg6
24 $\mathbb{Q}d1$ $\mathbb{W}c3$
25 $\mathbb{Q}e6$ $\mathbb{H}de8$
26 $\mathbb{H}f6$ $\mathbb{H}e7$
27 $\mathbb{H}ef1$ $\mathbb{H}he8 (D)$

At last!

37 $\mathbb{Q}f3$ $\mathbb{W}c2$
38 $\mathbb{W}e1$ $\mathbb{Q}c6$
39 $\mathbb{H}f2$ $\mathbb{W}e4$
40 $\mathbb{Q}g3$ $\mathbb{W}xg4$
41 $\mathbb{Q}g2$ $\mathbb{H}xe5$

0-1

Game 85

Bogoljubow – Alekhine

*Berlin Wch (25) 1934*

Queen’s Gambit Accepted

1 d4 d5
2 c4 c6
3 $\mathbb{Q}f3$ dxc4

An unusual line of play (instead of 3...$\mathbb{Q}f6$), which is certainly not refuted in the present game.

4 e3 $\mathbb{Q}g4$
5 $\mathbb{Q}xc4$ e6
6 $\mathbb{Q}c3$

Bogoljubow thinks that he could get some endgame advantage by continuing 6 $\mathbb{W}b3$ $\mathbb{W}b6$ 7 $\mathbb{Q}e5$, yet after 7...$\mathbb{Q}f5$ 8 $\mathbb{Q}c3$ $\mathbb{Q}f6$ 9 f3 $\mathbb{Q}fd7$!, there would not have been much to expect for White.

6 ... $\mathbb{Q}d7$
7 h3 $\mathbb{Q}h5$
8 a3

Very slow. But as Black does not plan any action in the centre such

1 30...$\mathbb{W}d3$ followed by ...$\mathbb{Q}xd4$ is even more convincing.
preventive moves cannot be criticised.

8 ... \( \text{Q} \text{g}6 \)
9 \( e4 \text{Q}e7 \)
10 0-0 0-0
11 \( \text{K}f4 \text{a}5 \)

As White is, for the time being, stronger in the centre, Black undertakes a diversion on the queenside. Its result will be the exchange of a couple of pieces, which will gradually relieve Black's rather cramped position.

12 \( \text{K}a2 \text{W}b6 \)
13 \( g4 \text{Q}g6 \)
14 \( \text{We}2 \text{Wa}6! \)
15 \( \text{We}3 \)

The exchange of queens would obviously deprive him of any serious winning hopes.

15 ... \( b5 \)
16 \( \text{Ke}5 \text{Q}xe5 \)

It was also possible to play 16...\( b4 \) 17 \( \text{Q}xg6 \text{hxg6} \) 18 \( \text{Ke}2 \text{c}5 \) — but I was not particularly enthusiastic about the variation 19 \( e5 \text{Q}d5 \) 20 \( \text{Qxd5 exd5} \) 21 \( \text{Q}g3 \), followed by \( f4 \); and, besides, I believed in the future of my temporarily encaged lightsquared bishop.

17 \( \text{Q}xe5 \) \( b4 \)
18 \( \text{Q}xf6 \text{Q}xf6 \)
19 \( \text{Q}e2 \)

After this, Black definitely gets the initiative, which he will keep until the very end. But also after 19 \( \text{Q}a4 \) (recommended by Bogoljubow and Nimzowitsch) 19...\( \text{bxa3} \) 20 \( \text{bxa3} \) e5! 21 d5 \( \text{Q}e7 \) his prospects would remain satisfactory.

19 ... \( \text{bxa3} \)
20 \( \text{bxa3} \text{c}5 (D) \)

21 \( \text{wc}1 \) \( \text{cxd}4 \)
22 \( \text{Q}xd4 \text{Q}xd4! \)

The exchange of the active f6-bishop at first sight looks surprising, but in reality offers the greatest possibilities of exploiting the weak spots of White's position both in the centre and on the kingside.

23 \( \text{W}xd4 \text{Q}fd8 \)
24 \( \text{wc}4! \text{W}b7 \)

The interesting line 24...\( \text{W}xc4 \) 25 \( \text{W}xc4 \text{Q}d3 \) 26 \( f4! \text{Q}xa3 \) 27 \( \text{Q}f2 \text{Q}xh3 \) 28 \( f5 \text{Q}g3+ \) 29 \( \text{Qh}2 \) \( \text{Q}xg4 \) 30 \( \text{fxg6} \text{Q}xg6 \) would have brought Black four pawns for the piece, but no real winning chances.

25 \( f3 \) \( h5 \)

Without having a 'hole' for his king, Black cannot dream of launching a serious offensive. At the same time this pawn move is the first step in the emancipation of the g6-bishop.

---

1 After 29 \( \text{Q}g2 \) Black only gets three pawns for the piece.
26 $e2  $d4
27 $e3

Dr. Lasker suggested 27 $fd1 instead of this, which, however, after the exchange of rooks, would lead to about the same position as the one we reach after the 33rd move.

27 ... $d7

After 27...$ad8 White would have forced the exchange of queens by playing 28 $d5 $b2 29 $b1.

28 gxh5

White hopes to obtain a counter-attack on the c-file and, in order to win a tempo for doubling rooks, gives some fresh air to the poor bishop. Bogoljubow indicates as a better line 28 $fd1 $ad8 29 $xd7 $xd7 30 $c4, but after 30...a4! followed by ...h4 the dark squares in his position would remain very weak.

28 ... $xh5
29 $c5 $g6
30 $fc1 $ad8!
31 $c4

He cannot take the a-pawn because of 31...$b2! with an immediate win\(^1\).

31 ... $d1+
32 $f1 $xc1
33 $xc1 a4!

In spite of the fact that this pawn cannot, for the present at least, be supported by the bishop, it is by no means weak, as Black will be perfectly able to protect it by counter-threats.

34 $c4 $d1
35 $b4

Not 35 $xa4 owing to 35...$xf1+ followed by 36...$b5+.

35 ... $c7

Threatening mate in three by 36...$g3+.

36 f4 $d8!
37 $f2 (D)

37 $xa4 would be refuted by 37...$xf1+ and 38...$d1+. The end is approaching.

\[\text{Diagram:} \]

37 ... f5!

The resurrection of the bishop, which will not only rescue the a-pawn but also contribute to the exploitation of White’s disorganised king position.

38 e5 $e8
39 $b6 $c8
40 $d6

Or 40 $h2 $c3! and Black is winning.

40 ... $c1
41 $d4

\(^1\) 31...$d1+ is even simpler, since it wins the bishop on a2 within a couple of moves.
There is no defence left. If for instance 41 \( \varnothing h2 \) then 41...\( \varnothing c2 \) 42 \( \varnothing d2 \) \( \varnothing x d2 \) 43 \( \varnothing x d2 \) \( \varnothing c5 \) winning a pawn and the game.

41 ... \( \varnothing h7 \)

In order to answer 42 \( \varnothing d8 \) by 42...\( \varnothing a6 \)!

42 \( \varnothing f2 \) \( \varnothing c2+ \)

43 \( \varnothing d2 \)

Or 43 \( \varnothing e2 \) \( \varnothing b5 \) 44 \( \varnothing d2 \) \( \varnothing x e2! \) 45 \( \varnothing x e2 \) \( \varnothing c5+ \), winning.

43 ... \( \varnothing c5+ \)

44 \( \varnothing e3 \)

If 44 \( \varnothing d4 \) then 44...\( \varnothing x a3 \) after which White could also resign.

44 ... \( \varnothing x f1+ \)

0-1

This game practically finished the match, as it gave me 15 points to my opponent’s 10.

Game 86

Alekhine – Em. Lasker

Zurich 1934

Queen’s Gambit Declined

1 d4 d5
2 c4 e6
3 \( \varnothing c3 \) \( \varnothing f6 \)
4 \( \varnothing f3 \) \( \varnothing e7 \)
5 \( \varnothing g5 \) \( \varnothing bd7 \)
6 e3 0-0
7 \( \varnothing c1 \) c6
8 \( \varnothing d3 \) dxc4

As mentioned elsewhere, this exchange gives Black more defensive resources if preceded by ...h6.

9 \( \varnothing x c4 \) \( \varnothing d5 \)
10 \( \varnothing x e7 \) \( \varnothing x e7 \)
11 \( \varnothing e4 \)

This move, my ‘patent’, is as good as the more usual 11 0-0, but probably not better. In both cases White usually gets an advantage in space and need not worry about a possible loss.

11 ... \( \varnothing f6 \)
12 \( \varnothing g3 \) e5

An interesting attempt by Lasker to solve immediately the problem of the c8-bishop. Capablanca regularly played 12...\( \varnothing b4+ \) in our match games and, after the exchange of queens, succeeded in drawing, but not without difficulties.

13 0-0 exd4
14 \( \varnothing f5 \)

This sharp-looking move is in reality less aggressive than the straightforward 14 exd4 which, on account of the open e-file, would cause Black genuine development trouble—for instance, 14...\( \varnothing b6 \) 15 \( \varnothing e1 \) \( \varnothing d6 \) 16 \( \varnothing b3 \) and, if 16...\( \varnothing g4 \) then 17 h3 \( \varnothing x f3 \) 18 \( \varnothing x f3 \), offering the d-pawn for a strong attack. After the text move, White will be practically forced to take on d4 with a piece and to allow, as a consequence, an unwelcome simplification.

14 ... \( \varnothing d8 \)
15 \( \varnothing 3 x d4 \)

If 15 \( \varnothing x d4 \) or 15 exd4, then 15...\( \varnothing b6 \).

1 Rather surprisingly, there is no immediate win after 46 \( \varnothing g3 \), so Black should have preferred 43...\( \varnothing h1 \) 44 \( \varnothing c4 \) \( \varnothing b1 \), which is instantly crushing.
15 ... \( \mathbb{D}e5 \)
16 \( \mathbb{D}b3 \) \( \mathbb{D}xf5 \)
17 \( \mathbb{D}xf5 \) (D)

\[ \text{Diagram B} \]

17 ... \( \mathbb{W}b6? \)

Black underestimates, or overlooks, the answer, which gives White a strong and hardly resistible attack.

The right move, sufficient for equality, is 17...g6, as played by Flohr against Euwe at Nottingham 1936.

Neither 18 \( \mathbb{W}d6 \) (met by 18...\( \mathbb{D}e8 \)!), nor 18 \( \mathbb{D}d6 \) (met by 18...\( \mathbb{W}e7 \)) would then prove successful.

18 \( \mathbb{W}d6! \) \( \mathbb{D}ed7 \)

Also 18...\( \mathbb{D}g6 \) 19 \( \mathbb{D}h6+ \) gxh6 20 \( \mathbb{W}xf6 \) \( \mathbb{W}d8 \) 21 \( \mathbb{W}c3 \) would be bad enough.

19 \( \mathbb{H}fd1 \) \( \mathbb{A}d8 \)
20 \( \mathbb{W}g3 \) \( g6 \)
21 \( \mathbb{W}g5! \)

With the main threat 22 \( \mathbb{D}d6 \).
Black has already no real defence.

21 ... \( \mathbb{W}h8 \)
22 \( \mathbb{D}d6 \) \( \mathbb{G}g7 \)
23 e4!

Not only in order to use this pawn as an attacking factor, but also, as will be seen, to free the third rank for the rooks.

23 ... \( \mathbb{D}g8 \)
24 \( \mathbb{D}d3 \) \( f6 \)

24...h6 would have led to an echo-variation, viz., 25 \( \mathbb{D}f5+ \) \( \mathbb{D}h7 \) 26 \( \mathbb{D}xh6! \) f6 27 \( \mathbb{D}f3! \) fxg5 28 \( \mathbb{A}h3+ \) and mate follows.

25 \( \mathbb{D}f5+ \) \( \mathbb{D}h8 \) (D)

\[ \text{Diagram W} \]

26 \( \mathbb{W}xg6! \) 1-0

The spectacular final coup of an attack that could hardly have been conducted in a more effective manner after Black's superficial 17th move.

Game 87
Alekhine – Euwe
Amsterdam Wch (1) 1935
Slav Defence

1 \( d4 \) \( d5 \)
2 \( c4 \) \( c6 \)
3 \( \mathbb{D}f3 \) \( \mathbb{D}f6 \)
4 \( \mathbb{D}c3 \) dxc4
5 a4 \( \mathbb{A}f5 \)
6 \( \mathbb{E}e5 \)

It has been proved in our second match that this aggressive move, which has been fashionable for about ten years, is decidedly less
promising than the natural 6 e3. Black’s best answer to the text move is, however, not 6...\( \text{Bd}7 \) but 6...e6 and, if 7 \( \text{g}5 \text{b}4 \text{f}3 \) then 8...\( \text{h}6! \) (11th match-game, 1937).

\[
\begin{align*}
6 & \ldots \text{Bd}7 \\
7 & \text{xc}4 \text{c}7 \\
8 & \text{g}3 \text{e}5 \\
9 & \text{xe}5 \text{xe}5 \\
10 & \text{f}4 \text{fd}7 \\
11 & \text{g}2 \text{e}6
\end{align*}
\]

Black does not need to cede to the white queen the square c2, but—as the first match-game, 1937, convincingly showed—even by the best continuation, 11...f6 12 0-0 \( \text{d}8 \) 13 \( \text{c}1 \text{e}6 \), White obtains a clear positional advantage by continuing 14 \( \text{c}4! \).

\[
\begin{align*}
12 & \text{xc}5 \text{xc}5 \\
13 & 0-0 \text{e}7
\end{align*}
\]

Black tries in the following to avoid the weakening of e6 through ...f6 and gradually gets into great difficulty because of the inadequate protection of his knight.

\[
\begin{align*}
14 & \text{c}2 (D)
\end{align*}
\]

![Diagram](image)

Threatening either \( \text{d}5 \) or \( \text{b}5\text{d}4 \). Black can hardly succeed in keeping his pair of bishops much longer.

\[
\begin{align*}
14 & \ldots \text{d}8 \\
15 & \text{fd}1 0-0 \\
16 & \text{b}5 \text{xd}1+
\end{align*}
\]

Also 14...\( \text{w}a5 \) 15 \( \text{b}5! \) would be advantageous for White.

\[
\begin{align*}
17 & \text{xd}1 \text{a}5 \\
18 & \text{d}4 \text{c}8 \\
19 & \text{b}4!
\end{align*}
\]

The spectacular start of a ‘minority’ attack which will immediately result in White gaining control of the extremely important square d5. The tactical justification of the text move is shown by the following variation: 19...\( \text{xb}4 \) 20 \( \text{b}3 \text{c}7 \) 21 \( \text{e}4 \text{c}3 \) (21...\( \text{d}6 \) 22 \( \text{d}4 \) wins) 22 \( \text{c}1 \text{b}2 \) (22...\( \text{f}5 \) 23 \( \text{c}2 \) 23 \( \text{c}2 \) \( \text{f}5 \) 24 \( \text{w}b4! \), with a winning position.

\[
\begin{align*}
19 & \ldots \text{c}7 \\
20 & \text{b}5 \text{c}5 (D)
\end{align*}
\]

\[
\begin{align*}
21 & \text{f}5 \text{f}6 \\
\end{align*}
\]

After this, the weakness of the light squares will soon prove fatal. But also after 21...\( \text{f}6 \) 22 \( \text{d}6 \text{d}8 \)
23 \( \text{De}4 \), the realisation of White’s positional advantage would have been merely a matter of time.

22 \( \text{De3} \) \( \text{Se6} \)

23 \( \text{Sd5!} \)

Even more effective than 23 \( \text{Sd5} \).

23 ... \( \text{Sxd5} \)

24 \( \text{Sxd5} \) \( \text{Sxa5} \)

There is no longer a defence left. If, for instance, 24...\( \text{Sd}8 \) then simply 25 \( \text{Sc}5 \text{fxe}5 \) 26 \( \text{Sf}5 \)\(^1 \), winning easily.

25 \( \text{Sf5} \) \( \text{Wf}1+ \)

26 \( \text{Sg}2 \) \( \text{Sd}8 \)

27 \( \text{Sxe}5 \) \( \text{fxe}5 \)

28 \( \text{Sd7!} \)

Finishing the game by a mating attack.

28 ... \( \text{Lf}6 \)

29 \( \text{Sh}6+ \) \( \text{Sh}8 \)

30 \( \text{Sxc5} \) 1-0

If 30...\( \text{Sxe}8 \), then 31 \( \text{Sd}5! \text{gxh}6 \) 32 \( \text{Wf}7 \) \( \text{Sxe}7 \) 33 \( \text{Sxe}7 \) followed by mate.

Game 88

Alekhine – Euwe

Amsterdam Wch (3) 1935

French Defence

1 e4 e6

2 d4 d5

3 \( \text{Sc}3 \) \( \text{Sb}4 \)

4 a3

This seldom-played move is certainly better than its reputation and has not been even nearly refuted, either by the actual game or by the

subsequent analysis. Another attempt made by me in the ninth game of the same match is less recommendable, in spite of its practical success: 4 \( \text{Sg}4 \) (too risky because of the yet unsettled situation on the queenside) 4...\( \text{Sf}6 \) 5 \( \text{Wxg}7 \) \( \text{Sg}8 \) 6 \( \text{Wh}6 \) \( \text{Sg}6 \) 7 \( \text{He}3 \) \( \text{Sxe}4 \)? (by playing 7...\( \text{c}5 \)! Black would have obtained a sound initiative) 8 \( \text{Sd}3! \) f5 9 \( \text{Sf}2 \) \( \text{c}5 \) 10 \( \text{Sxe}4 \) \( \text{fxe}4 \) 11 \( \text{Wh}3! \) \( \text{Sc}6 \) 12 \( \text{Wxh}7 \) \( \text{Wf}6 \) 13 \( \text{Wf}4! \) \( \text{cx}d4 \) 14 \( \text{Sxg}6 \) \( \text{dxc}3 \) 15 b3 \( \text{Sd}7 \) 16 \( \text{Sxe}7 \) \( \text{Sxe}7 \) 17 \( \text{h}4 \) \( \text{Wf}7 \) 18 \( \text{Wh}8+ \) \( \text{Wf}8 \) 19 \( \text{Wxf}8+ \) \( \text{Sxf}8 \) 20 \( \text{Sg}5 \) e5 21 f3! \( \text{exf}3 \) 22 gxf3? (after 22 \( \text{Sxe}7+ \) \( \text{Sxe}7 \) 23 gxf3, White would have but little trouble to force the win; the less exact text move leads to an interesting endgame with opposite-coloured bishops) 22...\( \text{S}a3! \) 23 f4! \( \text{Sf}5 \) 24 \( \text{fxe}5 \) \( \text{Sxc}2 \) 25 0-0+ \( \text{Wg}8 \) 26 \( \text{Sac}1 \) \( \text{Sxc}1 \) 27 \( \text{Sxc}1 \) \( \text{Sf}5 \) 28 \( \text{Sxc}3 \) \( \text{Sc}8 \) 29 \( \text{Sf}3 \) \( \text{Sf}8 \) 30 \( \text{Sf}6 \) \( \text{Se}4 \) 31 \( \text{Sg}3+ \) \( \text{Sf}7 \) 32 h5! \( \text{Sc}8 \) 33 \( \text{Sg}7+ \) \( \text{Sxe}6 \) 34 h6! d4 35 h7 \( \text{Sc}1+ \) 36 \( \text{Wf}2 \) \( \text{Sc}2+ \) 37 \( \text{Sg}3 \) \( \text{xh}7 \) 38 \( \text{xh}7 \) \( \text{Sxa}2 \) 39 \( \text{Sf}4 \) b5 40 \( \text{Sf}4 \) \( \text{Sf}2+ \) 41 \( \text{Sxd}4 \) 1-0.

4 ... \( \text{Sxc}3+ \)

5 \( \text{bxc}3 \) \( \text{dxe}4 \)

6 \( \text{Wg}4 \) \( \text{Sf}6 \)

A safer alternative was 6...\( \text{Sf}8 \) 7 \( \text{Wxe}4 \) \( \text{Sd}7 \), followed by 7...\( \text{Sf}6 \). After the text move the dark squares in Black’s position become decidedly weak.

7 \( \text{Wxg}7 \) \( \text{Sg}8 \)

\(^1\) The immediate 25 \( \text{Wf}5 \) is even stronger, as it prevents Black defending with \( \text{Sf}6 \).
8 \textit{\textbf{\textcolor{blue}{Wh6}} c5
9 \textit{\textbf{\textcolor{blue}{Qe2}} \textbf{\textcolor{red}{Qbd7}}}

In order to relieve the queen from the protection of the other knight. If 9...\textit{\textbf{\textcolor{blue}{Qc6}}}, White’s simplest answer would be 10 dxc5!, but also 10 \textit{\textbf{\textcolor{red}{Qg5}}}, as played by Romanovsky against Botvinnik in the half-final of the Soviet Championship 1938, would be sufficient for equalising. White lost that game only because he was out-classed in the later stages.

10 \textit{\textbf{\textcolor{blue}{Qg3}} (D)}

\begin{center}
\includegraphics[width=0.5\textwidth]{chess-board.png}
\end{center}

10 ... \textit{\textbf{\textcolor{red}{Qg6}}?}

After this loss of time Black’s position becomes very difficult. Comparatively better was to play for further complications by 10...\textit{\textbf{\textcolor{red}{Wa5}}} although White’s prospects would remain more favourable even in that case after 11 \textit{\textbf{\textcolor{red}{Qd2}} \textbf{\textcolor{blue}{Wc4}}} 12 dxc5!.

11 \textit{\textbf{\textcolor{blue}{Qe3}} \textbf{\textcolor{red}{Qd5}}}

Black must already look for compensation for his e4-pawn, which is now bound to be lost.

12 \textit{\textbf{\textcolor{blue}{Qxe4}} \textbf{\textcolor{red}{Qxc3}}
13 \textit{\textbf{\textcolor{blue}{Qd3}} \textbf{\textcolor{red}{Qd5}}

Also 13...cxd4 14 \textit{\textbf{\textcolor{blue}{Qxd4}} \textbf{\textcolor{red}{Qf6}} 15 \textbf{\textcolor{blue}{Qxf6}} \textbf{\textcolor{red}{Qxf6}} 16 \textbf{\textcolor{blue}{Qd3}} \textbf{\textcolor{red}{Qg7}} 17 \textbf{\textcolor{blue}{Qd2}}

would not be satisfactory. As a matter of fact Black’s game was hardly to be saved after his inconsiderate tenth move.

14 \textit{\textbf{\textcolor{blue}{Qe2}} \textbf{\textcolor{red}{Qf6}}
15 c3 \textbf{\textcolor{red}{Qxd4}}
16 cxd4 \textbf{\textcolor{blue}{Q7b6}}

The exchange of Black’s best posted piece by 16...\textit{\textbf{\textcolor{red}{Qf4}}} 17 \textit{\textbf{\textcolor{blue}{Qxf4}}} \textbf{\textcolor{red}{Qxf4}} 18 0-0 would only have made matters easier for White.

17 \textit{\textbf{\textcolor{blue}{Qh5}}!}

This bishop manoeuvre, consisting of four consecutive moves, forces a practically decisive weakening of Black’s pawn structure. The following play on both wings is very instructive and, I believe, typical of my style.

17 ... \textit{\textbf{\textcolor{blue}{Qg7}}
18 \textit{\textbf{\textcolor{blue}{Qf3}}

Threatening 19 \textit{\textbf{\textcolor{blue}{Qh5}}.

18 ... \textit{\textbf{\textcolor{blue}{Qg6}}
19 \textit{\textbf{\textcolor{blue}{Qe4!}}} \textbf{\textcolor{red}{f5}}
20 \textit{\textbf{\textcolor{blue}{Qf3}}} \textbf{\textcolor{red}{Qf8}}
21 a4!

The diagonal a3-f8 is here the best area of activity for the dark-squared bishop.

21 ... \textit{\textbf{\textcolor{red}{Qc7}}
22 0-0 \textit{\textbf{\textcolor{blue}{Qd7}}
23 \textit{\textbf{\textcolor{blue}{Qa3+}}} \textbf{\textcolor{red}{Qg8}}
24 a5 \textbf{\textcolor{red}{Qc3}}

This leads to the loss of a pawn without any improvement of Black’s position; but also the apparently better move 24...\textit{\textbf{\textcolor{blue}{Qc4}}} would not have saved the day. The continuation would be 25 \textit{\textbf{\textcolor{blue}{Qc5!}} (stronger than 25 \textbf{\textcolor{blue}{Qxf5}} \textbf{\textcolor{red}{Qh8!}) 25...Qe5 26 dxe5 \textbf{\textcolor{blue}{Qxc5}}} 27 \textbf{\textcolor{blue}{Qfc1}} \textbf{\textcolor{blue}{Qac8}} 28 \textbf{\textcolor{blue}{Qxc5}} \textbf{\textcolor{blue}{Qxc5}} 29
\[ \text{Wd4! winning at least the a-pawn with an overwhelming position. The remaining part is—in spite of Black's desperate efforts to 'swindle'—easy enough.} \]

\[ 25 \text{Wb1! Qa4 (D)} \]

\[ \]

\[ 26 \text{Qxd5 exd5} \]

\[ 27 \text{Wxb7 Wc6} \]

\[ 28 \text{a6!} \]

If now 28...Wxb7 29 axb7 Bb8, then 30 Bfb1 Qb6 31 Qb4 followed by Qxa7 and wins.

\[ 28 \ldots Bb6 \]

\[ 29 Qc5 f4 \]

\[ 30 Qf5! \]

More exact than 30 Qe2 which would also be sufficient.

\[ 30 \ldots Bh8 \]

\[ 31 Qe7 We6 \]

\[ 32 Qxb6 Qc6 \]

Mere desperation.

\[ 33 Qxc6 Qg8 \]

Threatening perpetual check by 34...Qxg2+.

\[ 34 Qe5! Qg7 \]

\[ 35 Wb8+? \]

As in so many games of that unfortunate match, I played, after the decision was practically reached, too rapidly—without, however, affecting the ultimate result in this particular case. Instead, 35 Qxa7! would force Black to resign immediately.

\[ 35 \ldots Rc8 \]

\[ 36 Qg6+ Qxg6 \]

\[ 37 Wxf4 Wxb6 \]

\[ 38 Wxe5+ Qg7 \]

\[ 39 Wxd5 Qd8 \]

\[ 40 We5 Wxd4 \]

\[ 41 Wxd4 1-0 \]

Game 89

Euwe – Alekhine

The Hague Wch (4) 1935

Grünenfeld Defence

\[ 1 d4 Qf6 \]

\[ 2 c4 g6 \]

\[ 3 Qc3 d5 \]

\[ 4 Wb3 \]

The praxis of the last two to three years has proved that this queen move is less effective than 4 Qf4 Qg7 5 e3 0-0 6 Wb3 c6 7 Qf3, with an unquestionable advantage in space.

\[ 4 \ldots dxc4 \]

\[ 5 Wxc4 Qg7 \]

Also playable is 5...Qe6 6 Wb5+ Qc6 7 Qf3 but now not 7...Qb8 (as in the second match game, 1935) but 7...Qd5!, with fairly good counter-chances.

\[ 6 Qf4 c6 \]

\[ 7 Qd1? \]

An artificial and unnecessary move, instead of which 7 Qf3 0-0 8 e4 was indicated. Black can now obtain at least an even game.

\[ 7 \ldots Wa5 \]
Threatening 8...\(\text{\&}e6\).

8 \(\text{\&}d2\)  b5?

There are some moves of mine in the first Euwe match which I actually simply cannot understand. Neither before nor since have I played such decidedly unsound chess, especially in the openings! Here, for instance, the spoiling of the pawn structure on the queenside cannot even be excused by the lack of other promising continuations, as the simple 8...\(\text{\&}b6\) 9 \(\text{\&}c1\) \(\text{\&}f5\) followed by ...0-0 would have secured Black a distinct advantage in development. I am adding, however, the present game to this collection, in spite of the poor opening strategy of both sides, because of the particularly interesting tactical complications of the well-played middle-game.

9 \(\text{\&}b3\)  b4

At least this has the advantage of consistency; Black prevents e4—but at what a price!

10 \(\text{\&}a4\)  \(\text{\&}a6\)
11 e3  \(\text{\&}e6\)

Black could also play immediately 11...0-0 since 12 \(\text{\&}xa6\) \(\text{\&}xa6\) 13\(\text{\&}xb4\) (or 13 \(\text{\&}xb4\) \(\text{\&}b5\)) 13...\(\text{\&}d5\), would be in his favour. But in that case he would not like the answer 12 \(\text{\&}c4\).

12 \(\text{\&}c2\)  0-0
13 b3

If instead 13 \(\text{\&}xc6\) then 13...\(\text{\&}c7\) threatening 14...\(\text{\&}d7\) or 14...\(\text{\&}xa2\).

13 ...  \(\text{\&}ab8\) (D)

14 \(\text{\&}d3\)

Because of his slightly belated development White decides not to take the c-pawn, and rightly so; after 14 \(\text{\&}xc6\) \(\text{\&}c8\)! the open c-file would become a dangerous weapon in Black's hands, for instance, 15 \(\text{\&}f3\) \(\text{\&}b7\) 16 \(\text{\&}c2\) \(\text{\&}fc8\) 17 \(\text{\&}b1\) \(\text{\&}e4\), to be eventually followed by ...\(\text{\&}c3\).

14 ...  \(\text{\&}fc8\)
15 \(\text{\&}e2\)

Obviously underestimating the value of the following pawn offer; otherwise he would have continued with 15 \(\text{\&}xa6\) \(\text{\&}xa6\) 16 \(\text{\&}c5\) \(\text{\&}b5\) 17 \(\text{\&}f3\)! (but not 17 \(\text{\&}xe6\) \(\text{\&}xe6\) followed by ...e5, with a good game for Black) 17...\(\text{\&}d7\) 18 \(\text{\&}c1\), with the better endgame prospects.

---

1 After 18...\(\text{\&}f5\) 19 \(\text{\&}c4\) \(\text{\&}xc5\) 20 \(\text{\&}xc5\) (20 \(\text{\&}xb5\) \(\text{\&}xb5\) 21 \(\text{\&}xc5\) \(\text{\&}xc5\) 22 dxc5 a5, followed by ...\(\text{\&}c8\), is good for Black as \(\text{\&}c1\) can always be met by ...\(\text{\&}b2\)) 20...\(\text{\&}a6\) there is no endgame, and Black is slightly better as the white king is pinned down in the centre. It seems to me that White cannot claim any advantage after 14...\(\text{\&}fc8\).
This possibility clearly proves the unsoundness of Black’s 8th and 10th moves.

15 ... c5!

An absolutely correct combination which would have given, even against White’s best defence, easy equality. But as a matter of fact my opponent, fortunately for me, underestimated the danger.

16 axa6 wxa6
17 dx65 wb5
18 ef4?

Permitting Black to open the centre and thus set the opponent’s house alight. The correct defence was 18 e4! Rd7 19 e3 e4d4 20 edx4 wxc5 21 wxc5 dxc5, with a probable draw.

18 ... g4!
19 f3

If 19 c1, the reply 19...e5 would also have been strong.

19 ... e5!
20 f3d3

Equally unsatisfactory was 20 fxg4 exf4 f3.

20 ... edx4!

A pretty and exactly calculated piece offer, which White is practically forced to accept, since both 21 edx4 Rd5! and 21 e4 Rd7 would have left him even fewer chances of salvation.

21 fxg4 dxe3 (D)

22 xe3

A comparatively more difficult variation for Black was 22 xb4 c3d5 23 a3 a5 24 wc4! axb4! 25 wxe5 bxa3 26 f1 (or 26 b4 c3+, followed by ...xc4 26.a2 27 ff71 c3+, followed by 28...xc5 and wins.

22 ... xg4
23 f4

Anything else was equally unsatisfactory, for instance 23 g1 c3+ 24 f1 f6 or 23 f2 c3+ 24 f1 c6! 25 g1 c7 26 xg1 26 wx2 27 d8, with a winning position for Black.

23 ... c3+
24 c2

Obviously forced.

24 ... xc5!

25 xc5 (D)

If 25 xb8 then 25...w8+! wins immediately.

25 ...

wxc5

1 27 e2 is a much better defence, when Black has nothing clear-cut.

2 The second variation can be improved by 25 a4!, which unpins the d3-knight with gain of tempo. After 25...wa5 26 Rd7 (26 e4 w5 27 e2 e8 28 h3 xf5 29 dxf2 is also possible, and White is certainly no worse) 26...d8 27 e2 Black has yet to justify his piece sacrifice.
At last Black has enough from all the complications and selects the clearest variation which secures him a slight material advantage (queen and pawn against two rooks) and a persisting attack. A shorter way to victory was, however, 25...\textit{E}e8+! with the following main variation:

\begin{align*}
26 & \text{\textit{E}}e4 f5 27 \text{\textit{D}}d1 \text{\textit{E}}xe4 28 \text{\textit{D}}d8+ \text{\textit{F}}f7 29 \text{\textit{G}}g5 f4! 30 \text{\textit{C}}c1 \text{\textit{E}}e2 31 \text{\textit{D}}d3 \text{\textit{W}}xg5! and wins\textsuperscript{1}. \\
26 & \text{\textit{E}}xb8 \text{\textit{W}}e7+ \\
27 & \text{\textit{D}}d1 \text{\textit{E}}e3+ \\
28 & \text{\textit{C}}c1 \text{\textit{E}}xc2 \\
29 & \text{\textit{E}}xc2 \text{\textit{H}}5!
\end{align*}

This is a necessary preparation for ...\textit{G}7.

\begin{align*}
30 & \text{\textit{E}}d1 \text{\textit{G}}7 \\
31 & \text{\textit{H}}3 \text{\textit{A}}5
\end{align*}

Black's chief trump which, with correct play, must guarantee the win, are the permanent insecurity of White's king and the unprotected position of the bishop, whose efforts to find a safe square are bound to fail.

The game remains lively and instructive until the very end.

\begin{align*}
32 & \text{\textit{F}}f4 \text{\textit{W}}e4 \\
33 & \text{\textit{C}}c7 \text{\textit{W}}e3+ \\
34 & \text{\textit{B}}b1 \text{\textit{A}}4!
\end{align*}

By this break-up, which could not in the long run be prevented, Black wins perforce at least the exchange.

\begin{align*}
35 & \text{\textit{B}}xa4 \text{\textit{B}}3 \\
36 & \text{\textit{A}}xb3 \text{\textit{W}}xb3+ \\
37 & \text{\textit{C}}c1 \text{\textit{H}}6+ \\
38 & \text{\textit{D}}dd2 \text{\textit{W}}xa4 \\
39 & \text{\textit{E}}e5
\end{align*}

Instead, 39 \textit{D}d1 would have marginally prolonged the game, since Black would be compelled first to force the white king back to the queenside by means of 39...\textit{D}xd2 40 \textit{D}xd2 \textit{W}e4! 41 \textit{C}c1 \textit{W}e1+, and only after that decide the game on the other wing through a gradual advance of his pawns supported by the king.

\begin{align*}
39 & \ldots \text{\textit{H}}7 \\
40 & \text{\textit{C}}c3 \text{\textit{B}}b5! (D)
\end{align*}

Preventing 41 \textit{D}d1.

\textsuperscript{1} This line includes a small oversight, in that White can draw by 31 \textit{D}d7+! giving perpetual check. Of course, Black should play 30...\textit{W}xg5 31 \textit{W}xe4 \textit{W}xd8 32 \textit{W}xf4+ \textit{G}f6 with a winning position.
41 \( \text{d4} \)

White no longer has satisfactory moves left. If, for instance, 41 \( \text{a1} \) then 41...\( \text{f1}+ \) followed by ...\( \text{g7}+ \).

41 ... \( \text{e2}! \)

42 \( \text{g4} \) \( \text{e1}+ \)

43 \( \text{b2} \) \( \text{xd2} \)

44 \( \text{c8} \) \( \text{c1}+! \)

0-1

Game 90

Alekhine – Euwe

Utrecht Wch (7) 1935

French Defence

1 e4 e6

2 d4 d5

3 \( \text{c3} \) \( \text{b4} \)

4 \( \text{e2} \) dxe4

5 a3 \( \text{e7} \)

5...\( \text{xc3}+\) 6 \( \text{xc3} \) \( \text{c6} \) is even more convincing, with at least an equal game. This possibility practically refutes White’s fourth move.

6 \( \text{dxe4} \) \( \text{c6} \)

Here, too, ...\( \text{c6} \) is good enough.

In the fifth game of this match I tried 7 \( \text{e3} \) (if 7 c3, then 7...e5), but did not obtain more than equality after 7...\( \text{f6} \) 8 \( \text{c2} \) 0-0 (already threatening ...\( \text{xe4} \) followed by ...f5). Therefore, in the present game I decided to try the following paradoxical-looking pawn move, the obvious idea being to combine the fianchetto development of the f1-bishop with a possible pawn attack on the kingside.

7 \( \text{g4}?! \) b6

This is not even an attempt at a refutation and White soon obtains the kind of position he was aiming at. True enough, the most natural answer 7...e5 would also not be convincing, because of 8 d5 \( \text{d4} \) 9 \( \text{c2} \) (but not 9 \( \text{xd4} \) \( \text{xd5}+ \)!) and if 9...f5, then 10 gxf5 \( \text{xf5} \) 11 \( \text{e3} \), with fair fighting chances for White. However, 7...\( \text{f6} \) 8 \( \text{xf6+} \) \( \text{xf6} \) 9 \( \text{e3} \) \( \text{d5} \) would have secured for Black a comfortable development of all his forces and thus prove the inefficacy of White’s seventh move.

8 \( \text{g2} \) \( \text{b7} \)

9 \( \text{c3} \) \( \text{f6} \)

10 \( \text{c2} \) 0-0?

Even if it could be proved that Black can find an adequate defence against the following kingside attack, the text move should still be condemned as endangering Black’s game without any profit or necessity. After the simple 10...\( \text{d7} \), followed by ...0-0-0, White would remain with an unimportant advantage in space and without any real attacking prospects.

11 \( \text{g5} \) \( \text{xe4} \)

12 \( \text{xe4} \) \( \text{h8} \)

Preparing for ...f5, which White prevents by his following strong move.

13 \( \text{h5}! \)

If now 13...f5 then of course 14 \( g6 \) with deadly effect.

13 ... \( \text{e8} (D) \)

Threatening again ...f5 but allowing the following promising combination. 13...\( \text{a5} \) was safer, as the variation 14 b4 \( \text{b3} \) 15 \( \text{f6} \) gxf6 16 \( \text{xb7} \) \( f5 \)! would not be dangerous for Black. In that case White would
increase his pressure by finishing his development—14 \( \text{Q}f4 \) eventually followed by 0-0-0 ±.

14 \( \text{Q}f6! \)

A correct pawn offer securing White a strong and most likely irresistible offensive.

14 ... \( \text{Q}x\text{f6} \)

The alternative was 14...gxf6 15 gxf6 Qa5 (if 15...\( \text{Q}x\text{f6} \)?, then 16 \( \text{Q}e4 \) followed by mate) 16 fxe7 \( \text{Q}xe7 \) 17 \( \text{Q}xb7 \) \( \text{Q}xb7 \) 18 \( \text{Q}g5 \) f6 19 \( \text{Q}h6 \) \( \text{Q}g8 \) 20 0-0-0 \( \text{Q}d6 \) 21 \( \text{Q}he1 \), with a clear advantage for White.

15 gxf6 gxf6
16 \text{Q}h4 \text{Q}d8

Forced, since 16...\( \text{Q}e7 \) would lose a piece after 17 \( \text{Q}e4! \).

17 \( \text{Q}f4! \)

This continuation of the attack, the point of which is the bishop retreat on the next move, was by no means easy to find. Black’s comparatively best chance was to give back his extra pawn by playing 17...f5—although after 18 \( \text{Q}xd8 \) \( \text{Q}axd8 \) 19 \( \text{Q}xc7 \) \( \text{Q}d7 \) 20 \( \text{Q}f4 \) Qa5 21 \( \text{Q}g1! \), White’s endgame advantage would be quite evident.

17 ... \( e5 \)
18 \( \text{Q}g3! \) \( f5 \)

There is hardly anything better. If, for instance, 18...exd4, then 19 0-0-0! with a straightforward attack.

19 dxe5

Here, too, 19 0-0-0 was strong. But the simple recovery of the sacrificed material is, bearing in mind White’s powerful attacking possibilities, sufficiently convincing.

19 ... \( \text{Q}g8 \)
20 \( \text{Q}f3? \)

But this inexact move permits Black to launch a saving counter-attack. Instead 20 \( \text{Q}h3! \) was practically decisive, since 20...\( \text{Q}d3 \) would be refuted by 21 \( \text{Q}h4! \) and 20...\( \text{Q}g4 \) by 21 0-0-0!, threatening f3, and winning material with a persisting attack.

20 ... \( \text{Q}d3! \)

An ingenious resource but, as the following shows, Black, in adopting it, did not actually realise how many interesting possibilities it opened to him.

21 \( \text{Q}e2 (D) \)

White has nothing better, since 21 \( \text{Q}xc6? \) would be fatal, because of 21...\( \text{Q}a6! \) 22 \( \text{Q}h5 \) \( \text{Q}g4! \), etc.

21 ... \( \text{Q}e4? \)

Leading to a lost endgame. From an objective point of view, it is certainly a pity that Black avoids the fantastic complications arising after 21...\( \text{Q}c2! \)—a move which with correct play would have secured him a draw. Here is the main variation as well as some minor possibilities: 22 \( \text{Q}f6+ \) \( \text{Q}g7 \) 23 \( \text{Q}g1! \) (the plausible 23
26 e6 is not good because of 23...\texttt{xe}8! 24 \texttt{g}1! \texttt{a}6!! (not 24...\texttt{xe}6 25 \texttt{xe}5! and wins) 25 \texttt{xa}6 \texttt{xe}6+ 26 \texttt{e}5 \texttt{e}4+ 27 \texttt{f}1 \texttt{xe}5, with advantage for Black) 23...\texttt{xb}2 24 e6!! \texttt{xa}1+ 25 \texttt{d}1 \texttt{d}4!! (but not 25...\texttt{d}8 nor 25...\texttt{b}1 because of the answer 26 \texttt{d}6!! and White wins) 26 \texttt{xg}7+! (there are no winning chances for White after 26 \texttt{xd}4 f6! 27 \texttt{xf}6 \texttt{f}3 28 \texttt{d}2 \texttt{a}2+ 29 \texttt{c}2 \texttt{e}4) 26...\texttt{h}7 27 \texttt{h}4+ \texttt{h}6! (instead 27...\texttt{f}8 loses: 28 e7+ \texttt{e}8 29 \texttt{g}8+ \texttt{d}7 30 \texttt{d}8+ and wins) 28 \texttt{g}5+, followed by 29 \texttt{f}4+, with a draw by perpetual check.

22 \texttt{xe}4 fxe4
23 \texttt{h}4!

The winning move, probably overlooked by Black when he played 21...\texttt{e}4. After 23 0-0-0 he would have obtained excellent drawing chances by continuing 23...\texttt{xe}3! 24 hxg3 \texttt{exe}5.

23 ... h6
24 0-0-0 \texttt{ae}8

25 \texttt{f}6+ \texttt{h}7
26 f4! exf3
27 \texttt{xf}3

Of course much stronger than winning the exchange for a pawn by 27 \texttt{d}3+. The white bishops are now dominating the board and Black is unable to prevent the intrusion of the d1-rook onto his second rank.

27 ...
28 \texttt{xb}7 \texttt{xb}7
29 \texttt{d}7 (D)

The beginning of the execution.

29 ...
30 \texttt{xf}7+ \texttt{g}6
31 \texttt{xc}7 \texttt{d}3+
32 \texttt{b}1

Also the simple 32 \texttt{c}2 was good enough.

32 ...
33 \texttt{f}5

---

1 In fact 25...\texttt{b}1 26 \texttt{d}6 \texttt{e}4+ leads to a draw, because 27 \texttt{d}2? \texttt{ag}8 28 \texttt{xf}7 fails to 28...\texttt{d}5+ and 29...\texttt{xf}7.
33 $\text{Q}d1$ $\text{Q}xe5$
34 $\text{Q}f1+$ $\text{Q}e4$
35 $\text{Q}xa7$ $\text{Q}c4$

Or 35...$\text{Q}f3$ 36 $\text{Q}a4+$ $\text{Q}e3$ 37 $\text{Q}d4+$. Black’s game is quite hopeless.

36 $\text{Q}d7$ $\text{Q}e3$
37 $\text{Q}e1+$ $\text{Q}f3$
38 $\text{Q}xe8$ $\text{Q}xe8$
39 $\text{Q}d4$ $\text{Q}e3$
40 $\text{Q}h4$ $\text{Q}f5$
41 $\text{Q}b4$ 1-0

Game 91
Ahues – Alekhine
Bad Nauheim 1936
Queen’s Gambit Accepted

1 $d4$ $d5$
2 $c4$ $\text{dxc}4$
3 $\text{Q}f3$ $a6$

This move, in connection with the next, was introduced by me in the third game of the 1934 Match with Bogoljubow. Even if it can be convincingly proved (which has not been done) that the bishop development at g4 is not good for Black, the text move will still be used by those who prefer to avoid the variations starting with White’s $\text{Q}a4+$.

4 $a4$

White has no reason to prevent $\text{b}5$, since the variation 4 e3 $b5$ 5 a4 $\text{Q}b7$ 6 axb5 axb5 7 $\text{Q}xa8$ $\text{Q}xa8$ 8 $b3$ is to his advantage. The text move, besides losing time, also weakens $b4$ and, therefore, has to be decidedly condemned. The two following positional fights may give an idea as to Black’s possibilities after 4 e3 $\text{Q}g4$.

The character of the ensuing conflict depends on whether White leaves the pawn structure intact in the centre (as in I), or tries to solve the problem of the centre in a dynamic way (as in II).

I. Zinner-Alekhine, Podebrad 1936.

4 e3 $\text{Q}g4$ 5 $\text{Q}xc4$ e6 6 h3 $\text{Q}h5$ 7 $\text{Q}b3$ $\text{Q}a7$ (or 7...$\text{Q}xf3$ 8 $\text{gxf3}$ b5) 8 a4 $\text{Q}c6$ 9 $\text{Q}d2$ $\text{Q}f6$ 10 $\text{c}3$ $\text{Q}d5$ 11 $\text{Q}bd2$ $\text{Q}xc3$ 12 $\text{bxc}3$ $\text{Q}a5$ 13 $\text{Q}a2$ $\text{Q}xc4$ 14 $\text{Q}xc4$ $\text{Q}d6$ 15 $\text{b}1$ 0-0 16 0-0 $\text{Q}g6$ 17 $\text{Q}b2$ c6 18 $\text{Q}b3$ b5 19 c4 $\text{Q}b7$ 20 $\text{Q}a1$ $\text{Q}b8$ 21 $\text{Q}aa2$ $\text{Q}c7$ 22 $\text{Q}d1$ $\text{Q}d3$! 23 $\text{cxb5}$ $\text{cxb5}$ 24 $\text{Q}e1$ $\text{Q}g6$ 25 $\text{Q}e2$ $\text{Q}d6$ 26 $\text{Q}df3$ b4! 27 $\text{Q}d3$ $\text{Q}e4$ 28 $\text{Q}c5$ $\text{Q}d5$ 29 $\text{Q}b3$

30 $\text{Q}c8$ 30 $\text{Q}a1$ a5 31 $\text{Q}c1$ $\text{Q}b6$ 32 $\text{Q}bc2$ $\text{Qxc2}$ 33 $\text{Qxc2}$ $\text{Qxd7}$! 34 e4 $\text{Q}xb3$ 35 $\text{Qxb3}$ $\text{Qc8}$ 36 $\text{Qc4}$ $\text{Qxc4}$ 37 $\text{Qxc4}$ h6 38 d5 $\text{Qxa4}$ 39 $\text{Qc8+}$ $\text{Qh7}$ 40 $\text{Qxb7}$ $\text{Qd8}$! 41 $\text{Qxf7}$ $\text{Qa1}$+ 42 $\text{Qh2}$ $\text{Qf6}$ 43 $\text{Qd7}$ b3 44 h4 b2 45 $\text{Q}b5$ exd5 0-1.

II. Aretsson-Alekhine, Orebro 1935. (The six first moves as in the previous game):

7 0-0 $\text{Q}f6$ 8 $\text{Q}c3$ $\text{Q}c6$ 9 $\text{Q}e2$ $\text{Q}d6$
10 b3 (better than a3, as played in an analogous position by Bogoljubow in the game mentioned above)
10...0-0 11 $\text{b}2$ $\text{Q}c7$ 12 e4 $\text{Q}xf3$ 13 $\text{Q}xf3$ $\text{Q}ad8$ 14 $\text{Q}e2$ $\text{Q}c5$ 15 $\text{Q}c1$
16 $\text{Q}b6$ 16 $\text{Q}wc2$ e5 17 d5 $\text{Q}b4$ 18 $\text{Q}a3$! a5 19 $\text{Q}wc4$ $\text{Qe8}$ 20 $\text{Q}fd1$ $\text{Qh4}$! 21 $\text{Q}xb4$ $\text{Qxf2+}$ 22 $\text{Q}h2$ axb4 23 $\text{Q}xb4$ $\text{Qd6}$ 24 a4 $\text{Q}a8$ 25 $\text{Q}f1$ $\text{Qh4}$
26 $\text{Q}wd2$ g6 27 g3 $\text{Q}we7$ 28 $\text{Q}c3$ f5 29 exf5 gxf5 30 $\text{Q}ce1$ $\text{Qg7}$ 31 b4 e4 32 $\text{Q}d1$ $\text{Qc4}$ 33 $\text{Qcl}$ $\text{Qe5}$ 34 $\text{Q}e2$ c6!
35 dxc6 bxc6 36 Aa1 d8 37 a5
d1 38 Wf4 Ac7 39 Wf2 Ad3! 0-1.

4 ... 6f6
5 e3 Ag4
6 Ac4 e6
7 Ac3 Ac6

As one may see from the above games, this knight development belongs to the system inaugurated by ...Ag4. In this particular position it is more appropriate than ever, Black having at his disposal, if needed, the square b4.

8 Ae2 Ab4
9 0-0 0-0
10 Ac2

White is over-anxious to simplify the position and allows, to his disadvantage, the following advance of Black’s e-pawn. The quieter 10 Ad2 would probably leave him with more equalising chances.

10 ... Axexe2
11 Aexe2 e5!

As the opening of the central file through dxe5 would be here, or on the following moves, to the benefit of the better-developed party, White will be practically compelled to allow a further advance of this pawn, after which the activity of his bishop will be reduced to a minimum.

12 6f3 Aa8
13 Ad2 Ad6

The exchange of the opponent’s poorest piece would be, of course, a grave strategic error.

14 Ag3 e4
15 Ae1 Axg3!

After this exchange, the immobilised pawn mass on the kingside will, in the long run, be unable to prevent Black adopting the attacking formation ...Ag4 and ...Wf5 (or ...Wh5).

The little counter-demonstration that White will now undertake on the open c-file can be parried without effort or loss of time.

16 hxg3 Ae7 (D)

Full control of d5 is the key to the situation.

<table>
<thead>
<tr>
<th>W</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>17 b4 Dd7</td>
<td></td>
</tr>
<tr>
<td>18 Ae2 Ded5</td>
<td></td>
</tr>
<tr>
<td>19 Aa3 b5!</td>
<td></td>
</tr>
</tbody>
</table>

Confining the mobility of the hostile knight.

18 axb5 axb5
19 Ae2 c6

This pawn could eventually become weak—had not Black already prepared a plan for an irresistible mating attack!

22 Ac2 Wf5

White cannot even answer this move by f3—his knight being unprotected—and he has nothing better than to prepare a desperate king’s flight.

23 Afc1 h6
A useful precaution—especially as White has such a small choice of moves.

24 \textit{\textbf{N}a5} \quad \textit{\textbf{K}ac8}
25 \textit{\textbf{Q}a1}

The knight dreams of eventually reaching a more suitable square (c5), but it is much, much too late!

25 ... \textit{\textbf{Q}g4}

This sets up the powerful threat 26...\textit{\textbf{W}h5}.

26 \textit{\textbf{Q}f1} \quad \textit{\textbf{K}e6l} (D)

A similar stratagem to that in the Dresden game against Bogoljubow (game 92): Black gives up a useless unit in order to gain the f-pawn and thus denude the enemy’s king.

27 \textit{\textbf{N}xb5} \quad \textit{\textbf{K}f6}
28 \textit{\textbf{N}bc5} \quad \textit{\textbf{Q}xf2}
29 \textit{\textbf{Q}e1}

Or 29 \textit{\textbf{Q}g1} \textit{\textbf{Q}g4} followed by ...\textit{\textbf{W}h5} and mate.

29 ... \textit{\textbf{Q}d3+}
30 \textit{\textbf{Q}d1} \quad \textit{\textbf{W}f1+}
31 \textit{\textbf{Q}e1} \quad \textit{\textbf{K}f2!}

Expecting 32 \textit{\textbf{W}xf1}, after which I would have the pleasant choice between the knight mates at b2 and e3.

0-1

Game 92

\textbf{Alekhine – Bogoljubow}

\textit{Dresden 1936}

Three Knights’ Game

1 \textit{\textbf{e}4} \quad \textit{\textbf{e}5}
2 \textit{\textbf{Q}f3} \quad \textit{\textbf{Q}c6}
3 \textit{\textbf{Q}c3} \quad \textit{\textbf{g}6}

Playing at his best, Bogoljubow would hardly have selected such an obviously inferior defence, since he knows very well how to play the Four Knights’ game with Black (see, for instance, his game against Maroczy, London 1922).

4 \textit{\textbf{d}4} \quad \textit{\textbf{exd}4}
5 \textit{\textbf{Q}d5!} \quad \textit{\textbf{Q}g7}
6 \textit{\textbf{Q}g5} \quad \textit{\textbf{Q}ce7}

This unnatural looking move is already the only one, since after 6...\textit{\textbf{f}6} 7 \textit{\textbf{Q}f4} \textit{\textbf{d}6} the diagonal a2-g8 would become fatally weak.

7 \textit{\textbf{e}5}

White has the choice between this only apparently more aggressive move—which in fact leads to a favourable endgame—and the simple 7 \textit{\textbf{Q}xd4} with excellent middlegame prospects after 7...\textit{\textbf{c}6} 8 \textit{\textbf{Q}xe7} \textit{\textbf{Q}xe7} 9 \textit{\textbf{W}d2}, followed by 0-0. Possibly this way was the more logical one.

7 ... \quad \textit{\textbf{h}6!}

Otherwise 8 \textit{\textbf{Q}f6+} would be too strong.

8 \textit{\textbf{Q}xe7}

The sacrifice of a pawn by 8 \textit{\textbf{Q}f6} \textit{\textbf{Q}xf6} 9 \textit{\textbf{Q}xf6+} \textit{\textbf{Q}xf6} 10 \textit{\textbf{e}xf6} \textit{\textbf{Q}g8} followed by ...\textit{\textbf{W}xf6} would not have paid.

8 ... \quad \textit{\textbf{Q}xe7}
9 \(\text{Wxd4} \ \text{Qxd5}\)
10 \(\text{Wxd5}\)

White's advantage in space begins to become alarming, so Black must try to exchange queens as quickly as possible in order to avoid an unanswerable kingside attack.
10 ... \(c6\)
If 10...d6 then 11 0-0-0 \(\text{Ae6} \ 12 \text{Wb5+}! \pm\).
11 \(\text{Wd6} \ \text{Axf8}\)
12 \(\text{Wd4} \ \text{Wb6} (D)\)

13 0-0-0!

By offering his f-pawn, White wins an important tempo for his development. Black rightly refuses this offer, for after 13...\(\text{Ac5} \ 14 \text{Wc3 Axf2} \ 15 \text{Qd4!}, his position would have rapidly gone to pieces\(^1\).
13 ... \(\text{Wxd4}\)
14 \(\text{Qxd4}\)

An interesting and difficult moment. White decides not to prevent the opening of the centre followed by the emancipation of the c8-bishop, for he is entitled to expect appreciable profits from the two central files dominated by his rooks. The consequences of the alternative 14 \(\text{Axd4 Ag7} \ 15 \text{Ae4 b5}, followed by ...\(\text{Ab7} \ \text{and} ...0-0-0, were, to say the least, not evident, especially as it would be Black who would have the initiative for opening the position.
14 ... \(d5\)

Almost forced, because White, in addition to all the other unpleasantness, threatened f4-f5.
15 \(\text{exd6} \ \text{Qxd6}\)
16 \(\text{Ac4} \ 0-0\)
17 \(\text{Ahe1}\)

The white pieces are beautifully placed while Black's c8-bishop is still looking for a suitable square. Its next sally is the best proof of the difficulties he has to deal with.
17 ... \(\text{Ag4}\)
18 \(f3 \ \text{Ac8}\)
19 \(g3\)

Holding the square f4 and now threatening 20 \(\text{Qxc6}\).
19 ... \(\text{Ac5}\)
20 \(\text{Ab3}\)

The beginning of an interesting knight manoeuvre which aims to strengthen the pressure against f7. Also good was 20 g4 followed by h4-h5.
20 ... \(\text{Ab6}\)
21 \(\text{Qd2}\)

If 21 \(\text{Ae7} \) then 21...\(\text{Ag7} \) and eventually ...\(\text{Af6}\).

---

\(^{1}\) The following line is even more convincing: 14 \(\text{Wf4 Axf2} \ 15 \text{Qd4 Axd4} \ 16 \text{Axd4} \ 0-0 \ 17 \text{Ad6}, followed by \(\text{Ac4} \ \text{and} \text{Af1}, with a crushing attack for White.\)
21 ...  a5
22 d4  b5
In order to save the b-pawn by ...
23 c3  xad8
24  d6
If 24 xad8 the answer would not be 24...xad8 25 xf2! followed by 26 e7 + but 24...xd8 25 d6 b5 26 xh3 xf6 with equality.
24 ...  b5
25  b3 (D)

25 ...  xd7
Protects, for the time being, all the vulnerable points. Speaking in general, one must admit that, after his extravagant opening, Bogoljubow has defended his position most carefully and still preserves fighting chances.

26  e8
A sound alternative was 26 e4 exd1+ 27 xd1 even though Black would still have a temporary defence by 27...g7. The text manoeuvre is linked with a temporary sacrifice of a pawn and leads, with the best defence, to at least the capture of Black’s f-pawn.
26 ...  xdl+
27 xd1  g2
This counter-thrust is Black’s best chance. After, for instance, 27...d8 White would increase the pressure without much trouble by 28 d6 f6 29 e2.
28  f6+
White realises that the black king will be at least no better at h8 than at g8, and therefore takes the opportunity to gain time on the clock. If Black, on his 29th move, had played ...g8, I intended to continue as in the actual game, 30 c2 xf3 31 d6, leading to variations examined further on.
28 ...  g7
29 e8+  h8
30 c2!  xf3
31 d6 (D)
31 ...
After Black’s stubborn defence so far, this misappreciation of the position seems incredible, as by the further exchange, White obtains various advantages:
1) The elimination of Black’s pair of bishops;
2) The pawn majority on the queenside;

---
1 Alekhine fails to mention 25 c7, after which it is hard to see how White can maintain any advantage, for example 26 xf7 xf7 27 xd8+ (27 e7 xd5! 28 xf7 xf7 29 xd5+ cxd5 30 xd5 a6 is not at all clear) 27...xd8 28 e8+ g7 29 xd8 xf3 30 g8+ h7 31 a8 f1+ 32 d2 f2+ with equality.
3) The central square d4 for his knight;
4) Play against Black's isolated d-pawn;
5) The possibility of penetrating with his rook via e7 or e8.

Any one of these considerations taken separately should have deterred Bogoljubow from selecting the text move, and, in fact, he could have set his opponent a by no means easy task by playing 31...\(\text{g7}\). My intention was to continue with 32 \(\text{xe7}\) and, if 32...\(\text{b6}\) (best), then 33 \(\text{xf7}\) \(\text{c5}\) 34 \(\text{b3+}\) \(\text{h8}\) 35 \(\text{f7+}\) \(\text{g7}\) (but not 35...\(\text{h7}\) 36 \(\text{g5+}\), followed by mate) 36 \(\text{b7!}\) \(\text{e4}\) 37 \(\text{d1}\) \(\text{f6}\) 38 \(\text{xh6}\) \(\text{d8}\) 39 \(\text{e2}\), and Black would not have found sufficient compensation for the minus pawn. Still, it would have been some kind of a fight, whereas what now happens merely reminds one of precisely executed butcher's work!

\[
\begin{align*}
32 & \text{xd5} & \text{xd5} \\
33 & \text{xb5} & \text{b6} \\
34 & \text{d3} & \text{g7} \\
35 & \text{b4} & \\
\end{align*}
\]

White's game now plays itself.

\[
\begin{align*}
35 & \cdots & \text{Ad8} \\
36 & \text{a4} & \text{a6} \\
37 & \text{d4} & \text{d6} \\
38 & \text{e8} & \text{h5} \\
\end{align*}
\]

If instead 38...\(\text{f6}\), White would first play a5.

\[
\begin{align*}
39 & \text{a8} & \text{f6 (D)} \\
\end{align*}
\]

A desperate trap. Needless to say, anything else would be equally hopeless.

\[
\begin{align*}
40 & \text{xa6!} & \\
\end{align*}
\]

White walks into the trap and proves that this is the quickest way to win!

\[
\begin{align*}
40 & \cdots & \text{xd4} \\
41 & \text{xf6} & \text{xf6} \\
42 & \text{a5} & \\
\end{align*}
\]

The extra bishop is unable to stop the two passed pawns. If, for instance, 42...\(\text{d8}\), then simply 43 \(\text{d4}\), followed by \(\text{xd5}\) and \(\text{c6}\).

\[
\begin{align*}
42 & \cdots & \text{e5} \\
43 & \text{b5!} & \text{h4} \\
44 & \text{a6} & \text{1-0} \\
\end{align*}
\]

Settles the matter, for 44...\(\text{hxg3}\) would be answered by 45 \(\text{hxg3}\), and if 44...\(\text{xg3}\) then 45 a7.
Game 93

Alekhine – Frydman
Podebrad 1936
Sicilian Defence

1 e4 c5
2 ∆f3 ∆c6
3 d4 cxd4
4 ∆xd4 ∆f6
5 ∆c3 d6
6 ∆g5

The idea of this move is to eliminate the possibility of ...g6 and ...∆g7 (the Dragon Variation), and it practically forces Black to adopt the so-called Scheveningen Variation\(^1\), one of the characteristics of which is the exposed—although quite defensible—d-pawn on the open file. White would be mistaken, however, if he thought that from now on he could count on a serious opening advantage; for my part, in spite of a 100% success with the text move, I am very far from that illusion.

6 ... e6
7 ∆b3

This harmless removal, typical of many variations in the Sicilian, contains—as, amongst others, the present game shows—more venom than one would suppose.

7 ... ∆e7
8 ∆d2

This attempt to enforce the pressure against d6 should be met by 8...h6! and, only after 9 ∆h4, 9...0-0-0, with the threat 10...∆xe4, equalising easily. White should, therefore, play 9 ∆e3 (instead of 9 ∆h4), but Black, anyhow, would not for the time being have to worry about his d-pawn.

8 ... 0-0?

Strangely enough, this very plausible answer is already a decisive mistake, for from now on Black will only have the choice between different evils.

9 0-0-0

Threatening the simple 10 ∆xf6 ∆xf6 (10...gxf6 would allow a winning kingside attack starting with 11 ∆h6) 11 ∆xd6. Therefore, Black has no time either for the preventative ...a6 or for the simplifying ...h6.

9 ... ∆a5

Hoping, after 10 ∆xf6 ∆xb3+ 11 axb3 ∆xf6 12 ∆xd6, to obtain a counter-attack by 12...∆a5; but the following strong white move stops this plan.

10 ∆b1! ∆xb3
11 axb3 (D)

The point of the 10th move is that Black can no longer play 11...∆a5 because of 12 ∆d5, and, likewise, 11...∆b6 would have led to a rapid debacle after 12 ∆xf6 ∆xf6 13 ∆xd6 ∆xf2 14 e5 ∆g5 15 h4! ∆f4 16 ∆b5! threatening 17 ∆xf8+! with mate in two. His next move is

---

\(^1\) Of course, in modern nomenclature this move constitutes the Richter-Rauzer Attack, the name ‘Scheveningen’ being reserved for 1 e4 c5 2 ∆f3 d6 3 d4 cxd4 4 ∆xd4 ∆f6 5 ∆c3 e6 (GB).
therefore the only way, if not to save the day, at least to prolong the fight.

24 \( \text{a5} \)!

Just at the right moment, as the obligation to protect the e-pawn will prevent Black from undertaking the intended diversion with the rook.

24 \( \ldots \) \( f6 \)

25 \( b4 \) \( \text{d7} \)

26 \( g3! \)

Of course, 26 \( b5 \) \( axb5 \) 27 \( \text{xb5} \) would be premature because of 27...\( \text{xd1} \). The advance in the centre, started by the text move, will force the black rook to leave the open file.

26 \( \ldots \) \( g5 \)

27 \( f4 \) \( \text{gxf4}+ \)

28 \( \text{gxf4} \) \( \text{e6} \)

After 28...\( \text{exf4}+ \) 29 \( \text{xf4} \), with \( \text{h5} \) to come, White’s work would be easier.

29 \( f5! \) \( \text{e7} \)

If 29...\( \text{xd6} \) then 30 \( \text{a1} \) and \( \text{g1} \), and the white rook would penetrate on the kingside. Now, on the other hand, the doubled pawn can at last be dissolved.

30 \( b5! \) \( \text{axb5} \)

31 \( \text{xb5} \) \( \text{g7} \)

32 \( \text{xc6}+ \) \( \text{xc6} \)

33 \( \text{a8} \) \( \text{g2} \)

This counter-attack is Black’s only chance, since 33...\( \text{f7} \) 34 \( \text{e8} \) followed by \( \text{e6}+ \) would be fatal.

34 \( \text{f8} \) \( \text{e2} \)

35 \( \text{xf6}+ \) \( \text{c5} \) (D)

With the threat of 36...\( \text{h3}+ \) followed by \( \ldots \text{d4} \).

36 \( b4! \)

The first link in the final combination; White gains the square d6 for his rook.

36 \( \ldots \) \( \text{c4}! \)
If 36...\textit{\&}xb4 then 37 \textit{\&}e6 wins easily.

\textbf{37 \textit{\&}d6}

Threatening 38 \textit{\&}d5, which, however, Black tries to prevent in an ingenious manner.

37 ... \textit{\&}h3+
38 \textit{\&}e2 \textit{\&}h4
39 \textit{\&}f3 h5!

Still making efforts—which are in fact crowned with a kind of ‘moral’ success—to complicate matters. By making this move, Black suggests that White cannot win by playing the natural 40 \textit{\&}d5—and the opponent believes him!

\textbf{40 \textit{\&}e6}

This can hardly he called an error since it wins perforce and is coupled with another pretty point. But with 40 \textit{\&}d5! White could prove to his opponent that his trap was not a trap at all. The continuation would be:

40...\textit{\&}f4+ 41 \textit{\&}e3 \textit{\&}xf5 42 exf5 \textit{\&}xd5 43 c4+ \textit{\&}d6 44 b5 b6 (or 44...h4 45 \textit{\&}f3) 45 f6 \textit{\&}e6 46 c5 and wins. The idea behind this pawn endgame is that while Black’s passed pawns are separated by only two files and can therefore be stopped by the enemy king, White is able to obtain passed pawns at a distance of three files from each other. This example is worthy of notice.

\textbf{40 ... \textit{\&}f4+}

If 40...\textit{\&}d4 then 41 c3+ (a second, diversionary offer) followed by 42 \textit{\&}xe5.

41 \textit{\&}e3 h4
42 \textit{\&}xe5 h3!

Very neat—but White’s material advantage assures him a safe defence against tactical tricks of this kind.

\textbf{43 \textit{\&}d5 \textit{\&}h4}
44 \textit{\&}d4+! \textit{\&}c3
45 \textit{\&}d1 h2
46 \textit{\&}h1 \textit{\&}h3+
47 \textit{\&}f4 \textit{\&}h4+
48 \textit{\&}e5 \textit{\&}d2
49 f6 \textit{\&}e3
50 \textit{\&}d6! \textit{\&}xe4
51 \textit{\&}xh2 \textit{\&}d4+
52 \textit{\&}e6 1-0

\textbf{Game 94}

\textbf{Alekhine – Foltys}

\textit{Podebrad 1936}

\textbf{Queen’s Gambit Declined}

1 d4 d5
2 c4 e6
3 \textit{\&}c3 \textit{\&}f6
4 \textit{\&}g5 \textit{\&}e7
5 e3 \textit{\&}bd7
6 \textit{\&}f3 0-0
7 \textit{\&}c2

This fashionable move which, for reasons unknown, was disdained for about a quarter of a century, allows Black to start a counter-attack in the
centre through 7...c5; but, as this action cannot be supported by Black's rooks, the resulting opening of files should turn to White's advantage. So, in my opinion, one should consider, instead of 7...c5, the following system: 7...c6 8 a3 (preventing ...Qe4) 8...h6 9 Qh4 Qe8 10 Qxe7 (10 Qg3 Qd6) 10...Qxe7 followed by ...Qd6.

7 ... c5
8 Qd1

As Black's reply proves sufficient to equalise, better would have been, as I played in two match games in Buenos Aires—8 cxd5 Qxd5 9 Qxe7 Qxe7 10 Qxd5 exd5 11 dxc5, followed by Qe2 and 0-0, with a secure slight endgame advantage.

8 ... wa5
9 Qd3 h6
10 Qh4 Qb6

A good move, which forces White to clear the situation in the centre before he has castled.

11 cxd5 cxd4 (D)

Although not directly bad, this zwischenzug certainly cannot be recommended, for it permits White to complicate matters without taking many chances. 11...Qbxd5, threatening 12...Qb4 or eventually ...cxd4, was incisive and good enough for equality.

12 d6!

This should not bring much but, still, it was a relief for White to be able to leave the routine, 'theoretical' path and force Black to find the best answer by himself!

12 ... Qxd6

Better than 12...dxc3 13 dxe7 cxb2+ 14 Qd2 Qe8 15 Qxf6 gxf6 16 Qxb2 ±.

13 Qxf6 gxf6?

But this weakening of the kingside was certainly unnecessary. After 13...dxc3 14 Qxc3 Qb4! 15 Qxb4 Qxb4+ 16 Qd2, the positional advantage left to White would be negligible.

14 Qxd4 Qb4

The bishop's position at d6 was not safe and, besides, the following exchange will give Black some kind of compensation for his disorganised queenside.

15 0-0 Qxc3
16 bxc3 Qd7

---

1 This assessment seems very doubtful. After 16...e5 17 0-0 Qg4 Black will soon take the pawn on e7, and White has little compensation as his pieces are not well placed for a kingside attack, for example 18 Qb1 Qxe7 19 Qc2 e4. However, by playing the immediate 15 Qxb2 White can prevent this defence and obtain adequate play for the pawn.
17  c4!

This pawn is about as weak here as at c3—but now, at least, it makes the important square d5 inaccessible to the black knight.

17  ...  \text{a}4
18  \text{b}b3  \text{w}b4
19  \text{w}e2!

Both an attacking and a defensive move. If now 19...\text{x}xb3, then first 20 \text{b}1.

19  ...  \text{f}c8
20  \text{b}1  \text{c}4

This looks very dangerous and, in fact, proves fatal. But, as the black king has been abandoned to his fate by all his troops, it is, in truth, already too late to prevent a direct assault by means of passive tactics. If, for example, 20...\text{x}xb3 then 21 \text{x}xb3 \text{w}e7 (or 21...\text{f}8 22 \text{f}3) 22 \text{g}4+ \text{f}8 23 \text{h}4 \text{g}7 24 \text{f}4 with an easy attack.

21  \text{d}d4  \text{c}5 (D)

When taking the pawn on the previous move, Black probably calculated that he would have a saving defence should White make the natural move 22 \text{x}b7. Actually, even in this case Black’s position would have been precarious enough, especially in view of White’s threat 23 \text{xe}6, which would win promptly after 22...\text{c}7, 22...\text{d}6, or 22...\text{e}8. Also 22...\text{e}5 would lose rapidly after 23 \text{h}5 \text{f}8 24 \text{f}4 \text{xd}3 25 \text{xe}6—but 22...\text{d}5, in order to answer 23 \text{xe}6? by 23...\text{xe}6 and 23 \text{b}4 by 23...\text{b}6, would still prolong the battle. The following combination by White is, therefore, the most convincing way to force a decisive advantage.

22  \text{xe}6!

Leads ‘only’ to the win of a pawn, but, by weakening black’s king’s position, permits White to force favourable exchanges, which will be amply sufficient for victory.

22  ...  \text{f}xe6
23  \text{g}4+  \text{h}8

After 23...\text{f}8 death would be quicker: 24 \text{xb}7 \text{g}5 25 \text{xe}6 \text{e}5 26 \text{f}4!.

24  \text{xb}7

Threatening mates at g7 and h7.

24  ...  \text{c}7
25  \text{xc}7  \text{xc}7
26  \text{xc}4  \text{e}5
27  \text{h}4  \text{g}7
28  \text{d}5

As Black’s king is now adequately protected, White rightly decides to simplify matters.

28  ...  \text{d}8
29  \text{xa}4  \text{xd}5
30  \text{c}6!

It was important to prevent Black doubling his pieces on the central d-file.
30 ... \( \text{Wf7} \)
31 \( \text{h3} \)

In order to activate the rook.
31 ... \( \text{g7} \)
32 \( \text{Ab1} \) \( \text{Ad7} \)
33 \( \text{a4!} \)

This pawn now threatens to advance to a6, after which \( \text{Ab7} \) would be decisive. Black is therefore practically forced to offer the exchange of queens.
33 ... \( \text{Cc7} \)
34 \( \text{Wb5} \) \( \text{Wd7} \)
35 \( \text{Wxd7+} \) \( \text{Xd7} \)
36 \( \text{Ab5!} \) (D)

The following endgame will be easily won, chiefly because of the dominating position of the rook.

5th. If now 44...\( \text{Ab4} \) then simply 45 \( \text{Cc6} \) \( \text{Xa4} \) 46 \( g5 \) and wins.
44 ... \( \text{g7} \)
45 \( \text{Cc7+} \) \( \text{h6} \)
46 \( \text{Ca7} \) \( \text{Ab3+} \)
47 \( \text{h4} \) \( \text{Ab4} \)

Or 47...\( \text{Ab6} \) 48 \( a5 \) \( \text{Cc6} \) 49 \( \text{f7}! \) \( \text{g6} \) 50 \( \text{Ab7} \) followed by 51 \( \text{Ab6} \) and wins.
48 \( \text{Xa6} \) 1-0

For if 48...\( \text{Xxf4} \), then 49 \( \text{Xxf6+}! \).

Game 95
Winter – Alekhine
Nottingham 1936
French Defence

1 \( \text{d4} \) \( \text{e6} \)
2 \( \text{e4} \) \( \text{d5} \)
3 \( \text{exd5} \)

This move is generally adopted to show that White is only playing for a draw. But, as a matter of fact, Black will have at least as many opportunities for complicating, if he wants to do so, as in most of the other variations of the French.
3 ... \( \text{exd5} \)
4 \( \text{Ed3} \) \( \text{Cc6} \)
5 \( \text{Ee2} \) \( \text{Ed6} \)
6 \( \text{c3} \)

Giving Black the welcome opportunity to take the initiative. However, the alternative 6 \( \text{Ec3} \) \( \text{b4} \) would lead either to the exchange of White’s light-squared bishop or to its removal to ineffective squares after 7 \( \text{Cc5+} \) \( \text{c6} \).
6 ... \( \text{Wf6!} \)

It was important to prevent 7 \( \text{Ec4} \).
7 \( \text{Ed2} \) \( \text{g4!} \)

The rook will prove even more effective on the 7th rank than on the
A correct pawn offer. After 8 \( \text{w}b3 \) 0-0-0 9 \( \text{w}x\text{d}5 \) \( \text{d}f6 \), to be followed by \( \ldots \text{e}h\text{e}8 \), Black would have an overwhelming advantage in development.

\[
\begin{align*}
8 & \text{wc}2 & 0-0-0 \\
9 & \text{d}f1 \\
\text{If} \ 9 \text{d}f5+, \text{then simply} \ 9 \ldots \text{b}8. \\
9 & \ldots & \text{g}6 \\
\end{align*}
\]

Preparing for the exchange of White’s ‘good’ bishop on d3, after which the light squares in his position will become somewhat weak.

\[
\begin{align*}
10 & \text{xe}3 & \text{ge}7 \\
11 & 0-0-0 & \text{f}5 \\
12 & \text{d}g3 & \text{xd}3 \\
13 & \text{xd}3 & \text{h}6 (D) \\
\end{align*}
\]

In order to secure the position of his queen, which might become uncomfortable after White’s \( \text{wd}2 \), intending \( \text{g}5 \).

\[
\text{W}
\]

\[
\begin{align*}
14 & \text{f}4? \\
\end{align*}
\]

This move, weakening without compensation important squares on the e-file, may be considered the decisive strategic mistake. Comparatively better was 14 \( \text{d}g1 \) followed by \( \text{d}f3 \), with a rather cramped but still defensible position.

\[
\begin{align*}
14 & \ldots & \text{w}g4 \\
\text{Black aims, successfully, at keeping f5 under control. How important this is will be evident in the second half of the game.} \\
15 & \text{h}3 & \text{w}d7 \\
16 & \text{d}h1 & \text{h}5! \\
\text{If now} 17 \text{f}5, \text{then} 17 \ldots \text{h}4 18 \text{f}6 \text{g}8 19 \text{h}1 \text{e}8 \text{and the white f-pawn would fall.} \\
17 & \text{d}g1 & \text{h}4 \\
18 & \text{d}e2 & \text{d}f5 \\
19 & \text{f}3 & \text{f}6 \\
\text{All White’s minor pieces will henceforth suffer from an obvious lack of space, and he will therefore be unable to counter Black’s increasing pressure on the e-file.} \\
20 & \text{h}2 & \text{d}e8 \\
21 & \text{d}2 & \text{e}6 \\
22 & \text{g}4 & \text{e}8 \text{h}8 \\
23 & \text{d}e1 & \text{d}e8 \text{g}7 \\
24 & \text{d}1 & \text{w}e8 \\
25 & \text{w}f3 (D) \\
\text{In order to move the knight from e2, which was at present impossible because of 25...\text{x}e1+ followed by \ldots \text{xf}4.} \\
\text{B}
\]

\[
\begin{align*}
25 & \ldots & \text{d}a5! \\
\end{align*}
\]
By this manoeuvre Black quickly obtains a decisive material advantage. White cannot now continue 26 \textit{W}xd5 because of 26...\textit{R}xe2 27 \textit{R}xe2 \textit{R}xe2 28 \textit{W}xa5 \textit{Q}g3 29 \textit{R}f3 \textit{W}e4! and wins.

26 \textit{b}3 \textit{Q}c4!

A forceful finish. If 27 bxc4, then 27...\textit{W}a4+ 28 \textit{Q}c1 \textit{Q}a3+ 29 \textit{Q}b1 \textit{Q}b6+ 30 \textit{Q}a1 \textit{W}c2 and mates in two.

27 \textit{Q}c1 \textit{Q}ce3+
28 \textit{Q}xe3 \textit{Q}xe3+
29 \textit{Q}xe3 \textit{Q}xe3
30 \textit{W}f2 \textit{W}b5!

Threatening 31...\textit{W}d3+ 32 \textit{Q}c1 \textit{Q}a3#. White is thus forced to give up a pawn.

31 \textit{Q}c1 \textit{Q}xc3
32 \textit{Q}xe7 \textit{Q}xe7
33 \textit{W}e1 \textit{Q}d7

If White plays \textit{W}xc3, now or next move, Black replies with ...\textit{W}xf1+ followed by ...\textit{W}xf4 or ...\textit{W}xg2 with an easy win.

34 \textit{f}5 \textit{Q}e3!
35 \textit{W}f2 \textit{g}5
36 \textit{Q}e1 \textit{Q}e4
37 \textit{Q}xe4

This exchange, giving Black a strong passed pawn, shortens matters. But White was lost in any case.

37 ... \textit{d}xe4
38 \textit{Q}d2 \textit{Q}d6

Threatening 39...\textit{c}3+!

39 \textit{Q}c2 \textit{Q}f4

0-1

1 Alekhine doesn’t analyse 27 \textit{W}xa5 in this line, when the win is more complicated: 27...\textit{Q}g3! 28 \textit{W}xa7 \textit{W}b5! 29 \textit{W}a8+ \textit{Q}d7 30 \textit{W}xf6+ \textit{Q}c6 31 \textit{c}4 (or else 31...\textit{W}xd2+ followed by 32...\textit{Q}e2+ wins) 31...\textit{W}xd2+ 32 \textit{Q}xd2 \textit{W}xc4! and Black wins as 33 \textit{Q}c1 allows mate in six.
10 b2 b8
Black shows his hand decidedly too early. The obvious object of the move is to play ...e4, followed by ...f5, for which purpose the bishop must be protected, to avoid the possible answer g5. But the same idea could have been combined with a mobilisation of forces, by 10...e7, 11...ad8 and eventually ...a8.

11 d1!
An interesting and effective way of meeting Black's plan. The b2-bishop is soon to play a most important and practically decisive part in the game.

11 ... e4
If 11...e7 then 12 e3 (and if 12...e4, then 13 d5).

12 e3 f5
13 d5!
This pawn will only apparently be weak as White can easily protect it by counter-threats.

13 ... exd5
13...e5 instead would lose a pawn to 14 h4!.

14 cxd5 d6 (D)

15 h4 d7
If 15...exd5 then 16 exd5! xd5 17 d4 wins material.

16 h3
Again preventing ...xd5, this time because of 17 xe4.

16 ... g6
17 f3 c5
18 g5

Threatening not only 19 xf6, but also 19 xf5 and 19 xf5. If 18...xd5, then White wins by 19 xg6. Black's reply is therefore forced.

18 ... g7
19 b4 cd7
It would be equally hopeless to play 19...a4 20 a1.

20 e4!
The initial move of the decisive sacrificial combination.

20 ... xe4 (D)
Black clearly based his last hopes on this ingenious tactical stroke. If now 21 xg7 xg5 22 xf8, then 22...xh3+ 23 g2 xf8 24 xh3 f6 followed by ...xd5 with good fighting chances.

21 c1!
Much more effective than 21 fxe4 wb2 22 exf5 w16, yielding White only a possible win after a laborious endgame.

21 ... ef6
22 xf5!

1 Or, after 14...ec5, Black would have given up his central outpost without any compensation.
The surprising sequel to 20 e4. After 22...gxf5 23 Ξxf5 Black would either lose his queen or be mated by 23...h8 24 h6+ g7 25 g5#.  
22 ...
23 Ξe6
At last the d-pawn is definitely safe.
23 ...
24 Ξe1 Ξe5
25 f4!
The simplest way to win.
25 ...
26 Ξd3 Ξxd3
27 g4 1-0
There is no remedy against g5.

Game 97
Alekhnine – Bogoljubow
Nottingham 1936
Slav Defence

1 d4 d5
2 c4 c6
3 Ξf3 Ξf6
4 Ξc3 dxc4
5 a4 e6?

This was the third time within a year that I had the pleasure of meeting the indifferent text move—and of taking advantage of it. 5...Ξf5 is, of course, much better.
6 e4 Ξb4
6...c5 is comparatively better, although not quite sufficient for equalising.
7 e5
7 Ξc2 b5 8 Ξe2 and 9 0-0 is also very promising, with more than sufficient positional compensation for the pawn.
7 ...
For 7...Ξd5 see Game 57.
8 Ξc2 Ξd5
9 Ξe2 c5
The game with Helling, Dresden 1936, continued as follows: 9...0-0 10 0-0 Ξxc3 11 bxc3 Ξe7 12 Ξd2 c5 13 Ξxc4 Ξd8 14 Ξc4 cxd4 15 cxd4 Ξd7 16 Ξd3 g6 17 Ξa3 Ξc6 18 Ξg4 Ξe8 19 Ξc4 h5 20 Ξf4 Ξg5 21 Ξg3 Ξh4 22 Ξe3 Ξd5 23 f3 Ξd8 24 Ξd6 Ξe7 25 Ξc5! and Black, whose queen is imprisoned in a quite spectacular way, resigned after a very few moves.
10 0-0 Ξxc3
11 bxc3 cxd4
12 Ξxd4 (D)

The 19th Euwe match–game 1935 continued as follows 12 cxd4 c3 13 Ξd2! Ξa5 14 Ξxc3! Ξxc3 15 Ξa3 Ξc6 (if 15...Ξd7, then 16 Ξxc3 Ξxa4 17 b5+!! and wins) 16 Ξxc3 Ξd7 17 Ξb1 0-0 18 Ξc5 Ξd8 19 Ξxb7 Ξc8 20 Ξb1 Ξxd4 21 Ξxd4 Ξxd4 22 Ξf3 and with the exchange up White had a technically easy win.

By recapturing here with the knight, I wanted to satisfy myself whether it is stronger than the line 1
adopted previously. As this game proves, White also wins back the pawn sacrificed, while keeping excellent attacking chances; the question which of the two moves gives him the greater advantage is, therefore, rather academic.

![Chess Diagram]

after which the weakness of the dark squares would be rapidly fatal for Black. The text move was based on a slight over-estimation of White’s attacking possibilities in the position which actually occurred after Black’s 21st move.

19 ...  
20  

Under the circumstances more promising than 20  which, however, was quite playable.

20 ...  
21  

The king must fly, because after 15... 16  and 17  Black would rapidly succumb.

16  

Forcing the weakening of Black’s kingside position.

16 ...  
17  
18  

Of course not 18...  because of 19  followed by .

19  

This is not the strongest continuation of the attack. The right way to exploit Black’s cramped position was to force the exchange of his dark-squared bishop by means of 19  20 f4 followed by 5,

22  ?

I made this move instantly, having calculated the whole variation on the 19th move. Instead 22  23  would maintain the advantage of space without any material loss.

22 ...  
23  
24  

Comparatively best as 24  25  would give Black some attacking prospects (...e5) in addition to his material gain.

24 ...  
25 $\text{d}4$

Realising that 25 $\text{a}a7$—planned already a few moves before—would be answered, not by 25...$\text{xa}7$ 26 b6 $\pm$, but by 25...$\text{d}5$! 26 $\text{xa}8$ $\text{xe}3$ 27 $\text{xf}8+$ $\text{xf}8$ 28 $\text{d}3$ $\text{xd}1$ 29 $\text{xd}1$ $\text{c}5+$, with a better queen ending for Black. After the text move White obtains sufficient compensation for the pawn, because of his powerful bishop, but that is about all. By the following moves Black could force a simplification which most probably would lead to a draw.

25 ... $\text{d}7$
26 $\text{f}2$ b6
27 $\text{e}1$

Preventing 27...f6 followed by ...e5.

27 ... $\text{c}4$
28 $\text{ab}1$ $\text{ac}8$
29 $\text{e}3$ $\text{fe}8$
30 $\text{f}3$ f6

Black begins to play with fire. Here, or even at the next move, he should offer the exchange of queens by ...$\text{d}5$, since he would still be able to protect his backward a-pawn. The variation 30...$\text{d}5$ 31 $\text{xd}5$ exd5 32 $\text{xe}8+$ $\text{xe}8$ 33 $\text{a}1$ $\text{a}8$ should probably result in a peaceful draw. After the text move and the next one, White succeeds in building up a formidable kingside attack.

31 $\text{b}4$ $\text{c}7$
32 $\text{b}2$

Now Black’s e-pawn becomes weak.

32 ... $\text{e}7$
33 $\text{be}2$ $\text{f}7$
34 g4 $\text{ce}8$
35 g5!

With a hidden purpose which Black entirely overlooks.

35 ... fxg5 ($D$)

The only chance of salvation was 35...f5 when White would still have excellent winning prospects by continuing h4-h5.

36 f5!!

A problem-like move which wins in all variations. Besides the continuation in the text, the following possibilities came into consideration:

1) 36...exf5 37 $\text{d}5+$ $\text{f}8$ 38 $\text{g}7+$! and wins.

2) 36...gx5 37 $\text{h}5+$ $\text{f}8$ 38 $\text{h}6+$ $\text{g}8$ 39 $\text{xg}5+$ and White wins.

---

1 Even here 26...$\text{a}2$! 27 $\text{xa}2$ $\text{xc}3$ 28 $\text{d}4$ $\text{f}3$ 29 $\text{f}1$ $\text{d}5$ maintains Black’s extra pawn, and leaves White struggling to find compensation for the sacrificed material.
3) 36...e5 37 \textit{d}d5+ \textit{f}8 38 \textit{c}6! \textit{xc}6 39 \textit{b}xc6 \textit{ex}d4 40 \textit{xe}7 \textit{xe}7 41 \textit{xe}7 \textit{xc}7 42 \textit{c}7 winning.  
36 ... \textit{f}4

Neither better nor worse than the variations just given.
37 \textit{fx}e6+ \textit{xe}6 38 \textit{d}5

Another winning line was 38 \textit{h}3 \textit{h}4 39 \textit{xf}1+ \textit{g}8 40 \textit{xe}6!.
38 ... \textit{f}6
White also threatened 39 \textit{xf}1.
39 \textit{xf}6 \textit{g}4+ 40 \textit{g}2 \textit{f}5 41 \textit{e}5

But not 41 \textit{c}4? \textit{c}5+ and Black would win!
41 ... \textit{g}8 42 \textit{f}2 \textit{g}4+ 43 \textit{h}1 \textit{h}5 44 \textit{g}1 \textit{h}4 45 \textit{f}6 \textit{h}7 46 \textit{xe}6 \textit{xe}6 47 \textit{d}7+ 1-0

Game 98
Alekhine – Fine
Hastings 1937
Ruy Lopez

1  e4   e5
2  \textit{f}3  \textit{c}6
3  \textit{b}5   a6
4  \textit{a}4  \textit{f}6
5  0-0  \textit{e}7
6  \textit{e}1  b5

7  \textit{b}3   d6
8  c3   \textit{a}5
9  \textit{c}2   c5
10  d4   \textit{c}7
11  \textit{bd}2   0-0

So far everything is conventional, but here the generally adopted move is 11...\textit{c}6, trying to force White to a decision in the centre. Then the most promising reply for White is 12 \textit{a}4 \textit{b}8 13 \textit{ax}b5 \textit{ax}b5 14 \textit{dx}c5 \textit{dx}c5 15 \textit{f}1 followed by \textit{c}3.
12 \textit{f}1  \textit{g}4

The continuation of this game proves convincingly that the early exchange of this bishop gives White promising attacking opportunities on the kingside—but a fully satisfactory plan is not easy to find. The comparatively most logical method seems to be 12...\textit{d}7, followed by ...\textit{fc}8 and ...\textit{f}8.
13 \textit{e}3!

The most forcible reply, which does not even oblige White to sacrifice anything on the next moves if he does not want to.
13 ... \textit{xf}3
14 \textit{xf}3!

After the simple 14 \textit{gxf}3 White would have the pair of bishops and some attacking chances on the basis of the open g-file; but the text move, by which he preserves his pawn structure intact, is more precise and stronger.

\footnote{Unfortunately, Alekhine fails to consider Black's best defences. 36...e5 37 \textit{d}5+ \textit{g}7 38 \textit{c}6 (38 \textit{f}6+ \textit{xf}6 39 \textit{xe}5 \textit{xe}5 40 \textit{xe}5 \textit{h}6! and White doesn't have much to show for his two pawns, since ...\textit{h}5 will defend the king) 38...\textit{c}8! is probably the most accurate, when White is struggling to avoid defeat.}
14 ... cxd4 (D)

15 Qf5?

But this risky offer—mainly explained by my being a half-point behind Fine and having to win at all costs in order to be first—cannot be recommended objectively, although after it White keeps the initiative for quite a long time. The right move was 15 cxd4! since, after 15...exd4 16 Qf5 Wxc2 17 Qxe7+ Wh8 18 Qf5! (threatening 19 Qxg7! Qxg7 20 Qh6+), White would have obtained a decisive advantage. Also 15...Qc6 (the answer I actually expected to 15 cxd4) 16 d5! Qd4 17 Wd1 Qxc2 18 Qxc2 (threatening 19 Qb4) 18...a5 19 Qd2, followed by Qc1, would have given White the advantage. Fine’s next few defensive moves are not only good, but the only ones.

15 ... dxc3
16 Qxc3! Qe8!

Indirectly protecting the knight at a5 by an attack against White’s c2-bishop.

17 Wg3 Qf8
18 Qd3

If, instead, 18 Qg5 then simply 18...Wxc2 19 Qxf6 g6.

18 ... Qc6
19 Qg5 Qe8
20 Qac1?!

As an eventual exchange of rooks would be entirely to Black’s advantage, there was no need for White to play his rook on to the open file. The immediate 20 Qad1 was indicated (see 24th move), followed by a3 and Qb1-a2, when White’s extra tempo would probably have been of great importance. After the move played, on the contrary, Black has a comparatively easy defence.

20 ... Wb7
21 a3

The manoeuvre intended here, namely Qb1-a2-d5, induces Black to start a counter-demonstration on the queenside, and, in order to do so, he must first force the exchange of the white knight.

21 ... g6
22 Qh6+ Qxh6
23 Qxh6

1 A strange comment, since at the end of this line 20 We3! h5 (the only move) 21 Qh6+ Qh7 22 Qxf7 gives White dangerous threats without any sacrifice; in particular, 22...Wxb2 loses to 23 Qg5+ Qg8 24 Wb3 Qe8 25 Wd7. It follows that Black should prefer 18...Qh5 19 Wg4 Wb7! (19...Wxc2?!) 20 Qac1, with Qxc8 and Qe7+ to come, is good for White), but White still has dangerous attacking chances and this line appears to be at least as good as that played in the game.
Black’s dark squares are now somewhat weak—but his knight at e8 is a stout defender.

23 ... \( \text{Qd4} \)
24 \( \text{Qc1} \) b4
25 f4!

The opening of this file offers fair equalising prospects—but with correct play hardly more.

25 ... exf4

The defence of e5 by means of 25...f6 would be well met by 26 f5!.

26 \( \text{Wxf4} \) bxa3
27 bxa3 \( \text{Qc3}! \)

An ingenious drawing combination: if 28 e5, then 28...\( \text{Rxd3} \) 29 \( \text{Lxd3} \) \( \text{Qe2}+ \) 30 \( \text{Qxe2} \) \( \text{Wb1}+ \) 31 \( \text{Qf2} \) \( \text{Rxd3} \) 32 e6! \( \text{Wf5} \) 33 \( \text{Wxf5} \) gxf5 34 e7 f6 35 \( \text{Qe3}! \) and the presence of White’s king on the queenside would eliminate the danger of his losing. But as a draw meant the same as a loss to me, I did not even take this variation into serious consideration.

28 \( \text{Wf2} \) \( \text{Qe6}?! \)

From now on, Fine’s resistance gradually begins to weaken. The game has not developed quite according to his expectations (i.e. the frustrated chance of simplifying by means of 28...\( \text{Rxd3} \)). After the natural 28...\( \text{Qc6} \) 29 \( \text{Qc1}! \) \( \text{Qe5} \) 30 \( \text{Qf1} \) (30...\( \text{Qg4} \) 31 \( \text{Wd4} \)), he would have slight winning chances, although the white bishops would have almost counterbalanced the not over-important extra pawn.

29 a4

This insignificant-looking pawn will support White’s threats in a very efficient way.

29 ... \( \text{Rac8} \)

Again out of place, since it will immediately become evident that his a-pawn needs more protection. The other rook should have returned to c8.

30 \( \text{Qf1} \)

Threatening 31 \( \text{Qxa6} \).

30 ... \( \text{R3c7} \)
31 \( \text{Qb1} \) \( \text{Wc6} (D) \)

32 a5!

Incredible but true—White has suddenly obtained strong pressure on the queenside. A rather confusing result of Black’s manoeuvres in that sector of the board!

32 ... \( \text{Qc5}? \)

The evolutions of this knight have been decidedly unfortunate, and after this last one there will be no salvation. Comparatively best was 32...\( \text{Ra8} \) after which White would have increased his positional advantage with 33 \( \text{Qbc1} \) followed by 34 \( \text{Qc4} \) ±.

33 \( \text{Qc4} \)

If now 33...\( \text{Qxe4} \), then 34 \( \text{Qxf7+} \) \( \text{Qh8} \) 35 \( \text{Wd4+} \) and wins. Black’s answer is therefore forced.
33 \ldots \text{ \textit{Wd7}}
34 \text{ \textit{Wa2}}!

It is odd how sometimes exactly the same attacking ideas repeat themselves within a short period of time! One may compare the text move, for instance, with 37 \textit{Wd2} in my game against Tylor from Margate 1937, where a queen move transposing a vertical attack into a diagonal one brought an equally rapid decision.

34 \ldots \text{ \textit{Qxe4}}
Or 34...\textit{Qe6} 35 \textit{Qxe6}.
35 \textit{Qxf7} \textit{Wxf7}
36 \textit{Qxf7}+ \textit{Qxf7}
37 \textit{We6}! 1-0

An interesting fight which was certainly influenced by the exceptional importance of the result.

Game 99
Alekhine – Reshevsky
Kemeri 1937
Alekhine Defence

1 e4 \textit{Qf6}
2 e5 \textit{Qd5}
3 \textit{Qf3} \textit{d6}
4 d4 \textit{Qg4}
5 c4

There is no hurry to dislodge the knight. The immediate 5 \textit{Qe2} allows White, if 5...dxe5, to retake with the knight without being forced to sacrifice a pawn.

5 \ldots \textit{Qb6}
6 \textit{Qe2} dxe5
7 \textit{Qxe5}

This was my intention when playing 5 c4, but—although White will obtain some compensation for the pawn sacrifice—it was hardly advisable to make a considerable effort in order to obtain most likely only equality. In the 29th game of my first match with Dr. Euwe I played here 7 c5 and obtained an opening advantage, but only because my opponent after 7...e4 8 cxb6 exf3 9 \textit{Qxf3} \textit{Qxf3} 10 \textit{Qxf3} selected the same move 10...axb6 instead of more active 10...\textit{Qc6}!.

7 \ldots \textit{Qxe2}
8 \textit{Wxe2} \textit{Wxd4}
9 0-0

Permitting the exchange of the central knight and thus facilitating Black's defence. More to the point was 9 \textit{Qa3}! \textit{Qd7} 10 \textit{Qf3} or 9...e6 10 \textit{Qc2}, in both cases preserving three minor pieces for attacking purposes.

9 \ldots \textit{Qd7}
10 \textit{Qxd7}

The sacrifice of the c-pawn by 10 \textit{Qf3} would be aimless.

10 \ldots \textit{Qxd7}?

Strangely enough, Reshevsky decided to make this inferior move after a particularly close examination of the situation. One would think that 10...\textit{Wxd7} could be automatically selected because of the general consideration that otherwise the exposed queen in the centre will permit White to win further tempi and thus obtain real compensation for the pawn. If Black had retaken with the queen, my intention was to continue with 11 a4! \textit{Qc6} (and not 11...\textit{Qxa4} 12 \textit{Qf3}!) 12 \textit{Qa3} e6 13
a5 งd7 14 งb5 after which Black’s defensive problem would remain by no means easy. The text move endangers his position and only the greatest circumspection saves him from a rapid debacle.

11 งc3 ค6
The threat 12 งb5 was too strong.
12 งe3 งe5
13 งad1 ค6 (D)

14 งf3!
An important move which practically forces Black to return his extra pawn since his king had to be removed from the centre at all costs. Insufficient would be, for instance, 14...งd6 15 g3, 14...งe7 15 งxd7! followed by 16 งxf7 or 14...งf6 15 งb5!, with a winning attack.

14 ... 0-0-0!

15 งxa7
Instead 15 งxf7 would be a grave error because of 15...งd6 followed by ...งh8 winning, but now White, after having restored material equality, maintains a clear positional advantage, Black’s king’s position being anything but safe.

15 ... งa5

16 งd4
Prevents 16...งe5.
16 ... งf5
Trying to make the best of it. The endgame after the queen exchange certainly looks bad enough, but is not quite hopeless.

17 งg3
An ex-champion’s decision... Before 1935—and now—I would doubtless have adopted the simple line 17 งxf5, which would secure virtually an extra pawn on the queenside and eliminate any shadow of danger. But during the whole period preceding the return match I simply could not rely on my patience and nerves—which certainly would have been required for winning the endgame in question.

17 ... ค5
18 งe3 งb4
19 งa4

White’s best attacking chance, since from this square the knight will ‘observe’ both b6 and c5. But Black’s next manoeuvre gives his king—at least temporarily—sufficient protection and, in fact, nearly equalises.

19 ... งa5!
20 f4!
Otherwise Black would even have obtained the initiative after 20...งc7 and ...e4.

20 ... งc7
21 b3
It was important to prevent Black from playing ...งc2 with tempo.
21 ... f6
22 fxe5 งe6
Of course not 22...\text{\texttt{\textbf{\textit{W}}}}xe5 23 \text{\texttt{\textbf{\textit{R}}}f4} and wins.

23 \text{\texttt{\textbf{\textit{h}}}3!}

A good positional move which, however, is neither particularly deep nor difficult to find. Its main object is to prevent the possibility ...\text{\texttt{\textbf{\textit{W}}}g4 after 23...\text{\texttt{\textbf{\textit{Q}}}xe5 24 \text{\texttt{\textbf{\textit{Q}}}c5, and also in some other variations the protection of g4 was essential. I was not a little surprised to read all the compliments addressed by the critics to the modest text move, and also, after the game was over, to be questioned—in all seriousness—whether by 23 \text{\texttt{\textbf{\textit{h}}}3 I already planned to play my queen to h2 on the 33rd move.

23 \ldots \text{\texttt{\textbf{\textit{E}}}hg8}

At this particular moment the g-pawn was not yet in danger—but after the exchange of one pair of rooks on the d-file it eventually could be taken.

24 \text{\texttt{\textbf{\textit{A}}}d4}

With the clear purpose of lessening the tension in the centre by 25 \text{\texttt{\textbf{\textit{W}}}e3 or \text{\texttt{\textbf{\textit{W}}}c3.

24 \ldots \text{\texttt{\textbf{\textit{Q}}}xe5}

This looks rather promising, as 25 \text{\texttt{\textbf{\textit{Q}}}c5 can be met by 25...\text{\texttt{\textbf{\textit{W}}}e7 and 25 \text{\texttt{\textbf{\textit{A}}}b6+ \text{\texttt{\textbf{\textit{Q}}}b8 26 \text{\texttt{\textbf{\textit{W}}}c3? by 26...c5, with advantage for Black, but a slight inversion of moves entirely changes the situation in White's favour. Therefore, 24...fxe5 25 \text{\texttt{\textbf{\textit{W}}}e3 e4 26 c5 \text{\texttt{\textbf{\textit{R}}}de8 was comparatively better, after which Black's passed pawn would in

some way counter-balance White's queenside threats.

25 \text{\texttt{\textbf{\textit{W}}}c3!}

Threatening both 26 \text{\texttt{\textbf{\textit{Q}}}c5 and 26 \text{\texttt{\textbf{\textit{A}}}b6+. Black's reply is practically forced, since after 25...\text{\texttt{\textbf{\textit{Q}}}b8 26 \text{\texttt{\textbf{\textit{Q}}}c5 \text{\texttt{\textbf{\textit{Q}}}d6 27 \text{\texttt{\textbf{\textit{W}}}b4! White's threats would prove the stronger.

25 \ldots \text{\texttt{\textbf{\textit{D}}}d7}

26 \text{\texttt{\textbf{\textit{c}}}5!}

In the following part of the game, this pawn will fulfil several functions of the bishop, which from now on will merely supervise the development of events.

26 \ldots \text{\texttt{\textbf{\textit{N}}}ge8 (D)}

\begin{center}
\begin{tabular}{|c|c|c|c|c|}
\hline
\text{W} & & & & \\
\hline
& & & & \\
\hline
& & & & \\
\hline
\end{tabular}
\end{center}

27 \text{\texttt{\textbf{\textit{b}}}4!}

A pawn-offer, the idea of which is 27...\text{\texttt{\textbf{\textit{W}}}xa2 28 \text{\texttt{\textbf{\textit{H}}}a1 \text{\texttt{\textbf{\textit{W}}}e6 (or 28...\text{\texttt{\textbf{\textit{W}}}d5 29 \text{\texttt{\textbf{\textit{Q}}}fd11) 29 \text{\texttt{\textbf{\textit{b}}}5! threatening 30 \text{\texttt{\textbf{\textit{Q}}}b6+, with a very strong attack.

27 \ldots \text{\texttt{\textbf{\textit{Q}}}b8}

After this retreat White obtains a won game—but not so much because of his direct attack as through

---

1 This line is virtually a forced win for Black after 29...\text{\texttt{\textbf{\textit{E}}}e2 30 \text{\texttt{\textbf{\textit{Q}}}f2 \text{\texttt{\textbf{\textit{R}}}f5, so it seems that Reshevsky could have taken the offered pawn.}
the fact that after the following forced exchange his bishop will become considerably stronger than the black knight. A satisfactory defence was, however, not visible. Black's decisive—although by no means obvious—error was most likely 24...\(\square\)xe5.

28 \(\square\)b6+ \(\square\)xb6
29 cxb6 \(\square\)xa2

After his counter-chances on the diagonal b8-h2 have vanished, Black rightly estimates that his only slight chance of salvation consists of extreme recklessness. As a matter of fact I confess that at this moment I even did not consider the possibility of the capture in the text.

30 \(\square\)g3!
More exact than 30 \(\square\)a1 \(\square\)d5.
30 ... \(\square\)d7
Or 30...\(\square\)f7 31 \(\square\)a1! \(\square\)xd4 32 \(\square\)a8 \(\square\)e5 33 \(\square\)xe5 and wins.
31 \(\square\)c5

Good enough, but 31 \(\square\)xf6! was simpler: if 31...gx\(\square\)f6 then 32 \(\square\)xd7 \(\square\)xd7 33 \(\square\)c7+ \(\square\)e6 34 \(\square\)e1+ wins.
31 ... \(\square\)f7
32 \(\square\)a1 \(\square\)g6
33 \(\square\)h2!

After this Black can no longer prevent the unwelcome rook's visit to a8.

33 ... \(\square\)e5
Or:
1) 33...\(\square\)g5 34 \(\square\)a8 \(\square\)e5 35 \(\square\)f2! \(\square\)xh2+ 36 \(\square\)xh2 and after \(\square\)g3 Black would lose the exchange with a hopeless position.
2) 33...\(\square\)a6 34 b5! \(\square\)g5 35 \(\square\)f1! and wins.

34 \(\square\)a8 (D)

34 ... \(\square\)d2

Black overlooks the main threat. But after a defensive move such as 34...\(\square\)e8 White would also have won very rapidly by 35 \(\square\)g3 followed by 36 \(\square\)a3.

---

1 It is typically Alekhine that he only analyses one alternative to the blunder actually played—the almost equally weak move 34...\(\square\)e8, which allows the white queen to enter the attack. Black should have prevented the sacrifice on e5 by 34...\(\square\)g5!, which both retains the black queen's active position and keeps the white queen in its box. The reply 35 \(\square\)f2 is pointless, as 35...\(\square\)d3 prevents White transferring his bishop to the h2-b8 diagonal. Of course the pin on the e5-rook ties Black up, but the absent white queen means that White also has few possibilities to strengthen his position, for example 35 b5 cxb5 36 \(\square\)a3 \(\square\)e3+ (36...\(\square\)d2?! 37 \(\square\)c1+ \(\square\)d7 38 \(\square\)xb8 b4! 39 \(\square\)xb7+ \(\square\)e6 40 \(\square\)xb4 \(\square\)xg2+ 41 \(\square\)xg2 \(\square\)xc1+ is also a draw) 37 \(\square\)h1 \(\square\)c3 38 \(\square\)g1 \(\square\)e2 39 \(\square\)h2 \(\square\)e5 is a draw, while given time Black
35 \( \text{Bx}b8+! \) \( \text{Qxb8} \)
36 \( \text{Wxe}5+! \)

and mate in three moves.

Although in all objectivity I had to blame my 17th move (which, by the way, is accompanied by an ! in the tournament book) I must admit that the final attack of this game gave me (and I hope will give the readers) much more pleasure than a scientifically correct, but purely technical, exploitation of a queenside pawn majority would do. After all, chess is not only knowledge and logic!

Game 100
Alekhine – Fine
Kemeri 1937
Queen’s Gambit Accepted

1 \( d4 \) \( d5 \)
2 \( c4 \) \( \text{dx}c4 \)
3 \( \text{Qf}3 \) \( \text{Qf6} \)
4 \( \text{Wa}4+ \)

This queen manoeuvre is more effective here than in the Catalan system (after \( g3 \)) since White may, in some variations, wish to develop his bishop on the diagonal \( f1-a6 \). But also after the more usual \( 4 \text{e}3 \) White’s prospects are considered by far the more promising, and this fact is due not to a particular variation, but to the modern method of treating the Queen’s Gambit Accepted with White: to advance the centre pawns at the first opportunity, even at the cost of heavy sacrifices. This characteristic idea can be seen in the games Reshevsky-Vidmar (Nottingham 1936), Euwe-Alekhine (5th match-game, 1937), and, even earlier, Opocensky-Rubinstein (Marienbad 1925). In my own recent practice the following example, illustrating this new tendency of White, is, I believe, noteworthy:

Alekhine-Letelier, Montevideo 1938: 4 \( c3 \text{e}6 \) 5 \( \text{dx}c4 \) \( c5 \) 6 \( 0-0 \) \( a6 \) 7 \( \text{We}2 \) \( b5 \) 8 \( \text{b}3 \) \( \text{b}7 \) 9 \( \text{Qc}3 \) \( \text{bd}7 \) 10 \( \text{Ed}1 \) \( \text{Ec}7 \) 11 \( \text{e}4! \) \( b4 \) 12 \( e5 \) \( \text{bx}c3 \) 13 \( \text{ex}f6 \) \( \text{xf}6 \) 14 \( \text{a}4+ \) \( \text{f}8 \) 15 \( \text{dx}c5 \) \( \text{a}5 \) 16 \( c6 \) \( \text{wx}a4 \) 17 \( \text{cx}b7 \) \( \text{xb}8 \) 18 \( \text{bx}c3 \) \( \text{xb}7 \) 19 \( \text{Ec}5 \) \( \text{We}4 \) 20 \( \text{wx}a6 \) \( \text{Cc}7 \) 21 \( \text{a}3! \)

\( g6 \) 22 \( \text{xe}7+ \) \( \text{xe}7 \) 23 \( \text{Wd}6 \) \( \text{g}7 \) 24 \( \text{We}7 \) \( \text{Wxe}5 \) 25 \( \text{Wb}4 \) 1-0.

See also Alekhine-Böök, Margate 1938 (game 110).

4 ... \( \text{Wd}7 \)

As the white queen will not be particularly dangerous on \( c4 \), there is no reason to make such an effort to force her exchange. Instead, \( 4...c6 \) \( \text{Wxc}4 \) \( \text{Qf}5 \) is a sound line.

5 \( \text{Wxc}4 \) \( \text{We}6 \)
6 \( \text{Qa}3 \)

There is but little difference between this move and \( 6 \text{Qbd}2 \) since in both cases Black has nothing better, in order to justify his previous manoeuvre, than to exchange queens.

---

might exchange a pair of rooks by \( ...\text{Qd}3-c3-c1 \). My impression is that while White is in no danger of being worse, Black should be able to hold on by accurate defence.
6 ... \(\text{\#xc4}\)
7 \(\text{\#xc4}\) e6
8 a3

It was very important to prevent ...
\(\text{\#b4+}\).

8 ... \(\text{c5?}\)

A dogmatic move after which White succeeds in obtaining a clear positional advantage. In his haste to
counter-attack in the centre, Black for a moment forgets the importance
of d6. A bold, but by no means antipositional, scheme was instead
8...a5 (preventing b4), and if 9 \(\text{\#f4}\) then 9...b5 followed by 10...
\(\text{\#d6}\). At least in that case White would not so easily obtain the advantage of the
pair of bishops.

9 \(\text{\#f4}\) \(\text{\#c6}\)

Slightly better was 9...
\(\text{\#bd7}\) 10
\(\text{\#d6+ \#xd6}\) 11 \(\text{\#xd6 \#e4}\) 12 \(\text{\#c7}\)
b6 followed by ...
\(\text{\#b7}\), but the weakness of the dark squares would
remain in any case.

10 \(\text{\#xc5}\) \(\text{\#xc5}\)
11 b4 \(\text{\#e7}\)
12 b5 \(\text{\#b8}\)
13 \(\text{\#d6+}\) \(\text{\#xd6}\)
14 \(\text{\#xd6}\) \(\text{\#e4}\)
15 \(\text{\#c7!}\)

At this stage, the dark-squared bishop is practically White’s only
winning chance, and he must play
extremely carefully in order to prevent its exchange. Inadvisable would
be 15 \(\text{\#b4 a5}\) 16 bxa6 \(\text{\#xa6}\), or 15
\(\text{\#f4 f6!}\), followed by 16...e5, with
approximately equal prospects in
both cases.

15 ... \(\text{\#d7 (D)}\)
16 \(\text{\#d4!}\)

Again an important move, the
idea of which is to build up the pawn chain e4, f3, g2. It was not very easy
to find, mainly because the two alternatives 16 e3 and 16 g3 also of-
fered some interesting possibilities.

16 ... \(\text{\#b6}\)
17 f3 \(\text{\#d5}\)
18 \(\text{\#a5}\) \(\text{\#e6}\)

Another important variation was
18...
\(\text{\#d6}\) 19 e4 (not 19 \(\text{\#c2}\) \(\text{\#c4}\))
19...
\(\text{\#e3}\) 20 \(\text{\#b4!}\) e5 21 \(\text{\#xd6 exd4}\)
22 \(\text{\#d3!}\) \(\text{\#xg2+}\) 23 \(\text{\#f2}\) \(\text{\#e3}\) 24
\(\text{\#e5} ±\).

19 \(\text{\#c2!}\)

The actual point of the manoeuvre inaugurated by 16 \(\text{\#d4}\): Black’s
knight is prevented from intruding at
e3 and from now on will be forced to
play a purely passive role. The chas-
ing of the bishop by the two knights
has thus proved a complete failure.

19 ... \(\text{\#d7}\)
20 e4 \(\text{\#e8}\)

This intermediate move is per-
fectly harmless, as the white king at
d2 cannot be seriously bothered by
the half-lamed black forces.

21 \(\text{\#d2!}\) \(\text{\#b6}\)
22 \(\text{\#e3}\) 0-0
All Black’s moves since 18...\(\text{Qe}f6\) have been virtually forced.

23 a4!

Much stronger than the conventional 23 \(\text{Qd}3\) which would permit the freeing manoeuvre \(\text{Qa}4\)-c5.

23 \(\text{Qd}3\) e5

After this weakening of the d5 and f4 squares the game can hardly be saved. Black’s only slight chance consisted of 24...\(\text{Qe}8\), eventually followed by ...\(\text{Qfd}7\). White’s tactics in that case would have remained about the same—exchange of one pair of rooks, removal of the a5-bishop and dislodging of the black knight from b6.

25 \(\text{Whc}1\) \(\text{Qe}6\)
26 \(\text{Xxc}8\) \(\text{Xxc}8\)
27 \(\text{Qb}4\)

Preventing the approach of the enemy king to the centre and eventually threatening \(\text{Qd}6\).

27 \(\text{Qe}8\)
28 a5 \(\text{Qd}7\) (D)

29 \(\text{Qd}5!\)

This had to be exactly calculated since the passed pawn resulting from the exchange will be slightly exposed. Because White threatens 30 \(\text{Qe}7+\) Black must take the knight

29 ... \(\text{Qxd}5\)
30 \(\text{exd}5\) \(\text{Qc}5\)

The ‘little combination’ thus started finds a convincing refutation in White’s 32nd move. But what could he actually do? The recommendation of the tournament book, 30...g6, would in the long run be perfectly hopeless after 31 d6 f5 32 \(\text{Qb}1!\) \(\text{Qg}7\) 33 \(\text{Qa}2\) \(\text{Qf}6\) (33...\(\text{Qef}6\) 34 \(\text{Qe}1\)) 34 \(\text{Qd}5\).

31 \(\text{Qf}5!\) \(\text{Qd}8\)

Or 31...\(\text{Qb}3+\) 32 \(\text{Qd}3\) \(\text{Qc}1+\) 33 \(\text{Qe}3\) \(\text{Qc}4\) 34 d6 and wins.

32 \(\text{Qc}3!\)

This pretty move eliminates both threats 32...\(\text{Qb}3+\) and 32...\(\text{Qxd}5+\), the latter because of the answer 33 \(\text{Qc}4!\) winning a piece. White’s overwhelming advantage in space now decides the battle in a few moves.

32 ... b6

Or 32...\(\text{Qd}7\) 33 \(\text{Qe}7\) and wins.

33 \(\text{axb}6\) \(\text{axb}6\)
34 \(\text{Qxc}5!\)

The bishop has done in this game more than his duty and may now retire, for the passed b-pawn can only be stopped at a heavy loss.

34 ... \(\text{bxc}5\)
35 b6 \(\text{Qd}5\)
36 \(\text{Qd}7!\) \(\text{Qxd}7\)

Instead of resigning.

37 \(\text{Qa}8+\) and mate in two.

This game is probably my best purely positional achievement of the last few years.
Game 101
Alekhine – Bogoljubow

Quadrangular Tournament,
Bad Nauheim 1937
Queen’s Gambit Declined

1 d4 d5
2 c4 e6
3 Qc3 Qf6
4 Qg5 Le7
5 Qf3 h6
6 Qh4 0-0
7 e3 b6

In conjunction with ...h6, this flank development has often been rather successfully adopted by Dr. Tartakower. White has several plausible ways of meeting it, not one being a convincing refutation. In the present game, I decided to allow Black to fulfil his plan of mobilisation or—to be more precise—the first part of it consisting of ...b7, ...Qbd7, ...c5—and to try to take advantage only from one detail of the position, namely the fact that the black queen is deprived of the diagonal d8-a5 and will not easily find a good square. The course of the game shows to what extent the idea proved successful. It lacks tactical points, is emotionless—but by no means dull—and is of use to the student.

8 Qc1 b7
9 Qe2

Inducing Black to win a tempo by the following pawn exchange.

9 ... dxc4
10 Qxc4 c5
11 0-0 Qbd7

If 11...Qc6 then 12 dxc5 Qxd1
13 Qfxd1 and Black would get into trouble because of the possible entry of the rook on to the seventh rank.

12 We2 0e4

I suppose many masters would have made this move since, by forcing the exchange of two minor pieces, it frees Black’s game and, in particular, provides a safe spot for the queen. Yet it is doubtful whether the more complicated 12...a6 13 Qfd1 b5 would not have offered more equalising prospects. After the exchange of Black’s b7-bishop, the light squares on the queenside suddenly become weak.

13 Qxe4 Qxh4
Or 13...Qxe4 14 Qg3! ±.

14 Qc3!

This simple retreat is more effective than 14 Qd6 Qxf3 15 Qxf3 Qe7\(^1\), forcing White to waste more time, or 14 Qd3 Qf6, after which Black would avoid the exchange of his light-squared bishop.

14 ... Qf6
15 Qfd1 We7

At last communication between the rooks is established, but now comes the actual point of White’s previous manoeuvres.

16 Qa6 Qab8
17 Qxb7 Qxb7

\(^1\) Here White can gain a clear advantage by 16 Qxf7! Qxf7 17 Qxe6 Qf6 18 Qfd1, so Black should prefer 15...cxd4.
18 Qe4!

In order to obtain full control of the c-file, White allows the isolation of his d-pawn, which, as the continuation will clearly show, is by no means weak.

18 ... cxd4
19 exd4 (D)

Instead, 19 Qxd4 Bxd4 20 Bxd4 Qf6 would be just good enough for a comfortable draw.

19 ... Ad8

Black’s position has become difficult. By playing 19...Qb8 20 Qe5! he could at least temporarily avoid compromising the kingside pawn structure—but a further suitable plan of defence would be as difficult to find as after the move selected.

20 Wa6! Qb8

After 20...Adb8, 21 Ac8+ would be strong and 20...Qfx8 21 Qxf6+ would leave the c6-square defenceless.

21 Qxf6+ gxf6 1
22 We2

Now White has two important trumps—the open file and Black’s weak kingside. By rational exploitation this will suffice.

22 ... Bd7
23 Ad3 Bd5
24 Eed3

As the weak pawn requires only one protector, the rooks can, and must, be used to exert strong pressure on the c-file.

24 ... Qh7
25 h3 a5

Weakens the b-pawn—but otherwise the a-pawn would need lasting defence. Already Black has only a choice between evils.

26 a3

As the opponent has no useful moves at his disposal, White can quietly correct the small defects in his pawn structure.

26 ... Eg8
27 Ac7 Qd7
28 Ac6 Wf8 (D)
29 Wc2+

More exact than 29 Ac8 Wg7! 30 Wc2+ after which Black would have the answer 30...Wg6.

29 ... f5

Otherwise 30 Ac8 would be even more effective.

30 Ac8 We7
31 Exg8

---

1 Black could have avoided having his kingside pawns broken up by the simple expedient of playing 21...Wb8 and only then 22...Wxf6. In this case White would only have a marginal edge.
The black rook had to be exchanged, for it prevented the possible activity of the white queen on the kingside.

31 ... \( \text{\underline{gx}g8} \)
32 \( \text{\underline{wc}1} \) \( \text{\underline{g}7} \)
33 \( \text{\underline{wf}4} \)

Threatening 34 \( \text{\underline{wg}3+} \), followed by \( \text{\underline{ec}8} \).

33 ... \( \text{\underline{wd}8} \)
34 a4!

Preventing ...\( \text{\underline{b}b5} \) once and for all, and putting Black into a kind of zugzwang position.

34 ... \( \text{\underline{b}5} \)

This natural-looking answer loses rapidly. Comparatively the best was 34...\( \text{\underline{h}h7} \), after which White finally forces the issue by playing the queen over to the queenside by \( \text{\underline{wc}1-c4-a6} \).

35 \( \text{\underline{wg}3+} \) \( \text{\underline{f}8} \)
36 \( \text{\underline{ed}6!} \)

This wins at least a pawn by practically forcing a queen exchange. The resulting endgame will not present much difficulty, since there will be still more weaknesses to take advantage of—for instance, the h6-pawn.

36 ... \( \text{\underline{wa}8} \)

36...\( \text{\underline{bxa}4} \) would be equally hopeless after 37 \( \text{\underline{xd}5} \) exd5 38 \( \text{\underline{d}d6+} \) \( \text{\underline{ec}7} \) 39 \( \text{\underline{xd}5} \).

37 \( \text{\underline{axb}5} \) \( \text{\underline{b}7} \)
38 \( \text{\underline{xd}5} \) \( \text{\underline{xd}5} \)
39 b6! \( \text{\underline{gc}6} \)
40 \( \text{\underline{wc}7} \) \( \text{\underline{xc}7} \)
41 bxc7 \( \text{\underline{bd}6} \)
42 \( \text{\underline{de}5} \) \( \text{\underline{e}7} \)
43 \( \text{\underline{ec}4} \)

After this the passed b-pawn will force the presence of at least one black piece on the queenside; in the meantime the white king will become master of the other side of the board.

43 ... \( \text{\underline{dc}8} \)
44 \( \text{\underline{dx}a5} \) \( \text{\underline{d}7} \)
45 \( \text{\underline{h}h2} \) \( \text{\underline{xc}7} (D) \)

46 \( \text{\underline{g}g3} \) \( \text{\underline{d}6} \)
47 \( \text{\underline{h}h4} \) \( \text{\underline{d}5} \)
48 \( \text{\underline{h}h5} \) \( \text{\underline{xd}4} \)
49 \( \text{\underline{xy}h6} \) e5
50 \( \text{\underline{gg}5} \) f4
51 h4 f6+

A last ‘try’ which White meets in the simplest manner.

52 \( \text{\underline{xf}6} \) e4
53 \( \text{\underline{b}3+!} \) \( \text{\underline{d}5} \)
Or 53...\textit{d}d3/c4 54 \textit{c}c5/d2+ followed by 55 \textit{e}xe4 and h5, winning.

54 h5 e3
55 fxe3 fxe3
56 \textit{c}c1 1-0

Game 102
Alekhnine – Sämisch
\textit{Quadrangular Tournament, Bad Nauheim 1937}
Ruy Lopez

1 e4 e5
2 \textit{f}f3 \textit{c}c6
3 \textit{b}b5 a6
4 \textit{a}a4 \textit{f}f6
5 0-0 \textit{e}e7
6 \textit{w}e2 b5
7 \textit{b}b3 d6
8 c3 0-0

A safer course is 8...\textit{a}a5 9 \textit{c}c2 c5, similar to the variation starting with 6 \textit{e}e1.

9 a4! \textit{g}g4

This is comparatively better than 9...b4 10 a5 or 9...\textit{b}b8 10 axb5 axb5 11 d4 ±, but still has the disadvantage of taking the bishop out of play if White, as in the actual game, does not accept the pawn offer.

10 h3

More usual is \textit{d}d1 followed by d4. The text move is the beginning of a quite different plan, which aims at limiting the activity of Black's light-squared bishop. Instead 10 axb5 axb5 11 \textit{xa}a8 \textit{w}xa8 12 \textit{xb}xb5 \textit{a}a7! would be inadvisable, because Black would regain the pawn with a good position.

10 ... \textit{h}h5

11 g4

The main objections against g4 in this type of position are generally the possibility of a knight sacrifice on g4, and the possibility that Black might later disturb White's pawn structure by means of ...h5. As neither of these eventualities is to be feared here (for instance, 11...\textit{x}xg4 12 hxg4 \textit{x}xg4 13 \textit{w}e3, or 11...\textit{g}g6 12 d3 h5 13 \textit{h}h4 ±), there was no reason to postpone the imprisonment of the bishop.

11 ... \textit{g}g6
12 d3 \textit{a}a5
13 \textit{c}c2 \textit{d}d7?

The full value of the system adopted by White could only be estimated if Black had built up the classical defensive position by playing 13...c5 followed by ...\textit{w}c7. The inconsequential text move—probably motivated by an exaggerated fear of White's \textit{h}h4—leaves White a free hand both in the centre and on the queenside. The first victim of this strategy will be the a5-knight, which will be at once removed to a purely passive square and become merely a target for White's combinative play.

14 b4 \textit{b}7
15 \textit{a}a3 c6
16 \textit{b}b3 \textit{b}6

White threatened eventually c4, which would force Black to exchange his b-pawn, thus weakening still further the queenside. The move in the text, which prevents that danger at the cost of a tempo, is therefore not to be blamed.
17 a5  
18 e3

In making this last preparatory move for the forthcoming queenside pawn advance, White had to take into account the counter-attack 18...d5!? 19 exd5 c5, which he intended to meet by 20 d6! xd6 21 d5, or 20...xd6 21 bxc5, in both cases with advantage.

18 ...  

Sooner or later compulsory in order to bring the g6-bishop back to life.

![Chess Diagram]

19 c4!

As will be seen, White’s following tactics are based on the weakness of the knight at b7.

19 ...  

d6

Initiating an ingenious, although not quite sufficient, counter-attack. Indeed, he already had desperately little choice.

20 cxb5  
21 xb5!

A purely positional offer or, to be more accurate, exchanging combination, which in the main variation would develop as follows: 21...xb5 22 a6 d7 23 axb7 xxb7 24 g5! xa1 25 a1 d7 (otherwise 26 a7 wins) 26 h4! a8 27 a5, and Black would finally perish principally because of his helpless bishop on g6. No wonder, therefore, that Samisch prefers to carry on with the exploitation of White’s slightly exposed kingside and to win an important tempo by leaving the hostile knight en prise.

21 ...  

22 a6  
23 c3  

24 b5!

Instead, 24 h5+ 25 h1 h5! would have assured Black of at least a draw. But now matters become very difficult for him because of the formidable threat b6 and the possibility of d5 in case of ...xb5.

24 ...  

25 dxe3

25 ...  

26 d5 (D)

---

1 It seems even better to preface h4 by 26 a7, which prevents Black activating his rook.
now he is almost forced to exchange at d5, since 34...\textit{c}c6 would be answered by 35 $\textit{d}xe7$ and 34...\textit{d}d8 by 35 $\textit{b}b6!$ $\textit{c}c6$ 36 $\textit{x}xa8!$.

34 ...

35 $\textit{x}xd5$

36 \textit{e}e8

37 \textit{e}e8

38 $\textit{e}e8$ (D)

These last anaemic efforts will be rapidly stopped by an energetic final combination.

39 $\textit{d}xe5!$

The knights have certainly performed their best in this fight: the first one contributed in smashing Black’s queenside to pieces and his colleague can die happy after cleaving open the way to the heart of the enemy’s fortress. The rest is easy.

---

1 I don’t understand this line at all, since at the end Black can play 29...\textit{x}xa1 30 $\textit{x}xc8$ $\textit{x}xb1+ 31 $g2$ $\textit{xc}6!$ 32 $\textit{d}xd6$ $\textit{x}d6$ 33 $\textit{xc}6$ $\textit{fb}8$ with a clear advantage to Black. It is hard to see any real improvement for White, so the game position must be judged favourable for Black—indeed, why not, since he is a pawn up and White’s kingside has been shattered?
39 ... dxe5  
40 ♕xe5+ ♗g8  
41 d6!  
Threatening 42 ♗d5+.  
41 ... ♗c8  
42 dxe7 ♘c2+  
43 ♗h1 ♗f2  
44 ♘xf5 1-0

Game 103
Alekhone – Euwe
Rotterdam Wch (2) 1937
Slav Defence

1 d4 d5  
2 c4 c6  
3 ♗f3 ♗f6  
4 ♘c3 dxc4  
5 a4 ♗f5  
6 ♘e5

The discovery that the text move is not sufficient to secure White an opening advantage was one of the assets of the present match.

6 ... e6

Bogoljubow played this twice against me in the 1929 match. As the experiment did not succeed (he only managed to draw one game with great difficulty and lost the other) the move 6...e6 disappeared from master practice. But, as was proved, especially by the eleventh game of this match, it is, in fact, much safer than the fashionable Kmoch Variation (i.e. 6...♗bd7 in conjunction with ...♗c7 and ...e5).

7 ♗g5  
As, after 7 f3 ♘b4 the move 8 e4? would provoke the absolutely sound sacrifice 8...♘xe4! (first played by Chéron against Przepiorka in The Hague 1928), White must not hurry to form a pawn centre¹.

Still, after the following answer, he had no better move than 8 f3.

7 ... ♘b4  
Much more logical than 7...♘e7 as played by Bogoljubow in our 5th match-game, 1929 (see game 58).

8 ♘xc4  
Very harmless, since Black, instead of the complicated variation actually selected, could simply play 8...h6, and if 9 ♗h4 then 9...g5 10 ♗g3 ♘e4 11 ♗c1 (or 11 ♗b3 ♘a6) 11...c5, with at least even prospects.

8 ... ♗d5  
Also a good move which leads, after a short, sharp intermezzo, to an equally balanced position.

9 ♘xf6  
The alternative 9 ♘e3 ♗a5 10 ♘xf5 ♗xf5 was even less promising. And if 9 ♗b3, then 9...♗a6 ±.

9 ... ♗xc4  
Better than 9...gx6f 6 10 ♘e3 ♗a5 11 ♗b3 with slightly better prospects for White.

10 ♗d2 (D)

The only move, for 10 ♗c1? would have been refuted by 10...gx6f 6 11 e4 ♗a2!.

10 ... gx6f
More promising was 10...\textit{R}b3! 11 \textit{R}xg7 \textit{R}g8 12 \textit{R}h6 \textit{Q}d7, with a strong initiative for the pawn.

11 \textit{e}4 \textit{R}b3
12 exf5 \textit{Q}d7
13 fxe6 fxe6
14 \textit{R}e2 0-0-0
15 0-0

The last few moves were practically forced and the position thus reached offers about equal attacking possibilities for both sides.

15 ... \textit{e}5

This logical move—which brings the knight into a strong position and opens the d-file to Black’s advantage—has, in my opinion, been unduly criticised. In any case, 15...\textit{Q}b6, which was recommended instead, would expose Black to dangerous threats after 16 a5 \textit{Q}a4 17 \textit{R}e3 \textit{Q}xb2 18 \textit{R}fc1—and this without offering him any real winning prospects\textsuperscript{1}.

16 dxe5 \textit{Q}xe5

\textbf{17} \textit{R}c1 \textit{Q}xc3

As 18 \textit{Q}e4 was not really a strong threat, this exchange should have been postponed till a more appropriate moment. Black should have played 17...\textit{R}hg8 for if 18 \textit{Q}e4 (18 \textit{R}e3 \textit{R}xb2) then 18...\textit{R}f3+ 19 \textit{R}xf3 \textit{R}xf3 20 \textit{Q}g3 \textit{R}g4, with a quite satisfactory position. After the move in the text White obtains the better chances because his bishop will prove superior to the knight as soon as the black piece is dislodged from e5.

18 \textit{b}xc3 \textit{R}hg8
19 \textit{R}e3 \textit{b}b8

Not absolutely necessary, since he could indirectly protect his a-pawn by playing 19...\textit{R}d5 20 g3 \textit{R}d2 but after 21 \textit{R}xd2 \textit{R}xd2 22 \textit{R}fe1 (22...\textit{R}d3 23 \textit{R}ad1!) White’s endgame chances would still be the better.

20 g3

As this defensive move is unavoidable, it is better to play it immediately.

20 ... \textit{R}d7
21 \textit{R}ab1 \textit{R}c2 (D)
22 \textit{R}fe1!

The most subtle move of the game! With this, White prepares for the important move f4. The immediate advance of that pawn would be refuted by 22...\textit{R}d2! 23 \textit{R}fe1 \textit{R}d3.

22 ... \textit{R}d2

\textsuperscript{1} In this line, 16...\textit{R}c4 looks very promising for Black, since 17 \textit{R}xc4 \textit{R}xc4 18 \textit{R}fd1 \textit{e}5 wins the d-pawn, while 17 \textit{R}f4 \textit{Q}xb2 forces White to spend time dealing with the threat to the c3-knight. At this stage in the game Black undoubtedly has the better chances.
32 h5! and, only after that preparation, g4 freeing his f-pawn with disastrous effect for Black.

32 \(\text{d}3\)!

The decisive manoeuvre forcing a further weakening of Black’s kingside pawn structure. Eventual pawn losses on the other wing do not matter any more because the passive position of Black’s pieces prevents him from undertaking any serious counter-attack.

32 \(\text{h}6\)
33 \(\text{f}5+\)\(\text{d}8\)
34 \(\text{g}4!\)

If now 34...\(\text{xc}3\) then 35 \(\text{h}5\) \(\text{xa}4\) 36 \(\text{xe}6\) would win easily.

34 \(\text{...}\) \(\text{e}7\)
35 \(\text{b}1\) \(\text{e}8\)

Or 35...\(\text{d}5\) 36 f5.

36 \(\text{h}5\) \(\text{f}7\)
37 \(\text{a}2+\) \(\text{f}8\)
38 \(\text{xh}6\) \(\text{d}2\)

The main line was 38...\(\text{f}5+\) 39 \(\text{g}6\) \(\text{xe}3\) 40 f5 followed by the advance of the h-pawn.

39 \(\text{e}6\) \(\text{d}3\)
40 g4 \(\text{xc}3\)
41 g5 1-0

Even simpler than 41 \(\text{d}1\) \(\text{d}5\). If now 41...fxg5 then 42 fxg5, winning.

Game 104

Alekhine – Euwe

Haarlem Wch (6) 1937
Slav Defence

1 \(\text{d}4\) \(\text{d}5\)
2 \(\text{c}4\) \(\text{c}6\)
3 \(\text{c}3\)
In my opinion this move gives White more chances of obtaining an opening advantage, for the following reasons:

1) The dangers of the continuation 3...dxc4 in conjunction with 4...e5 are clearly shown in the present game;

2) the Winawer Counter-attack 3...e5 can be met in a simple and effective manner by 4 cxd5 cxd5 5 e4! and if 5...dxe4, 6 \textit{b}5+ \textit{;} 

3) in answer to 3...\textit{f}6 4 e3 g6 I suggest 5 f3, which after 5...\textit{g}7 6 e4 dxe4 7 fxex4 e5! 8 d5 0-0 9 \textit{f}3 leads to a rather complicated position, still positionally favourable to White.

\begin{center}
\begin{tabular}{l}
3  ...  \textbf{dxc4} \\
4  e4! \\
\end{tabular}
\end{center}

It is almost incredible that this quite natural move has not been considered by the so-called theoreticians. White now obtains a clear advantage in development, no matter what Black replies.

\begin{center}
\begin{tabular}{l}
4  ...  \textbf{e5} \\
\end{tabular}
\end{center}

The alternative is 4...b5 5 a4 e5 (or 5...b4 6 \textit{a}2 \textit{f}6 7 e5 \textit{d}5 8 \textit{xc}4 6 axb5 exd4 7 \textit{xc}4! \textit{b}4! 8 \textit{a}4 a5 9 bxa6, and White will emerge a pawn to the good.

\begin{center}
\begin{tabular}{l}
5  \textbf{xc4} \\
\end{tabular}
\end{center}

This sacrificial combination is certainly very tempting and, especially over the board, extremely difficult to refute; but it is by no means the necessary consequence of White’s previous move, which has a value absolutely independent of the correctness of the piece sacrifice.

The positional exploitation of White’s advantage in space consists of 5 \textit{f}3! exd4 6 \textit{xd}4 \textit{xd}4 7 \textit{xd}4 after which Black would only get into further trouble by trying to protect the gambit-pawn; for instance, 7...b5 8 a4 b4 9 \textit{d}1 \textit{a}6 10 \textit{e}3 \textit{f}6 11 f3 followed by \textit{c}1 and \textit{xc}4 with a clear positional advantage.

\begin{center}
\begin{tabular}{l}
5  ...  \textbf{exd4} \\
\end{tabular}
\end{center}

Fatal would be 5...\textit{xd}4 6 \textit{b}3 \textit{d}7 7 \textit{g}5! with a winning attack.

\begin{center}
\begin{tabular}{l}
6  \textit{f}3 (D) \\
\end{tabular}
\end{center}

Putting before Black a most difficult practical problem.

\begin{center}
\begin{tabular}{l}
6  ...  \textbf{b5} ? \\
\end{tabular}
\end{center}

Which he not only fails to solve, but even selects a move that immediately brings him a decisive disadvantage. As a matter of fact, the offer could be accepted since Black would have at his disposal a more effective line than the one I had analysed when proposing it. My ‘chief’ variation was the following: 6...\textit{xc}3 7 \textit{xf}7+ \textit{e}7 8 \textit{b}3 \textit{f}6 9 e5 \textit{e}4 10 0-0! \textit{b}6 (or 10...\textit{a}6 11 \textit{c}4! \textit{ac}5 12 \textit{g}5+! \textit{xc}5 13 \textit{xc}5
with a winning attack) 11 \( \text{wc4! cxb2} \) 12 \( \text{dxf6} \) \( \text{wc2} \) 13 \( \text{xe4 xf7} \) 14 \( \text{g5+ e8} \) 15 \( \text{wc4 e7} \) 16 \( \text{wd7+ d8} \) 17 \( \text{ad1+ d7} \) 18 \( \text{e6+ c8} \) 19 \( \text{we7 xe5} \) 20 \( \text{we6 f6} \) 21 \( \text{xd7 xe7} \) (21...\( \text{xd7} \) 22 \( \text{wd6} \) winning) 22 \( \text{xe7} \) with a won position. But, instead of 8...\( \text{af6} \) Black could play 8...\( \text{cxb2} \) 9 \( \text{xb2} \) \( \text{wb6!} \) 10 \( \text{xg8 xg8} \) 11 \( \text{xb4} \) (or 11 \( \text{a3+ c5} \) 11...\( \text{b4+} \) 12 \( \text{d2 xb2} \) after which his middlegame chances, in spite of the approximate equality of forces, should be estimated decidedly higher than White’s remaining possibilities of a direct attack. Consequently, unless an improvement can be found in this last line of play, White’s knight offer will hardly be repeated, at least in serious practice.

7 \( \text{dxb5!} \)

Dr. Euwe admits simply having overlooked this reply. This time the knight obviously cannot be taken because of 8 \( \text{d5} \).

7 ... \( \text{a6} \)

8 \( \text{wb3!} \)

An important move with a triple object: to protect the c4-bishop, to prevent the check at b4 and to strengthen the pressure against f7.

8 ... \( \text{we7} \)

If 8...\( \text{xb5} \) then 9 \( \text{xf7+ d7} \) 10 \( \text{xd4!} \) (not 10 \( \text{xg8? xg8} \)) with an easy win.

9 0-0 \( \text{xb5} \)

10 \( \text{xb5} \) \( \text{f6} \)

Of course not 10...\( \text{cxb5} \) because of 11 \( \text{wd5} \).

11 \( \text{c4} \) \( \text{bd7} \)

12 \( \text{xd4} \)

Another winning method was 12 \( \text{e5} \) \( \text{xe5} \) (if 12...\( \text{e4} \), 13 \( \text{b7} \)) 13 \( \text{xe5} \) \( \text{xe5} \) 14 \( \text{b7} \) \( \text{b8} \) 15 \( \text{xf7+ d8} \) 16 \( \text{xa7} \) but after 16...\( \text{d6} \) Black would be able to put at least as much further resistance as after the simple text move.

12 ... \( \text{b8} \)

13 \( \text{c2} \) \( \text{c5} \)

Hereafter, White, in order to win, has only to avoid a few little traps.

14 \( \text{f5} \)

Here, for instance, 14 \( \text{xc6} \) would be wrong because of 14...\( \text{c8} \)!

14 ... \( \text{e5} \)

15 \( \text{f4!} \)

And now, after the tempting 15 \( \text{xf7+ d8!} \) (15...\( \text{xg7?} \) 16 \( \text{xf7+} \) 16 \( \text{d1+ c7} \) two white pieces would be en prise.

15 ... \( \text{h5 (D)} \)

16 \( \text{xf7+} \)

A very profitable simplification. 16 \( \text{xe5} \) \( \text{xe5} \) 17 \( \text{e2 c5} \) 18 \( \text{xc5 xc5} \) 19 \( \text{xh5 g6} \) would be less convincing.

16 ... \( \text{xf7} \)

17 \( \text{xc5} \) \( \text{xc5} \)

18 \( \text{xe5} \) \( \text{b5} \)
19 ... \textit{A}d6

Threatening 20 a4.

19 ... \textit{A}b6

20 b4!

And now the rook is in danger. Black cannot avoid further loss of material.

20 ... \textit{A}d8
21 \textit{A}ad1 e5
22 bxc5 \textit{A}xc5
23 \textit{A}d5! 1-0

White will win at least the exchange.

Game 105

Alekhine – Euwe

\textit{Leiden Wch (8) 1937}

Nimzo-Indian Defence

1 d4 \textit{f}6
2 c4 e6
3 \textit{A}c3 \textit{b}4

4 \textit{W}c2

I believe that this move is the most logical of the many moves possible (4 \textit{W}b3, 4 a3, 4 \textit{A}d2, 4 \textit{g}5, 4 \textit{e}3, 4 \textit{f}3, 4 \textit{g}3 or even 4 \textit{f}4), as it achieves two important objects: it keeps control over e4 and it prevents, temporarily at least, the doubling of White's c-pawns.

4 ... d5

5 exd5

If 5 a3 \textit{A}xc3+ 6 \textit{W}xc3 \textit{A}e4 7 \textit{W}c2 c5 8 dxc5 \textit{A}c6 9 e3 Black obtains an equal game by continuing 9...\textit{W}a5+ 10 \textit{A}d2 \textit{A}xd2 11 \textit{W}xd2 dxc4! and if 12 \textit{W}xa5 \textit{A}xa5 13 \textit{A}c1 then 13...b5! 14 cxb6 \textit{A}b7!.

5 ... \textit{W}xd5

6 e3

If 6 \textit{A}f3 then, for instance, 6...c5
7 \textit{A}d2 \textit{A}xc3 8 \textit{A}xc3 cxd4 9 \textit{A}xd4 e5! (Levenfish-Botvinnik, 7th match-game, 1937).

6 ... c5
7 a3 \textit{A}xc3+
8 bxc3 \textit{A}d7

There is no hurry developing the knight. 8...0-0 9 \textit{A}f3 b6! seems to be more appropriate for equalising, and if 10 \textit{A}e2, then 10...cxd4 11 cxd4 \textit{A}a6! as, for instance, I played (with Black) against Grau in Montevideo 1938.

9 f3

A sound strategic scheme: White intends to meet the eventual ...e5 by the counter-advance e4. However, first 9 \textit{A}e2 would be still more exact, since then 9...cxd4 10 cxd4 \textit{W}b6 would not be satisfactory because of 11 \textit{A}c3.

9 ... cxd5

10 cxd5 \textit{A}d4
11 \textit{A}e2 \textit{A}d7
12 \textit{A}f4

Played in order to obtain a slight endgame advantage after 12...\textit{W}c6 13 \textit{W}xc6. If, instead, 12 \textit{A}c3 then 12...\textit{W}c6 with a quite satisfactory game.

12 ... \textit{W}d6
13 \textit{A}d2 \textit{A}c8
14 \textit{W}b2 \textit{A}fd5

Doubtless the best move, eliminating any immediate danger in the centre.

15 \textit{A}xd5 exd5
16 \textit{A}b4 \textit{W}e6 (D)

If 16...\textit{W}g6 then 17 \textit{A}c1.

17 \textit{A}f2
The first move of the ‘Indian’ Castling (see game 75 against Sultan Khan). Actually, the king, in this position, is quite comfortable on f2.

17 ... \textit{\texttt{Qa4}}

The first deviation from the logical path. By far the best drawing chance was 17...\textit{\texttt{Qc4}} (but not 17...f5 18 \textit{\texttt{Qc5!}} ±) 18 \textit{\texttt{Qxc4}} \textit{\texttt{Qxc4}} thus obtaining opposite-coloured bishops; if, for instance, 19 \textit{\texttt{Qac1}} then Black can reply 19...\textit{\texttt{Qxc1}} 20 \textit{\texttt{Qxc1}} \textit{\texttt{Qc6}} 21 \textit{\texttt{Qc3}} f6 22 \textit{\texttt{Qc5}} a6 23 \textit{\texttt{Qb6}} \textit{\texttt{Qd7}}, with an adequate defence.

18 \textit{\texttt{Qd2}} b6? \textit{(D)}

A fatal mistake, allowing White to win by force. 18...f5 was necessary, although White’s advantage after 19 \textit{\texttt{Qd3}} followed by \textit{\texttt{Qh1}} and eventually e4 would already be evident.

19 \textit{\texttt{Qa6!}} \textit{\texttt{Qb8}}

As the sequel shows, the threat to imprison the bishop by ...b5 is by no means an effective one. But 19...\textit{\texttt{Qc7}} 20 \textit{\texttt{Qac1}} would be equally hopeless for Black.

20 e4

This simple opening-up of the centre leaves Black without any saving resource.

20 ... \textit{\texttt{b5}}

If 20...f6 then 21 exd5 \textit{\texttt{Qxd5}} 22 \textit{\texttt{Qc2+!}} \textit{\texttt{Qe6}} 23 \textit{\texttt{Qh1}} \textit{\texttt{Qxe2+}} 24 \textit{\texttt{Qxe2+}} \textit{\texttt{Qd8}} 25 \textit{\texttt{Qe7+}} \textit{\texttt{Qc7}} 26 \textit{\texttt{Qc1+}} and wins.

21 \textit{\texttt{Qf4!}}

This powerful zwischzug destroys Black’s last hopes of catching the bishop on a6. If now 21...\textit{\texttt{Qd8}}, then 22 exd5 \textit{\texttt{Qxd5}} 23 \textit{\texttt{Qh1+}} \textit{\texttt{Qe6}} 24 \textit{\texttt{Qe5}} \textit{\texttt{Qxd4+}} 25 \textit{\texttt{Qxd4}} \textit{\texttt{Qxd4}} 26 \textit{\texttt{Qxb5+}} and wins.

21 ... \textit{\texttt{Qb6}}

22 exd5

This is more precise than 22 \textit{\texttt{Qh1}}, which could be answered by 22...\textit{\texttt{Qb2!}}.

22 ... \textit{\texttt{Qxd5}}

23 \textit{\texttt{Qh1+}} \textit{\texttt{Qe6}}

24 \textit{\texttt{Qac1}}

With the terrible threat of 25 \textit{\texttt{Qc8+}}.

24 ... f6

25 \textit{\texttt{Qc7!}}

More convincing than the win of the exchange by 25 \textit{\texttt{Qc8+}}.

25 ... \textit{\texttt{Qd8}}

26 \textit{\texttt{Qxa7}} 1-0

As mate in a few moves is unavoidable.
Game 106
Alekhine – Euwe
Zwolle Wch (14) 1937
Catalan Opening

1 d4 Qf6
2 c4 e6
3 g3 d5

The Soviet grandmaster Levenfish played, in a tournament game at Tbilisi 1937, 3...b4+ 4 d2 Qxd2+ 5 Qxd2 Qe4 6 Qc2 d5 7 g2 Qe7 8 a3 f5 and obtained a quite satisfactory position. The text move, in conjunction with the next one, leads to a modern variation of the Queen’s Gambit Accepted which is slightly in White’s favour.

4 g3

White need not avoid the exchange of queens by playing 4 g2, since after 4...dxc4 5 Qa4+ Qd7 6 Qxc4 Qc6 7 Qd2, he would obtain an advantage both in space and development.

4 ... dxc4
5 Qxa4+ Qbd7
6 Qxc4

There is no advantage to be obtained by delaying this capture, for instance, if 6 g2 a6 7 Qc3, then 7...b8! 8 Qxc4 b5, at least equalising.

6 ... c5

If now 6...a6 then 7 Qc2! in order to answer 7...b5 by 8 a4. The same manoeuvre would apply if Black were to play ...a6 on his seventh move.

7 g2 Qb6

This plan has the disadvantage of not solving the problem of the development of the queen’s bishop. First 7...cxd4 would be more advisable, and if 8 Qxd4 then 8...Qb6 followed by 9...Qb4+; and if 8 Qxd4, then 8...Qc5 9 Wh4 Qe7, still harassing the adventurous white queen.

8 Qd3 cxd4
9 0-0!

In order to prevent 9...Qb4+, which is possible after 9 Qxd4, for instance. Black’s extra pawn cannot be protected because of (9...Qc5) 10 b4!.

9 ... Qe7
10 Qxd4 0-0

Of course not 10...e5 because of 11 Qb5+ Qfd7 12 Qf5, with a clear advantage.

11 Qc3 e5

The following double exchange is rather risky, since the slight disturbance of White’s queenside pawn structure will be more than compensated by the advantage of the two bishops. 11...Qd7 would be an interesting attempt, aiming both at 12...e5 and 12...Qd8.

12 Qf5 Qb4
13 Qc2! Qxc3
14 bxc3 Qxf5?

This exchange was necessary sooner or later, it is true—but why the haste? As Black intended to play ...Qc7 he would have been better advised to do this at once, thereby giving White less choice of attacking moves.

15 Qxf5 Qc7 (D)
16 Qh6

The main object of this rather difficult move is to prevent a knight
move to d5, which is possible, for instance, after 16 \( \text{g5}. \)

If now 16...\( \text{Qd5}, \) then 17 \( \text{e4!} \) \( \text{g6} \) 18 \( \text{Wf3} \) \( \text{fd8} \) 19 \( \text{fd1} \) is to White’s advantage.

\[ \text{16 ... Qbd7} \]

\[ \text{17 Wg5?!} \]

But by leaving his bishop so dangerously placed, White certainly complicates matters without necessity. Simple and strong was 17 \( \text{e3} \) and if 17...\( \text{g6} \) then 18 \( \text{Wg5} \), with a considerable positional advantage.

\[ \text{17 ... Qe8} \]

\[ \text{18 Hab1} \]

Also possible was 18 \( \text{h3} \)—a move which I intended to play later on as an answer to, for example, 18...\( \text{Ab8}. \)

\[ \text{18 ... Qc5} \]

The tempting 18...\( \text{Qb6} \) would have been answered by 19 \( \text{a4!} \) and if 19...\( \text{f6} \) then 20 \( \text{Wf5!} \) \( \text{gxh6} \) 21 \( \text{a5} \) \( \text{Wd7} \) 22 \( \text{Wh5} \) and Black would get into serious trouble if he tried to keep the extra piece much longer.

\[ \text{19 Wg4 Ad8} \]

It would hardly be a wise policy to force the exchange of queens by playing 19...\( \text{Wc8}, \) since after 20 \( \text{Wxc8} \) \( \text{xc8} \) 21 \( \text{g5} \) \( f6 \) 22 \( \text{d5+} \) followed by 23 \( \text{e3} \) the bishops would certainly play a vital part in the endgame.

\[ \text{20 Ag5 Ad6} \]

\[ \text{21 Wc4} \]

Preparing the advance of the f-pawn, which at this moment would have been premature, for instance 21 \( \text{f4} \) \( \text{h6} \) 22 \( \text{fxe5?} \) \( \text{Ag6} \) \( \text{T}. \)

\[ \text{21 ... b6} \]

White threatened 22 \( \text{xb7}. \)

\[ \text{22 f4 Ag6!} \]

With this and the following few strong moves Black eliminates any immediate danger.

\[ \text{23 Hbd1} \]

Threatening 24 \( \text{d8} \) followed by \( \text{f5}. \)

\[ \text{23 ... e4} \]

Preventing the above threat since 24 \( \text{d8} \) \( \text{d6!} \) 25 \( \text{xc7} \) \( \text{xc4} \) would now be to Black’s advantage.

\[ \text{24 Hh4!} \]

After this well-timed retreat the black position begins to look very precarious because, for instance, 24...\( \text{d6} \) 25 \( \text{Wd5} \) \( \text{Qb5} \) 26 \( \text{ec1} \) \( \text{Hd6} \) 27 \( \text{Wc4} \) would be in White’s favour.

---

1 I don’t see White’s advantage after the obvious 19...\( \text{Wxc3}, \) when White has to go into contortions to avoid the exchange of queens. However, simply replacing 19 \( \text{fd1} \) by 19 \( \text{ad1} \) vindicates Alekhine’s opinion (indeed, this might very well be a misprint).

2 25...\( \text{Qa4} \) looks much better.
By the following interesting pawn offer Black succeeds in removing the white queen to a less active square, but at the heavy price of a serious weakening of the position of his knight at c5.

24 ... b5!!

25 \( \mathbb{W}b4! \)

The only correct answer, for 25 \( \mathbb{W}xb5 \) would permit Black to place a knight on f5 via d6 after which the threats of ...\( \mathbb{D}xh4 \) and ...\( \mathbb{D}e3 \) would secure him a promising initiative.

25 ... a5

26 \( \mathbb{W}a3 \) \( (D) \)

And not 26 \( \mathbb{W}b2 \) or 26 \( \mathbb{W}b1 \) because of 26...\( \mathbb{D}a4 \).

26 ... f5?

The wish to prevent f5 and at the same time secure the e-pawn is quite understandable, but the move has the grave inconvenience of making Black's position in the centre even more shaky than it was before. A perfectly satisfactory line was, however, hardly to be found. If, for instance, 26...\( \mathbb{D}d6 \) (recommended by the great theoretician, Prof. Becker, as even giving Black an advantage!)

then 27 \( \mathbb{D}e7! \) \( \mathbb{D}xd1 \) (27...\( \mathbb{W}xe7 \) 28 \( \mathbb{W}xc5 \) \( \pm \) ) 28 \( \mathbb{D}xc5! \) \( \mathbb{D}xf1+ \) 29 \( \mathbb{D}xf1 \) after which Black would have to suffer further material loss. After the comparatively better 26...\( \mathbb{D}d6 \) White would secure a definite positional advantage by the important move 27 \( \mathbb{D}d5! \). Black had therefore only the choice between unpleasant alternatives.

27 \( \mathbb{D}d8! \)

A most unpleasant shock: White gets his threat in first and thus prevents the harmonious co-operation of Black's forces.

27 ... \( \mathbb{W}a7 \)

28 \( \mathbb{D}h1 \) \( \mathbb{D}a6 \)

29 \( \mathbb{D}d5 \)

The simple domination of the central file by the rooks will soon prove decisive owing to the numerous pawn weaknesses created by 23rd-26th moves of Black.

29 ... \( \mathbb{D}e6 \)

30 \( \mathbb{D}fd1 \) \( \mathbb{D}xd8 \)

If, instead, 30...\( \mathbb{W}e3 \), then simply 31 \( \mathbb{W}b2 \) and the threats would remain.

31 \( \mathbb{D}xd8 \) \( \mathbb{W}f7 \)

32 \( \mathbb{D}d5 \)

This is more effective than 32 \( \mathbb{D}d7 \) \( \mathbb{W}c4 \).

32 ... \( \mathbb{D}c6 \)

33 \( \mathbb{D}xb5 \) \( \mathbb{W}c4 \)

34 \( \mathbb{D}xf5! \)

Conclusive, because 34...\( \mathbb{D}xf5 \) 35 \( \mathbb{D}xe8+ \) \( \mathbb{D}f7 \) 36 \( \mathbb{W}e7+ \) \( \mathbb{G}g6 \) 37 \( \mathbb{D}xe4 \) would be absolutely hopeless for Black.

34 ... \( \mathbb{D}cf6 \)

35 \( \mathbb{D}xf6 \) \( \mathbb{g}xf6 \) \( (D) \)
36 \textit{\textbf{A}d4?!}

A typical 'short-of-time' calculation. I was glad to find a practically forced sequence of moves that would bring me without damage over the ominous 40th move—and did not pay attention to the simple 36 \textit{\textbf{W}b3}, forcing an endgame with two extra pawns and most probably immediate resignation!

36 ... \textit{\textbf{W}xe2}
37 \textit{\textbf{W}b3+} \textit{\textbf{h}8}
38 \textit{\textbf{A}xe4} \textit{\textbf{W}d2}
39 \textit{\textbf{W}b1!}

Technically easier than 39 \textit{\textbf{h}3} \textit{\textbf{A}d6} with slight fighting possibilities for Black.

39 ... \textit{\textbf{W}xc3}
40 \textit{\textbf{W}e1} \textit{\textbf{W}xe1+}

Or 40...\textit{\textbf{W}c8} 41 \textit{\textbf{W}xa5}.

41 \textit{\textbf{A}xe1}

The ending is easily won as White, besides his extra pawn, has a very strong bishop against a knight completely lacking safe squares in the centre of the board.

41 ... \textit{\textbf{A}d6}
42 \textit{\textbf{A}c6!}

Immobilising the knight (because of the eventual threat to exchange rooks by \textit{\textbf{A}e8}) and simultaneously preventing a further advance of Black's a-pawn.

42 ... \textit{\textbf{A}b8}

Or 42...\textit{\textbf{A}c8} 43 \textit{\textbf{A}a4}.

43 \textit{\textbf{A}e6} \textit{\textbf{A}b1+}
44 \textit{\textbf{g}2} \textit{\textbf{A}b2+}
45 \textit{\textbf{h}3} \textit{\textbf{f}5}
46 \textit{\textbf{A}xf6} \textit{\textbf{A}e7}
47 \textit{\textbf{A}e4} \textit{\textbf{g}7}
48 \textit{\textbf{A}e6} \textit{\textbf{f}7}
49 \textit{\textbf{A}h6} \textit{\textbf{A}xa2}
50 \textit{\textbf{A}xh7+} \textit{\textbf{A}f6}
51 \textit{\textbf{A}h6+} \textit{\textbf{A}f7}
52 \textit{\textbf{A}a6} 1-0

Game 107

Alekhine – Euwe

Delft Wch (22) 1937
Réti Opening

1 \textit{\textbf{A}f3} \textit{\textbf{d}5}
2 \textit{\textbf{c}4} \textit{\textbf{d}4}
3 \textit{\textbf{e}3}

After 3 \textit{\textbf{b}4} Black could play 3...\textit{\textbf{f}6} followed by ...\textit{\textbf{e}5} with good prospects. The move selected prevents this possibility, since after 3 \textit{\textbf{e}3} \textit{\textbf{c}5} 4 \textit{\textbf{b}4} \textit{\textbf{f}6} White can play, not 5 \textit{\textbf{x}c5} \textit{\textbf{e}5}! with about even chances, but 5 \textit{\textbf{exd}4} \textit{\textbf{cxd}4} 6 \textit{\textbf{c}5}! (this last move, which appears very effective, was discovered by myself when preparing for the match), after which the weakness of the diagonal a2-g8 would cause Black considerable trouble. If 6...\textit{\textbf{e}5}, then 7 \textit{\textbf{A}c4}; if 6...\textit{\textbf{d}5}, then 7 \textit{\textbf{c}2} \pm; if 6...\textit{\textbf{a}5}, then 7 \textit{\textbf{A}a4+} \textit{\textbf{A}d7} 8 \textit{\textbf{b}5} \textit{\textbf{e}5} 9 \textit{\textbf{A}c4} and Black cannot play 9...\textit{\textbf{A}xc5} because of 10 \textit{\textbf{A}xg8} followed by 11 \textit{\textbf{W}c4}. In other words,
the consequences of 3...c5 seem to be decidedly in White’s favour.

3 ... \( \text{c6} \)

On the contrary, after this move White will find it very difficult (if indeed possible) to obtain any opening advantage.

4 exd4 \( \text{exd4} \)

5 \( \text{c3} \)

6 \( \text{f6} \)

Even simpler is 6...e5 immediately, but as Black can still advance his e-pawn next move, the text continuation does not spoil anything yet.

7 \( \text{d3} \)

Useless would be 7 \( \text{b5} \) \( \text{b6} \) 8 d4 e5! 9 c5 \( \text{c6} \) 10 \( \text{c3} \) a6\(^1\).

7 ... \( \text{c6?} \)

A serious loss of time, instead of which 7...e5 was quite sufficient. If then 8 \( \text{e3} \), simply 8...\( \text{d8} \) 9 d4 \( \text{g4} \) or if 9 \( \text{e2} \), then 9...c5 (or even more solid, 9...\( \text{e7} \)), in both cases with an approximately equal game.

8 \( \text{e3} \)

9 \( \text{d4} \)

10 \( \text{g6} \)

Threatening...\( \text{g4} \), which would have been useless immediately because of 11 \( \text{f4} \) followed by h3.

11 \( \text{h3} \)

12 \( \text{b6} \)

13 \( \text{f3} \)

\( \text{b7} \) \((D)\)

14 \( \text{a4!} \)

In order to make a break in the centre more effective, White tries first to weaken b6. The sequel will prove the soundness of this scheme.

14 ...

14 \( \text{ad8} \)

In connection with his eighteenth move, this looks like a loss of time, but in reality it is almost a sad necessity since after a5 Black will have to deal with the threat a6; on the other hand, after the exchange on b6 he will be obliged to offer the exchange of at least one pair of rooks.

15 \( \text{a5} \)

16 \( \text{c7} \)

This and the next move are necessary in order to give sufficient protection to the weak square b6.

16 \( \text{b3} \)

17 \( \text{xb6} \)

18 \( \text{a7} \)

19 \( \text{a8} \)

White’s main threat was 19 d5.

19 \( \text{fa1} \)

Otherwise the imminent d5 would be even more unpleasant than it proved to be in the actual game.

---

\(^1\) 10 dx\text{e}5 followed by 11 \( \text{d5!} \) is good for White, but the solid 8...c6 would have been adequate for Black.
20 $\text{hx}a8$  $\text{h}xa8$ (D)

This move has been unduly criticised. After 20...$\text{hx}a8$ 21 $\text{hx}a8+$ $\text{hx}a8$ 22 $\text{w}a3$ $\text{b}b7$ 23 $b4$ White would have to face a technically easier problem than in the actual game.

21 $d5$!

By no means an easy decision to make, as I was fully aware that the resulting exchanges would cede to Black important squares in the centre. Still, it was necessary to undertake something definite at this particular moment since:

1) White has no means of improving the excellent position of his pieces;

2) Black, on the contrary, could eventually try to generate an attack against White's d-pawn, starting by ...$\text{d}d8$; and

3) this is the only possibility of taking advantage of the weakness of $b6$, created by the advance of White's a-pawn.

21 ... cxd5

22 cxd5 $\text{c}c5$

The tactical justification of the move 21 $d5$ resides in the variation 22...$\text{xc}3$ 23 d6! $\text{xd}6$ 24 $\text{xc}3$ $\text{xf}3$ 25 $\text{h}6$! and White wins the exchange. And if 22...$\text{e}5$, then 23 $\text{e}4$ still threatening d6.

23 $\text{c}4$

If 23 $\text{xc}5$ $\text{xc}5$ 24 $\text{dxe}6$, then 24...$\text{xf}3$ 25 efx7+ $\text{xf}7$ 26 gxf3 $\text{xc}3$ 27 $\text{a}a7$ $\text{g}5+$ with perpetual check.

23 ... exd5

24 $\text{xd}5$ $\text{xd}5$

25 $\text{d}5$ $\text{e}5$

Black selects the most aggressive variation, which is certainly more promising than the purely passive 25...$\text{b}7$ 26 $\text{b}1$ $\text{d}7$ 27 $\text{b}5$! with a clear space advantage for White.

26 $\text{b}1$ $\text{a}4$!

An ingenious way of keeping the sick pawn, at least temporarily. The next moves on both sides had to be most exactly calculated.

27 $b3$ $\text{b}2$

28 $\text{e}6$ $b5$!

The point of the knight manoeuvre; this pawn cannot be taken because of the answer 29...$\text{d}8$.

29 $\text{f}4$! $\text{e}6$

After this, White, as the succeeding moves show, can take the pawn. The only adequate defence was 29...$\text{e}2$! which would be answered by 30 $\text{f}1$! still leaving Black with the following weak spots:

a) the b-pawn;

b) the square $f6$;

c) last but not least, the insecure position of the knight at $b2$.

30 $\text{xb}5$!

This seemingly very risky capture secures White a material advantage
which he will succeed in keeping until the end. If now 30...\textit{Xd}8, then 31 \textit{Xc}1! \textit{Xxd}5 32 \textit{Wb}8+ (this is why 29 \textit{Xf}4 was necessary) 32...\textit{Xf}8 33 \textit{Xh}6 \textit{Wd}6 (or 33...\textit{We}7 34 \textit{Xc}8) 34 \textit{Wxd}6 \textit{Xxd}6 35 \textit{Xc}8 and wins.

30 ... \textit{We}4
31 \textit{Xc}1 \textit{Xd}3

Or 31...\textit{Xd}8 32 \textit{Xg}5 with variations similar to those mentioned above.

32 \textit{Wc}4!

Again the only move, but amply sufficient to maintain the advantage.

32 ... \textit{We}2
32...\textit{Xd}4 would be a grave mistake because of 33 \textit{Xf}6+.

33 \textit{Xf}1 \textit{Xxf}4

Black has practically no choice, for 33...\textit{Xe}8 (threatening 34...\textit{Wxf}1+) would be easily met by 34 \textit{Xe}3.

34 \textit{Wxf}4

And not 34 \textit{Xxf}4 \textit{Wxc}4 35 \textit{bxc}4 \textit{Xc}8 36 \textit{Xc}1 \textit{Xh}6 with a probable draw.

34 ... \textit{Wb}5 (D)

35 \textit{Wf}3!

White still has to be careful. Here, for instance, the more ‘natural’ move 35 \textit{Wc}4 would lead to a speedy draw after 35...\textit{Xb}8.

35 ... \textit{Xb}8
36 \textit{Xb}1 \textit{Wa}6
37 \textit{Xd}1

This attempt to repeat moves, due to a slight shortage of time, leads to extremely interesting complications. After the simple 37 \textit{b}4 White would not have much trouble in taking advantage of the passed pawn. A plausible variation would be, for instance, 37...\textit{Wc}4 38 \textit{De}7+ \textit{Xf}8 39 \textit{Xc}6 \textit{Xb}6 40 \textit{b}5! \textit{Xxb}5 41 \textit{Wa}3+ and wins.

37 ... \textit{Wa}3
38 \textit{Xb}1 \textit{Wa}2
39 \textit{Wd}3 \textit{Xd}4

This counter-attack only compromises Black’s king position, but it is difficult to suggest a satisfactory line of play, for White is threatening simply to advance his passed pawn.

40 \textit{Xf}1 \textit{Wb}2

The alternative 40...\textit{Wa}7 would also be unsatisfactory due to 41 \textit{b}4.

41 \textit{De}7+!

This sealed move initiates the final attack which, after a dozen moves, leads practically by force to the win of the queen for two pieces.

41 ... \textit{Wf}8

The only move. Hopeless would be 41...\textit{Xg}7 42 \textit{Xf}5+! \textit{Xxf}5 43 \textit{Wg}3+

\footnote{Black has a much better defence in 40...\textit{Xb}2!, but this is irrelevant as White has an earlier forced win by 40 \textit{Xd}1!! \textit{Xf}6 41 \textit{De}5!}
followed by \( \text{wxb8} \), or 41...\( \text{h8} \) 42 \( \text{c6 xf2+} \) 43 \( \text{xf2 w} \) 44 \( \text{h2 xc6 45 xf7} \).

42 \( \text{c6 xf2+} \)
43 \( \text{h2!} \) (D)

The idea of this pawn sacrifice (instead of 43 \( \text{xf2 w} \) 44 \( \text{f1 xc6 45 xf7 g8 46 f3} \) with very problematic winning chances) will become apparent only after the 48th move. The ensuing knight manoeuvre is very spectacular.

43 ... \( \text{xe8} \)

If 43...\( \text{b7} \) then 44 \( \text{f3 b6} \) (or 44...\( \text{c5 45 d5} \) 45 \( \text{d8!} \) winning at least the exchange\(^1\).

44 \( \text{f3 e2} \)

Again the only move, as is also the following. But had the white

king gone to \( \text{h1} \) on the 43rd move, then 44...\( \text{e1} \) would have saved Black.

45 \( \text{d4! d2} \)
46 \( \text{e6+ e7} \)
47 \( \text{f4} \)

Threatening 48 \( \text{d3} \).

47 ... \( \text{d4} \)

Or 47...\( \text{c2 48 a1} \) and the exposed king would succumb to the attack of the three white pieces.

48 \( \text{h1!} \) (D)

Only this ‘quiet’ move, which had to be calculated a long time before, justifies the attack started by 43 \( \text{h2} \). White now threatens 49 \( \text{e2} \), and if Black tries to prevent this by 48...\( \text{h4} \) he loses as follows: 49 \( \text{b7+ d7 50 b4+ e8 51 e6!} \)

\(^1\) At the end of this line Black can play 45...\( \text{e5+ g3} \) (46 \( \text{h1 xd8!} \) 47 \( \text{xb7 c7 draws} \) 46...\( \text{e7 47 xf7 e2+ 48 xe2 xe2+ 49 h1 e7} \) with an almost certain draw. Since there are no real improvements for White, it would appear that the move chosen by Euwe threw away good drawing chances.

\(^2\) Alekhine does not analyse 49...\( \text{e8} \), but then White has a beautiful win by 50 \( \text{e6!} \) (the only method) 50...\( \text{d7} \) (50...\( \text{fxe6 51 f7+ d8 52 f8+ c7 53 f7+ b6 54 b8+ a6 55 a8+ b6 56 b7+ c5 57 c8+ wins the queen) 51 b8+ e7 52 b4+ xe6 53 e4+ d6 54 f4+ e7 (the only move to avoid a devastating rook check) 55 xf7+ d8 56 f8+ e8 57 b4!.}
(stronger than 51 \( \Box xg6 \) h\( xg6 \) 52 \( \Box xh4 \) \( \Box d1 \))! 51...\( \Box e7 \) 52 \( \Box w8+ \) \( \Box d8 \) 53 \( \Box xd8 \) \( \Box x8 \) 54 \( \Box c5+ \) \( \Box e7 \) 55 \( \Box h8+ \) \( \Box d7 \) 56 \( \Box xh7 \) \( \Box f2 \) 57 \( \Box d1+ \) \( \Box c7 \) 58 \( \Box h8 \).

48 ... \( \Box a2 \)

Or 48...h5 49 \( \Box e2 \) \( \Box d1 \), which would not greatly differ from the line of play actually adopted.

49 \( \Box e2 \)

50 \( \Box b7+ \)

Of course not 50 \( \Box xd4 \)? \( \Box xf1+ \) followed by ...\( \Box g1+ \) winning back the queen.

50 ... \( \Box f6 \)?

The game was lost, anyhow, but 50...\( \Box f8 \) would have prolonged the battle—for instance, 51 \( \Box xd4 \) \( \Box xf1+ \) 52 \( \Box h2 \) \( \Box g1+ \) 53 \( \Box g3 \) \( \Box f2+ \) 54 \( \Box f3 \) 55 \( \Box e4 \) \( \Box f6 \) or 55 \( \Box e2 \) \( \Box f2+ \) 56 \( \Box e1 \) \( \Box g7 \)!

In this variation White, in order to win, would have been obliged to use his reserve trump—the passed pawn.

51 \( \Box xd4 \) \( \Box xf1+ \)

52 \( \Box h2 \) \( \Box g1+ \)

53 \( \Box g3 \) \( \Box f2+ \)

54 \( \Box f3 \) \( \Box xd4+ \)

55 \( \Box e4 \) \( \Box d1 \)

Now, forced, as White threatened 56 \( \Box a6+ \).

56 \( \Box d5 \)!

There was really no need to bother about calculating the (won) pawn endgame after 56...\( \Box e1+ \) 57 \( \Box xd4 \) \( \Box d1+ \) 58 \( \Box c5 \) \( \Box xd5+ \) 59 \( \Box xd5 \) \( \Box e7 \) 60 \( \Box c6 \), as the simple 56 \( \Box c6+ \) followed by 57 \( \Box c2 \) would have won immediately! This is the only (fortunately negligible) omission I committed in this unusually difficult game.

56 ... \( \Box e7 \)

57 g4 \( \Box h5 \)

Despair.

58 gxh5 \( f5+ \)

59 \( \Box f3 \) \( \Box d3+ \)

60 \( \Box e2 \) \( \Box e3+ \)

61 \( \Box d2 \) \( \Box e4 \)

62 hxg6 \( 1-0 \)

Game 108

Alekhine – Euwe

Rotterdam Wch (24) 1937

Semi-Tarrasch Defence

1 \( \Box f3 \) \( d5 \)

2 c4 \( e6 \)

For 2...d4 see Game 107.

3 d4 \( \Box f6 \)

4 \( \Box c3 \) \( c5 \)

5 cxd5 \( \Box xd5 \)

6 g3

A harmless deviation from the usual 6 e4. In both cases Black has very little trouble developing his pieces.

6 ... \( \Box cxd4 \)

---

1 Here White missed a quick win by the curious manœuvre 49 \( \Box d5+ \), followed by 50 \( \Box c3 \) forcing the rook along the second rank, and only then 51 \( \Box e2 \) winning material, since Black has been deprived of the defence ...\( \Box a1 \).

2 In fact White can win easily by 54 \( \Box g4 \) h5+(54...f5+55 \( \Box xf5 \)) 55 \( \Box g5 \) \( \Box e3+ \) 56 \( \Box h4 \) and now either 56...\( \Box xd4 \) 57 \( \Box b4+ \) or 56...\( \Box f4+ \) 57 \( \Box g3 \) \( \Box xd4 \) 58 \( \Box b8+ \) and 59 \( \Box e5+ \).
Also good enough is 6...\(\squarec6\) 7 \(\squareg2\) \(\squarexd4\) 8 \(\squarexd4\) \(\squarexc3\) 9 \(\text{bxc}3\) \(\text{cxd}4\) 10 \(\text{wx}d4\) \(\text{wx}d4\) 11 \(\text{cxd}4\) \(\text{\textit{d}6}\) 12 a4 \(\squaree7\) with equality, as played in the last of the exhibition games arranged after the match.

7 \(\text{dx}d5\) \(\text{wx}d5\)
8 \(\text{wx}d4\) \(\text{wx}d4\)
9 \(\text{dx}d4\) \(\text{\textit{b}4+}\)

There is nothing to be said against this check and the following exchange.

10 \(\text{\textit{d}2}\) \(\text{dx}d2\)
11 \(\text{xd}d2\) \((D)\)

11 ... \(\squaree7\)?

But neglecting to develop the queenside pieces will be the cause of all Black's trouble. 11...\(\text{\textit{d}7}\) 12 \(\text{\textit{g}2}\) \(\text{\textit{c}6}\) 13 \(\text{\textit{x}c6}\) \(\text{\textit{xc}6}\) 14 \(\text{\textit{x}c6+}\) \(\text{\textit{b}xc6}\) 15 \(\text{\textit{ac}1}\) 0-0-0+ 16 \(\text{\textit{e}3}\) \(\text{\textit{c}7}\) was indicated, with an easily defensible rook endgame.

12 \(\text{\textit{g}2}\) \(\text{\textit{d}8}\)
13 \(\text{\textit{e}3}\) \(\text{\textit{a}6}\)

Practically forced, as \(\text{c7}\) needed protection. But the knight on \(\text{a6}\) will not only be out of play but also, as the sequel will show, dangerously exposed. The next part of the game, which ends with White winning a pawn, is easy to understand but still rather instructive.

14 \(\text{\textit{ac}1}\) \(\text{\textit{b}8}\)
15 \(\text{a}3\)
15 \(\text{\textit{b}5}\) would be useless because of 15...\(\text{\textit{d}7}\) (16 \(\text{\textit{xa}7}\) ? \(\text{\textit{a}8}\)).
15 ... \(\text{\textit{d}7}\)

Threatening 16...\(\text{e}5\) which White prevents by his next move.

16 \(\text{f}4\) \(\text{f}6\)

This move has been criticised, without much reason, in my opinion, since in the long run Black would not be able to avoid material loss anyhow. If, for instance, 16...\(\text{\textit{e}8}\) then 17 b4 \(\text{\textit{d}7}\) 18 \(\text{\textit{b}5}\) \(\text{\textit{a}8}\) 19 \(\text{\textit{c}3}\) followed by 20 \(\text{\textit{fc}1}\) and 21 \(\text{\textit{c}8}\) or 21 \(\text{\textit{c}7}\). In the actual game Black, in spite of pawn minus, will still keep some drawing chances.

17 \(\text{\textit{e}4}\)!

A typical ‘centralisation’ which the late Nimzowitsch would certainly have enjoyed. White not only attacks the h-pawn, but threatens in some variations \(\text{\textit{d}3}\) and (what is still more important) prevents 17...\(\text{e}5\) because of 18 \(\text{f}xe5\) \(\text{dxe}5\) 19 \(\text{f}3\), winning a pawn.

17 ... \(\text{\textit{e}8}\)

Preventing 18 \(\text{\textit{x}h7}\), as the answer 18...\(\text{g}6\), with the threats ...\(\text{f}7\) (followed by ...\(\text{\textit{h}8}\)) and ...\(\text{\textit{ac}8}\) (followed by ...\(\text{\textit{c}7}\)), would give Black sufficient resources. But with his next two moves White succeeds in taking advantage of the weakness of \(\text{e}6\).

18 \(\text{\textit{b}4!}\) \(\text{\textit{d}7}\)
19 \(\text{f}5!\) \(\text{\textit{c}7}\)
Comparatively better than 19...e5 20 \( \text{Qxe6} \) or 19...exf5 20 \( \text{Qxf5} \) \( \text{Qd5} \) 21 \( \text{Qxh7} \), in both cases with considerable advantage for White.

\[
\begin{align*}
20 & \text{fxe6} \quad \text{Qxe6} \\
21 & \text{Qxe6} \quad \text{Qxe6} \\
22 & \text{Qxh7}
\end{align*}
\]

Thus White has obtained a material plus, but his positional advantage has in the meantime almost vanished, and Black will even succeed in obtaining some pressure on the e-file.

\[
\begin{align*}
22 & \ldots \quad \text{f5} \\
23 & \text{Qc5!}
\end{align*}
\]

Preparing the exchange of bishops at d5.

\[
\begin{align*}
23 & \ldots \quad \text{g6} \\
24 & \text{Qg8+} \quad \text{Qf6} \\
25 & \text{Hc1} \quad \text{He7+} \\
26 & \text{Qf2} \quad \text{Qc6} \\
27 & \text{Qd5} \quad \text{He8} \\
28 & \text{He1!}
\end{align*}
\]

By far the best, as 28 \( \text{Q1c2} \) \( \text{Qa4} \) 29 \( \text{Qd2} \) b6 30 \( \text{Qc3} \) \( \text{Qd8} \) would lead to an unpleasant pin.

\[
\begin{align*}
28 & \ldots \quad \text{Qxd5} \\
29 & \text{Qxd5} \quad \text{g5 (D)}
\end{align*}
\]

After this desperate advance the game speedily becomes hopeless. The natural course was 30...\( \text{Qf7} \) 31 h4 \( \text{gxh4} \) 32 \( \text{gxh4} \) \( \text{Qh8} \) 33 \( \text{Qd4} \) and White would still have some technical difficulties in order to force the win.

\[
\begin{align*}
31 & \text{Qed1} \quad \text{g4} \\
32 & \text{Qd5+} \quad \text{Qe4} \\
33 & \text{Qd4+} \quad \text{Qe5} \\
34 & \text{Qe3}
\end{align*}
\]

It would be equally hopeless to play 31...\( \text{He6} \) 32 \( \text{Qd7} \) \( \text{Qe7} \) 33 h4.

\[
\begin{align*}
32 & \text{Qd5+} \quad \text{Qe4} \\
33 & \text{Qd4+} \quad \text{Qe5} \\
34 & \text{Qe3}
\end{align*}
\]

Also possible was 34 e4 which would lead to the win of a second pawn, but permit Black a longer resistance than occurred in the actual game—for instance 34...\( \text{Qc8!} \) 35 \( \text{Q6d5+} \) \( \text{Qe6} \) 36 exf5+ \( \text{Qf6} \). The way selected is simple enough.

\[
\begin{align*}
34 & \ldots \quad \text{Qe6} \\
35 & \text{Qf4} \quad \text{Qc6} \\
37 & \text{Qxe6+} \quad \text{Qxe6} \\
38 & \text{Qe5} \quad \text{Qa6}
\end{align*}
\]

If 38...\( \text{Qf6} \) then 39 e4 fxe4+ 40 \( \text{Qxg4} \) \( \text{Qf2} \) 41 h4 winning rapidly.

\[
\begin{align*}
39 & \text{Qxf5} \quad \text{Qxa3} \\
40 & \text{Qb5!}
\end{align*}
\]

The immediate 40 \( \text{Qxg4} \) would probably win too, but the text manoeuvre is more exact.

\[
\begin{align*}
40 & \ldots \quad \text{b6} \\
41 & \text{Qxg4} \quad 1-0
\end{align*}
\]

If now 41...\( \text{Qe3} \), then 42 \( \text{Qg5+} \) \( \text{Qh6} \) 43 b5! (the point of the 40th move) 43...\( \text{Qxe2} \) 44 h4, after which there would be no fighting chances for Black.
Game 109

Euwe – Alekhine

The Hague Wch (25) 1937

Nimzo-Indian Defence

1 d4 \( \text{f6} \)
2 c4 e6
3 \( \text{\underline{c}c3} \) \( \text{b4} \)
4 e3 0-0
5 \( \text{\underline{e}e2} \)

This is one of the less fortunate inventions of the great openings artist, Rubinstein. Its weak point is that the knight will not have much future either on f4 or on g3 and that Black, by making the simplest moves, will obtain a slight advantage in development. Therefore, 5 \( \text{\underline{d}d3} \) first is preferable, and if 5...b6 then 6 \( \text{\underline{e}e2} \) (or even 6 \( \text{\underline{w}f3} \)), or if 5...d5, then 6 \( \text{\underline{f}f3} \), with fairly good prospects.

5 ... d5
6 a3 \( \text{e7} \)
7 cxd5

Since White intended to play \( \text{\underline{g}g3} \), he would have done better to delay this exchange. In fact, after 7 \( \text{\underline{g}g3} \) c5 8 dxc5 \( \text{\underline{x}c5} \) 9 b4 the move 9...d4 would have been wrong because of 10 \( \text{\underline{c}e4} \) and if 10...\( \text{\underline{b}b6} \) then 11 c5. Consequently, Black would have been obliged to modify his plan of development.

7 ... exd5
8 \( \text{\underline{g}g3} \)

Rubinstein used to play here 8 \( \text{\underline{f}f4} \)—obviously in order to prevent the next move, after which Black experiences no more difficulty in the opening.

8 ... c5

9 dxc5

Preparing for the mistake at the next move. As Black’s ...c4 was not to be feared, White’s logical course was 9 \( \text{\underline{d}d3} \) \( \text{\underline{c}c6} \) 10 dxc5 \( \text{\underline{x}c5} \) 11 0-0.

9 ... \( \text{\underline{x}c5} \)
10 b4?

Obviously not foreseeing the answer, otherwise he would have played 10 \( \text{\underline{d}d3} \).

10 ... d4! (D)

The point of this interesting move is that White cannot well answer it by 11 \( \text{\underline{a}a4} \) because of 11...dxe3 12 \( \text{\underline{w}xd8} \) (after 12 \( \text{\underline{x}c5} \) or 12 bxc5, Black wins by 12...\( \text{\underline{e}f2+} \) 13 \( \text{\underline{e}e2} \) \( \text{\underline{g}g4+} \)) 12...\( \text{\underline{e}f2+} \) 13 \( \text{\underline{e}e2} \) \( \text{\underline{g}g4+} \!) forcing the king to move on to the d-file, after which the queen will be taken with check, thus saving the bishop on c5. And as 11 \( \text{\underline{c}e4} \) \( \text{\underline{x}e4} \) 12 \( \text{\underline{x}e4} \) \( \text{\underline{b}b6} \) would also have been advantageous for Black, White’s next move is comparatively the best.

11 bxc5 dxc3
12 \( \text{\underline{w}c2} \)

White is in decidedly too optimistic a mood and underestimates
Black's threats. Otherwise he would have tried to simplify matters by 12
\( \text{W}x\text{d8} \text{E}x\text{d8} 13 \text{E}e2 \text{E}c4 14 \text{f}3 \text{E}xc5 \)
15 \( \text{E}xc3 \text{E}c6 \) after which, however, Black, owing to his pawn majority on the queenside and better development, would still hold a slight advantage.

12 ... \( \text{Wa5} \)
13 \( \text{Eb1} \)

Now 13 \( \text{E}e2 \) would not be sufficient because of 13...\( \text{E}d5 \) 14 e4 \( \text{Eb}4! \), winning the exchange.
13 ... \( \text{Ed7}! \)

The threat 14...\( \text{E}a4 \) is now difficult to meet. If, for instance, 14 \( \text{Ec4} \) \( \text{E}a4 \) 15 \( \text{Eb}3 \); then 15...\( \text{Eb}5 \); and if 14 \( \text{Eb4} \) (which has been suggested by many annotators) then 14...\( \text{E}a6! \)
15 \( \text{E}xa6 \) \( \text{W}xa6 \) 16 e4 \( \text{E}e8 \) and White can neither castle nor take the ominous c-pawn because of the reply ...\( \text{Ed5} \). Therefore, White's decision to give up the exchange for a pawn in order to finish the development of his pieces appears comparatively the wisest.
14 \( \text{Eb3} \) \( \text{E}a4 \)
15 \( \text{W}xc3 \) \( \text{W}d8! \)

The point of the thirteenth move. In spite of his material advantage, it will be by no means easy for Black to force the victory. The next part of the game is chiefly instructive from the tactical point of view.
16 \( \text{Ec4} \) \( \text{E}a6! \)

Instead of 16...\( \text{E}xb3 \) 17 \( \text{W}xb3 \) \( \text{E}a6 \) 18 \( \text{W}xb7 \) \( \text{E}xc5 \) 19 \( \text{W}b5 \), which would have allowed White to preserve the two bishops.
17 \( \text{E}xa6 \) \( \text{bxa6} \)

And not 17...\( \text{E}xb3 \) 18 \( \text{E}d3! \), with more counter-chances than in the actual game.

18 \( \text{O-O} \) \( \text{E}xb3 \)
19 \( \text{W}xb3 \) \( \text{Eb}8 \)

The b-file will soon become a very important factor. After the more obvious 19...\( \text{W}d5 \) White, by playing 20 \( \text{W}xd5 \) \( \text{E}xd5 \) 21 e4, would still have some chances of saving the endgame.

20 \( \text{W}c2 \) \( \text{W}d5 \)
21 e4 \( \text{W}b3 \)
22 \( \text{W}e2 \)

Now, on the contrary, the endgame after 22 \( \text{W}xb3 \) \( \text{E}xb3 \) would be quite hopeless because of the weakness of White's a-pawn.

22 ... \( \text{W}b5! \)
23 \( \text{W}f3 \)

Comparatively better than 23 \( \text{W}e3 \) \( \text{E}d7 \). If White wants to avoid the exchange of queens, he must forget about his c-pawn.

23 ... \( \text{W}xc5 \) (D)

\begin{center}
\includegraphics[width=0.5\textwidth]{chess_board.png}
\end{center}

24 \( \text{E}f5? \)

But here 24 \( \text{E}f4 \), in order to prevent the following pin, offered a slightly better fighting chance. The
right answer for Black would be 24...\( \text{B} \text{b}8 \), and if 25 e5 (25 \( \text{B} \text{c}1 \text{B} \text{b}5! \) 26 \( \text{B} \text{d}6 \text{B} \text{c}8 \)), then 25...\( \text{B} \text{d}7 \) 26 \( \text{B} \text{e}4 \) \( \text{B} \text{c}2 \) 27 \( \text{B} \text{c}1 \text{B} \text{b}2 \), keeping the material advantage.

24 ... \( \text{B} \text{b}1 \)

25 \( \text{B} \text{f}4 \)

Or 25 \( \text{B} \text{g}3 \) \( \text{g}5 \) 26 \( \text{B} \text{g}5 \) \( \text{h}8 \)!, with an easy defence. But now White threatens to win the queen by playing 26 \( \text{B} \text{g}5 \).

25 ... \( \text{B} \text{x}e4 \)

One might suppose that after the capture of this important pawn the fight would be very soon over. But White succeeds in finding new attacking moves again and again.

26 \( \text{h}4 \) \( \text{e}8 \)

26...\( \text{B} \text{x}f2 \) would be unconvincing because of 27 \( \text{h}2 \)!.

27 \( \text{B} \text{e}1 \) \( \text{c}3 \)

28 \( \text{d}1 \)

Threatening 29 \( \text{B} \text{x}e4 \).

28 ... \( \text{d}2 \)!

This spectacular move forces a further, most welcome, simplification, after which there will be practically no more fight left.

29 \( \text{x}d2 \) \( \text{x}c1 \+)

But not 29...\( \text{B} \text{x}c1 \) 30 \( \text{h}2 \) \( \text{B} \text{b}2 \)? because of 31 \( \text{e}5 \)! with a win for White!

30 \( \text{h}2 \) \( \text{c}7 \)

31 \( \text{d}6 \) \( \text{c}5 \) (D)

32 \( \text{g}3 \)!

A very ingenious idea worthy of a better fate. If Black executes his threat by 32...\( \text{B} \text{xf}5 \), then after 33 \( \text{e}6 \)!! he will be obliged to give up his queen for two rooks (33...\( \text{f} \text{xe}6 \) 34 \( \text{B} \text{xc}7 \) \( \text{B} \text{xf}2+ \) 35 \( \text{h}3 \) \( \text{e}5 \)), when White would still be able to put up a stubborn resistance.

32 ... \( \text{f}8 \)!

But this simple answer puts an end to the last hopes of salvation. What follows is agony.

33 \( \text{g}4 \)

Instead 33 \( \text{B} \text{x}g7 \) \( \text{g}7 \) 34 \( \text{B} \text{f}6+ \) \( \text{g}8 \) 35 \( \text{d}4 \) \( \text{h}5 \) would not work.

33 ... \( \text{f}6 \)

34 \( \text{h}3 \) \( \text{h}5 \)

The beginning of the counter-attack.

35 \( \text{w} \text{d}2 \) \( \text{h}xg4+ \)

36 \( \text{x}g4 \)

37 \( \text{h}5 \) \( \text{h}5 \)!

At last the most hated knight of the match can he eliminated with decisive effect, and Black, in addition to the two extra pawns, quickly obtains a mating attack. It was an exciting struggle!

38 \( \text{B} \text{xf}5 \) \( \text{h}xh5+ \)

39 \( \text{f}4 \)

40 \( \text{h}4+ \)

1 27 \( \text{B} \text{e}3 \) is an even more convincing reason to reject 26...\( \text{B} \text{xf}2 \).
40 \( \text{g}f3 \)

If 40 \( \text{g}f5 \) then Black can mate in four: 40...g6+ 41 \( \text{e}e6 \) (or 41 \( \text{x}xg6 \) \( \text{h}h7# \)) 41...\( \text{e}e4+ 42 \text{d}d7 \text{b}b7+ 43 \( \text{e}e6 \text{f}f7# \).

40 ... \( \text{h}h3+ \)

41 \( \text{e}e4 \)

Or 41 \( \text{f}f4 \text{e}e8 \) with the deadly threat of 42...g5#.

41 ... \( \text{e}e8+ \)

42 \( \text{d}d5 \) \( \text{b}b3+ \)

43 \( \text{d}d4 \) \( \text{x}a3 \)

0-1

Game 110

Alekhine – Böök

Margate 1938

Queen’s Gambit Accepted

1 \( d4 \) \( d5 \)

2 \( c4 \) \( \text{dxc}4 \)

The Queen’s Gambit Accepted leads to a game in which Black gives up the centre and attempts to compensate for this by an early queenside pawn advance. In preparing and making this advance, he is liable to fall behind in development and unless he plays the opening with great accuracy, he may easily succumb to a white attack breaking through in the centre.

3 \( \text{d}f3 \) \( \text{f}f6 \)

4 \( e3 \) \( e6 \)

5 \( \text{xc}4 \) \( c5 \)

6 0-0 \( \text{c}c6 \)

This natural move is not the best. The correct line is 6...a6 7 \( \text{e}e2 \) b5 8 \( \text{b}b3 \) \( \text{b}b7 \) 9 \( \text{d}d1 \) \( \text{bd}7 \) 10 a4 b4 11 \( \text{bd}2 \text{c}c7 \) with an equal game. On d7 the knight supports the c-pawn and leaves the light-squared bishop an open diagonal. On c6 it is misplaced as the course of this game shows.

7 \( \text{e}e2 \) \( a6 \)

8 \( \text{c}c3 \) \( b5 \)

This move is now too dangerous. 8...\( \text{e}e7 \) 9 \( \text{d}d1 \text{c}c7 \) is preferable, but after 10 \( \text{xc}5 \text{xc}5 \) 11 a3 White’s superior development gives him the better game.

9 \( \text{b}b3 \) \( b4 \)

There is no good move here, for example:

1) 9...\( \text{e}e7 \) 10 \( \text{xc}5 \text{xc}5 \) 11 e4! \( \text{d}d7 \) (best) 12 e5 with advantage to White.

2) 9...\( \text{b}b7 \) 10 \( \text{d}d1 \) \( \text{b}6 \) 11 d5! exd5 12 \( \text{xd}5 \) b4 13 \( \text{xf}7+ \) (Stålberg-Böök, Kemer 1927) winning easily, e.g. 13...\( \text{xf}7 \) 14 \( \text{c}c4+ \) \( \text{e}e8 \) 15 \( \text{e}e6+ \) \( \text{e}e7 \) 16 \( \text{e}e5 \) \( \text{f}8 \) 17 \( \text{c}c4 \) and 18 \( \text{d}d6+ \).

3) 9...\( \text{ex}d4 \) 10 \( \text{d}d1! \) \( \text{xb}6 \) 11 exd4 \( \text{a}a5 \) 12 \( \text{c}c2 \) \( \text{e}7 \) 13 \( \text{e}e5 \) 0-0 14 \( \text{g}g5 \) \( \text{a}7 \) 15 \( \text{d}d3 \) (Ichim-Troianovsky, 1940) with a strong attack.

4) 9...c4 10 \( \text{c}c2 \) \( \text{e}7 \) 11 a4 with advantage.

The text move is as good a chance as any.

10 \( \text{d}5! \) \( \text{a}a5 \)

If 10...\( \text{ex}d5 \) 11 \( \text{xd}5! \) \( \text{xd}5 \)

12 \( \text{d}d1 \text{c}c7 \) (12...\( \text{e}e6? \) 13 e4 \( \text{e}e7 \) 14 \( \text{ex}d5 \) followed by 15 d6) 13 \( \text{xd}5 \) followed by e4 with a beautiful position. If 10...\( \text{xc}3 \) 11 \( \text{xc}6 \) cx\( \text{b}2 \) 12 \( \text{xb}2 \) and White again has much the better of the position.

11 \( \text{a}4+ \) \( \text{d}7 \)

12 \( \text{dxe}6 \) \( \text{fxe}6 \) (D)
13 $\Delta d1$

Beginning a remarkable sacrificial attack. It is possible that Black might theoretically have avoided loss but Spielmann's remark to Böök after the game is the best comment on this, 'How can you play like that? Such sacrifices are always correct in over-the-board play!' Moreover, even an Alekhine will not normally analyse exhaustively such a sacrifice—he will examine as many variations as he can in the limited time available, and for the rest trust that, if his general judgement of the position is correct, he will be able to find a reply to an unexpected counter-stroke.¹

13 ... $\text{bxc3}$
14 $\Delta xd7!$ $\text{xd7}$
15 $\text{e5}$ $\text{a7}$
16 $\text{bxc3!} (D)$

Played with extraordinary coolness! A rook behind, White calmly stops to recapture a pawn. 16 $\text{wh5+}$

would not have been good because of 16...g6 17 $\text{e5g6 hgx6}$ 18 $\text{wh8}$ $\text{f7}$ and Black should win.

16 ... $\text{e7}$

Here, if anywhere, was Black's chance to save the game. The natural move 16...g6 will not do, as shown by Böök in the following analysis: 17 $\text{wd3}$ $\text{e7}$ (17...g7 18 $\text{xd7}$ $\text{xd7}$ 19 a3) 18 e4! $\text{f6}$ (not now 18...xe5?? 19 $\text{g5+}$) 19 f3 g7 20 $\text{g5 f8}$ 21 $\text{d1 c7}$ 22 $\text{d7}$ $\text{xd7}$ 23 $\text{xd7+}$ $\text{xd7}$ 24 $\text{xd7}$ $\text{gxd7}$ 25 $\text{f3+}$ $\text{c8}$ 26 $\text{xa6+}$ $\text{b7}$ 27 $\text{f6+}$ $\text{b8}$ 28 $\text{f4+}$ $\text{a7}$ 29 $\text{c7}$ followed by mate. Black's only chance lies in an immediate return of almost all the extra material, which he can offer in two ways:

1) 16...wb8 17 $\text{xd7}$ $\text{xd7}$ 18 $\text{xa6}$ $\text{c7}$ 19 $\text{xe6+}$ (best) 19...$\text{d8}$ 20 e4! threatening both 21 $\text{f4}$ and 21 $\text{g5+}$; now it is difficult to find anything good for Black:

¹ It is worth mentioning that White has a reasonable risk-free alternative: 13 $\text{e5}$, and if 13...bxc3, then 14 $\text{xd7}$ $\text{xd7}$ 15 $\text{h5+}$ $\text{e7}$ (or 15...g6 16 $\text{e5}$) 16 $\text{d1}$ is very good for White.
1a) 20...\textit{\texttt{e7}}? 21 \textit{\texttt{f4!}} \textit{\texttt{b7}} 22 \textit{\texttt{x7d7}} \textit{\texttt{xd7}} 23 \textit{\texttt{b6+}}.

1b) 20...\textit{\texttt{b7}} 21 \textit{\texttt{g5+ \texttt{c8}}} (or 21...\textit{\texttt{e7}} 22 \textit{\texttt{exe7+ \texttt{exe7}}} 23 \textit{\texttt{d1+}})
22 \textit{\texttt{d1}} \textit{\texttt{d6}} 23 \textit{\texttt{e5}}.

1c) 20...\textit{\texttt{d6}} 21 \textit{\texttt{g5+ \texttt{c7}}} (the lines 21...\textit{\texttt{c7}} 22 \textit{\texttt{f4! or 21...\texttt{c8}}} 22 \textit{\texttt{e8+ \texttt{c7}}} 23 \textit{\texttt{f4!}} are no better)
22 \textit{\texttt{xe7+ \texttt{xe7}}} 23 \textit{\texttt{b6+ \texttt{c7}}} 24 \textit{\texttt{b8+ \texttt{c8}}} 25 \textit{\texttt{d1+}}.

2) 16...\textit{\texttt{e7}}! (this simple move threatening to castle is Black's best chance) 17 \textit{\texttt{h5+ g6}} 18 \textit{\texttt{xe6}} \textit{\texttt{hxg6}}
19 \textit{\texttt{xe8+}} \textit{\texttt{f8}}! and now I can find nothing decisive for White. With two
pawns for the piece, a pair of bishops and with Black still tied up, I think, however, that even in this variation
White's practical chances are extremely good.

17 \textit{\texttt{e4!}} \textit{\texttt{f6}}

18 \textit{\texttt{g5}} \textit{\texttt{c7}}

19 \textit{\texttt{f4}}^2 \textit{\texttt{b6}}

If 19...\textit{\texttt{b7}}, then 20 \textit{\texttt{e3! \texttt{d8}}}
(alternatively, 20...\textit{\texttt{c4}} 21 \textit{\texttt{g5+ \texttt{g5xg5}}} 22 \textit{\texttt{xe5+ \texttt{d6}}} 23 \textit{\texttt{d1+ \texttt{c7}}}
24 \textit{\texttt{d8#)) 21 \textit{\texttt{d3+ \texttt{c8}}} 22 \textit{\texttt{b1}}
\textit{\texttt{xe4}} 23 \textit{\texttt{f7!}} and mate follows.

20 \textit{\texttt{a1}} \textit{\texttt{g6}}

White threatened \textit{\texttt{g5}} followed by \textit{\texttt{h5}}. There is nothing to be done.

21 \textit{\texttt{g5}} \textit{\texttt{g7}}

22 \textit{\texttt{d7}} \textit{\texttt{xd7}}

23 \textit{\texttt{b6d7+ \texttt{b8}}}

\textbf{24 \textit{\texttt{xf6}} \textit{\texttt{xf6}}}

25 \textit{\texttt{e5}} \textit{\texttt{1-0}}

If the bishop moves, then 26 \textit{\texttt{f3+}} and mate follows; other moves
are met by either \textit{\texttt{exf6}} or \textit{\texttt{f3}}. An
outstandingly brilliant game.

\textbf{Game 111}

\textbf{Alekhine – Euwe}

AVRO 1938

Slav Defence

1 \textit{\texttt{d4}} \textit{\texttt{d5}}

2 \textit{\texttt{c4}} \textit{\texttt{c6}}

3 \textit{\texttt{f3}} \textit{\texttt{f6}}

4 \textit{\texttt{cxd5}} \textit{\texttt{cxd5}}

Like a good many symmetrical variations, this is less innocuous
than it appears at first sight. In all
symmetrical openings, the danger
for Black lies in the fact that he can
not indefinitely continue to imitate
White (cf. his 7th move in this
game) and is liable to find himself
confronted with a position in which
White makes a strong aggressive
move and Black is forced to make a
very humble reply, with consequent
disadvantage: examples of this can
be found not only in the Slav but in
the Four Knights’, Petroff’s Defence
and the English Opening. Of course,
4...\textit{\texttt{xd5}} is not good here because of
5 \textit{\texttt{c3}} and 4...\textit{\texttt{xd5}} is met by 5 \textit{\texttt{e4}}.

---

1 16...\textit{\texttt{h4}} is interesting, to attack a4, for example 17 \textit{\texttt{xd7+ xd7}} 18 \textit{\texttt{xd7 d6}}
19 \textit{\texttt{xa6}} (19 g3 \textit{\texttt{c4}}!) 19...\textit{\texttt{h2+ 20 f1 \texttt{h1+ 21 e2 xd7}} 22 \textit{\texttt{xa5 \texttt{xg2}}}
with a roughly equal position.

2 Not bad, but 19 \textit{\texttt{h5}} was a complete killer, for example 19...\textit{\texttt{xe5}} 20 \textit{\texttt{e8+ \texttt{d6}}}
21 \textit{\texttt{d1+ \texttt{c7}} 22 \textit{\texttt{d8+ matting, or 19...g6}} 20 \textit{\texttt{xe6+ hxg6}} 21 \textit{\texttt{h8 c5}} 22
\textit{\texttt{h7+}.}
7 5 6 7  e3
c3 c6 f4 f5
e is ineffectual because of a5 8 a4+ d7.
7 a6
Not 7...e6 since then 8 b3! is very strong, as 8...a5 9 a4+, 8...c8 9 b5 and 8...d7 9 e5 all give White a winning game.
However a good alternative to the text is 7 b6 8 d3 x3d3 (8...xb2 9 0-0 xd3 10 xd3 gives White an overwhelming position for the sacrificed pawn) 9 xd3 e6 10 0-0 e7 and White has little, if any, advantage. The move played leads to complications in which it is difficult for Black to hold the position.
8 e5! c8
9 g4!
A characteristic move transforming the game.
9 a7!
A very difficult decision, but this unpleasant move is certainly best. If 9...g6, 10 h4! h6 (10...xe5 11 dxe5 e4 12 a4+! d7 13 xd7+ xd7 14 xd5 c5 15 d1 and wins) 11 xg6 fxg6 12 d3 with a won game. Or 9...xe5 10 gxf5 e4 (10...c6 11 h3! and Black is hopelessly tied up) 11 a4+ d7 12 xd7+ xd7 13 a4! e8 (14 xc4 was threatened) and White has two bishops with much the better game.
10 g2 (D)
Not 10 g5 e4 11 xd5? a5+!

10 e6
11 0-0
The continuation 11 g5 e4 12 xxe4 dxe4 13 xxe4 xxe5 14 dxe5 b4+ 15 f1 b5+ 16 g2 e7 would give Black compensation for the sacrificed pawn.
11 h6
Now, however, this is necessary, or White will win a pawn with impunity.
12 g3 h5?
He should play 12...e7 and if 13 f4 xxe5 14 fxe5 h7 and Black’s game is far from lost, since although White has an advantage in space and some attacking chances, he also has

---

1 This comment is incorrect, as after 8...c8 9 b5 Black may play 9...b4+,
forcing the king to move (10 d2 e4 11 c7+ d8 is good for Black, and 10
xb4 xb4 11 xd6+ e7 12 xc8+ hxc8 is ineffective), and then 10...0-0.

2 After 17 f3 I see no compensation at all for the pawn. Moreover, White could
have played 13 xd7 b4+ 14 f1 xd7 15 xe4, with an extra pawn and the
two bishops. In fact, 11 g5 is probably as good as the move played.
weaknesses in his pawn structure. For this reason 13 \( \text{Qxd7} \) \( \text{Wxd7} \) 14 \( f4 \) might be a shade better, but Black can then continue ...\( \text{Qa5-c4} \) with counter-chances on the queenside.

13 \( \text{Qxd7} \) \( \text{Qxd7} \)?

And after this move the game is probably lost. 13...\( \text{Wxd7} \) 14 \( g5 \) \( \text{Qg8} \) is necessary, when Black’s position, although most unpleasant, might still be defensible.

14 \( g \times h5 \) \( \text{Qf6} \)
15 \( \text{Qf3} \) \( \text{Qb4} \)
16 \( \text{Ac1} \) \( \text{Qf8} \)

If 16...0-0, then 17 \( \text{Qh1} \) followed by \( \text{Qg1} \) gives White a winning attack. The white pawn on \( h5 \) is very dangerous should Black castle since it prevents ...\( g6 \) and White constantly threatens \( h6 \).

17 \( a3 \) \( \text{Qxc3} \)
18 \( \text{Qxc3} \) \( \text{Qe7} \)
19 \( \text{Wb3} \) \( \text{Qxc3} \)
20 \( \text{bxc3} \)

Although Black has succeeded in reducing the material—the classical method of diminishing the force of an attack—White retains too many advantages for the game to be saved.

20 ... \( \text{Wd7} \)

If 20...\( b5 \), 21 \( a4 \) and Black’s a-pawn will fall.

21 \( \text{Wb6} \) \( \text{Qc8} \)

Otherwise 22 \( \text{Ab1} \) wins.

22 \( \text{Cc5+} \) \( \text{Qg8} \)
23 \( \text{Ab1} \) \( b5 \) \( (D) \)

White threatened 24 \( c4 \).

24 \( h6 \)

This pawn, which has played a major part throughout, makes a final and decisive advance.

24 ... \( \text{gxh6} \)

If 24...\( \text{Qxh6} \), 25 \( a4 \) \( \text{Qa7} \) 26 \( \text{Wb6} \) \( \text{bxa4} \) 27 \( \text{Wxa6} \) and White wins.

25 \( \text{Qe5} \) \( \text{Qg7} \)
26 \( a4 \) \( \text{bxa4} \)

This would not have been playable with the black rook on \( h6 \) and king on \( g8 \) because of \( \text{Qb8} \).

27 \( \text{c4!} \) \( \text{Qe7} \)

After 27...\( \text{Qxc4} \)? 28 \( \text{Qxf6+} \) \( \text{Qxf6} \)
29 \( \text{Qe5+} \) White wins the rook.

28 \( \text{exd5} \) \( \text{Qxd5} \)

If 28...\( \text{exd5} \), 29 \( \text{Ab6} \).

29 \( \text{Qh1!} \)

Not 29 \( \text{Qxd5 exd5} \) 30 \( \text{Ab6 Qg4+} \) and White must submit to perpetual check or release the pin on the black knight. The text move, however, threatens this line by forestalling ...\( \text{Qg4+} \).

29 ... \( \text{Qc8} \)
30 \( \text{Qg1+} \) \( \text{Qh7} \)
31 \( \text{Wb3} \) \( \text{Qg8} \)

Forced in order to meet the threat of 32 \( \text{Wd3+ Qh8} \) 33 \( \text{Qxd5 Wxd5+} \) 34 \( e4 \). If 31...\( \text{Qe8?} \), then 32 \( \text{Qf8} \) followed by mate. Now, however, Black loses a piece.

32 \( e4 \) \( \text{Qxg1+} \)
33 \( \text{Qxg1} \) \( \text{Wb5} \)
34 exd5 \( \text{wb1} + \)
35 \( \text{g2} \) \( \text{g6} + \)
36 \( \text{f1} \) \( \text{b1} + \)
37 \( \text{g2} \) \( \text{g6} + \)
38 \( \text{g} 3 \) \( \text{xd5} \)
39 \( \text{xd5} \) exd5
40 \( \text{xa4} \) h5
41 h4 1-0

The ending is quite hopeless. An original and forceful game.

Game 112

Alekhine – Flohr

AVRO 1938

Ruy Lopez

1 e4 e5

A sensation! Flohr almost invariably plays semi-open defences when facing 1 e4.

2 \( \text{f3} \) \( \text{c6} \)
3 \( \text{b5} \) a6
4 \( \text{a4} \) \( \text{f6} \)
5 0-0 \( \text{e7} \)
6 \( \text{e1} \) b5
7 \( \text{b3} \) d6
8 c3 \( \text{a5} \)
9 \( \text{c2} \) c5
10 d4 \( \text{c7} \)
11 \( \text{bd2} \)

Here 11 h3 to prevent \( \text{g4} \) is more usual. White plays to get his knight to e3 (controlling f5 and d5) as quickly as possible—the drawback of the line is that, because it allows Black to put pressure on d4 by 12...\( \text{g} 4 \), White is unable to keep the centre fluid as long as in the normal line.

11 ... 0-0
12 \( \text{f1} \) \( \text{g4} \)
13 dxe5

Against Fine at Margate 1936/7, Alekhine here played 13 \( \text{e3} \) \( \text{xf3} \) 14 \( \text{xf3} \) cxd4 15 \( \text{f5} \) and, in My Best Games, 1924-37, says that this pawn sacrifice is not quite sufficient but that he should have played 15 cxd4 \( \text{c6} \) 16 d5 \( \text{d4} \) 17 \( \text{d1} \) \( \text{xc2} \) 18 \( \text{xc2} \) a5 19 \( \text{d2} \) which he says ‘would have been in White’s favour’. It seems to me that Black is at little, if any, disadvantage in this line and it was probably in anticipation of this variation that Flohr allowed the Lopez to be played. If 13 d5, a position similar to that in the 11 h3 variation arises, but better for Black since after 11 h3 he has to play \( \text{c6} \) to force d5 after which he returns to a5, thus losing time.

13 ... dxe5
14 \( \text{e3} \) \( \text{e6} \) (D)

\[ \]

---

1 It seems that Alexander is actually referring to the Hastings encounter—see game 98.
15 \$e2 ffe8

The idea of this move is that after an eventual $d5 by White and an exchange on that square the rook will be ready to protect the e-pawn. It would, however, be better to proceed at once with the queenside counterattack by 15...c4. Then 16 $g5 $b7 17 $xe6 fxe6 18 $d2 $c5 gives rise to an equal game, while 17 $d5 $xd5! 18 exd5 $d6 is also satisfactory for Black.

16 $g5 c4
17 b4 exb3

If 17...$c6, then 18 $d5 $xd5 19 exd5 $xg5 20 dxe6 $xc1 21 exf7+ $xf7 22 $xc1 with the better game, White having a bishop against a knight and a strong square on e4. If 17...$b7, then 18 $xe6 fxe6 and White has a slight advantage because of his two bishops and better pawn formation—note that Black cannot now (in contrast to the variation in the previous note) get his knight to c5. This would, however, be better than the text as it would leave Black with fewer weaknesses. The point of b4 is that whether Black exchanges or not, the pressure on White's queenside is completely eliminated.

18 $xe6 fxe6
19 axb3 b4
20 exb4!

Not the obvious 20 c4, in reply to which Black can play ...$b7-c5 blockading the passed pawn, with a good game.

20 ...
21 $d2 $xd2

If 21...$c6 22 $xb4 $xc4, then 23 $c4! $xc2 24 $wc2 followed by $c3 and $a5. The trouble with Black's game is that he has two weak spots to watch, at e5 and a6, whereas White has only his b-pawn to worry about. It would be much less serious for Black if he had not played 17...exb3, as he would then only have had the weakness on the e-file and White would not have c4 for his knight.

22 $xd2 $c6
23 $c3 $b6
24 $d3 $d4
25 b4 $ec8
26 $c4 $ab8

If the queen moves, then 27 $a5 and the e-pawn will fall without compensation.

27 $xa5 $xb4
28 $xb4 $xb4
29 $xe5 $b3 (D)

It seems as if Black has extricated himself rather neatly—if the rook retreats then 30...$c5, and White can only win the a-pawn at the cost of his e-pawn.

30 $xa6!!

A shattering surprise: it is amazing that White can safely allow the ...$c5 fork.

30 ...

---

1 I don't understand this comment, since I cannot see how this type of position could have arisen if Black had not played ...exb3.
31 \textit{\texttt{\underline{\texttt{\textsf{H}c}}1}} \textit{\texttt{\underline{\texttt{\textsf{B}}}b}8} \\
32 \textit{\texttt{\underline{\texttt{\textsf{H}}}}c4!} \textit{\texttt{\underline{\texttt{\textsf{G}}}}h8}

Not 32...\textit{\texttt{\underline{\texttt{\mathbf{A}}}}xa6?} 33 \textit{\texttt{\underline{\texttt{\mathbf{A}}}}xe6+} \textit{\texttt{\underline{\texttt{\mathbf{G}}}}f8}
34 \textit{\texttt{\underline{\texttt{\mathbf{H}}}}xc8+} \textit{\texttt{\underline{\texttt{\mathbf{H}}}}xc8} 35 \textit{\texttt{\underline{\texttt{\mathbf{A}}}}xc8} with an easily winning endgame. However 32...\texttt{\underline{\texttt{\mathbf{G}}}}f8 would be better than the text; after 33 \textit{\texttt{\underline{\texttt{\mathbf{A}}}}}a7 (I can see nothing better) 33...\texttt{\underline{\texttt{\mathbf{D}}}}fxe4 Black has good drawing chances although White has a clearly superior position.

33 \texttt{\underline{\texttt{\mathbf{D}}}}f7+ \texttt{\underline{\texttt{\mathbf{G}}}}g8 \\
34 \texttt{\underline{\texttt{\mathbf{D}}}}d6 \texttt{\underline{\texttt{\mathbf{K}}}}c7

If 34...\texttt{\underline{\texttt{\mathbf{H}}}}d8, 35 \texttt{\underline{\texttt{\mathbf{C}}}}c6 retaining the pawn with a winning endgame.

35 \texttt{\underline{\texttt{\mathbf{A}}}}aa1 \texttt{\underline{\texttt{\mathbf{F}}}}f8 \\
36 e5 \texttt{\underline{\texttt{\mathbf{D}}}}g4 \\
37 \texttt{\underline{\texttt{\mathbf{E}}}}e1 \texttt{\underline{\texttt{\mathbf{G}}}}5

Hastening the end, but Black is lost whatever he does.

38 \texttt{\underline{\texttt{\mathbf{K}}}}a3! \texttt{\underline{\texttt{\mathbf{H}}}}h6 \\
39 \texttt{\underline{\texttt{\mathbf{F}}}}f3+ \texttt{\underline{\texttt{\mathbf{G}}}}g7

If 39...\texttt{\underline{\texttt{\mathbf{E}}}}e7, 40 \texttt{\underline{\texttt{\mathbf{H}}}}h3 wins a second pawn.

40 \texttt{\underline{\texttt{\mathbf{G}}}}g3 \texttt{\underline{\texttt{\mathbf{G}}}}4 \\
41 \texttt{\underline{\texttt{\mathbf{H}}}}h3 \texttt{\underline{\texttt{\mathbf{K}}}}h8

Here the game was adjourned and Black resigned without resuming play—after 42 \texttt{\underline{\texttt{\mathbf{H}}}}xg4 he has no chance of saving the game.

1-0

Game 113
Alekhine – Capablanca
AVRO 1938
French Defence

1 \texttt{\underline{\texttt{\mathbf{E}}}}4 \texttt{\underline{\texttt{\mathbf{E}}}}6 \\
2 \texttt{\underline{\texttt{\mathbf{D}}}}4 \texttt{\underline{\texttt{\mathbf{D}}}}5 \\
3 \texttt{\underline{\texttt{\mathbf{C}}}}d2

This move—a favourite of Keres and, at least in his later years, of Alekhine—preserves the option of protecting the centre by c3 and circumvents the pin 3...\texttt{\underline{\texttt{\mathbf{D}}}}b4. Its drawback, however, is that since it puts less immediate pressure on the black centre than 3 \texttt{\underline{\texttt{\mathbf{C}}}}c3, it allows Black to counter safely with the energetic 3...c5!.

3 ... \texttt{\underline{\texttt{\mathbf{F}}}}f6

This, although quite playable, is rather less good than ...c5, since it leads to a type of game in which it is valuable for White to have c3 available. Capablanca, however, having just lost to Keres with 3...c5, did not care to try the move again.

4 \texttt{\underline{\texttt{\mathbf{E}}}}5 \texttt{\underline{\texttt{\mathbf{D}}}}fd7 \\
5 \texttt{\underline{\texttt{\mathbf{D}}}}d3 \texttt{\underline{\texttt{\mathbf{C}}}}c5 \\
6 c3 \texttt{\underline{\texttt{\mathbf{C}}}}c6 \\
7 \texttt{\underline{\texttt{\mathbf{D}}}}e2 \texttt{\underline{\texttt{\mathbf{W}}}}b6 \\
8 \texttt{\underline{\texttt{\mathbf{F}}}}f3

It is interesting to compare this position with the somewhat similar one that arises in Spielmann’s favourite variation 1 \texttt{\underline{\texttt{\mathbf{E}}}}4 \texttt{\underline{\texttt{\mathbf{E}}}}6 2 \texttt{\underline{\texttt{\mathbf{D}}}}4 \texttt{\underline{\texttt{\mathbf{D}}}}5 3 \texttt{\underline{\texttt{\mathbf{C}}}}c3 \texttt{\underline{\texttt{\mathbf{F}}}}f6 4 \texttt{\underline{\texttt{\mathbf{E}}}}5 \texttt{\underline{\texttt{\mathbf{D}}}}fd7 5 \texttt{\underline{\texttt{\mathbf{C}}}}ce2 c5 6 c3 \texttt{\underline{\texttt{\mathbf{C}}}}c6 7 f4 \texttt{\underline{\texttt{\mathbf{W}}}}b6 8 \texttt{\underline{\texttt{\mathbf{F}}}}f3. The difference in the positions is that in the present game the bishop stands on d3 instead of f1 and the f-pawn on f2 instead of f4. Both these differences
are favourable to White: the development of the bishop on d3 is obviously a great advantage and the preservation of f4 for the knight and an open diagonal for the c1-bishop also strengthens White’s game.

8 ... cxd4
9 cxd4 b6
10 f4!

In a closed position such as this, loss of the privilege of castling is comparatively unimportant: it is far more important to prevent Black easing his position by exchanges.

10 ... e7
11 a3 f6

Black should play 11...a5 to stop 12 b4. Note that if 11...0-0, then 12 f4 followed by h4 and g5 would give White a winning attack. The effect of the pawn on e5 is virtually to prohibit kingside castling.

12 b4!

Further restricting Black.

12 ... d7
13 e3 e7
14 c3 a6
15 a4 a7
16 b5 b6
17 g3 f5 (D)

Black now embarks on an attempt to free himself which merely hastens his defeat. However, if he does absolutely nothing (the alternative plan!), he will almost certainly succumb to an attack in the long run: White can prepare for f5 at his leisure and Black will not have room to post his pieces properly for the defence.

20 h4 h7
21 h5!

g6 is a far more valuable square for White than g5 or e4 is for Black.

21 ... g5
22 h4 e4
23 w2 f7

Not 23...hx4? 24 gxh4! and the knight on e4 (which has gone to such trouble to get there) is trapped!

24 f3 e5

A very fine move, resulting in the reincarceration of Black’s h8-rook just as it was about to emerge.

25 ... fxg4
26 g6+ g4
27 f4! f3

If 27...e4, then 28 xe4 dxe4 29 g6, while 27...f7 is met by 28 d3 f8 29 w2 followed by wg4 and playing a rook to g1. 27...h3 allows 28 hxh7+ xh7 (28...xh7 29 c2+) 29 g6 followed by we2 and wg4. In every case White wins easily.

28 xh7+ xh7

Or 28...xh7 29 c2+ g8 30 g6 and wins.

29 g6 d8
30 \textit{\textbf{A}}ac1 \textit{\textbf{A}}e8
31 \textit{\textbf{A}}g3!

An original way to trap a knight!
31 ... \textit{\textbf{W}}f7
32 \textit{\textbf{A}}xg4 \textit{\textbf{A}}h4
33 \textit{\textbf{B}}xh4 \textit{\textbf{W}}xh5+
34 \textit{\textbf{A}}g3 \textit{\textbf{W}}f7
35 \textit{\textbf{B}}f3 1-0

Black exceeded the time limit, but
his position was quite hopeless in
any case. This fine game was the last
between the two great rivals and was
Alekhine's only tournament victory
against Capablanca.

Game 114
Alekhine – Keres
Salzburg 1942
Ruy Lopez

1 \textit{\textbf{e}}4 \textit{\textbf{c}}5
2 \textit{\textbf{B}}f3 \textit{\textbf{c}}6
3 \textit{\textbf{A}}b5 \textit{\textbf{a}}6
4 \textit{\textbf{A}}a4 \textit{\textbf{d}}f6
5 0-0 \textit{\textbf{A}}e7
6 \textit{\textbf{W}}e2 \textit{\textbf{b}}5
7 \textit{\textbf{A}}b3 \textit{\textbf{d}}6
8 \textit{\textbf{c}}3

The 'thematic' move 8 a4 is ade-
quately met by 8...\textit{\textbf{A}}g4 9 \textit{\textbf{c}}3 (not 9
axb5? \textit{\textbf{Q}}d4) 9...0-0.
8 ... 0-0
9 \textit{\textbf{B}}d1

If 9 d4, then 9...\textit{\textbf{A}}g4 10 \textit{\textbf{B}}d1 exd4
11 cxd4 d5! 12 e5 \textit{\textbf{A}}e4 with equality.
White transposes moves in order to
avoid this variation.
9 ... \textit{\textbf{A}}a5

If 9...\textit{\textbf{A}}g4, then 10 d3! followed
by h3 and g4 with an excellent game.
Black cannot reply 10...d5? because
of 11 exd5 \textit{\textbf{Q}}xd5 12 \textit{\textbf{W}}e4 \textit{\textbf{A}}e6 13
\textit{\textbf{Q}}xe5. The usual Lopez rule applies:
...\textit{\textbf{A}}g4 is not good for Black before
White has played d4 because of the
reply d3!, leaving the bishop mis-
placed.
10 \textit{\textbf{A}}c2 \textit{\textbf{c}}5
11 \textit{\textbf{d}}4 \textit{\textbf{W}}c7
12 \textit{\textbf{A}}g5

It is more usual to keep the bishop
on c1 and to play the b1-knight to the
kingside. The ideas behind the text
are:
1) that when the b1-knight ar-
vies on e3 (via d2 and f1) White
will be threatening \textit{\textbf{A}}xf6 followed
by \textit{\textbf{Q}}d5; and
2) \textit{\textbf{A}}ac1 will be possible earlier
than usual.

However, the bishop is not really
particularly well placed on g5 and it
is more important to get the knight
round to e3 as soon as possible.
12 ... \textit{\textbf{W}}g4

For now Black could have played
12...cxd4! 13 cxd4 \textit{\textbf{A}}g4 threatening
14...\textit{\textbf{A}}xf3 breaking up White's kings-
side. If 14 \textit{\textbf{Q}}c3, then 14...b4! 15
\textit{\textbf{A}}xf6 bxc3 16 \textit{\textbf{A}}xe7 cxb2 17 \textit{\textbf{N}}ab1
\textit{\textbf{W}}xe7 18 \textit{\textbf{A}}xb2 \textit{\textbf{Q}}c6 with a good
game, while 14 \textit{\textbf{A}}d3 \textit{\textbf{Q}}c6 also al-
 lows Black full equality.
13 dxe5 \textit{\textbf{dxe5}}
14 \textit{\textbf{Q}}bd2 (D)
14 ... \textit{\textbf{W}}fd8

14...\textit{\textbf{A}}h5 at once gives Black a
rather easier game. If 15 h3, then
15...\textit{\textbf{A}}e6 16 \textit{\textbf{A}}xe7 (or 16 \textit{\textbf{A}}f1 \textit{\textbf{A}}xg5
17 \textit{\textbf{A}}xg5 \textit{\textbf{A}}f4 18 \textit{\textbf{W}}e1 \textit{\textbf{A}}c4 19 \textit{\textbf{A}}e3
f6 20 \textit{\textbf{A}}f3 \textit{\textbf{A}}e2) 16...\textit{\textbf{A}}f4! 17 \textit{\textbf{W}}f1
\textit{\textbf{W}}xe7 with a satisfactory position,
18 \( \text{Qxe5} \) being met by 18...\( \text{Qxh3} \). I can see no way in which White can gain the advantage—the variations are similar to those that arise in the actual game, with the important difference that in the game White has gained a very valuable move.

15 \( \text{Qf1} \) \( \text{Qh5} \)

If 15...\( \text{Qc4} \), then 16 \( \text{b3} \) \( \text{a5} \) 17 \( \text{Qxf6} \) \( \text{Qxf6} \) 18 \( \text{Qd5} \) followed by \( \text{Qe3} \) with the better game. If Black does nothing in particular then 16 \( \text{Qe3} \) \( \text{Qe6} \) 17 \( \text{Qh4} \) and White has the advantage because of his pressure on f5 and d5.

16 \( \text{h3!} \) \( \text{Qe6} \)

Best. If 16...\( \text{Qxg5} \), then 17 \( \text{hxg4} \) \( \text{Qf4} \) 18 \( \text{We1} \) \( \text{Qe7} \) 19 g3 \( \text{Qh3} + \) 20 \( \text{Qg2} \) \( \text{Qg5} \) 21 \( \text{Qe3} \) with much the better game.

17 \( \text{Qe3} \) \( \text{f6!} \)

18 \( \text{Qh2} \)

Better than 18 \( \text{Qh4} \) \( \text{Qf4} \), when Black has a good game.

---

1 Here 16...\( \text{Qxf3} \) appears promising for Black since 17 \( \text{Wxf3} \) \( \text{Qxb2} \) loses a pawn, while 17 \( \text{gxh3} \) \( \text{Qh5} \) 18 \( \text{Qxe7} \) \( \text{Qf4} \) 19 \( \text{c2} \) \( \text{Qxe7} \) 20 \( \text{Qxc4} \) bxc4 results in damage to both sides' pawn structures, but the damage to White's is more serious as it also exposes his king.

2 There is no obvious reason why Black should not take the pawn on b2.
2) Black’s kingside is somewhat weakened and his h5-knight misplaced;
3) Black’s queenside is open to attack by a4.

None of these weaknesses separately seems very serious—it takes an Alekhine to exploit them.

22 $\text{Qxd1}$ $\text{Qd8}$

Here again ...$\text{Qc4}$ is better. The text results in White gaining command of the a-file, which is of more value to him than the d-file is to Black.

23 $\text{a4}$ $\text{Qc4}$
24 $\text{axb5}$ $\text{axb5}$
25 $\text{Qd5!}$

Another fine move. Black cannot safely accept the offered pawn.

25 ...

If 25...$\text{Qxd5}$, then 26 $\text{exd5}$ $\text{Qxd5}$ 27 $\text{We4!}$ $\text{Qd8}$ (27...$\text{Qd2}$ 28 $\text{Qxh5}$ gxh5 29 $\text{Qf3}$ and the rook must retreat in view of 29...$\text{Qxb2}$? 30 $\text{Qa8+}$ $\text{Qg7}$ 31 $\text{Qa7}$) 28 $\text{Qxh5}$ gxh5 29 $\text{Qf3}$ $\text{Qf7}$ (29...$\text{Qg7}$ 30 $\text{Qxh5}$ $\text{Qxb2}$ 31 $\text{Qg4}$ wins back at least the sacrificed pawn with a strong attack and the superior game) 30 $\text{Qc6}$ $\text{Qxb2}$ 31 $\text{Qxg5+}$ $\text{Qg8}$ 32 $\text{Qxb5}$ with much the better game.

26 $\text{b3}$ $\text{Qd6}$
27 $\text{c4}$ $\text{bxc4}$
28 $\text{bxc4}$ $\text{Qxd5}$
29 $\text{exd5}$ (D)

The first stage of the middlegame (which might be said to have begun on White’s 14th move) is over and White has achieved his aims, with a decisive or almost decisive advantage. White’s bishop is better than Black’s knight, his passed pawn is invulnerable and Black has a weak c-pawn and a kingside majority with little future. The next stage sees White gradually increasing his advantage until Black, under pressure, loses a pawn by a blunder.

29 ...

30 $\text{Qg4}$ $\text{We7}$
31 $\text{Qc2}$ $\text{Qge8}$

31...$\text{Qf7}$ followed by ...$\text{f5}$ might be a little better.

32 $\text{h4}$

Preventing any sort of pawn rush by Black.

32 ...

33 $\text{Qe3}$ $\text{We5}$?

This turns out badly, but if Black does nothing White will play $\text{Qe3}$ followed by $\text{Qa6}$, $\text{Wd2}$ and $\text{Qa5}$ with a powerful queenside attack.

33 $\text{Qe3}$ $\text{We5}$?

Blundering in a bad position, as so often happens.

34 $\text{Qa7}$ $\text{Qg8}$?

34...$\text{Qg7}$ is essential, but after $\text{Wf1-a5}$ White has a winning game.

35 $\text{Qg4}$ $\text{Wd4}$
36 $\text{Qxe4!}$ $\text{f5}$
36...$\text{Qxe4}$? 37 $\text{Qh6+}$ $\text{Qh8}$ (or 37...$\text{Qf8}$?? 38 $\text{Qc7}$#) 38 $\text{Qf7+}$ and
39 \textit{xd}8. A similar line wins against 36...\textit{w}xe4.

\begin{align*}
37 & \textit{h}6+ & \textit{h}8 \\
38 & \textit{c}2 & \textit{f}6 \\
39 & \textit{e}6 & \textit{xe}6 \\
40 & \textit{dxe}6
\end{align*}

Now comes the final stage—winning a won ending.

The game concluded 40...\textit{c}8 41 \textit{f}7+ \textit{xf}7 (after 41...\textit{g}8 42 \textit{e}5 the ending is of course also won) 42 \textit{exf}7 \textit{d}6 43 \textit{d}3 \textit{g}7 (or 43...h5 44 \textit{xd}7! \textit{xe}4 45 \textit{xe}4 \textit{fxe}4 \textit{fxe}4 46 \textit{c}7 \textit{f}8 47 \textit{f}1! \textit{g}7 48 \textit{e}2 \textit{xf}7 49 \textit{xf}7+ \textit{xf}7 50 \textit{e}3 winning) 44 \textit{f}8\textit{w}+ \textit{xf}8 45 \textit{xh}7 \textit{g}8 46 \textit{d}7 \textit{e}8 47 h5! \textit{gxh}5 (if 47...\textit{xf}6, 48 \textit{d}6 \textit{g}7 49 h\textit{g}6 \textit{gxg}6 50 \textit{g}4! winning a second pawn) 48 \textit{xf}5 \textit{a}8 49 \textit{e}6+ \textit{h}8 50 \textit{d}5 \textit{f}6 51 \textit{xc}5 \textit{g}7 52 \textit{g}2 \textit{a}2 53 \textit{f}5! \textit{a}3 54 \textit{c}7+ \textit{h}6 55 \textit{f}7 \textit{a}6 56 \textit{f}4 h4 57 \textit{g}4 1-0

White threatens g5+ and Black dare not move the knight because of \textit{h}7 mate.

\textbf{Game 115}  
Keres – Alekhine  
\textit{Salzburg 1942}  
King's Gambit

1 e4 e5
2 f4

This game was played in the last round of the tournament. Alekhine having 6½/9, Keres 6/9, and the other competitors being out of the running. Keres therefore had to go all-out for a win, which explains his somewhat rash play.

2 ... exf4
3 \textit{f}3 \textit{f}6
4 e5 \textit{h}5
5 \textit{e}2?

This, in conjunction with White’s 7th move, is a new idea in this variation—but not a very good one. Since the normal line 5 d4 d5 6 c4 \textit{c}6 7 cxd5 \textit{xd}5 8 \textit{c}3 \textit{b}4 gives Black a satisfactory position with a pawn more, Keres decides to delay Black’s ...d5 and to prepare for queenside castling. Black, however, simply continues with his development, is able to play ...d5 as soon as he really needs to, and White’s unnatural queen move rebounds.

5 ... \textit{c}7
6 d4 0-0
7 g4?!

A corollary of 5 \textit{we}2, intending to permit the development of the bishops and give White open lines for a kingside attack. If White does not play this move, he will have to move his queen again to develop the f1-bishop, and the pawn on f4 will exert a cramping effect on his whole game. The disadvantage of opening files in this way, i.e. by pawn sacrifices that do not disturb the opponent’s pawn structure, is that one then has no pawns left with which to storm the enemy king: for this reason Alekhine finds comparatively little difficulty in defending himself.

7 ... fxg3
8 \textit{c}3 d5!

Avoiding the tempting 8...\textit{h}4 9 hxg3 \textit{hxg}3 (9...\textit{gxg}3+ 10 \textit{d}1 \textit{f}4 11 \textit{we}4 \textit{g}6 12 \textit{g}4 \textit{f}2 13 \textit{g}xg3).
\[ \text{W} \text{h}5 \text{h}6 14 \text{Q}e4 \text{wins easily}) 10 \text{Wh}2 \text{Qxh}1+ 11 \text{Qxh}4 \text{with a highly critical position in which White has good prospects.} \\
9 \text{d}d2 \\
\text{If} 9 \text{e}e3, \text{then} 9...\text{f}5 10 0-0-0 \text{f}4 11 \text{d}d2 \text{c}6 \text{threatening} 12...\text{g}4, \text{and Black has a winning advantage. If here} 10 \text{exf}6, \text{then the spearhead of White's attack (the pawn on e5) has gone and Black's extra material will give him a comfortable victory.} \\
9 ... \text{c}6 \\
10 0-0-0 \text{g}4 \\
11 \text{e}e3 \\
\text{Necessary (to prevent} 11...\text{xd}4) \text{and now} 11...\text{f}5 \text{is not so menacing because of} 12 \text{h}3 \text{xf}3 13 \text{xf}3. \\
11 ... \text{f}6! \\
12 \text{h}3 \text{e}6 (D) \\

13 \text{g}5! \\
The only move to make a fight of the game, though it proves insufficient against Alekhine's accurate defence. Otherwise Black will play ...\text{f}5-\text{f}4 with an overwhelming game. \\
13 ... \text{fxg}5 \\
14 \text{Wh}x5 \text{g}6 \\
15 \text{e}e2 \text{g}4! \\
Forcing a further exchange of minor pieces and reducing White's already small chances of a successful attack. \\
16 \text{hxg}4 \text{g}5 \\
17 \text{b}1 \text{xe}3 \\
18 \text{xe}3 \text{xg}4 \\
19 \text{Wh}6 \text{f}7 \\
20 \text{g}2 \text{e}7 \\
\text{Certainly not} 20...\text{xd}1 21 \text{xd}5 \text{threatening} \text{Whh}7+. \\
21 \text{df}1 \text{g}7 \\
\text{Note how snugly Black hides amongst his pawns and White has nothing with which to dig him out.} \\
22 \text{xf}4 \text{e}6 \\
23 \text{e}2 \\
\text{Or} 23 \text{Wh}3 \text{xf}5 24 \text{wd}3 \text{g}5 \text{with a winning game}^1. \\
23 ... \text{f}5 \\
24 \text{h}3 \\
24 \text{xf}3 \text{xf}3 25 \text{Wh}3 \text{again leaves Black with a won ending, and White must try to create complications.} \\
24 ... \text{wd}7 \\
25 \text{fg}1 \\
\text{Not} 25 \text{xf}5 \text{(intending} 25...\text{xf}5 \text{26 \text{xd}5 penetrates to f6 and gives White a crushing attack. Instead, Black should play} 23...\text{c}6 maintaining the extra pawn.} \\
25 ... \text{f}8 \\
26 \text{wd}2 \text{xd}4! \\

^1 \text{This comment is impossible to understand, since at the end} 25 \text{xd}5 \text{xd}5 26 \text{xd}5 \text{penetrates to f6 and gives White a crushing attack. Instead, Black should play} 23...\text{c}6 maintaining the extra pawn.}
This little combination destroys any chance White might have had. The game concluded: 27 \textit{Wxd4} \textit{Axc3} 28 \textit{Mxg3} \textit{Axf5} 29 \textit{Wxa7} b6 30 \textit{Wxa3} c5 31 \textit{Wb3} \textit{Axe4} 32 \textit{Ad1} \textit{Wf5} 33 \textit{Cc3} c4 34 \textit{Wa4} \textit{Wxe5} 35 \textit{Bxh3} (a blunder under time pressure, but the game is over in any case) 35...\textit{Axe2}+ 36 \textit{Wxe2} \textit{Wxe3} 37 \textit{Cxh5} \textit{Wc5} 38 \textit{Wc3} h5 39 a3 \textit{Axf} 40 \textit{Af6}+ \textit{Bxf6} 41 \textit{Wxf6} \textit{Wf5}+ 42 \textit{Wxf5} \textit{gxf5} 43 \textit{Bc2} \textit{Bh7} 44 \textit{Cc3} \textit{Ag4} 45 \textit{Ad} 7+ \textit{Bg6} 46 \textit{Ad} 6+ \textit{Bg5} 47 \textit{Bxb6} h4 48 \textit{Bdb} h3 49 \textit{Bg8}+ \textit{Bf} 4 50 \textit{Bb8} \textit{Ag3} 51 \textit{Bh5} h2 0-1

A game showing that, when necessary, Alekhine could defend with as much skill as he could attack: Keres never had a chance after his unsound opening tactics.

Game 116
Alekhine – Keres
	extit{Munich 1942}

Queen’s Indian Defence

1 \textit{d4} \textit{Af6}
2 \textit{Af3} b6
3 \textit{c4} \textit{Ab7}
4 \textit{g3} e6
5 \textit{Ag2} \textit{Ac7}
6 0-0 0-0
7 b3

If 7 \textit{Cc3}, then 7...\textit{Cc4} 8 \textit{Wc2} \textit{Axc3} 9 \textit{Wxc3} f5 10 \textit{Bd1} \textit{Af6} with equality. The text move is played to avoid this simplification and to solve the problem of the c1-bishop.

7... \textit{d5}

However, Black could have taken advantage of White’s momentary weakness on the long dark-squared diagonal to free his game by 7...c5! The general rule in these positions is that...c5 is good if White cannot reply d5 and here he cannot, for 8 d5 exd5 (not 8...\textit{Wxd5}!?) 9 \textit{Cc5}! and wins a piece). 9 \textit{Bh4} (9 \textit{Cc5} d6 10 \textit{Cc3} \textit{Wc7}) 9...\textit{Cc4}! gives Black the advantage.

The text move is not bad, but gives Black a less easy game.

8 \textit{Cc5} c6

And here 8...c5 would certainly be better. After 8...c5 9 dxc5 bxc5 10 cxd5 exd5 Black is left, it is true, with ‘hanging pawns’ (which was probably why Keres rejected the line) but, as Alekhine himself demonstrated with Black in the 23rd game of his 1937 match with Euwe, he can maintain equality. The Euwe-Alekhine game continued 11 \textit{Cc3} \textit{Bbd7} 12 \textit{Cc3} \textit{Bb6} 13 a4 a5 14 \textit{Bc4} \textit{Cc8} with equal chances.

9 \textit{Cc2} \textit{Cc4} 10 \textit{Cc2} c5

Now if White exchanges pawns, he cannot put the black centre under immediate pressure by \textit{Cc3}. He can (and does), however, hold the centre by e3, retaining an advantage in

\footnote{This is not so as 9...\textit{Axf6} 10 \textit{Axb2} (10 f4 d6) 10...\textit{Cc6}! allows Black to keep his extra pawn; a more convincing line against 8...\textit{Wxd5} is 9 cxd5 \textit{Af6} 10 dxe6 \textit{Af6} 11 exf7+ \textit{Cc7} 12 \textit{Cc5}!, with an edge for White.}
space: it was not worth Black’s while to play in this over-cautious manner.

11 e3  
12 Axc1  
13 We2  
13...Wb8? (D)

He should play 13...Wb8 followed by ...Af8c8. The text move leaves the c7-rook unprotected, of which Alekhine takes instant advantage.

14 cxd5  
14...exd5  
If 14...exd5, then 15 dxc5 bxc5 (15...Dxc5 or 15...Dxc5 leaves him with a very bad d-pawn and enables White to occupy d4 with a clear advantage) 16 Dxd7 Dxd7 (16...Dxd7 17 Dxf6 wins a pawn) 17 e4 dxe4 (17...d4? 18 Dxd4) 18 Dxe4 with the better endgame, Black having two weak pawns. This would, however, be a little better than the line played.

15 e4  
16 b4!

Exploiting to the full the vulnerable position of the rook on c7.

16 ...  
17 dxc5  
18 b5  
This manoeuvre, opening the a-file, is immediately fatal and is a surprising error of judgement for a master of Keres’ strength. Best was 18...Dxe5 19 Dxe5 Dd7 20 Df1 followed by Db3 or Dc4. White’s superior pawn formation gives him an appreciable advantage but there is a great deal of play left in the game.

19 a4  
20 axb5  
20...Wxb5

Obviously overlooking the reply, but his game is very bad in any event.

21 De4!  
22 Dxf6  
22...gx6

However he plays he loses the exchange, for example 22...Dxf6 23 b6 or 22...Dxf6 23 Db6.

23 b6  
24 e5  
25 Dxb6  
26 Dxb7  
27 exf6  
28 De4  
28...Dg7 29 Dd6 and 28...We7 29 Wa6 Dxb8 30 Db1 Dd7 31 Dxb8+ Dxb8 32 Dc8+ lose material.

29 Wg4+  
30 Dh8

29...Df8 is better but after 30 Dg5 Dgx5 31 Wgx5 White must win.

30 Wf4

Threatening both 31 Wxf7 and 31 Dxc5, but not 30 Dxc5? Axc5 31 Dd4+ e5 and Black wins a piece.

30 ...  
31 Dxc5  
Or 31...Dxc5 32 Dxc5 Dxc5 33 We5+. The text move loses another pawn, but whatever Black plays, White wins easily.

32 Dxe6  
33 Dxf4  
1-0
Game 117
Alekhine – Junge
Krakow 1942
Ruy Lopez

1 e4 e5
2 ∆f3 ∆c6
3 ∆b5 a6
4 ∆a4 ∆f6
5 0-0 ∆e7
6 ∆e2 b5
7 ∆b3 0-0
8 c3 d5
9 d3!

An excellent reply, avoiding the complications arising from 9 exd5 and ensuring White a positional advantage since the opening of the d-file is in his favour (as he can immediately occupy it). If 9 exd5 then Black can either play 9...∆xd5 or 9...∆g4 10 dxc6 e4.

9 ...

If 9...d4, then 10 cxd4 ∆xd4 11 ∆xd4 ∆xd4 12 ∆e3 ∆d6 13 f4 with rather the better game. This, however, is Black’s best line. 9...∆g4 10 h3 (10 exd5 ∆xd5 11 ∆e4 ∆e6! 12 ∆xe5 ∆xe5 13 ∆xe5 ∆d6 is dangerous for White) 10...∆h5 11 ∆g5 dxe4 transposes into the line played. Finally, 9...∆d6 is met by 10 ∆g5. In every case Black will be forced, by the combined pressure on his e- and d-pawns, to play ...dxe4 or ...d4 and both moves react against him. This position is worth considerable study, as it is an interesting example of a not uncommon type — where one player has a free and apparently very satisfactory game but where the fundamental insecurity of his pawn formation makes it difficult for him to maintain equality.

10 dxe4 ∆g4
11 h3 ∆h5
12 ∆g5

Indirectly preventing 12...∆a5?, since 13 g4 ∆g6 14 ∆xe5 wins a pawn (14...∆xe4? 15 ∆xf6 gxf6 16 ∆xf7 and wins).

12 ...
13 ∆e8

Forced. After 13...∆xe7 14 g4 ∆g6 15 ∆d5 ∆d7 16 ∆bd2! Black loses the e-pawn. Or if 13...∆xe7, then 14 g4 again winning the e-pawn.

14 ∆xf3 ∆xe7
15 ∆d1 ∆d6
16 ∆d2 c6

16...∆h8! is better, intending 17 ∆f1 f5 or 17 ∆c2 c6; in this latter variation Black is obviously better off than in the game as White does not particularly want to retreat the bishop. In any event, White has the better game since his bishop is a better piece than the opposing knight and he can attack the weakened queenside pawns at an appropriate moment by a4, but Black’s position was still quite defensible. After the text it steadily becomes more difficult for Black to hold the game.

17 ∆f1 ∆c7
18 a4! (D)

In Alekhine’s words “The opening of the a-file in the Ruy Lopez is in every case favourable for White.”

18 ...
19 ∆g3 ∆e8
White threatened 20 \( \text{We}3 \), and then either 21 axb5 and 22 \( \text{Aa}7 \) or (if 20...c5) 21 axb5 axb5 22 \( \text{Ae}5 \), with much the better game. It is very interesting to see how White's queenside threats force the black knight over to b6, whereupon White wins on the kingside!

20 \( \text{a}x\text{b}5 \) \( \text{a}x\text{b}5 \)
21 \( \text{Af}5! \) \( \text{Ab}6 \)
22 \( \text{We}3! \) \( \text{Ax}f5 \)

If 22...\( \text{Ad}c4 \), then 23 \( \text{Ae}c4 \) \( \text{Ax}c4 \) (23...\( \text{Bx}c4 \) 24 \( \text{We}c5 \)) 24 \( \text{We}c5 \) and wins, e.g. 24...\( \text{Bxb}2 \) 25 \( \text{Ax}d8 \) \( \text{Ax}d8 \) 26 \( \text{Ae}7+ \) \( \text{Ah}8 \) 27 \( \text{Ax}c6 \) \( \text{Ec}8 \) 28 \( \text{Aa}7 \).

23 \( \text{ex}f5 \) c5

Allowing a pretty finish, but the game was hardly to be saved. If 23...\( \text{Ad}5 \) (best), then 24 \( \text{Ae}d5 \) \( \text{Ax}d5 \) 25 \( \text{Ax}d5 \) \( \text{cx}d5 \) 26 \( \text{Aa}7 \) \( \text{Wd}6 \) (or 26...\( \text{Wb}8 \) 27 \( \text{Wg}5! \) \( \text{Ah}8! \) 28 \( \text{We}7 \))

27 \( \text{Bb}7 \) \( \text{Bb}8 \) 28 \( \text{Aa}7 \) \( \text{Bxb}7 \) 29 \( \text{Wxb}7 \) and White should win. If 24...\( \text{cx}d5 \),

then 25 \( \text{Aa}7 \) d4 26 \( \text{Ax}c7 \) dxe3 27 \( \text{Ax}d8 \) \( \text{ex}f2+ \) (27...e2 28 \( \text{Cc}8!! \) e1\( \text{W}+ \) 29 \( \text{Ah}2 \) g5 30 \( \text{f}6 \) h5 31 \( \text{Ae}8+ \) \( \text{Ah}7 \) 32 \( \text{Ag}8! \) and wins) 28 \( \text{Af}2 \) \( \text{Ax}d8 \) 29 \( \text{Bb}7 \) wins.

24 f6! gxf6
25 \( \text{Wf}6 \) f5

If 25...\( \text{Ax}d1+ \), then 26 \( \text{Ax}d1 \) f5 27 \( \text{Wg}5+ \) \( \text{Ah}8 \) 28 \( \text{Wf}6+ \) \( \text{Ag}8 \) 29 \( \text{Ad}3 \) f4 30 \( \text{Ad}6 \) \( \text{Ad}7 \) 31 \( \text{We}7 \) wins. Black must play ...f5 as otherwise \( \text{Ac}2 \) wins.

26 \( \text{Af}7+! \)

A beautiful finishing touch.

26 ... \( \text{Wxf7} \)

White also wins after 26...\( \text{Af}xf7 \) 27 \( \text{Wxh}7+ \), 26...\( \text{Af}xf7 \) 27 \( \text{Wg}5+ \) or 26...\( \text{Ah}8 \) 27 \( \text{Wf}6# \).

27 \( \text{Ax}d8 \) \( \text{Da}4 \)

Or 27...\( \text{Ax}d8 \) 28 \( \text{Wg}5+ \).

28 b3 1-0

28...\( \text{Ab}2 \) 29 \( \text{Aa}8 \). A most instructive game for all players, like myself, who are addicted to the Ruy Lopez.

Game 118

Alekhine – Junge

Prague 1942

Catalan\(^1\)

1  \( \text{d}4 \) \( \text{d}5 \)
2  \( \text{c}4 \) \( \text{e}6 \)
3  \( \text{Af}3 \) \( \text{Af}6 \)

---

\(^1\) This famous game has been analysed many times, for example by Alekhine himself, Fine (Chess Marches On!, 1945), Pachman (Pachman's Decisive Games, 1975) and Dvoretsky and Yusupov (Secrets of Chess Tactics, 1992). As the conclusions of modern analyses are totally different to those expressed by Alexander, I shall add some extra commentary at critical points. As this extra analysis is fairly extensive, it is embedded in the text.
4  g3       dxc4
5  wa4+  \textit{d}bd7

In Junge-Alekhine, Munich 1943, Alekhine played ...\textit{d}d7-c6; the more usual plan, adopted here by Junge, of ...	extit{\textit{d}}d7, aims at an early advance of the queenside pawns combined with ...	extit{a}b7. The two lines are of about equal merit, and either should give equality with careful play by Black.

6  \textit{a}g2       a6
7  wc4        b5
8  wc6

The immediate wc2 is more common, but White has in view a continuation for which he wishes to drive the rook off the a-file.

8 ...  \textit{a}b8

8...\textit{a}a7 is slightly better as the rook has little future on the b-file, and from a7 it can later play across to c7 or d7 if necessary. However, the text move is perfectly sound.

9  0-0  \textit{b}b7
10  wc2        c5
11  a4!

A far-sighted positional pawn sacrifice which Black should decline by 11...b4, thereby maintaining equality. After accepting the sacrifice, the best Black can hope for is to avoid disaster if he defends with absolute accuracy.

11 ...  \textit{\textit{x}}xf3
12  \textit{\textit{x}}xf3  cxd4
13  axb5  axb5
14  \textit{\textit{d}}d1  wb6

Not 14...\textit{\textit{a}}c5 15 \textit{\textit{f}}4 e5 (15...\textit{\textit{c}}c8
16 \textit{b}7 d3 17 wxd3 \textit{xf}2+ 18 wf1! also wins for White) 16 \textit{\textit{a}}c5 \textit{\textit{x}}xe5
17 wxc5 \textit{\textit{xf}}3+ 18 exf3 wc7 19

\textit{\textit{x}}d4 (or 19 \textit{\textit{x}}c7+) and White should win.

15  \textit{\textit{d}}d2  e5
16  \textit{\textit{b}}b3  \textit{\textit{c}}c5? (D)

Overlooking White’s forthcoming sacrifice. Black’s best line was 16...\textit{e}7 17 e3 dxe3 18 \textit{\textit{x}}xe3 \textit{we}6 when White has adequate positional compensation for his pawn, but nothing immediately decisive.

\begin{center}
\begin{tikzpicture}
\end{tikzpicture}
\end{center}

17 \textit{\textit{x}}c5  \textit{\textit{x}}c5 (D)

If 17...\textit{\textit{x}}xc5, then 18 \textit{\textit{c}}c6+ \textit{\textit{d}}d7
(or 18...\textit{\textit{d}}d8 19 \textit{\textit{x}}c5 \textit{\textit{x}}c5 20
\textit{\textit{x}}xb5!) 19 \textit{\textit{x}}c5 \textit{\textit{x}}xc5 20 \textit{\textit{a}}a5 regaining the pawn with advantage.

[JN: Neither of these lines is especially convincing, because once queens are exchanged White has no advantage—Black’s active rooks and pressure against b2 easily balance White’s two bishops. After 18...\textit{\textit{d}}d8, Alekhine gave 19 \textit{\textit{f}}5 \textit{\textit{x}}c6 20 \textit{\textit{x}}xe5 with two lines:
1) 20...\textit{\textit{d}}d6 21 \textit{\textit{x}}xd6 \textit{\textit{a}}b6 22
\textit{\textit{f}}4 \textit{\textit{e}}e8 23 \textit{\textit{a}}a7 \textit{\textit{c}}c8 24 \textit{\textit{f}}5+ \textit{\textit{b}}8, and now the strongest line is
25 \textit{\textit{a}}xd6! \textit{\textit{x}}xd6 26 \textit{\textit{e}}d7 ±.
2) 20...\textit{\textit{d}}d7 21 \textit{\textit{x}}xd4 \textit{\textit{c}}c8 22
\textit{\textit{d}}d2 b4 23 \textit{\textit{c}}c1 \textit{\textit{x}}c1+ (23...\textit{\textit{b}}6
can be broken down by 24 \( \text{N}d1 \text{N}c7 \)
25 \( \text{N}e3! \text{N}c6 26 \text{N}f4! \text{N}b7 27 \text{N}a1! \)
24 \( \text{N}xc1 \text{N}xc1+ 25 \text{N}g2 \text{N}c7 26 \text{N}d5 \) after which White wins the f7-
pawn at the very least. In view of the
continuing exposure of Black’s
king, this position can be assessed as
clearly better for White.

Against 18...\( \text{N}d7 \), Dvoretsky and
Yusupov give 19 \( \text{N}e4 \), which does
indeed appear very good for White,
e.g. 19...\( \text{N}c8 20 \text{N}xd7+ \text{N}xd7 21 e3 \)
or 19...\( \text{N}d8 20 e3.\]

18 \( \text{N}a6!! \)
A magnificent and most unex-
pected sacrifice, which is perfectly
correct.

18 ... \( \text{N}xa6 \)
19 \( \text{N}xc5 \) \( \text{N}e6 \)

If 19...\( \text{N}d7 \), then 20 \( \text{N}c6 f6 21 \text{N}d6 \) with several threats: \( \text{N}xd7+, \text{N}xd7+ \) and \( \text{N}e6+. \)

20 \( \text{N}c6+ \) \( \text{N}d7 \)

If 20...\( \text{N}d8 \), then 21 \( \text{N}d2 b4 22 \text{N}a1! \) wins in view of 22...\( \text{N}c8 23 \text{N}b6+ \text{N}e7 24 \text{N}xb4+ or 22...\( \text{N}d7 \)
23 \( \text{N}xd7 \text{N}xd7 24 \text{N}a7. \)

[JN: In this line the simple move
22 \( \text{N}a5+, \) given by Dvoretsky and
Yusupov, wins easily after 22...\( \text{N}e7 \)
23 \( \text{N}c7+ \text{N}d7 24 \text{N}xd7 \text{N}xd7 25 \text{N}xe5+ \text{N}e6 26 \text{N}xg7 \) and Black
will lose at least two more pawns.
Alexander’s 22 \( \text{N}a1 \) is far less clear
after the reply 22...\( \text{N}e7! \).]

21 \( \text{N}xd7+ \) \( \text{N}xd7 \)

If 21...\( \text{N}xd7, 22 \text{N}xe5+ \) wins the
rook on b8.

22 \( \text{N}a7+ \) (D)

22 ... \( \text{N}c6 \)
If 22...\( \text{N}c8, 23 \text{N}d2 \) followed by
\( \text{N}c1+ \) is immediately decisive.

[JN: This is a critical moment.
Virtually all analysts have recom-
mended 22...\( \text{N}d6 \) as leading to a
draw, starting with Alekhine him-
self. Summarising the various analy-
ses gives us the following lines:

1) 23 \( \text{N}xd4+ \text{exd4 24 \text{N}f4+ \text{N}d5 \n25 \text{N}xb8 \text{N}c8! is good for Black, as \nBlack’s king can run away via c4 \nand b3. \n
2) 23 \( \text{N}d2 \text{N}d7 24 \text{N}b4+ \text{N}e6 \n25 \text{N}a6+ \text{N}f5 26 e4+ \text{N}xe4 27 f4 \nand Dvoretsky and Yusupov com-
ment (correctly) that ‘the chances of \nsuch a speculative attack succeeding \nwould be highly dubious’. \n
3) 23 f4 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textbf{\textit{d}}}}}}7 (given by Pachman; Fine only analysed 23...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{f}}}}6 24 fxe5 fxe5 25 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{f}}}}}f4 exf4 26 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}xd4+, which is good for White, although even in this line 25...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{h}}}}}d8! 26 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}xd4+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c6 is probably enough for a draw) 24 fxe5+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{h}}}}}e6 25 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}a6+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}7 26 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{g}}}}}5+ and after 26...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{e}}}}}8 or 26...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{f}}}}}f8 the position is completely unclear.

4) 23 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{f}}}}}f4 (Alekhine thought this best) 23...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{e}}}}}xf4 24 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}xd4+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c6 25 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d1 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{h}}}}}c8 (25...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{b}}}}}b6 26 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c1+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d5 27 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}c7 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c6 28 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d1+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c4 29 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c1+ is also a draw) 26 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c1+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d5 27 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d1+ with perpetual check.

However, it is by no means certain that the move played should have led to a loss.

In view of this, some of Alexander’s comments (in particular, the question mark attached to Black’s 16th move), appear somewhat out of place.

23 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d2 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{h}}}}}c8

[\textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{JN: All previous analysts believed that Black is lost here. It is true that the move played loses by force, but Black had a much better defence: 24...b4! 25 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{a}}}}}a1 and now:}}}}}

1) \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{Pachman gives 25...\textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{b}}}}}b6 26 b3 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}xb3 27 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{c}}}}}c1+ \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{b}}}}}b5 28 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}xc8 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{d}}}}}d1+ 29 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{g}}}}}g2 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}xd2 30 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{w}}}}}d7+ mating.}}}}

2) 25...\textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}e8 26 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}a5! \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}a8 (after 26...\textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}f8, 27 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{c}}}}}xe5 starts regaining the material without diminishing the attack) 27 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}c5+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{d}}}}}d7 28 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}d5+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{e}}}}}e7 29 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}xc5+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{f}}}}}f8 30 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}xb4+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{g}}}}}g8 31 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}xd4 when White, with two pawns for the exchange, has some winning chances but the game is far from over.

3) 25...\textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{b}}}}}b5! is best, introducing the possibility of escaping with the king via c4 and d3. After this I cannot see anything more than a draw, for example 26 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}a4+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{c}}}}}c4! or 26 b3 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}b6 27 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}d7+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{c}}}}}c6.]

25 \textcolor{red}{\textit{\textbf{\textcolor{red}{\textit{a}}}}}a1 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{b}}}}}4

26 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}a6+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{b}}}}}5

27 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}a5+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{c}}}}}6

28 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}c5+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{d}}}}}7

29 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{a}}}}}a7+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{1}}}}}0

24 e4 (D)

24 ... \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{w}}}}}b3

White threatened 25 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{c}}}}}c1+ \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{d}}}}}d6 26 \textcolor{brown}{\textit{\textbf{\textcolor{brown}{\textit{b}}}}}b4+.}

Three Knight’s Game 229
Alexander Alekhine captivated the chess world with his dazzling combinative play. His genius has been a strong influence on every great player since, none more so than World Champion Garry Kasparov.

This book contains a selection of the very best of Alekhine’s annotations of his own games, converted to algebraic by John Nunn. These games span his career from the early encounters with Lasker, Tarrasch and Rubinstein, through his world title battles, to his meetings with the new generation of players who were to dominate chess in the 1950s.

For further information about Batsford chess books, please write to:
Batsford Chess Books, 583 Fulham Road, London SW6 5BY

Alexander Alekhine was World Champion from 1927 to 1935 and again from 1937 to his death in March 1946. His life was as turbulent as his chess; his long-standing feud with his great rival Capablanca is legendary, as is his vilification, and posthumous elevation to hero status by the Soviet authorities.
